

### ***FY22 Work Plan***

*The Environmental Advisory Board considers equity and environmental justice vital components of each of its work plan items. Consideration of equity and environmental justice will guide the Board's review of each item on its work plan.*

1. Continue to host and celebrate Raleigh's Environmental Awards Winners with awards and recognition.

#### Strategic Plan – Growth & Natural Resources

2. Review and evaluate strategies in the Community Climate Action Plan (CCAP) that reduce greenhouse gas emissions, and address equity and resilience to reach the City's goal of 80% reduction of greenhouse gas emissions by 2050:

- Energy Use in Buildings and properties
  - Energy efficiency in new and existing City buildings and properties, including the Dorothea Dix Park and the Civic campus, focusing on solar energy, building standards for new buildings and major renovations, and insulation and HVAC upgrades for existing buildings.
  - Review initiatives to encourage community energy best practices, like the Sustainable Business Toolkit.
  - Review the prior EAB initiative of the LEED building policy.
- Energy Use in Transportation
  - Fossil fuel use in the City fleet, including the replacement policy for mowers and other equipment with electric.
  - Review City transportation initiatives and linkages to greenhouse gases, social equity, and overall environment, including plans for bus rapid transit, mass transit, goals to reduce vehicle miles travelled and greenhouse gases, and public education.
- Resilience & Cross Cutting
  - Review Annual BeeCity USA reports and activities and the relationship of pollinators in the food system.
- Progress updates on past Work Plan Actions

#### Strategic Plan Areas - Growth and Natural Resources, Safe, Vibrant, Healthy Community and Transportation and Transit

3. Other items as directed by City Council
