CITY OF  
**Raleigh**  
MANAGER'S  
OFFICE

Issue 2019-25

June 28, 2019

## IN THIS ISSUE

North Carolina Chapter, American Planning Association “Great Places” Awards  
NC Department of Transportation Project Updates  
Capturing Climate Change and Housing Affordability Impacts in Planning Staff Reports  
Weekly Digest of Special Events

### Council Follow Up

Police Crisis Intervention Training  
Police Community Liaisons - Community Resource Officers (Council Member Cox)  
2017 Traffic Calming Projects – Construction Update  
Citizen Advisory Council Support  
Chavis Park Construction Bid - Value Engineering Cost Saving Items (Council Member Thompson)  
Safe Routes to School Program (Council Member Crowder)  
Interim Update - Hillside and Sloped Site Development in Mixed-Use Districts (Council Member Crowder)

### Regular Council Meeting Tuesday, July 2 - No Lunch Work Session - Afternoon and Evening Sessions

Reminder that Council will meet next **Tuesday** in regularly scheduled sessions at **1:00 P.M.** and **7:00 P.M.**  
The agenda for the meeting was published on Thursday:

<http://boarddocs.com/nc/raleigh/board.nsf>

Please note there will be a **Closed Session** immediately following the afternoon session of the Council meeting.

**Reminder:** If there is an item you would like to have pulled from the consent agenda for discussion, please send an e-mail [mayorstaff@raleighnc.gov](mailto:mayorstaff@raleighnc.gov) by 11 A.M. on the day of the meeting.

### City Offices Closed in Observance of Independence Day

Reminder for Council that City offices will be **closed** next **Thursday, July 4** in observance of the **Independence Day** holiday.

## INFORMATION:

### North Carolina Chapter, American Planning Association “Great Places” Awards

Staff Resource: Allison Evans, City Planning, 996-4631, [allison.evans@raleighnc.gov](mailto:allison.evans@raleighnc.gov)

Karli Stephenson, City Planning, 996-4632, [karli.Stephenson@raleighnc.gov](mailto:karli.Stephenson@raleighnc.gov)

The City has received recognition in the form of a 2019 Great Places awards program sponsored by the North Carolina Chapter of the American Planning Association (APA-NC). Staff from the Urban Design Center submitted several nominations for the APA-NC Great Places Awards; two of the nominations will be recognized: Raleigh Union Station won the Great Transformation award, and the Norris House won the Historic Rehabilitation award.

The City will receive the awards from APA-NC during the annual Sir Walter Raleigh Awards event scheduled for October 2.

### NC Department of Transportation Project Updates

Staff Resource: Eric Lamb, RDOT, 996-2161, [eric.lamb@raleighnc.gov](mailto:eric.lamb@raleighnc.gov)

The North Carolina Department of Transportation (NCDOT) has recently shared some changes in project schedules and announced public meeting dates that may be of interest to the City Council.

- **U-5518 – US 70 Freeway Upgrade:** This project proposes to upgrade US 70 to a freeway between I-540 and Durham County. In the most recent draft Transportation Improvement Program, this project was proposed for acceleration from FY2021 to FY2020 as a design/build project. NCDOT recently made a determination that this project will be delayed until January 2021 due to funding constraints.
- **U-2823 – Glenwood Avenue Widening:** This project proposes to widen Glenwood Avenue to six lanes from Millbrook Road/Duraleigh Road to I-540. In the most recent draft Transportation Improvement Program, this project would be delayed for construction from FY2023 to FY2028. This project was already in production when this proposed schedule change was released; however, NCDOT has opted to continue with the project development. NCDOT currently has an open house public meeting scheduled for July 22, 2019 from 4-7pm at the Embassy Suites Brier Creek. NCDOT may schedule an elected officials briefing for this meeting; we will share event details with the City Council if/when that meeting is scheduled.
- **B-5130 – Avent Ferry/Lake Johnson Bridge Replacement:** NCDOT has been working through the complex permitting issues associated with replacing this bridge and improving the causeway over Lake Johnson. The major permitting hurdle relates to impacts to the City’s Lake Johnson Park property, which has certain federal protections related to the original development of the park. These federal permitting difficulties have pushed the project schedule into potentially overlapping the nearby I-440 widening project (TIP Project U-2719). NCDOT recently decided to delay the construction of the Avent Ferry bridge project until after the I-440 project is substantially further advanced. This delay is intended to avoid creating overlapping impacts of street closures associated with both projects. As a result, the Avent Ferry bridge project would likely not move forward until 2021 at the earliest.

