STAFF REPORT

Based on the information contained in the application and staff’s evaluation:

A. The installation of a 6’ tall wooden fence and gates is not incongruous in concept according to Guidelines 1.4.5, 1.4.6, 1.4.11, and the following suggested facts:

1* Location: The applicant proposes replacing existing deteriorated fencing on the east property line and two smaller sections with gates that run north and south that connect to the side walls of the house. No change in fence or gate locations is proposed.

2* The proposed wooden fence and gate locations are characteristic of the district.

3* Height: The existing deteriorated fencing is 60-72” in height on the east property line (due to the slope of the property) and 72” for the two sections that connect to the side walls of the house. The proposed new fence height matches the existing height.

4* The committee has regularly found that 6’-tall wood privacy fences meet the Design Guidelines in Oakwood when installed in rear and side yards (except for corner lots).

5* Design: The existing fencing is of three different designs;

    a. Standard unpainted wood picket design with minimal spacing between pickets on the north side of the house and the east property line;
b. A non-traditional design with painted wide vertical boards and relatively wide spacing on the south side of the house;

c. Standard unpainted wood shadow-box style on the north and south property lines.

6* The application proposes installing the shadow-box style fence in all three locations that are to be replaced so that all fencing in the yard matches. Traditionally, fences were constructed with neighbor friendly design, with structural members facing inward; the proposed shadow-box fence design has the same appearance on each side.

7* If the applicant were proposing replacing the fencing like-for-like there would be no need for a COA application according to the type of work list: “Routine Maintenance (includes repair or replacement where there is no change in the design, materials, or general appearance of elements of the structure or grounds.)

8* One gate is proposed for each of the smaller sections that run north and south that connect to the side walls of the house.

9* Wood is a traditional fencing material. The proposed fence will have a natural finish.

10* A tree protection plan was not provided.

Staff suggests that the Committee approve the application with the following condition:

1. That any new post holes be dug manually and tree roots larger than 1” caliper that are encountered while digging the fence post holes shall receive a clean final cut using tools designed for the purpose, such as loppers.

Staff Contact: Melissa Robb, melissa.robb@raleighnc.gov
Property Street Address: 706 N. East St

Historic District: Oakwood

Historic Property/Landmark name (if applicable)

Owner's Name: Elizabeth Nash and Brent Floyd

Lot size: .12 acres  (width in feet) 48' (49')  (depth in feet) 109' (110')

For applications that require review by the COA Committee (Major Work), provide addressed, stamped envelopes to owners of all properties within 100 feet (i.e. both sides, in front (across the street), and behind the property) not including the width of public streets or alleys (Label Creator).

<td>The owners are proposing to replace three sections of 6' tall wooden fence bordering the back yard. The replacement will focus on sections of the fence and gates that are in disrepair and suffering from substantial wood rot. The replacement will follow the exact path of the existing fence. No location changes are planned in conjunction with the replacement. The proposed replacement includes North and South sections adjacent to the rear of the house as well as the fence bordering the back of the yard. No alterations are planned for existing side sections of fence. Both sections are board-on-board construction have been replaced and/or repaired more recently and are in good shape. The proposed fence replacement sections will use board-on-board construction to match the existing fence sections that will remain in place. This will serve to unify the fence design around the entire perimeter of the back yard.</td>

**Minor Work Approval (office use only)**

Upon being signed and dated below by the Planning Director or designee, this application becomes the Minor Work Certificate of Appropriateness. It is valid until ________________. Please post the enclosed placard form of the certificate as indicated at the bottom of the card. Issuance of a Minor Work Certificate shall not relieve the applicant, contractor, tenant, or property owner from obtaining any other permit required by City Code or any law. Minor Works are subject to an appeals period of 30 days from the date of approval.

Attach 8-1/2” x 11” or 11” x 17” sheets with written descriptions and drawings, photographs, and other graphic information necessary to completely describe the project. Use the checklist below to be sure your application is complete.

**Minor Work (staff review) – 1 copy**

**Major Work (COA Committee review) – 10 copies**

1. **Written description.** Describe clearly and in detail the nature of your project. Include exact dimensions for materials to be used (e.g. width of siding, window trim, etc.)

2. **Description of materials** (Provide samples, if appropriate)

3. **Photographs** of existing conditions are required. Minimum image size 4” x 6” as printed. Maximum 2 images per page.

4. **Paint Schedule** (if applicable)

5. **Plot plan** (if applicable). A plot plan showing relationship of buildings, additions, sidewalks, drives, trees, property lines, etc., must be provided if your project includes any addition, demolition, fences/walls, or other landscape work. Show accurate measurements. You may also use a copy of the survey you received when you bought your property. Revise the copy as needed to show existing conditions and your proposed work.

6. **Drawings** showing existing and proposed work
   - Plan drawings
   - Elevation drawings showing the façade(s)
   - Dimensions shown on drawings and/or graphic scale (required)
   - 11” x 17” or 8-1/2” x 11” reductions of full-size drawings. If reduced size is so small as to be illegible, make 11” x 17” or 8-1/2” x 11” snap shots of individual drawings from the big sheet.

7. Stamped envelopes addressed to all property owners within 100 feet of property not counting the width of public streets and alleys (required for Major Work). Use the Label Creator to determine the addresses.

8. **Fee** *(See Development Fee Schedule)*
706 N East St Fence Replacement

The owners of 706 N East St would like to replace three sections of a wooden fence bordering the back yard. The support posts and vertical slats suffer from considerable rot. The replacement will match the existing fence height of 72” along the North and South sides of the house and match the height of the rear fence that currently ranges from 60” to 72” to match yard topography. All replacement sections will follow the path of the existing fence. The new fence will match the existing North and South fence sections and will serve to unify the fence design around the entire perimeter.

There are minimal sightlines from East Street to the fence given the proximity of neighboring homes and existing vegetation. This limited visibility should prevent any noticeable changes when viewed from the street.
However, the maps are produced for information purposes, and are NOT surveys. No warranties, expressed or implied, are provided for the data therein, its use, or its interpretation.
Front and back photos of South Section of the fence. Gate post is rotted, and wood is in bad shape. This is the only section of the entire fence that is painted. Plan to replace with unpainted wood. (Existing Height 72” – proposer Height 72”)
Front and back photos of North Section of the fence. Gate post is rotted on this side as well. (Existing Height 72” – proposer Height 72”)
48’ length of fence along rear of property. A number of the vertical slats have been replaced over the years. Will replace all fence sections following the same path and will match existing height. (Existing Height varies from 60” to 72” moving north to south to match terrain). We propose to match height.
Front View of House from Across Street

South Side
Current View of Board-on-Board fence sections to remain in place. Height is ~72”. New fence to match style of this fence in terms of height, materials and board spacing.
