

FY20 Work Plan

- Continue to host Raleigh's Environmental Awards Celebration with awards and recognition.

Strategic Plan – Growth & Natural Resources

- Based on the five key areas of the Environmental Advisory Board's 2019 Recycling Report, continue to review and evaluate opportunities with a focus on organics recycling and the viability of a solid waste compost center. Review and evaluation will include consideration of environmental justice and social equity issues.

Strategic Plan – Growth & Natural Resources and Safe, Vibrant & Healthy Community

Note- Organics Recycling - The Solid Waste Reduction Task Force referred assessing the development of an organics/food waste diversion strategy or strategies to the Environmental Advisory Board.

- Review and evaluate strategies to reduce Raleigh's Greenhouse Gas emissions as listed below, including consideration of environmental justice and social equity issues:

Strategic Plan - Growth and Natural Resources

- The Climate Energy Action Plan (CEAP), the Community-wide Climate Action Plan (CCAP) project and the Regional Resilience Assessment
 - Discuss food waste/material choices along with the city purchasing process and approach
 - Review transportation initiatives and linkages to greenhouse gases, social equity, and overall environment, including plans for bus rapid transit, mass transit, goals to reduce vehicle miles travelled and greenhouse gases, and public education
 - Review of NC Clean Energy Plan to identify opportunities/connections for the COR
 - Review fossil fuel use in the city fleet, including the replacement policy for mowers and other equipment with electric
 - Review the 2030 Comprehensive Plan Environmental Section
 - Review the prior EAB initiatives of the LEED building policy, the US Mayor's Climate Protection Agreement and BeeCity USA
- Other items as directed by City Council.