**Capturing Climate Change and Housing Affordability Impacts in Planning Staff Reports**

*Staff Resource: Jason Hardin, City Planning, 996-2657, [jason.hardin@raleighnc.gov](mailto:jason.hardin@raleighnc.gov)*

The Department of City Planning routinely produces staff reports that analyze rezoning requests, proposed Comprehensive Plan amendments, and other planning-related questions. These reports typically contain both policy analysis and impact analysis. To that end and in an effort to better capture the impacts of planning decisions, the Department of City Planning is adding a new section to its rezoning and Comprehensive Plan amendment staff reports that provides objective analysis of sustainability- and affordability-related issues. The new section will, to the extent possible, analyze the impact of a proposed rezoning or plan amendment with respect to climate change and housing affordability. Sample documents are included with the *Weekly Report* materials.

The change will assist City Council in making decisions that address these critical community issues and help meet the city's goal of an 80 percent reduction in greenhouse gases by 2050. It will also make Raleigh a leader nationally in terms of embedding these crucial topics into routine decision-making processes.

## Council Member Follow Up Items

### General Follow Up Items

**Police Crisis Intervention Training**

*Staff Resource: Chief C.L. Deck-Brown, Police, 996-3385, [cassandra.deck-brown@raleighnc.gov](mailto:cassandra.deck-brown@raleighnc.gov)*

In follow up to a previous request for information regarding training received by officers on mental health-related interactions (*Weekly Report 2019-20* (May 24)), Crisis Intervention Training (CIT) is a requirement of all new police officers as part of academy training. The Raleigh Police Department is very active in the local CIT program and since September 2005 a total of 477 current or former officers have attended CIT. Additional information may be found in the staff memorandum included with the *Weekly Report* materials.

*(Attachment)*

### **2017 Traffic Calming Projects – Construction Update**

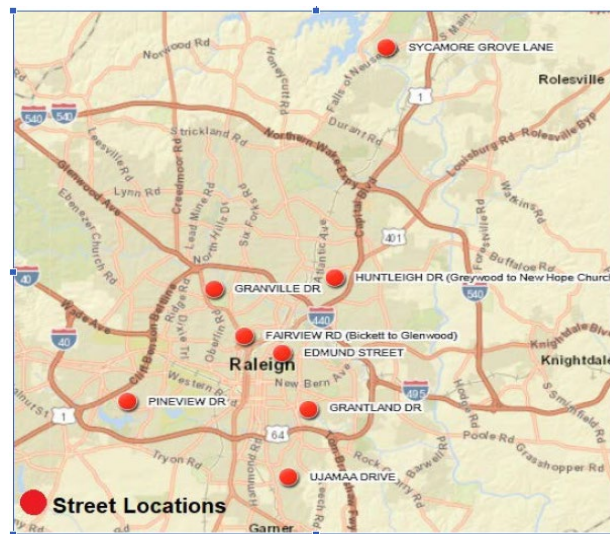

Staff Resource: Will Shumaker, RDOT, 996-4175, [william.shumaker@raleighnc.gov](mailto:william.shumaker@raleighnc.gov)

As reviewed for Council in Weekly Reports 2019-16 (April 26) and 2018-43 (November 9), the Raleigh Department of Transportation had difficulty receiving bids for the 2017 Traffic Calming Projects due to a competitive construction market throughout the area.

A final advertisement was recently issued. Two bids were submitted, and an acceptable bid was selected. The contractor (RDU Paving Inc.) is now under contract. They were issued a notice to proceed on 5/31/2019 with a contract duration of 90 days, so the construction completion date should be no later than 8/29/2019. Staff sent additional mailings to residents and the surrounding areas, thanking everyone for their continued patience and providing an update and general timeframe of when to expect the traffic calming treatment installations. RDU Paving has started work and anticipates installing the treatments in this order.

- Ujamaa Drive
- Grantland Drive
- Pineview Road
- Sycamore Grove Lane
- Granville Drive
- Edmund Street
- Huntleigh Drive – existing hump removal
- Huntleigh Drive – placement of new speed humps
- Fairview Road

Below is a graphic which indicates the geographic location of the various projects.

