

# Alamance Drive Drainage Improvements Project

## Improving Drainage and Reducing Flooding

### PROJECT GOAL

We are improving drainage in the stormwater system to address and improve flooding and safety concerns on Alamance Drive, Alleghany Road, and Forsyth Street.

### MORE ABOUT THE PROJECT

Residents on Alamance Drive and Alleghany Road noticed severe yard and structural flooding, which came from undersized pipes in the area. To reduce flooding, we will reroute the water flow on Alamance Drive and replace and upsize a stormwater pipe on Alleghany Road.

We looked at the current stormwater system in the project area to determine the design improvements, which are currently being developed.

### TENTATIVE PROJECT SCHEDULE

The project schedule is highlighted below and is subject to change.

- **Summer 2025: Host Public Meeting**
- Winter 2025: Design Phase Complete
- Early 2026: Advertise Project for Construction Bid
- Summer 2026: Begin Construction
