

# Commercial Amplified Sound Study

*October 2025*

This document is a compilation of the sound data provided by the City's consultant, Brian Block who is the founder and president of Sound City Planning.

For context, his scope of work included two separate onsite visits (8/1-8/3 and 9/5- 9/7). He measured sound in Glenwood South and a handful of other locations in the city. Mr. Block actively participated in community engagement efforts, including observation visits from residential units during peak nightlife hours. There was also a late-night weekend walkthrough of Glenwood South with venue operators and owners, Special Events staff, the City Attorney's Office, and RPD.

The charts lists date and time of reading, location, and the dB(A) and dB(C) readings. The dB(A) reading is labeled Laeq and the dB(C) is Lceq.
