Certificate of Appropriateness Placard
for Raleigh Historic Resources

422 N PERSON STREET
Address
OAKWOOD
Historic District

Historic Property
130-17-MW
Certificate Number
08-01-2017
Date of Issue
02-01-2018
Expiration Date

Project Description:

- Install gravel parking pad and extend driveway
- Note: Due to the proximity of trees to the new parking pad, any digging will require hand excavation to protect nearby tree roots. Also, should any tree roots over 1" in diameter require cutting it must be done cleanly with a saw or loppers.

This card must be kept posted in a location within public view until all phases of the described project are complete. The work must conform with the code of the City of Raleigh and laws of the state of North Carolina. When your project is complete, you are required to ask for a final zoning inspection in a historic district area. Telephone the RHDC office at 832-7238 and commission staff will coordinate the inspection with the Inspections Department. If you do not call for this final inspection, your Certificate of Appropriateness is null and void.

Pending the resolution of appeals, commencement of work is at your own risk.

REVISION 08.29.16
Melissa,

Thank you for the kind advice about digging in the backyard for gravel. The attached plot plan for 422 N Person Street has been revised since the original submittal of June 30, 2017. The changes are as follows.

Holes were dug in backyard to determine locations of previous gravel. Sample locations #1 through #7 provide that gravel is present at these locations. The drawing and photographs #1 and #2 below show these locations. Photographs #3 and #4 show gravel dug from sample locations #2 and #4 placed on paper towels. On this basis, dashed lines are shown on the drawing to represent the presence of existing gravel. The garden hose in the photographs shows the location of the dashed lines in the drawing. The three rectangles A, B, and C in the drawing show an existing gravel surface of 491 square feet as shown in the table below.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>5' x 10'</td>
<td>50 square feet</td>
</tr>
<tr>
<td>B</td>
<td>19' x 21'</td>
<td>399 square feet</td>
</tr>
<tr>
<td>C</td>
<td>6' x 7'</td>
<td>42 square feet</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td>491 square feet</td>
</tr>
</tbody>
</table>

By my figures, inclusion of the existing gravel area described above causes the built area to increase by 4%, from 39.5% to 43.5%. Calculations are summarized below.

The lot size is an average depth of 165 feet with an average width of 58.75 feet. The dimensions are taken from the previously submitted survey and the property contains 9,694 square feet. This calculation does not include the sidewalk and adjacent area, but does include the 9 feet depth and 56 feet width at the rear of the property.

I come up with 2625 covered square feet for the house. This number considers the house, covered porches and an average overhang of one foot around the perimeter of the house. The table below summarizes existing built square feet.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>House</td>
<td>2625 square feet</td>
</tr>
<tr>
<td>Existing driveway</td>
<td>710 square feet</td>
</tr>
<tr>
<td>Recently discovered existing gravel</td>
<td>491 square feet</td>
</tr>
<tr>
<td>Total</td>
<td>3826 square feet</td>
</tr>
</tbody>
</table>

Existing built area of 3826 square feet divided by property area of 9694 square feet equals 39.5%. The area of the proposed additional built area is 390 square feet and is summarized from the drawing in the next table.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>8' x 18'</td>
<td>144 square feet</td>
</tr>
<tr>
<td>11' x 18'</td>
<td>198 square feet</td>
</tr>
<tr>
<td>Near fence</td>
<td>4' x 7'</td>
</tr>
</tbody>
</table>
Triangle section near fence  20 square feet
Total  390 square feet

Existing built area of 3826 square feet plus additional built area of 390 square feet divided by 9694 square feet which equals 43.5%. This is an increase of 4%.

In closing, I would love to increase the overall size of the built area by 1% to reach the 5% increase, but am choosing to leave my request as is.

Best,

Luis Turner

Luis,

See my response in red below. You might do a little digging on the property to see how far the driveway has gone back in the past. If you can find evidence of other gravel that shows it being larger at some point that will help you make the case for a slightly larger addition to it.

Melissa

Melissa,

Thank you for the additional input.

- I will run some numbers to see what kind of footprint the more modest increase will allow. Can you advise of any surface that might provide increased percentage of permeability and satisfy the appearance of historical guidelines? It’s not about the permeability, but rather about the surface area. The intention of the guideline I cited is that historic properties should not be entirely built on or paved if they were not historically. A minor increase is more appropriate to the way changes happened over time. Your proposal to use gravel is approvable under the Design Guidelines, so there’s no need to look for an alternative material.

- The tree root issue will need more thought.

Let’s communicate further to see what needs to be done.

Best,  
Luis

Subject: RE: COA application - 422 N Person St

Luis,

I discussed your project with my colleague and have additional information and questions for you.
- I have learned that a longer driveway that extends into the backyard is not uncommon in Oakwood, and neither is a turnaround space. However, the scale of your proposed driveway and parking area is still an issue and doesn’t clearly meet the Design Guidelines. Your proposal increases the built area to open space by 10%. If you could modify the proposal so that it is a more modest increase, perhaps 5%, it would be more readily approvable. This would require a reduction of roughly 50% of the area currently proposed.
- It is unclear if there are any trees that will be impacted by the project. If there are, especially tree roots that might be under the new driveway, you’ll need to have a tree protection plan.

You still have the option of either modifying the design so that staff can review and approve it, or else submitting it as a major work application that will be reviewed by the COA Committee. Please let me know if I can assist you further.

Best,
Melissa

Subject: COA application - 422 N Person St

Luis,

In reviewing your COA application for the driveway project at 422 N Person St I have a few questions for you. Is there any evidence of a parking area where you propose the new parking pads? I understand the driveway that runs alongside the house has been there for some time, but can you see any indication that there was any such area to the rear?

There are two issues that staff has found in reviewing your application
- This first is that you are significantly increasing the amount of built area to open space vs. what is there now. It appears that the house with its two porches and existing gravel driveway cover approximately 33% of the lot, while the newly proposed parking pad and driveway increase the lot coverage to 43%. This is in direct conflict
with an important design guideline: “1.3.8 In the residential historic districts, it is not appropriate to alter the residential character of the district by significantly reducing the proportion of the original built area to open space on a given site through new construction, additions, or surface paving.”

- The second is that the configuration is not appropriate for the historic district, as traditional driveways in Oakwood were straight runs that did not include the additional turnaround area you propose. The gravel you propose to use is a material that can be approved, however.

There are two possible paths forward in order for this application to be approved at the staff level:

- Redesign the layout to be both more compatible with the historic design of driveways in the district and smaller in surface area, or
- Provide evidence of the existence of a driveway/parking area like the one you propose through historical documentation or evidence on site.

If you prefer to continue with the application as it is, it can be converted to a major work application which would require an additional fee of $118. If that is your choice you would need to communicate with our office by August 15, and the case would be heard at the September 28 COA Committee meeting.

Please let me know how you would like to proceed.

Best,
Melissa
