# Section 1: Introduction

The City of Raleigh (City) operates under a Phase I National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) Permit Number NCS000245. The current iteration of the City permit became effective October 10, 2018 and extends through October 9, 2023.

This permit authorizes the City to discharge stormwater from the MS4, located within the City corporate limits, into receiving waters of the state within the Neuse River Basin. This document is the Stormwater Management Plan (SWMP), as required by Part I.A of the City's NPDES MS4 permit, which establishes the methods by which the City implements the permit requirements to achieve compliance and protect receiving stream water quality to the extent allowable under state and local law. The SWMP is intended to describe the various control measures and activities the City will undertake to implement the stormwater management program. The SWMP is a consolidation of the City's relevant ordinances and other regulatory requirements and a description of all programs and procedures (including standard forms to be used for reports and inspections) that will be implemented and enforced to comply with the permit and to document the selection, design, and installation of all stormwater control measures (SCMs).

In preparing this SWMP, the City has evaluated its MS4 and the permit requirements to develop a comprehensive five-year SWMP that will meet the community's needs, address local water quality issues, and provide the measures necessary to comply with the permit. This includes the effective prohibition of non-stormwater discharges to the MS4 and the reduction of pollutant discharges to the maximum extent practicable (MEP) through the implementation of the six minimum measures stipulated in the federal NPDES regulations. This SWMP identifies the program elements to be implemented under the permit program and includes: a brief program narrative, the best management practices (BMPs) intended to fulfill the permit requirements, measurable program goals, annual reporting metrics, implementation schedules, and responsible parties.

The SWMP includes the following core NPDES MS4 permit programs, which are implemented within the City's corporate limits unless noted otherwise:

- Public Education and Outreach - BMPs to distribute educational materials to the community, conduct public outreach activities, raise public awareness on the causes and impacts of stormwater pollution, and inform the public on steps they can take to reduce or prevent stormwater pollution.
- Public Involvement and Participation - BMPs for the public to participate in program development and implementation and to comply with applicable state and local public notice requirements.
- Illicit Discharge Detection and Elimination (IDDE) - BMPs to detect and eliminate illicit discharges to the City's MS4; address significant sources of pollutants to the MS4; implement appropriate enforcement procedures and actions; maintain a map showing the City's major MS4 outfalls to state waters receiving direct discharges; and inform

employees, businesses, and the general public of hazards associated with illegal discharges and improper disposal of waste.

- Construction Site Runoff Controls - BMPs to reduce pollutants in stormwater runoff from construction activities disturbing one acre or more of land surface and to provide procedures for public input, sanctions to ensure compliance, requirements for construction site operators to implement appropriate erosion and sediment control practices, review of site plans, and procedures for site inspection and enforcement of control measures. The City's unified development ordinance (UDO) exceeds this MS4 permit requirement, requiring SCMs to reduce pollutants in stormwater runoff from construction activities disturbing 12,000 square feet or more of land surface. The City's UDO also includes procedures for public input, sanctions to ensure compliance, requirements for construction site operators to implement appropriate erosion and sediment control practices, review of site plans, and procedures for site inspection and enforcement of control measures. This City program is authorized within the corporate limits and the Extra Territorial Jurisdiction (ETJ) area.
- Post-Construction Site Runoff Controls - BMPs to manage stormwater runoff from development that drains to the City's MS4 and to waters within the ETJ area, to provide a mechanism requiring long-term operation and maintenance of SCMs, and to ensure controls are in place to minimize water quality impacts. This City program is authorized within the corporate limits and the ETJ area.
- Pollution Prevention and Good Housekeeping for Municipal Operations - BMPs to prevent or reduce stormwater pollution from municipal facilities and operations through pollution prevention and good housekeeping techniques.
- Program to Monitor and Evaluate Stormwater Discharges to Municipal Systems – BMPs to monitor and control pollutants in stormwater discharges to the City's MS4 from hazardous waste treatment, storage, disposal, and recovery facilities; industrial facilities subject to Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA); and industrial facilities the City determines are contributing or have a potential to contribute substantial pollutant loading to the MS4.
- Water Quality Assessment and Monitoring - BMPs to evaluate the impacts of MS4 discharges on water quality through the implementation of a water quality assessment and monitoring plan.
- Total Maximum Daily Loads (TMDLs) - BMPs to evaluate strategies and tailor practices within the six minimum measures to address pollutants of concern (POCs) that are discharged to TMDL-listed streams.

The SWMP will be evaluated annually and updated, if necessary, throughout the permit reporting period to ensure that the elements and minimum measures it contains continue to adequately provide for permit compliance and the community's needs. Upon approval of updates to the SWMP by the North Carolina Department of Environmental Quality (DEQ) or 90 days after submittal if no response is received, all provisions contained and referenced in this SWMP, along with any modifications to the SWMP, are incorporated by reference into the permit and become enforceable parts of the permit.

## Section 2: MS4 Information

The following sections include general information about the City's administrative organization for stormwater management, the storm sewer system, and the MS4 receiving waters. These sections inform the development of the stormwater management program and successful permit program implementation.

### 2.1 Permitted MS4 Area

This SWMP applies throughout the corporate limits of the City, including all regulated activities associated with the discharge of stormwater from the MS4. Additionally, the City is authorized to operate, administer, and enforce the construction site runoff control and post construction site runoff control programs within the ETJ area. The City has developed an operational definition for the MS4 based on the permit language that specifies the extents of the City's permit responsibilities. The map below (Figure 1) shows the corporate limits and the ETJ area of the City as of the date of this document.

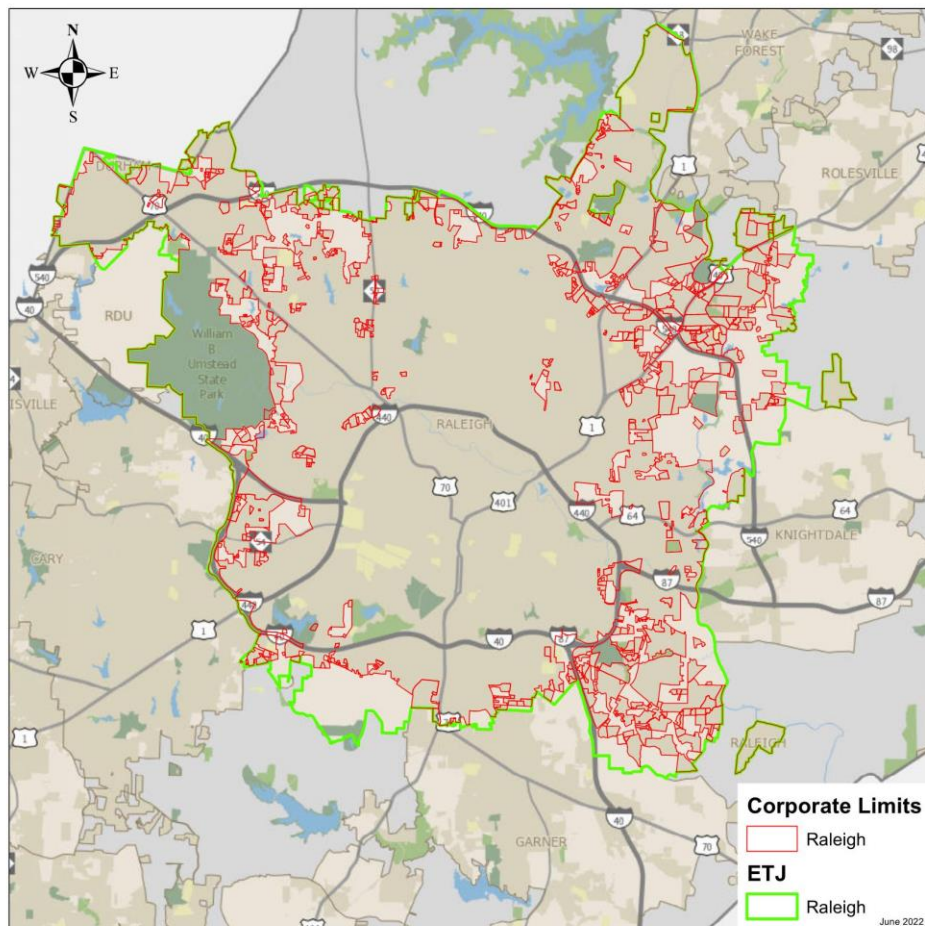

Figure 1. City of Raleigh Corporate Limits and ETJ area

## 2.2 Existing MS4 Mapping

In fiscal year 2014, the City conducted an MS4 mapping program which compiled and documented all known MS4 infrastructure and outfalls within the City corporate limits in a geographic information system (GIS) format. Since this initial effort, the City has continually updated the MS4 mapping, which includes pipes, ditches, inlets, catch basins, culverts, headwalls, channels, manholes, and outfalls, including sizes and inverts. City mapping includes culverts that convey stream and lake flow, which are not considered part of the MS4. The MS4 mapping updates are incorporated into the illicit discharge detection and elimination program, which is described in Section 6.

