

Project Schedule

- Comments from the meeting being held tonight will be carefully reviewed and incorporated into the project design where possible.
- Prepare the Engineering Designs taking into consideration comments received.
- Second Public Meeting - May 2016
- City Council Hearing – July 2016
- Acquire right-of-way and easements as necessary to construct the project. Award the construction contract of the project by December 2016 (tentative schedule).
- Begin construction of the project by spring 2017 (tentative schedule).
- Complete construction of the project by late 2017 (tentative schedule).

Notes:

Design Public Meeting

Pullen Road Extension

Raleigh City Hall

222 W. Hargett Street, Raleigh, NC 27602

Sponsored by City of Raleigh and Ramey Kemp & Associates, Inc.

March 17, 2016

Welcome!

Welcome to the design public meeting for the Pullen Road Extension Roadway Improvements Project. This is a workshop sponsored by the City of Raleigh to gather public input for the initial project design. Please feel free to review the project location maps and ask questions of members of the project team here tonight from the City of Raleigh and the design consultant, Ramey Kemp & Associates, Inc. Team members will be available for questions between 6:00 P.M. and 7:00 P.M. Thank you for your participation.

Your Input is Important

We value your contributions and suggestions pertaining to the plans. You are encouraged to complete the enclosed comment sheet today or mail your comments to the address at the bottom of the comment sheet. We request that you provide your input by **March 31, 2016**, in order for your comments to be incorporated into the project design.

Project Details

Location: The proposed project will extend Pullen Road from Western Boulevard to the south, connect to a proposed roundabout at Bilyeu Street, and then extend to the southwest to tie into the existing Centennial Parkway / Oval Drive Intersection.

Need/Benefit: The Pullen Road Extension will enhance connectivity between Western Boulevard and Centennial Parkway and will provide a corridor for both vehicles and pedestrians.

Description of Roadway:

- The Pullen Road Extension is 2-lane divided roadway with bike lanes between Western Boulevard and the proposed roundabout. The proposed speed limit is 25 mph.
- The proposed roundabout will connect the Pullen Road extension with Bilyeu Street and has a 120' diameter.
- Bilyeu Street will consist of a 2-lane divided roadway with bike lanes to the west of the proposed roundabout. The proposed speed limit is 25 mph.
- Street trees, street lighting, a 10' multi-use path, and sidewalks are proposed along the corridor.

Traffic Maintenance: Local traffic operations on existing Western Boulevard, Centennial Parkway, and Bilyeu Street will be maintained during construction. There will be brief periods of one-lane, two-way traffic controlled by flaggers during non-peak travel times. The Bilyeu Street connection will remain open until the proposed Pullen Road Extension is operational and will then be closed and traffic routed towards the roundabout.
