

# Carolina Pines Avenue Street Improvement Project

Public Meeting

Monday, Nov. 4, 2019

## Welcome!

We are here tonight to show the preliminary project design and answer questions you may have. The meeting will start with a brief project presentation followed by a general question and answer session.

Please feel free to review the project maps displayed. City staff and our consultant, HW Lochner Inc., are on hand to answer specific, individual questions at the map stations after the general Q&A concludes.

## About:

The proposed project is located between Lake Wheeler Road and S. Saunders Street. The goal of the project is to improve mobility and connectivity for pedestrian, bicycle, and vehicular traffic while enhancing safety throughout the corridor.

The existing street has two lanes from Lake Wheeler Road to South Saunders Street with a speed of limit of 35 miles per hour (mph). The proposed improvements include curb and gutter, with a sidewalk on one side and a multi-use path on the opposite side. Traffic calming measures, street lights, landscaping, and a boardwalk are also proposed along the corridor. The improved roadway will also have a posted speed limit of 25 mph.

The project is being funded through the City of Raleigh Transportation Bonds that were approved in 2013 and 2017.

Comments from tonight's meeting will be carefully reviewed and considered, where possible, in the advanced project design.

## Next Steps

- Development and prepare the Advanced Design;
- Advanced Design Public Meeting – Summer 2020;
- Right-of-way and easements acquisition;
- Award the construction contract - Summer 2021
- Begin construction - Fall 2021; and,
- Complete construction - Summer 2023.

## We are Listening:

We want your comments on the proposed improvements. Please provide comments by Nov. 18, 2019, at [https:// publicinput.com/4229](https://publicinput.com/4229) or fill out the paper copy of the comment form and leave it with a City representative. All comments will be considered and addressed by the project team during the advanced design phase.