The condition of the MS4 stormwater inlets and conveyance system is evaluated through the City storm sewer system inspection and maintenance program, which is described in Section 9.

## 2.3 Receiving Waters

The City MS4 is located within the Neuse River Basin and discharges directly into the receiving waters listed in Table 1 below. Applicable water quality standards listed below were compiled from the following DEQ sources: NC Surface Water Classification Map (<https://experience.arcgis.com/experience/7073e9122ab74588b8c48ded34c3df55>) and the most recent EPA-approved DEQ Final 303(d) List (2022) (<https://edocs.deq.nc.gov/WaterResources/DocView.aspx?dbid=0&id=2361776>). TMDLs are addressed in Section 2.5 and Section 12.

The water quality classifications referenced in Table 1 include:

- B: Primary Recreation, Fresh Water
- C: Aquatic Life, Secondary Recreation, Fresh Water
- CA: Critical Area
- NSW: Nutrient Sensitive Waters
- WS-III: Water Supply III – Moderately Developed
- WS-IV: Water Supply IV – Highly Developed

**Table 1. MS4 Receiving Waters**

Receiving Water Name	Stream Index/ Assessment Unit (AU) Number	Water Quality Classification	303(d) Listed Parameters of Interest

Unnamed Tributary to Swift Creek (Yates Mill Pond)	27-43-5-(1.5)	WS-III; NSW	N/A

## 2.4 MS4 Interconnection

The City's MS4 is interconnected with two regulated MS4s and conveys stormwater runoff to the North Carolina Department of Transportation (NCDOT) and North Carolina State University (NCSU) storm sewer systems, as determined by the City's storm sewer system conveyance data. There are multiple points of interconnection between the City and NCDOT MS4s at the edge of roadway rights-of-way and the City, and NCSU at the property boundaries within the City's corporate limits. There are no known interconnections with the MS4s of the City's neighboring communities.

## 2.5 Total Maximum Daily Loads

The TMDLs listed in Table 2 have been approved by EPA within the MS4 receiving waters, as determined by the map and list provided on the DEQ Modeling and Assessment/TMDL web page (<https://deq.nc.gov/about/divisions/water-resources/planning/modeling-assessment/tmdls>). The table also indicates whether the approved TMDL has an individual numeric stormwater Waste Load Allocation (WLA) assigned to the City permitted MS4, and whether a water quality recovery program has been implemented to address the WLA.

**Table 2. Summary of EPA-Approved TMDLs or Nutrient Management Strategies**

Water Body Name	TMDL Pollutant(s) of Concern	Assigned Numeric MS4 WLA (Y/N)	Water Quality Recovery Program (Y/N)
Pigeon House Branch	Copper and Fecal Coliforms	No	No
Perry Creek	Benthos	No	No
Falls Lake	Nitrogen and Phosphorus	No	City is participating in 4B nutrient management strategy
Neuse River Estuary	Nitrogen	No	City is implementing the State Nutrient Sensitive Waters Management Strategy

## 2.6 Industrial Facility Discharges

The City corporate limits encompass multiple industrial facilities which hold NPDES Industrial Stormwater Permits. The list of permitted industrial facilities within the City corporate limits is reviewed annually and updated, if necessary, as required by Part II Section H.2 (a). The City will provide program results in the City's annual reporting, as documented in Section 10.

## 2.7 Non-Stormwater Discharges

In addition to authorized point source discharges of stormwater runoff from the MS4, non-stormwater discharges from facilities that are permitted by and in compliance with another NPDES discharge permit, including discharges of process and non-process wastewater and stormwater associated with industrial activities, are also allowed.

The water quality impacts of other allowable non-stormwater discharges, documented in Part I Section I.2 of the permit, have been evaluated by the City as summarized in Table 3 below. The non-permitted non-stormwater discharges listed as incidental do not significantly impact water quality based upon historical illicit discharges and City staff judgement. The two sources identified below with potential for significant water quality impacts include residential and charity car washing and dechlorinated swimming pool discharges. These two non-stormwater discharges are primarily addressed by the City through their public education and outreach program, as documented in Section 4.

**Table 3. Non-Stormwater Discharges**

Non-Stormwater Discharge	Water Quality Impacts
Water line flushing	Incidental
Landscape irrigation	Incidental
Diverted stream flows	Incidental
Rising groundwater	Incidental
Uncontaminated groundwater infiltration	Incidental
Uncontaminated pumped groundwater	Incidental
Discharges from potable water sources	Incidental
Foundation drains	Incidental
Air conditioning condensate	Incidental
Irrigation waters	Incidental
Springs	Incidental
Water from crawl space pumps	Incidental
Footing drains	Incidental
Lawn watering	Incidental
Residential and charity car washing	Potential
Flows from riparian habitats and wetlands	Incidental
Dechlorinated swimming pool discharges	Potential
Street wash water	Incidental
Flows from emergency firefighting	Incidental

Non-Stormwater Discharge	Water Quality Impacts
Splash pad (spray ground) water from potable water source only	Incidental

## 2.8 Target Pollutants and Sources

In addition to the parameters of interest identified through the 303(d) listings and the TMDLs described in Sections 2.3 and 2.5, target pollutants and sources within the City's MS4 will be reviewed annually and identified based on inspection results and enforcement activities within the MS4 program elements. The City will provide annual program target pollutants and results in the City's annual reporting, as documented in Section 13.

## Section 3: Program Implementation

This section corresponds to Part II Section A of the MS4 permit. The City's program organization and funding are necessary elements for implementing the elements of the MS4 program. Annual reporting metrics are included in Table 4.

### 3.1 City Ordinances

The current City regulations, ordinances, policies, and procedures can be accessed on the City website at: <https://raleighnc.gov/services/government/city-code> and <https://raleighnc.gov/business/content/PlanDev/Articles/Zoning/ZoningRemapping.html>.

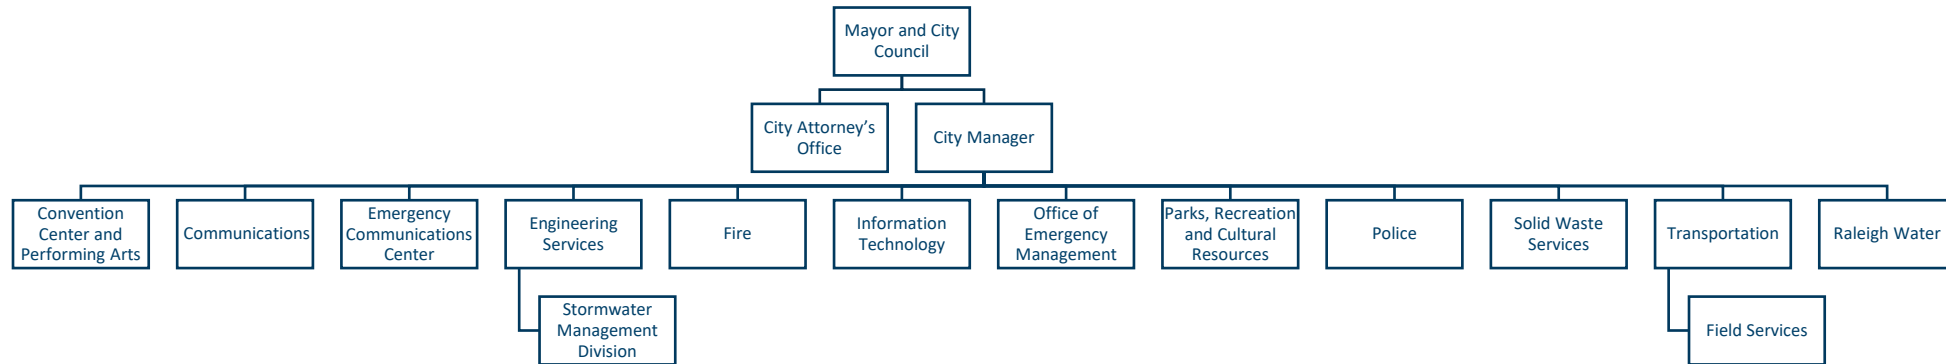

### 3.2 Program Funding and Budget

In accordance with the MS4 permit, the City maintains adequate funding to implement and manage the provisions of the SWMP and comply with the permit requirements. Multiple sources of funding are utilized by the responsible parties to achieve permit compliance. Program elements are primarily funded by the City stormwater utility fee. Additional sources of funding include plan review and permit application fees; the City general fund and Raleigh Water utility fee revenue may be utilized for pollution prevention and good housekeeping activities by owning departments.

