

New Hope Church Rd & Green Rd Improvement Project

Pre-Construction Meeting

Tuesday, Jan. 28, 2020

6-7:30 p.m.

Green Road Community Center

Type:

Road, Sidewalk, & Stormwater Improvements

Cost: \$5.4 Million

CAC: Atlantic & North

Team:

City of Raleigh Roadway Design and Construction
Fred Smith Company (Contractor) Ramey Kemp & Associates, Inc. (Design Consultant)

About:

The scope of work for the New Hope Church Road project will extend the existing three-lane roadway section from Ingram Drive to Deana Lane and will enhance pedestrian and bicycle amenities with the addition of bike lanes and sidewalks on both sides of New Hope Church Road. The existing culvert under New Hope Church Road will be replaced just east of Pittsford Road with a 6' Tall x 14' Wide precast reinforced concrete box culvert that will be about 230' in length. The construction of this culvert will require a 5 month road closure (Spring 2020-Summer 2020) from just east of Ingram Drive to just west of the Deana Lane and New Hope Church Road intersection. A detour and additional details will be provided at our public preconstruction meeting.

The scope of work for the Green Road project will include sidewalk improvements from New Hope Church Road to the Spring Forest Road intersection. These improvements include the construction of new sidewalk, curb & gutter, stormwater infrastructure, ADA compliant handicap ramps, and transit improvements including multiple bus pads.

Fred Smith Company has been awarded the construction contract for the combined project. The City of Raleigh will start the 12-month construction effort in February 2020.

History:

The New Hope Church Road and Green Road Improvements Project is part of the City's Capital Improvement Program. Construction is being funded through the 2011 & 2013 Transportation Bond.

The purpose of the project is to reconstruct the failing roadway and stormwater culvert, as well as to improve vehicle, pedestrian and bicycle safety. The last public meeting to review the design was held in November 2017. Shortly after City Council approval in February 2018, real estate staff began the process of negotiating with property owners for acquisition of rights-of-way. The project was successfully bid and awarded in Fall 2019.

Schedule:

February 2020 - Start Construction

February 2021 - Complete Construction