(No attachment)

**Police Community Liaisons - Community Resource Officers (Council Member Cox)**

*Staff Resource: Chief C.L. Deck-Brown, Police, 996-3385, [cassandra.deck-brown@raleighnc.gov](mailto:cassandra.deck-brown@raleighnc.gov)*

During a recent City Council meeting Council Member Cox advised that a Raleigh Police Officer was identified on the LGBTQ Center website as the RPD liaison to the LGBTQ community. Staff verified that the website in question does note that Officer M. Horner is listed as the Community Resource Officer on the website, along with other resources identified by the Center. Council requested if similar identification could then be listed on the City website.

In the role of Community Resource Officer, each police district has a team of community officers assigned to the geographic area. On occasion, community affinity groups will note specific community officers and this information is disseminated by various neighborhood, CAC, Community Watch, HOA, and social media outlets such as Nextdoor and others. Due to the team approach by district, it would not be prudent to note or identify any single police officer on the COR website as the designated liaison to a specific affinity group. When there are many officers serving in a similar capacity throughout the City. Currently there is on one liaison listed on the Police department web pages; however it should be noted that community officers of the Downtown District all have a similar rapport with the members and staff of the Center.

*(No attachment)*

**Follow Up from the June 11 Work Session****Citizen Advisory Council Support**

*Staff Resource: Damien Graham, Communications, 996-3100, [damien.graham@raleighnc.gov](mailto:damien.graham@raleighnc.gov)*

*Linda Jones, Housing & Neighborhoods, 996-4330, [linda.jones@raleighnc.gov](mailto:linda.jones@raleighnc.gov)*

In follow up to the work session topic, staff with the Communications department has partnered with Housing and Neighborhoods to enhance communications support for the Citizen Advisory Councils (CACs).

The two departments met following the works session to discuss production of an educational video by RTN that will be hosted on YouTube, posted on social media, and shared with each CAC for use by individual CACs.

This video, which will outline what CACs are, what happens at CAC meetings, and encourage citizen participation with the local CAC, will be completed by July 12 and will also be available on the City of Raleigh web site.

The Communications department is also working on methods to provide CACs with more prominence on RaleighNC.gov. Changes to be made to current site include:

- CACs are the first link under “Community Engagement,” which is a tile feature (separate box on a web page) in the “Community” section (one of the main navigational sections). CACs are also the first link under “Involvement” in the left navigational bar of all “Community” pages.
- Determine the feasibility of providing the CACs a tile featured on the “Community” main page.
- CAC events can also be posted to the calendar. Staff with Housing & Neighborhoods assigned as CAC liaisons can submit requests for calendar items and events.

- In addition, staff can...
  - Add CACs to left vertical navigation of main page in “Find” section.
  - Feature awareness building communications that are being produced for CACs (such as the educational video).

Plans for the new City website (scheduled for implementation by end of calendar year 2019):

- Overall, the site will be much more service-oriented overall and simple, making CAC information easy to find.
  - CACs will be featured in core services (under community engagement)
  - Establish Twitter handle dedicated to CACs to promote meetings and events which will be managed by Housing and Neighborhoods staff.
- CAC events and meetings will be integrated into citywide calendar.
- CAC news can be featured in that section as provided.

## Follow Up from the June 18 City Council Meeting

### Chavis Park Construction Bid - Value Engineering Cost Saving Items (Council Member Thompson)

Staff Resource: Rich Kelly, Engineering Services, 996-5576, [richard.kelly@raleighnc.gov](mailto:richard.kelly@raleighnc.gov)

During the meeting Council requested staff to provide a list of the Value Engineering (VE) items that were generated related to the John Chavis Memorial Park Improvements project. The table below is the result of negotiations between the Engineering Services Department and Monteith Construction, and was developed in an effort to explore any and all potential cost saving opportunities. The VE items ultimately deemed viable by staff are referenced in the agenda backup materials for the July 2 City Council meeting.