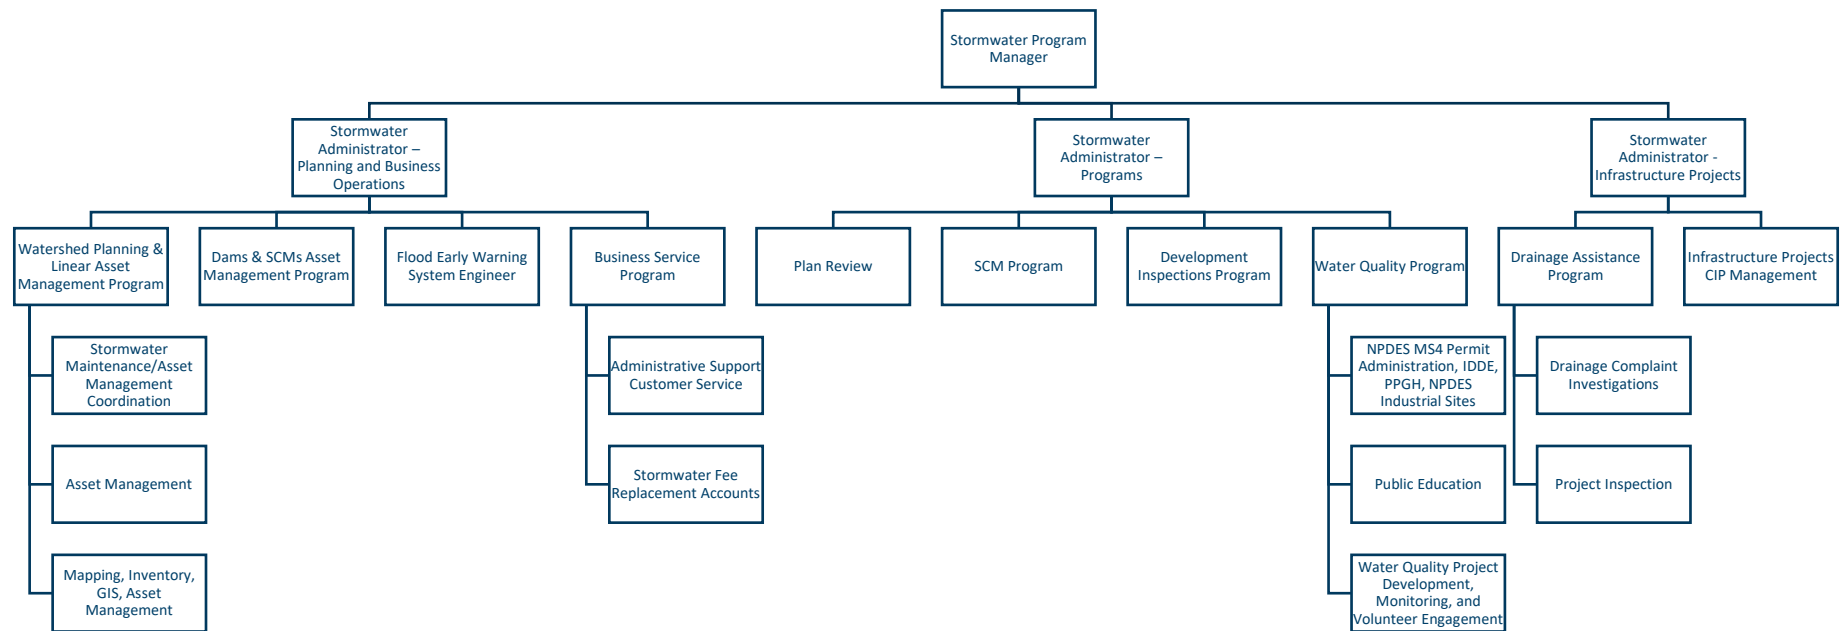

A fiscal analysis will be conducted annually to confirm funds are adequate to meet program needs. A discussion of program funding will be included in the City's Annual Report, as documented in Section 13.

### 3.3 Organizational Structure

The City MS4 program is implemented by multiple departments with oversight and coordination led by the Stormwater Management Division, which is within the Engineering Services Department. The responsible parties are identified in the organizational charts in Figures 2 and 3. These charts depict responsible parties for MS4 permit implementation and do not reflect the entire City organizational structure. The responsible parties also are identified by program element and BMP in Sections 4 through 12. Some responsible departments have been identified for having a direct role in implementing the SWMP, such as the SCM Program, and others have an ancillary role (i.e., implement pollution prevention and good housekeeping practices or provide program support activities, such as Information Technology).

**Figure 2. City of Raleigh MS4 Permit Implementation Responsible Departments Organizational Chart**

**Figure 3. City of Raleigh Stormwater Management Division MS4 Permit Implementation Organizational Chart**

Table 4. Program Element – Program Implementation

Program Element	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
	FY2023	FY2024 – FY2027		
Part II Section A. The permittee will implement, manage and oversee all provisions of its Stormwater Management Plan to control to the maximum extent practical the discharge of pollutants from its municipal storm sewer system associated with stormwater runoff and illicit discharges, including spills and illegal dumping. The overall program implementation, however, will be subject to, at a minimum, either 1) an annual review by the Division to determine implementation status and progression toward meeting the pollutant control intent of the Stormwater Management Plan, i.e., a compliance audit, or 2) a voluntary assessment process that has been approved by the Division and is at least as stringent as the annual review described herein.	Complete annual review with DEQ or conduct a voluntary assessment.	Complete annual review with DEQ or conduct a voluntary assessment.	Stormwater Program Manager  Water Quality Manager	<ul style="list-style-type: none"><li>Report type of assessment completed</li></ul>
Part II Section A.1. The permittee will maintain adequate legal mechanism, such as regulations, ordinances, policies, and procedures to implement all provisions of the SWMP. If major modifications are proposed in the timeline for development of these authorities, the Division must be notified of the changes, the reasons for the changes, and justifications for the changes. The Division may comment on the modifications and require changes as allowed by Federal and State and as deemed necessary to assure appropriate implementation of the SWMP. The Permittee shall obtain prior approval of changes to the SWMP that eliminate or reduce any program or measure in an approved SWMP.	Review or evaluate regulations, ordinances, policies, and procedures annually and update, as needed.	Review or evaluate regulations, ordinances, policies, and procedures annually and update, as needed.	Stormwater Program Manager  Water Quality Manager  City Attorney’s Office	<ul style="list-style-type: none"><li>Report modifications to the regulations, ordinances, policies, and procedures</li></ul>
Part II Section A.2. The permittee will implement provisions of the SWMP and evaluate the performance and effectiveness of the program components.	Evaluate program effectiveness with responsible parties annually, as described in Table 4 through Table 15 and Section 13.	Evaluate program effectiveness with responsible parties annually, as described in Table 4 through Table 15 and Section 13.	Stormwater Program Manager  Water Quality Manager	<ul style="list-style-type: none"><li>Program evaluation completed (Y/N)</li><li>Annual reporting of program effectiveness is described in each annual report section</li></ul>
Part II Section A.3. The permittee is required to keep the SWMP up to date with annual updates if any changes are warranted. The permittee is required to make available its SWMP to the Division upon request. At a minimum, the permittee shall include ordinances, or other regulatory mechanisms providing the legal authority necessary to implement and enforce the requirements of the permit. The Division may review reports submitted by the permittee to assure that the SWMP is implemented appropriately to address the requirements of the permit. The Division may require modifications to any part of the permittee's SWMP where deficiencies are found. If modifications to the SWMP are necessary, then the Division will notify the permittee of the need to modify the SWMP to be consistent with the permit and will establish a deadline to finalize such changes to the program.	Review the SWMP at least once annually and update, as needed.	Review the SWMP at least once annually and update, as needed.	Stormwater Program Manager  Water Quality Manager	<ul style="list-style-type: none"><li>Report modifications to the SWMP and make available to DEQ upon request</li></ul>

