Project Description:

- Remove dead/diseased/dangerous tree;
- prune trees;
- install new plantings;
- NeighborWoods donation

This card must be kept posted in a location within public view until all phases of the described project are complete. The work must conform with the code of the City of Raleigh and laws of the state of North Carolina. When your project is complete, you are required to ask for a final zoning inspection in a historic district area. Telephone the RHDC office at 832-7238 and commission staff will coordinate the inspection with the Inspections Department. If you do not call for this final inspection, your Certificate of Appropriateness is null and void.

Greg: Thank you for submitting a Minor Work COA application for 510 Polk Street. I've reviewed the application and have a few comments. Additional materials may be sent in via email.

- Please send in a front yard picture of the property.
- In order to remove the tree as a Minor Work application, a replacement tree of similar species is required. Please provide species and location. Alternatively, if there is not an appropriate location on the property or right-of-way, a NeighborWoods donation may be made. Evidence indicating the lack of location would need to be provided for staff concurrence.

Thanks,

Daniel

Daniel:

Attached is a photo of the front yard/house as viewed from Polk St. There are dogwood trees on either side of the location from which the photo was taken, in the strip of land (right-of-way?) between sidewalk & street. There is also a large oak just out of the field of view on the RHS of the photo. I can provide a wider view photo, to show the dogwoods & oak, if you prefer.

I am happy to replace the dangerous tree, in a location very close to the current spot. Given the proximity of the planting zone to my house & my neighbor’s garage, I’d prefer to install a small tree (under 30 ft @ maturity) such as a dogwood or chalk maple (see attached PDF).

I agree with the plan to install new trees esp oaks. No other location is avail on my property for such a tree ... if you prefer a donation to NeighborWoods to plant such a large tree elsewhere, I’m agreeable.

Thanks,

Greg

*Please Note: This list is based on our experience gardening in the Piedmont of North Carolina. Although we consider everything here suitable for the Southeast, not all of the plants are suitable for all areas of the Southeast. Most can be successfully grown in the Piedmont, but there are some that will not thrive in the more extreme conditions of the Mountains or the Coastal Plain, or in the northern or southern extremes of the region.

Nomenclature follows Alan S. Weekley’s *Flora of the Carolinas, Virginia, and Georgia* (working draft of July 5, 2005).

Addn’l property photos to show:

1) Tree canopy across the front yard
2) Trees in right-of-way
3) Location of dangerous tree relative to structures
4) Smaller tree (next to garage) close to location of dangerous tree

I am happy to install a smaller tree close to the location of the dangerous tree. Perhaps not necessary given the existing plantings & canopy.

Please review & pass along comments.

Thanks,

Greg

Hi Greg –

I appreciate your patience. I have reviewed all of the documentation and am prepared to approve the application. All that is needed is a donation to NeighborWoods. Their current tree cost is $50 per tree. You may either send the form and payment directly to us or provide a receipt from the program.

The donation form is online here.

Best,
Tania

Hi Tania:

The tree has been dropping more pieces of its exposed core, which doesn't help stability.

I scheduled removal for Tues 22 September, since we all agreed that the tree represents a danger to adjacent structures/people.

Please drop me a note, with your decision about replanting or other action, when you return to the office.

Thanks,

Greg