Project Element	Cost Reduction
Carousel Building- deduct complete	(\$210,000)
Landscaping-deduct complete	(\$76,000)
Splash Pad- Deduct complete/ include infrastructure only	(\$328,000)
Demo of Community Center- demo first	(\$47,000)
Demo of Community Center- demo first/Owner to perform	(\$165,000)
Masonry- traditional CMU/Brick veneer cavity system	(\$315,000)
Simplify site concrete- no color	(\$32,000)
Eliminate acoustical wall panels/ceiling baffles	(\$112,000)
Credit back fins/coordination for Art installation	(\$5,000)
Delete running track	(\$145,000)
Gym flooring alternate manufacturer	(\$20,000)
Security cameras- quantify and evaluate	(\$TBD)
Provide unit price allowance amount	(\$34,700)

Shell only-2nd floor	(\$190,000)
Delete chiller/dumpster screen wall gate- provide fencing	(\$34,000)
Square footage reduction- multipurpose rooms	(\$282,000)
Simplify interior storefront to HM frames	(\$22,000)
Simplify hand/guardrails	(\$25,000)
Delete Duct Cleaning	(\$5,000)
Alternate Electrical Fixture Manufacturers	(\$20,000)
Delete Data Server from Security Package	(\$13,000)

(No attachment)

### **Safe Routes to School Program (Council Member Crowder)**

Staff Resource: Eric Lamb, RDOT, 996-2161, [eric.lamb@raleighnc.gov](mailto:eric.lamb@raleighnc.gov)

During the meeting Council requested additional information regarding sidewalks that had been constructed as part of the Safe Routes to School program, and which schools have been prioritized for additional treatments.

Sidewalk improvements are currently programmed around the Leesville Road school campus, with new pedestrian access and crossings provided along Oneal Road and Country Trail. With the exception of this project, City funds dedicated specifically for school-related improvements were not allocated until the FY19 Capital Improvement Program was adopted in June 2018. Historically staff has assisted several schools with external grants for infrastructure. Staff has also worked with the Capital Area Metropolitan Planning Organization (CAMPO) under a John Rex Foundation grant to develop action plans for Ligon Middle School and Bugg Elementary.

The City does not currently have a priority system in place for candidate school sites. The level of demand for projects has been low enough that staff has worked with schools on an as-needed basis. Staff has been working with parents and school administration from Harris Creek Elementary, Lacy Elementary, and Martin Middle School to look at accessibility issues for each campus. The City is currently working with CAMPO to develop a system-wide means of identifying and prioritizing schools in Wake County with deficient access by bike and by foot.

### **Interim Update - Hillside and Sloped Site Development in Mixed-Use Districts (Council Member Crowder)**

Staff Resources: Joe Michael, City Planning, 996-4639, [joe.michael@raleighnc.gov](mailto:joe.michael@raleighnc.gov)

Mark Holland, City Planning, 996-2625, [mark.holland@raleighnc.gov](mailto:mark.holland@raleighnc.gov)

During the meeting Council requested a progress update on the study of infill development standards that was added to the contract for the Hillside Development Best Practices study. Staff is preparing an update but requires additional time to solidify a specific timeline for next steps. Staff anticipated delivery of a complete update on the project the week of July 12.

## MEMO

TO: Ruffin L Hall, City Manager

FROM: Ken Bowers, AICP, Director  
Jason Hardin, AICP, Sr. Planner

DEPARTMENT: City Planning

DATE: June 24, 2019

SUBJECT: Climate Change and Affordability in Planning Staff Reports

---

To better capture the impact of planning decisions, the Department of City Planning is adding a new section to its rezoning and Comprehensive Plan amendment staff reports that will provide objective analysis of sustainability- and affordability-related issues. The new section will, to the extent possible, analyze the impact of a proposed rezoning or plan amendment with respect to climate change—carbon and other greenhouse gas emissions—and housing affordability.

The change will assist Planning Commission and City Council in making decisions that address these critical community issues and help meet the city's goal of an 80 percent reduction in greenhouse gases by 2050. It will also make Raleigh a leader nationally in terms of embedding sustainability into its routine decision-making processes.

### Background

The Department of City Planning routinely produces staff reports that analyze rezoning requests, proposed Comprehensive Plan amendments, and other planning-related questions. These reports typically contain analysis of both policy consistency community impacts. The policy analysis considers whether a rezoning or plan amendment is consistent with the city's goals as expressed in the Comprehensive Plan. The impact analysis considers questions such as whether a rezoning would add additional vehicle trips, whether the property is in a floodplain, and similar objective data.