Program Element	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
	FY2023	FY2024 – FY2027		
Part II Section A.4. The permittee shall maintain, and make available to the Division upon request, written procedures for implementing the six minimum control measures. Written procedures shall identify specific action steps, schedules, resources, and responsibilities for implementing the six minimum measures.	Maintain written procedures as documented in Sections 4 through 12.	Maintain written procedures as documented in Sections 4 through 12.	Stormwater Program Manager  Water Quality Manager	<ul style="list-style-type: none"><li>N/A, written procedures are available to DEQ upon request</li></ul>

## Section 4: Public Education and Outreach

As documented in Part II Section B of the MS4 permit, the objectives of the public education and outreach program are to make educational materials available to the community, conduct public outreach activities, raise public awareness on the causes and impacts of stormwater pollution, and inform the public of actions they can take to reduce or prevent stormwater pollution. This is achieved through a variety of BMPs detailed in Table 5.

**Describe target pollutants and target pollutant sources.** In addition to the areas of focus identified in Tables 1, 2, and 3, the City reviews datasets, such as citizen complaints, illicit discharges, and other program activities to identify target pollutants to focus the public education and outreach materials and activities.

**Describe target audiences.** Target audiences may be defined by target parameters of interest and associated sources. The City identifies target audiences by reviewing the types of activities correlated to citizen complaints, illicit discharges, and other activities that may cause pollutants to reach the MS4.

**Informational website.** The City maintains a stormwater website located at <https://raleighnc.gov/stormwater>.

**Distribute public education materials to identified user groups.** The City utilizes multiple mechanisms to provide educational materials to identified user groups, including attending City events to engage the general public, utilization of social media platforms, mailing materials to target audiences, and providing materials during response to complaint calls. Additionally, the City participates in the Clean Water Education Partnership (CWEP), which conducts regional media campaigns and develops educational materials. Media campaigns and materials include television public service announcements, radio public service announcements, print advertisements, and a stormwater education website at <https://nc-cleanwater.com/>.

**Promote and maintain Hotline(s) or Helpline(s).** The City maintains a public helpline, referred to as the stormwater administration helpline, at (919) 996-3940, which is included on education and outreach materials and the website. The helpline is staffed by multiple stormwater administrative staff during regular business hours.

**Implement a public education and outreach program.** The City implements a program to educate the general public, provide classroom educational activities, and target audiences

selected based on target parameters of interest and associated sources, as informed by other MS4 permit program elements.

		FY2023	FY2024 – FY2027		
Part II Section B.2 (e). Promote and maintain hotline(s) or helpline(s)	Promote and maintain a stormwater hotline(s) or helpline(s) for the public to request information about stormwater, public involvement & participation, and to report illicit connection and discharges, etc.	Maintain the stormwater administration helpline to share information and receive public complaints.  Evaluate the program effectiveness annually and notify the Water Quality Manager of plan and/or program modifications.	Maintain the stormwater administration helpline to share information and receive public complaints.  Evaluate the program effectiveness annually and notify the Water Quality Manager of plan and/or program modifications.	Stormwater Program Manager  Water Quality Manager  Administrative Support Customer Service	<ul style="list-style-type: none"><li>Report number of calls handled by the stormwater administration helpline by type of call</li></ul>
Part II Section B.2 (f). Implement a public education and outreach program	The permittee’s outreach program, including those elements implemented locally or through a cooperative agreement, shall include a combination of approaches designed to reach the target audiences. For each media, event, or activity, including those elements implemented locally or through a cooperative agreement the permittee shall estimate and record the extent of exposure.	Review annually the Education, Outreach, and Public Involvement Plan and update, as needed.  Review annually the Communications Plan and update, as needed.  Implement the public education and outreach program utilizing the Education, Outreach, and Public Involvement Plan and the Communications Plan.  Evaluate the program effectiveness annually and notify the Water Quality Manager of plan and/or program modifications.	Review annually the Education, Outreach, and Public Involvement Plan and update, as needed.  Review annually the Communications Plan and update, as needed.  Implement the public education and outreach program utilizing the Education, Outreach, and Public Involvement Plan and the Communications Plan.  Evaluate the program effectiveness annually and notify the Water Quality Manager of plan and/or program modifications.	Stormwater Program Manager  Water Quality Manager  Public Education  Water Quality Project Development, Monitoring, and Volunteer Engagement  Communications	<ul style="list-style-type: none"><li>Report City events and number of handouts distributed at each event</li><li>Report City in-school events and number of participants</li></ul>

## Section 5: Public Involvement and Participation

As documented in Part II Section C of the MS4 permit, the objectives of this program are to provide opportunities for the public to participate in program development and implementation and to comply with applicable state and local public notice requirements. This is achieved through the application of a variety of BMPs detailed in Table 6.

**Volunteer community involvement program.** The City promotes multiple volunteer opportunities on its website, including Adopt a Stream, storm drain marking, and the volunteer water quality monitoring program.

**Establish a mechanism for public involvement.** The City engages the public through the Stormwater Management Advisory Commission (SMAC). The SMAC, which is comprised of City residents, meets with Stormwater Management Division staff to discuss program activities and provides feedback to inform Stormwater Management Division decisions.

**Establish Hotline(s) or Helpline(s).** As described in Section 4, the City maintains the stormwater administration helpline at (919) 996-3940 to share information with the public, including public involvement and engagement opportunities.

**Public review and comment.** A review and comment period will be provided for public input before finalization of updates to the SWMP. Public input will also be received during a public hearing. Once approved by DEQ or more than 90 days after submission, the City will make the current version of the SWMP available to the public on their website.

**Public notice.** The City complies with public notice requirements when implementing their public involvement and participation program. Public notice is provided for public engagement opportunities during all SMAC meetings.

Table 6. BMP Measurable Goals for the Public Involvement and Participation Program

Part II Section C.2 (e). Public notice	Pursuant to 40 CFR 122.34 the permittee must, at a minimum, comply with State, Tribal and local public notice requirements when implementing a public involvement / participation program	Place legal public notice to advertise public review and comment opportunities when implementing a public involvement/participation program, as needed.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Place legal public notice to advertise public review and comment opportunities when implementing a public involvement/participation program, as needed.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager	<ul style="list-style-type: none"><li>If public notice occurred for SWMP updates, report mechanism(s) used to advertise public review and comment and public notice period</li><li>Report number of SMAC meetings that provided an opportunity for public involvement/participation</li></ul>

## Section 6: Illicit Discharge Detection and Elimination

As documented in Part II Section D of the MS4 permit, the objectives of this program are to detect and eliminate illicit discharges to the City's MS4; address significant contributors of pollutants to the MS4; implement appropriate enforcement procedures and actions; maintain a map showing the City's major MS4 outfalls to waters of the state; and inform employees, businesses, and the general public of hazards associated with illegal discharges. These objectives are achieved through a variety of BMPs detailed in Table 7.

**Maintain appropriate legal authorities.** The City maintains legal authorities to operate its program as documented in Section 3.1.

**Maintain a storm sewer system base map of the major MS4 outfalls.** The City maintains a storm sewer base map of major MS4 outfalls, as described in Section 2.2.

**Inspection and detection program to detect dry weather flows at MS4 outfalls.** The IDDE program is conducted by the City under the guidelines provided in the most recent version of the IDDE and dry weather screening standard operating procedures (SOPs) to specify a timeframe for monitoring and identify the number of outfalls for screening and areas to be targeted for inspection.

**Employee training.** Employee training on detection and reporting of illicit discharges is conducted regularly to ensure that City staff can recognize and report illicit discharges. Training is conducted virtually, in an in-person classroom setting, or by other means.

**Maintain a public reporting mechanism(s).** In addition to the stormwater administration helpline discussed in Section 4, the public may report an illicit discharge via the City's illegal discharge email address, the SeeClickFix mobile application, and other mechanisms documented on the City website and outreach materials.

**Documentation.** The City maintains documentation for each illicit discharge investigation for a minimum of five years, including the date of the activity and any enforcement actions and remediation activities that occurred. During each illicit discharge investigation, City staff evaluate if the discharge poses an imminent threat to health or the environment and confirms the required notification to DEQ is completed, as needed.

Table 7. BMP Measurable Goals for the IDDE Program

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metrics
		FY2023	FY2024 – FY2027		
Part II Section D.2 (a). Maintain appropriate legal authorities	Maintain adequate ordinance or other legal authorities to prohibit illicit connections and discharges and enforce the approved IDDE program	Maintain and enforce public ordinances. Update, if necessary, to maintain legal authority.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Maintain and enforce public ordinances. Part II Section D.2 (e). Maintain a public reporting mechanism(s)	Maintain and publicize reporting mechanism(s) for the public to report illicit connections and discharges	Maintain the stormwater administration helpline to receive public reports.  Maintain the illicit discharge reporting email address ( <a href="mailto:IllegalDischarge@raleighnc.gov">IllegalDischarge@raleighnc.gov</a> ).  Coordinate with appropriate City staff so illicit discharge complaints received through the SeeClickFix app are routed to the Stormwater Management Division.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Maintain the stormwater administration helpline to receive public reports.  Maintain the illicit discharge reporting email address ( <a href="mailto:IllegalDischarge@raleighnc.gov">IllegalDischarge@raleighnc.gov</a> ).  Coordinate with appropriate City staff so illicit discharge complaints received through the SeeClickFix app are routed to the Stormwater Management Division.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  Administrative Support Customer Service  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites	<ul style="list-style-type: none"><li>Report the total number of illicit discharge complaints received</li><li>See helpline reporting metrics in Table 5, Part II Section B.2 (e)</li></ul>
Part II Section D.2 (f). Documentation	The permittee shall document the date of investigations, any enforcement action(s) or remediation that occurred.	Maintain IDDE inspection records, notices of violations and compliance, and other program records.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Maintain IDDE inspection records, notices of violations and compliance, and other program records.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites	<ul style="list-style-type: none"><li>Report date(s) of investigations, any enforcement action(s), and remediation that occurred</li></ul>

## Section 7: Construction Site Runoff Controls

As documented in Part II Section E of the MS4 permit, the objectives of this program are to:

- Reduce pollutants in stormwater runoff from construction activities disturbing one or more acres of land, or less than an acre within a larger common plan of development located within the City corporate limits and ETJ area.
- Provide procedures for public input, sanctions to ensure compliance, requirements for construction site operators to implement appropriate erosion and sediment control practices, review of site plans that incorporate consideration of potential water quality impacts, and procedures for site inspection and enforcement of control measures.
- Implement a locally delegated program that meets state requirements.

**Delegated local program.** The erosion and sediment control program is delegated to the City by DEQ. The City adopted an erosion and sediment control ordinance, originally as part of its development regulations, and recodified the ordinance on June 1, 2021, under the City's UDO, Erosion and Sedimentation Control. The UDO is updated, when necessary, to meet DEQ's minimum requirements. The City's UDO exceeds the MS4 permit requirement, requiring SCMs to reduce pollutants in stormwater runoff from construction activities disturbing 12,000 square feet or more of land surface. The UDO is available on the City stormwater website listed in Section 3.1. The objectives of the erosion and sediment control program include identifying critical areas, limiting time of exposure and exposed areas, controlling surface waters and sedimentation, managing stormwater runoff, and controlling operations in lakes or natural watercourses.

**Plan reviews.** Erosion and sediment control plans for new development and redevelopment within the City are reviewed by Plan Review staff for compliance with the UDO and the Raleigh Guidance for Land Disturbing Activities and amendments.

**Construction inspections.** The City Development Inspections Program staff inspect the land-disturbing activities at reasonable times to ensure the activities are being conducted in accordance with the approved plan or the requirements of the UDO and to determine whether the measures implemented are effective in controlling accelerated erosion and preventing off-site sedimentation.

These objectives are achieved through a variety of BMPs detailed in Table 8.

Table 8. Program Elements for Construction Site Runoff Controls

Program Element	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
	FY2023	FY2024 – FY2027		
Part II Section E.2 (a). The permittee has a delegated or authorized Sediment and Erosion Control Program. As such, to the extent authorized by law, the permittee is responsible for compliance with the Sediment Pollution Control Act of 1973 and Chapter 4 of Title 15A of the North Carolina Administrative Code. The delegated or authorized Sediment and Erosion Control Program effectively meets the MEP standard for Construction Site Runoff Controls by permitting and controlling development activities disturbing one or more acres of land surface and those activities less than one acre that are part of a larger common plan of development as authorized under the Sediment Pollution Control Act of 1973 and Chapter 4 of Title 15A of the North Carolina Administrative Code.	Implement standard construction site inspection procedures.  Perform erosion and sediment control plan reviews.  Perform enforcement activities, if necessary.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Implement standard construction site inspection procedures. Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  Development Inspections Program  Plan Review	<ul style="list-style-type: none"><li>Report number of inspections and enforcement activities conducted</li></ul>
Part II Section E.2 (b). The NCG010000 permit establishes requirements for construction site operators to control waste such as discarded building materials, concrete truck washout, chemicals, litter, and sanitary waste at the construction site that may cause adverse impacts to water quality.	Perform construction site inspections for the erosion and sediment control program and appropriate enforcement activities that meet requirements of Part II Section E.2 (a), if necessary.  Perform illicit discharge investigations when reported by City staff or residents.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Perform construction site inspections for the erosion and sediment control program and appropriate enforcement activities that meet requirements of Part II Section E.2 (a), if necessary.  Perform illicit discharge investigations when reported by City staff or residents.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  Development Inspections Program  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites	<ul style="list-style-type: none"><li>N/A, see reporting metrics in Part II Section E.2 (a) and Table 7, Part II Section D (f)</li></ul>
Part II Section E.2 (c). The permittee shall provide and promote a means for the public to notify the appropriate authorities of observed erosion and sedimentation problems. The permittee may implement a plan promoting the existence of the DEQ “Stop Mud” hotline (1-866-STOPMUD) to meet the requirements of this paragraph.	Maintain the stormwater administration helpline to receive public reports.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Maintain the stormwater administration helpline to receive public reports.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  Administrative Support Customer Service	<ul style="list-style-type: none"><li>N/A, see reporting metrics in Table 5, Part II Section B.2 (c)</li></ul>
Part II Section E.2 (d). For new development and redevelopment projects to be built within the permittee’s planning jurisdiction by entities with eminent domain authority, the permittee shall, to the MEP, coordinate the approval of the construction site runoff control with the DEMLR.	Coordinate with DEQ for development and redevelopment projects by entities with eminent domain authority, if necessary. This includes land-disturbing activities conducted by local, state, or United States governments or entities with the power of eminent domain (e.g., public utilities), which remain under jurisdiction of the Division of Energy, Mineral, and Land Resources (DEMLR).	Coordinate with DEQ for development and redevelopment projects by entities with eminent domain authority, if necessary. This includes land-disturbing activities conducted by local, state, or United States governments or entities with the power of eminent domain (e.g., public utilities), which remain under jurisdiction of the DEMLR.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications. 	Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.			

## Section 8: Post-Construction Site Runoff Controls

As documented in Part II Section F of the MS4 permit, the objectives of this program are to manage stormwater runoff from development that disturbs one acre or more of land surface within the City's corporate limits and ETJ area, provide a mechanism requiring long-term operation and maintenance of SCMs, and ensure controls are in place to minimize water quality impacts. These objectives are achieved through the application of a variety of BMPs detailed in Tables 9 and 10.

**Nutrient Sensitive Waters.** The City implements the Neuse River Basin Nutrient Sensitive Waters Management Strategy throughout the City corporate limits and ETJ area.

**Post-construction stormwater management program.** The City maintains appropriate ordinances for implementing the program, as documented in Section 3.1.