The theme of sustainability is woven throughout the Comprehensive Plan and is addressed by numerous policies. However, while impact section of staff reports contains specific estimates of metrics such as wastewater demand, has not directly focused on carbon emissions or other similar sustainability metrics. That meant that analysis of consistency with specific policies such as Environmental Protection 1.1—Greenhouse Gas Reduction; Land Use 4.4—Reducing VMT Through Mixed Use; or Housing 1.8—Zoning for Housing was difficult and not based on objective measures. This addition to the staff reports addresses this information gap.

### Methodology

Staff explored various methods for capturing carbon emissions and affordability. Because rezoning proposals typically somewhat general in nature, often permitting different uses, building types, price points, and other variables, precise measurements are not possible or would be vulnerable to challenge. However, relatively simple yes/no or more/less evaluations are quite feasible and defensible.

For instance, with respect to transportation—the category responsible for the largest share of carbon emissions—development that produces fewer and shorter vehicle trips per

Municipal Building

North Carolina 27602-0590  
(Mailing Address)

resident, employee, customer, or visitor produces less carbon. Additionally, there is strong evidence that travel patterns vary by area. In downtown, for instance, trips are more likely to be made on foot or transit than in areas where uses are separated by greater distances and transit is infrequent or not present. The same is true for other walkable centers and neighborhoods with a mix of uses, short block lengths, a connected grid, and similar features. In these areas, vehicle trips will be fewer and shorter than in less walkable areas.

However, estimating *exact* mode shares and trip lengths for a given area or zoning category is difficult. Variables include the location, street infrastructure, building or housing type, and more. Instead of providing a precise estimate, then, the staff report contrasts the area in question to the city as a whole, a comparison that can be made with much more confidence. In other sections of the report, similar methods are used. They are briefly described below.

#### Transportation

The analysis uses Walk Score, a publicly available service that measures pedestrian friendliness by analyzing population density and road metrics such as block length and intersection density. The service has been used by other municipal governments for planning purposes. The report uses Walk Score to assess walkability and transit service for a given location and to compare that with the average for the city as a whole. Development in an area with a higher walk or transit score than the city's averages presumed to decrease the city's carbon emissions on a per capita basis compared with baseline development.

#### Building Efficiency

This section uses data from the U.S. Department of Energy that captures annual energy use by housing type. Because units that share walls are more energy-efficient than other buildings, this analysis provides a means of considering the carbon footprint of housing types included or excluded in any particular rezoning proposal or plan amendment.

#### Other Sustainability Metrics

The report includes a more open-ended section intended to capture any other carbon-related impacts of a rezoning or plan amendment. These could include, for instance, whether a rezoning includes a condition that specifies the adaptive reuse of existing buildings or that provides bikeshare memberships or transit passes to residents.

#### Affordability

This section includes a summary of the impact of a rezoning proposal or plan amendment on various housing metrics. It notes whether a proposal adds or subtracts from the housing supply, whether it includes any subsidized units, and other yes/no measurements.

### **Using the New Section**

The city has long been a leader in addressing sustainability in city facilities, operations, and fleets through a focus on energy-efficient buildings, electric vehicles, methane capture, and more. However, carbon emission from the private sector are many times larger than those from the public sector. Because city decisions about planning and zoning already directly influence private sector emissions, the new section simply provides more information about those impacts when decisions are made.

The new section will not determine whether a particular rezoning request or plan amendment is consistent with the Comprehensive Plan overall. However, it can provide additional support for why a particular request is or is not consistent with a specific policy, and it can bring currently little-used policies into the analysis by providing a clearer and less subjective rationale for their application.

## IMPACT ANALYSIS

### Carbon Footprint: Transportation

	City Average	Site	Notes
Transit Score	30	(score)	(Comparison of score to average)
Walk Score	30	(score)	(Comparison of score to average)

Source: Walk Score is a publicly available service that measures pedestrian friendliness by analyzing population density and road metrics such as block length and intersection density. The higher the Transit Score or Walk Score, the greater the percentage of trips that will be made on transit or by walking, and the smaller the carbon footprint. The scores also correlate with shorter vehicle trips, which also produce less carbon.

**Summary:**

**Impact Identified:**

### Carbon/Energy Footprint: Housing

Housing Type	Average Annual Energy Use	Permitted in this project?
Detached House	82.7	Yes/No
Townhouse	56.5	Yes/No
Small Apartment (2-4 units)	42.1	Yes/No
Larger Apartment	34.0	Yes/No

Source: U.S. Energy Information Administration, 2015 survey. Statistics for residential structures in the South.