**Strategies which include SCMs appropriate for the MS4.** Through the UDO and Stormwater Design Manual, the City requires that SCMs are designed to meet DEQ requirements, and designs are reviewed by Plan Review staff prior to construction approval. SCM construction is confirmed by qualified third-party professionals through an as-built submittal process, which requires City acceptance prior to issuance of the Certificate of Occupancy. To confirm adequate operation and maintenance of SCMs, the City requires annual inspection reports by qualified professionals as defined by the UDO. The City maintains inspection records of each SCM and conducts enforcement activities, if necessary, when SCMs are deemed noncompliant.

**Deed restrictions and protective covenants.** The City provides mechanisms to record deed restrictions and protective covenants in the UDO, as documented in Section 3.1.

**Operation and maintenance plan.** The City requires an operation and maintenance plan with a legally enforceable acknowledgement by the responsible party for each SCM during the design review process; if revisions are made, the updated operation and maintenance plan must be approved. The City maintains records of the plan for each SCM.

**Educational materials and training for developers.** The City provides periodic training for contractors and developers.

Table 9. BMP Measurable Goals for Post Construction Site Runoff Control

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section F.2 (a). Post-construction stormwater management program	Maintain an ordinance (or similar regulatory mechanism) that authorizes a program to address stormwater runoff from new development and redevelopment to the extent allowable under the State law	<p>Review the UDO and Stormwater Design Manual annually and make documents available to developers and construction site operators.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review the UDO and Stormwater Design Manual annually and make documents available to developers and construction site operators.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>Plan Review</p>	<ul style="list-style-type: none"><li>N/A, see reporting metrics documented in Table 4, Part II Section A</li></ul>
Part II Section F.2 (b). Strategies which include SCMs appropriate for the MS4	<p>Maintain strategies that include a combination of structural and/or non-structural SCMs implemented in concurrence with (a) above. Provide a mechanism to require long-term operation and maintenance of structural SCMs. Require annual inspection reports of permitted structural SCMs performed by a qualified professional.</p> <p>A qualified professional (as defined in the UDO) means an individual trained and/or certified in the design, operation, inspection, and maintenance aspects of the SCMs being inspected, for example, someone trained and certified by NC State for SCM Inspection &amp; Maintenance.</p> <p>Within 12 months of the effective date of this permit, the permittee shall evaluate, and revise as needed, SCM requirements, to be at least as stringent as the minimum requirements in 15A NCAC 02H .1000.</p>	<p>Maintain the UDO and Stormwater Design Manual so that the City requirements are at least as stringent as the minimum requirements in 15A NCAC 02H .1000 and make documents available to developers and construction site operators.</p> <p>Review annually the SCM Inspections Program Plan and update, if necessary.</p> <p>Implement the SCM inspection and maintenance program.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Maintain the UDO and Stormwater Design Manual so that the City requirements are at least as stringent as the minimum requirements in 15A NCAC 02H .1000 and make documents available to developers and construction site operators.</p> <p>Review annually the SCM Inspections Program Plan and update, if necessary.</p> <p>Implement the SCM inspection and maintenance program.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>SCM Program</p>	<ul style="list-style-type: none"><li>Report number of sites with SCMs</li><li>Report number of sites where SCM inspections have been received</li><li>Report SCM enforcement activities</li></ul>

Table 10. Program Elements for Post-Construction Site Runoff Controls

Program Element	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
	FY2023	FY2024 – FY2027		
Part II Section F.3. To meet the Post-construction Stormwater Runoff Control requirements the permittee may use the Department's model ordinance, design its own post-construction practices that meet or exceed the rules found in 15A NCAC 02H .1000, or develop its own comprehensive watershed plan that is determined by the Department to meet the post-construction stormwater management measure required by 40 Code of Federal Regulations § 122.34(b)(5) (1 July 2003 Edition).	<p>Review annually the DEQ model ordinance and regulations for changes affecting the City’s post-construction practices. Incorporate and submit revisions to DEQ for approval, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review annually the DEQ model ordinance and regulations for changes affecting the City’s post-construction practices. Incorporate and submit revisions to DEQ for approval, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>Plan Review</p>	<ul style="list-style-type: none"><li>Report whether UDO was updated (Y/N)</li></ul>
Part II Section F.4. To the extent allowable under State law, additional requirements shall apply to projects draining to certain sensitive receiving waters as set forth in 15A NCAC 02H .1017(9). For areas draining to Nutrient Sensitive Waters (NSW), where the Department has approved a locally implemented Nutrient Management Strategy that addresses post-construction runoff, the provisions of that Strategy fulfill the MS4 post-construction requirement.	<p>Maintain Table 1, which identifies City receiving waters, including NSW and Water Supply Watershed designations.</p> <p>Implement the Neuse River Basin Nutrient Sensitive Waters Management Strategy throughout the City’s corporate limits and ETJ area. Implement Water Supply Watershed rules in designated watersheds.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Maintain Table 1, which identifies City receiving waters, including NSW and Water Supply Watershed designations.</p> <p>Implement the Neuse River Basin Nutrient Sensitive Waters Management Strategy throughout the City’s corporate limits and ETJ area. Part II Section F.5. The permittee shall meet the requirements of the post-construction program for construction projects that are performed by, or under contract for, the permittee. To meet this requirement, the permittee may either develop the necessary requirements for post-construction controls that will pertain to their own projects, or develop procedures to ensure that the permittee meets these requirements by complying with other entities’ Phase I or Phase II Stormwater Management Programs for post-construction. If the permittee decides to rely on another program for compliance with these program areas for their own projects, they shall indicate in their Stormwater Management Program that the permittee will fully comply with the requirements of the second party’s post-construction programs.	<p>Maintain UDO and Stormwater Design Manual and make documents available to all City Departments.</p> <p>Review annually the Asset Management SCM Operation &amp; Maintenance Plan and update, if necessary.</p> <p>Implement SCMs and dams asset management program.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Maintain UDO and Stormwater Design Manual and make documents available to all City Departments.</p> <p>Review annually the Asset Management SCM Operation &amp; Maintenance Plan and update, if necessary.</p> <p>Implement SCMs and dams asset management program.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>Plan Review</p> <p>SCMs and Dams Asset Management Program</p>	<ul style="list-style-type: none"><li>N/A, see reporting metrics in Table 9, Part II Section F.2 (b) and Table 11, Part II Section G.2 (g)</li><li>Number of City projects approved for post-construction compliance</li></ul>

—

## Section 9: Pollution Prevention and Good Housekeeping for Municipal Operations

As documented in Part II Section G of the MS4 permit, the objectives of this program are to reduce stormwater pollution from municipal operations that drain to the MS4 and incorporate pollution prevention and good housekeeping techniques into municipal operations.

This is achieved through the application of a variety of BMPs detailed in Table 11 and managed in cooperation with multiple departments in the City, also referred to as facility owning departments, which may include but are not limited to the following:

- Convention Center and Performing Arts
- Emergency Communications Center
- Engineering Services Department
- Raleigh Fire Department
- Office of Emergency Management
- Parks, Recreation, and Cultural Resources Department
- Police Department
- Raleigh Water
- Transportation Department
- Solid Waste Services

**Inventory of municipal facilities and operations.** The City has developed an inventory of municipal facilities and defined criteria to identify facilities that have significant potential for generating polluted stormwater runoff. The City will update the list as new facilities are constructed or as the Stormwater Management Division is made aware of facility changes. Additionally, the City maintains a list of operations that may generate polluted stormwater runoff. The City also maintains a list of municipally-owned SCMs.

**Inspection and maintenance program for municipal facilities and operations.** The Stormwater Management Division oversees a program for managing stormwater pollution from municipal facilities and operations with significant potential for generating polluted stormwater runoff through facility inspections conducted by facility owning departments and the Stormwater Management Division and maintenance performed by facility owning departments. This may include, but is not limited to, municipal facilities with NPDES Industrial Stormwater Permits, other facilities with significant potential for generating polluted stormwater runoff, municipal operations with significant potential for generating polluted stormwater runoff outside of municipal facilities, and maintenance of municipally owned streets, roads, and parking lots.

**Site pollution prevention plans (SPPPs) for municipal facilities.** City facilities with NPDES Industrial Stormwater Permits maintain stormwater pollution prevention plans (SWPPPs), as required by their respective permits. The City also coordinated with facility owning departments to develop SPPPs for municipal facilities that have significant potential for generating polluted stormwater runoff but have not been required to apply for an NPDES Industrial Stormwater Permit.

**Spill response procedures for municipal facilities and operations.** The City maintains a general SOP to establish the responsibilities and steps to be followed by City staff in the handling of emergencies involving hazardous and non-hazardous materials that threaten to enter the MS4. Site specific spill response procedures are included in SWPPPs, as required by the NPDES Industrial Stormwater Permits. Spill response procedures are also included in SPPPs for municipal facilities and operations with significant potential for generating polluted stormwater runoff.

**Prevent or minimize contamination of stormwater runoff from municipal facility areas used for vehicle and equipment cleaning.** Measures and actions to be taken for preventing and minimizing pollution of stormwater runoff from areas used for vehicle and equipment cleaning are identified in the SWPPP for each municipal facility with an NPDES Industrial Stormwater Permit. For municipal facilities without SWPPPs that conduct vehicle washing, such as fire stations with three or fewer trucks, the Stormwater Management Division is coordinating with facility staff to utilize measures to remove or reduce wash water runoff from entering the storm sewer system. Stormwater Management Division staff review all plans for new construction and renovations for City facilities that require a permit by the UDO. When facilities with three or fewer fire trucks undergo structural renovations, the City will recommend measures to prevent wash water from entering the storm sewer system during the plan review process.

**Street, road, and public parking lot maintenance.** The City conducts maintenance activities, such as street sweeping, leaf and lawn litter pick up, and other measures, to maintain municipally owned streets, roads, and public parking lots.

**Inspection and maintenance for municipally-owned or maintained SCMs and the storm sewer system.** The City conducts programs to inspect and maintain municipally-owned SCMs and the storm sewer system. This includes conducting third-party inspections of regulatory SCMs and visual inspections, use of pole cameras, and closed-caption television inspections to determine the storm sewer system condition. The City conducts maintenance activities, if necessary, based on the storm sewer system condition. Additionally, the Stormwater Management Division is executing agreements with facility owning departments to provide maintenance of SCMs located at municipal facilities.

**Staff training.** Employee training for pollution prevention and good housekeeping is conducted regularly, as described in the facility SPPP or SWPPP and in the Education, Outreach, and Public Involvement Plan. Training may be conducted virtually, in an in-person classroom setting, or by other means.

Table 10. BMP Measurable Goals for Pollution Prevention and Good Housekeeping for Municipal Operations

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section G.2 (a). Inventory of municipal facilities and operations	Maintain an inventory of municipal facilities and operations owned and operated by the permittee that have been determined by the permittee to have significant potential for generating polluted stormwater runoff. Also maintain an inventory of municipally owned structural SCMs.	Review the inventory annually and update, as needed, based on changes in municipal facilities and operations.  Maintain and update annually an inventory of municipally-owned SCMs.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Review the inventory annually and update, as needed, based on changes in municipal facilities and operations.  Maintain and update annually an inventory of municipally-owned SCMs.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites  SCMs and Dams Asset Management Program	<ul style="list-style-type: none"><li>Report inventory of facilities determined to have significant potential for generating polluted stormwater runoff</li><li>Report number of municipal SCMs by type</li></ul>
Part II Section G.2 (b). Inspection and maintenance program for municipal facilities and operations	Implement an inspection and maintenance program for facilities and operations owned and operated by the permittee for potential sources of polluted runoff, including stormwater controls and conveyance systems. The inspection program shall evaluate pollutant sources, document deficiencies, plan corrective actions, implement appropriate controls, and document the accomplishment of corrective actions. The maintenance program shall include maintenance activities and procedures aimed at preventing or reducing pollutants generated from municipal facilities and operations.	Review annually the Asset Management SCM Operations and Maintenance Plan and Industrial Facility Inspection Program Plan guidance and update, as needed.  Inspect and document municipal facility inspections, including any corrective actions.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Review annually the Asset Management SCM Operations and Maintenance Plan and Industrial Facility Inspection Program Plan guidance and update, as needed.  Inspect and document municipal facility inspections, including any corrective actions.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites  Facility Owning Departments	<ul style="list-style-type: none"><li>Report number of facilities inspected</li><li>Report corrective actions taken at municipal facilities or operations</li></ul>
Part II Section G.2 (c). SPPPs for municipal facilities	Maintain and implement SPPPs for municipal facilities owned and operated by the permittee that have been determined by the permittee to have significant potential for generating polluted stormwater runoff that has the goal of preventing or reducing pollutant runoff.	Review annually facility SPPPs/SWPPPs with facility owning departments and update, as needed.  Develop SPPPs/SWPPPs for newly identified facilities, if necessary.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Review annually facility SPPPs/SWPPPs with owning departments and update, as needed.  Develop SPPPs/SWPPPs for newly identified facilities, if necessary.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites  Facility Owning Departments	<ul style="list-style-type: none"><li>Report number of facilities within the City corporate limits with SPPPs/SWPPPs</li></ul>
Part II Section G.2 (d). Spill response procedures for municipal facilities and operations	Maintain spill response procedures for municipal facilities and operations owned and operated by the permittee that have been determined by the permittee to have significant potential for generating polluted stormwater runoff.	Review facility, operation, and Citywide spill response procedures annually and update, as needed.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Review facility, operation, and Citywide spill response procedures annually and update, as needed.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites  Facility Owning Departments	<ul style="list-style-type: none"><li>Report number of spill response procedures developed/updated</li></ul>

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section G.2 (e). Prevent or minimize contamination of stormwater runoff from all areas used for vehicle and equipment cleaning	<p>Describe measures that prevent or minimize contamination of the stormwater runoff from all areas used for vehicle and equipment cleaning, including fire stations that have more than three fire trucks and ambulances. Perform all cleaning operations indoors, cover the cleaning operations, ensure wash water drains to the sanitary sewer system, collect wash water and stormwater run-on from the cleaning area and provide treatment or recycling, or other equivalent measures. If sanitary sewer is not available to the facility and cleaning operations take place outdoors, wash water shall drain to an SCM for treatment, or else the cleaning operations shall take place on or drain directly to grassed or graveled areas to prevent point source discharges of the wash water into the storm drains or surface waters.</p> <p>Where cleaning operations cannot be performed as described above and when operations are performed in the vicinity of a storm drainage collection system, the drain is to be covered with a portable drain cover during cleaning activities. Any excess standing water shall be removed and properly handled prior to removing the drain cover.</p> <p>Facilities that have three or fewer fire trucks and ambulances should attempt to comply with the above requirements; however, those that cannot comply with these requirements due to existing limitations shall incorporate structural measures during facility renovation to the extent practicable.</p>	<p>Review procedures for vehicle and equipment cleaning operations annually and update, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review procedures for vehicle and equipment cleaning operations annually and update, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites</p> <p>Facility Owning Departments</p>	<ul style="list-style-type: none"><li>• Report number of high priority facilities performing vehicle and equipment cleaning operations</li><li>• Report actions taken to prevent or minimize stormwater runoff from vehicle and equipment cleaning</li><li>• Report number of facilities with three or fewer fire trucks/ambulances undergoing renovations that will include structural measures to prevent wash water from entering the storm sewer system to the extent feasible</li></ul>