## COMPREHENSIVE PLAN AMENDMENT ANALYSIS – CASE #

### OVERVIEW

[Generally describe the amendments to the Comprehensive Plan that may be necessary for approval of the rezoning request.]

### LIST OF AMENDMENTS

1. Numbered list: Insert blackline-formatted amendments to the Comprehensive Plan which should accompany approval of this case in order to resolve inconsistency. Provide an explanation for each amendment based on the circumstances of this case.

### AMENDED MAPS

[Insert images of amendments to policy maps which may need to accompany approval of this case in order to resolve inconsistency.]

### IMPACT ANALYSIS

[Describe citywide impacts of amendments listed above.]

## Special Events Weekly Digest

Friday, June 28 – Thursday, July 4

City of Raleigh Special Events Office  
[specialevnts@raleighnc.gov](mailto:specialevnts@raleighnc.gov) | (919) 996-2200 | [www.raleighnc.gov/specialevnts](http://www.raleighnc.gov/specialevnts)

---

### ***Permitted Special Events***

#### **Pups in the Park**

Chavis Way

Friday, June 28 – Sunday, June 30

Event Times: 7:00am - 8:00pm on 6-28-19, 6-29-19, and 6-30-19

Associated Road Closures: No roads will be closed for the event. The grass area at the intersection of Chavis Way and E. Cabarrus Street will be used from 7:00am on 6-28-19 until 8:00pm on 6-30-19.

#### **North Carolina State Highway Patrol 90th Anniversary Celebration**

Edenton Street

Friday, June 28

Event Time: 10:00am - 3:00pm

Associated Road Closures: Edenton Street between N. Wilmington Street and N. Salisbury Street will be closed from 6:00am until 4:00pm.

#### **Play On!**

City Plaza

Friday, June 28

Event Time: 12:00pm - 2:00pm

Associated Road Closures: No roads will be closed for the event. Off-street portions of City Plaza will be used from 10:30am until 3:00pm.

#### **Moore Square Market**

City Market

Wednesday, July 3

Event Time: 4:00pm - 7:00pm

Associated Road Closures: Parham Street between E. Martin Street and Wolfe Street will be closed from 2:00pm until 8:30pm.

#### **Keep RLGH Independent 4 Miler**

Dorothea Dix Park

Thursday, July 4

Event Time: 7:30am - 10:00am

Associated Road Closures: Goode Street between Lake Wheeler Road and Biggs Drive will be closed from 7:00am until 11:00am. The following roads will be closed from 7:50am until 9:30am to facilitate the route:

Start at Goode Street; Right onto Biggs Drive; Right onto Palmer Drive; Left onto Cranmer Drive; Left onto Umstead Drive; Right to stay on Umstead Drive; Right onto Barbour Drive; Right onto Kendall Circle; Left onto Barbour Drive; Right onto Bender Street; Continue onto Dorsett Drive; Right onto Barbour Drive; Left onto Umstead Drive; Right to stay on Umstead Drive; Right onto Black Drive; Left onto Palmer Drive; Right onto Biggs Drive; Left onto Goode Street to finish.

#### **Raleigh 4th of July Fireworks Display**

PNC Arena & Carter-Finley Stadium Area

Thursday, July 4

Event Time: 6:00pm - 10:00pm

The City's annual July Fourth fireworks will be held around the Stadium and Arena Complex (Carter-Finley Stadium and PNC Arena area). Free parking will be available in lots at the PNC Arena, Carter-Finley Stadium, and Bunn Field at the North Carolina State Fairgrounds along Trinity Road. Gates open at 6:00pm and

fireworks launch at 9:34pm. A portion of Trinity Road between Blue Ridge Road and Edwards Mill Road, including the pedestrian tunnel, will be closed beginning at 9:30pm. In the event of inclement weather on July 4, the event will be moved to July 5.

### ***Other Events This Weekend***

#### **[Healthy Funk Music Fest](#)**

Friday, June 28

Dr. Martin Luther King, Jr. Memorial Gardens

#### **[Richa Sharma Live in Concert](#)**

Friday, June 28

## **MEMO**

TO: Ruffin Hall, City Manager

FROM: C. L. Deck-Brown, Chief of Police

DEPT: Police

DATE: June 11, 2019

SUBJECT: Crisis Intervention Team

The Crisis Intervention program is a partnership with Wake County Law Enforcement Agencies, Alliance Behavioral Health Care and the National Alliance of Mental Illness (NAMI) of Wake County. The training curriculum is designed by Roosevelt Richard of Alliance Behavioral Health with input from NAMI and all participating law enforcement agencies in Wake County. Participants meet regularly to discuss any topic changes and course presenters to ensure the officers receive the most up to date information. The program consists of 36 hours of classroom work covering a variety of topics to include, but not limited to: substance use disorders, trauma, suicide assessment, de-escalation, site visits to local providers, and a consumer panel. The program also requires each officer to complete 4 hours of shadowing a mental health professional at UNC Wakebrook. Classroom instructors are from many partners in the program and mental health care providers. The Raleigh Police Department (RPD) also provides two instructors to conduct training covering topics of de-escalation and suicide assessment.

Crisis Intervention Team training was originally designed for officers who have the desire to be involved in the program and who have a desire to work with this at risk population. It was not designed for and was never intended to be used as mandatory training for all officers. However, despite the original vision of CIT, over the past several years, RPD has made a strong effort to train all Field Operations personnel in CIT. This effort was made because Field Operations officers are the primary responders to 911 calls for service.

Currently, working with the partners at Alliance Behavioral Health Care and their schedule, RPD has capacity to potentially train 48 officers. This number includes all new officers who successfully complete the Raleigh Police Academy. If the Raleigh Police Department and Alliance Behavioral Health are able to maintain the current training schedule, all officers assigned to the Field Operations division could potentially be trained by the end of 2020. If the Department were to mandate CIT training for all personnel outside of Field Operations, completion would likely take an additional 4-6 years.

Weekly Report

Below are some quotes from the CIT International Core Elements document along with a link to the document.

*CIT is a program that provides the foundation necessary to promote community and statewide solutions to assist individuals with a mental illness. The CIT Model reduces both stigma and the need for further involvement with the criminal justice system. CIT provides a forum for effective problem solving regarding the interaction between the criminal justice and mental health care system and creates the context for sustainable change.*

*Basic Goals: Improve Officer and Consumer Safety Redirect Individuals with Mental Illness from the Judicial System to the Health Care System*

*Experience has shown that a successful CIT program will have trained 20-25% of the agency's patrol division. Ultimately, the goal is to have an adequate number of patrol officers trained in order to ensure that CIT-trained officers are available at all times.*

*Officers within a patrol division should voluntarily apply for CIT positions. Each candidate then goes through a selection process, which is assessed according to the officer's application, recommendations, personal disciplinary police file, and an interview. Once selected, each of the CIT Officers maintains their role as a patrol officer and gains new duties and skills through the CIT training, serving as the designated responder and lead officer in mental health crisis events.*

RPD has been and is currently very active in the CIT program. Since September 2005, 477 RPD officers have attended CIT. While our current numbers currently stand at 384, the difference of 93 is explained by officers who have left the department for various reasons.

The numbers mentioned above do not include the CIT class to be held June 10-14, 2019 or the current academy recruits who will receive CIT during the week of June 17. Upon completion of the aforementioned training, we anticipate approximately 420 officers will be CIT certified.

It is also worth noting; RPD created the first CIT refresher course in 2016 and sent all CIT officers to this training, along with officers from other agencies within the county. The CIT refresher program has received praise and backing from both NAMI and Alliance Behavioral Health Care.

Due to our recognition of the need for our personnel to receive Mental Health training and our commitment to the needs of the community, RPD has trained 798 sworn and civilian personnel in Mental Health First Aid. This is an eight hour block of awareness training for personnel and this number does not include those officers who attended the CIT refresher course, as they were not required to attend this training.

In 2016, CIT International created a CIT Coordinator Course certification. In 2018, RPD sent two officers through the course for certification. To date, only 596 people have received this certification worldwide.

Finally, realizing RPD and the community must partner together to recognize and address mental health issues, we offered several opportunities for citizens to attend an eight hour block of instruction. A total of 6 classes began in December 2018 and concluded in May 2019. The total number of citizens participating in the classes was 147.

The Raleigh Police Department recognizes mental health concerns as a community issue and we continue to strive to be a strong partner and lead agency with mental health providers and the Law Enforcement Community.