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section G.2 (f). Streets, roads, and public parking lots maintenance	The permittee shall implement BMPs to reduce polluted stormwater runoff from municipally owned streets, roads, and public parking lots within the corporate limits.	<p>Document street, road, and public parking lot BMPs in the MS4 Operation and Maintenance Plan.</p> <p>Implement BMPs to reduce polluted stormwater runoff from municipally-owned streets, roads, and public parking lots.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review annually the MS4 Operation and Maintenance Plan and revise, as needed.</p> <p>Implement BMPs to reduce polluted stormwater runoff from municipally-owned streets, roads, and public parking lots.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>Transportation Field Services</p> <p>Facility Owning Departments</p>	<ul style="list-style-type: none"><li>Report maintenance activities completed in the previous fiscal year</li></ul>
Part II Section G.2 (g). Inspection and Maintenance (I&M) for municipally-owned or maintained stormwater control measures (SCMs) and the storm sewer system.	The permittee shall maintain and implement an inspection and maintenance program for SCMs owned and operated by the municipality and the municipal storm sewer system including catch basins, the conveyance system, and SCMs.	<p>Review annually the MS4 Operation and Maintenance Plan and Asset Management SCM Operation and Maintenance Plan, and revise, as needed.</p> <p>Review annually the Asset Management SCM Operation and Maintenance Plan, and revise, as needed.</p> <p>Establish service level agreements (SLAs) with facility owning departments address shared ownership and maintenance responsibilities and outstanding maintenance needs for SCMs located at municipal facilities.</p> <p>Review existing SLAs and coordinate with facility owning departments, if necessary.</p> <p>Implement inspection and maintenance programs documented in the MS4 Operation and Maintenance Plan and Asset Management SCM Operation and Maintenance Plan.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review annually the MS4 Operation and Maintenance Plan and Asset Management SCM Operation and Maintenance Plan, and revise, as needed.</p> <p>Implement inspection and maintenance programs documented in the MS4 Operation and Maintenance Plan and Asset Management SCM Operation and Maintenance Plan.</p> <p>Review existing SLAs and coordinate with facility owning departments, if necessary.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>Transportation Field Services</p> <p>SCM Program</p> <p>SCMs and Dam Asset Management Program</p> <p>Stormwater Maintenance/Asset Management Coordination</p> <p>Facility Owning Departments</p>	<ul style="list-style-type: none"><li>Report number of municipal SCMs inspected</li><li>Report number of storm sewer conveyance system components inspected</li><li>Report maintenance and repair actions</li></ul>

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section G.2 (h). Staff training	Maintain and implement a training plan that indicates when, how often, and who is required to be trained and what they are to be trained on.	<p>Review annually and implement the Education, Outreach, and Public Involvement Plan, in conjunction with Part II Section D.2 (d) in Table 7, which documents the employee training program, including who should receive training, types of training, and frequency.</p> <p>Conduct employee training and document attendance.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review annually the Education, Outreach, and Public Involvement Plan and update, as needed.</p> <p>Conduct employee training and document attendance.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites</p>	<ul style="list-style-type: none"><li>Report types of training provided and number of staff who completed pollution prevention and good housekeeping training</li></ul>

## Section 10: Program to Monitor and Control Pollutants in Storm Water Discharges to Municipal Systems

As documented in Part II Section H of the MS4 permit, the objective of this program is to evaluate pollutants in stormwater discharges to the City's MS4 from industrial facilities that have been determined to contribute or have potential to contribute substantial pollutant loading to the MS4, including the following types of facilities: hazardous waste treatment, disposal, and recovery facilities; industrial facilities subject to Section 313 of Title III of SARA; and facilities with NPDES Industrial Stormwater Permits. This is achieved through a variety of BMPs detailed in Table 12.

**Maintain an inventory of industrial facilities.** The City maintains an inventory of industrial facilities and previous inspection records. At least once per permit cycle, the City reviews and updates the list of facilities with data obtained from the DEQ NPDES Industrial Stormwater Permit program to identify permitted industrial facilities, EPA's RCRAInfo search tool (<https://enviro.epa.gov/facts/rcrainfo/search.html>) to identify permitted hazardous waste facilities, and EPA's Toxic Release Inventory (<https://www.epa.gov/toxics-release-inventory-tri-program#trisearch>) to identify facilities that are subject to Section 313 of SARA Title III.

**Inspection program.** The City has established inspection guidance and documentation procedures for the program.

**Evaluate industrial facilities discharging stormwater to the City's MS4.** Industrial sites within the City's corporate limits will be evaluated using the inspection program guidance. Those sites demonstrating significant non-compliance will be reported to the permitting authority or appropriate enforcement action will be taken for non-permitted sites where non-compliance is determined. Where compliance with an existing NPDES Industrial Stormwater Permit does not result in adequate control of pollutants to the MS4, City staff will recommend and document the need for modifications or additional action to the permit issuing authority. If a potential illicit discharge is identified, it will be investigated using the procedures described in Section 6.

Table 11. BMP Measurable Goals for the Program to Monitor and Control Pollutants in Stormwater Discharges to Municipal Systems

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section H.2 (a). Maintain an inventory of industrial facilities	<p>Maintain an inventory of permitted hazardous waste treatment, disposal, and recovery facilities, industrial facilities that are subject to Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA), and industrial facilities identified with an industrial activity permitted to discharge stormwater to the permittee’s MS4.</p> <p>For the purposes of this permit, industrial activities shall mean all permitted industrial activities as defined in 40 CFR 122.26.</p>	<p>Review at least once per permit cycle the industrial facility inventory and update, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review at least once per permit cycle the industrial facility inventory and update, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites</p>	<ul style="list-style-type: none"><li>Report number of industrial facilities identified within the City’s corporate limit</li></ul>
Part II Section H.2 (b). Inspection program	<p>Identify priorities and inspection procedures. At a minimum, priority facilities include those identified above in subsection II.H.2.a.</p>	<p>Review annually the Industrial Facility Inspection Program Plan and update inspection guidance and checklists, if necessary.</p> <p>Review inspections results and identify program priorities, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Review annually the Industrial Facility Inspection Program Plan and update inspection guidance and checklists, if necessary.</p> <p>Review inspections results and revise program priorities, as needed.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites</p>	<ul style="list-style-type: none"><li>Report number of facility inspections conducted</li><li>Identify program priorities</li></ul>
Part II Section H.2 (c). Evaluate industrial facilities discharging stormwater to the City’s MS4	<p>The Permittee is required to evaluate control measures implemented at permitted hazardous waste treatment, disposal, and recovery facilities, industrial facilities that are subject to Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA), industrial facilities identified with an industrial activity permitted to discharge stormwater to the permittee’s MS4, or as identified as an illicit discharge under the IDDE Program.</p> <p>For permitted facilities, the municipality shall establish procedures for reporting deficiencies and non-compliance to the permitting agency. Where compliance with an existing industrial stormwater permit does not result in adequate control of pollutants to the MS4, municipality will recommend and document the need for permit modifications or additions to the permit issuing authority.</p> <p>For the purposes of this permit, industrial activities shall mean all permitted industrial activities as defined in 40 CFR 122.26. For the purpose of this permit, the Permittee is authorized to inspect the permitted hazardous waste treatment, disposal, and recovery facilities as an authorized representative of the Director.</p>	<p>Conduct inspection activities based on established procedures documented in City guidance and checklists.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Conduct inspection activities based on established procedures documented in City guidance and checklists.</p> <p>Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.</p>	<p>Stormwater Program Manager</p> <p>Water Quality Manager</p> <p>NPDES MS4 Permit Administration, IDDE, PPGH, NPDES Industrial Sites</p>	<ul style="list-style-type: none"><li>Report number of deficiencies identified and forwarded to DEQ</li><li>Report number of illicit discharges identified at industrial facilities</li></ul>

## Section 11: Water Quality Assessment and Monitoring

As documented in Part II Section I of the MS4 permit, the objective of this program is to evaluate the impacts of MS4 discharges on surface water quality. This is achieved through the application of a variety of BMPs detailed in Table 13.

**Water quality assessment and monitoring plan.** The City has developed a Water Quality Assessment and Monitoring Plan that identifies monitoring locations, a monitoring schedule, monitoring parameters, sample data analysis, and data evaluation and assessment. The Water Quality Assessment and Monitoring Plan is compliant with the monitoring and records requirements documented in Part V Section C of the MS4 permit.

**Water quality monitoring.** City staff conduct water quality monitoring, as documented in the Water Quality Assessment and Monitoring Plan. The current version of the plan has been submitted to DEQ.

Table 12. BMP Measurable Goals for Water Quality Assessment and Monitoring

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section I.2 (a). Water Quality Assessment and Monitoring Plan	Maintain a Water Quality Assessment and Monitoring Plan. The Plan shall include a schedule for implementing the proposed assessment and monitoring activities.	Review annually the Water Quality Assessment and Monitoring Plan and update, as needed.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Review annually the Water Quality Assessment and Monitoring Plan and update, as needed.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>Report updates and revisions to the Water Quality Assessment and Monitoring Plan and the date submitted to DEQ, if applicable</li></ul>
Part II Section I.2 (b). Water quality monitoring	Maintain and implement the Water Quality Assessment and Monitoring Plan submitted to DEMLR.	Conduct water quality monitoring and data evaluation as documented in the Water Quality Assessment and Monitoring Plan.  Provide the current Water Quality Assessment and Monitoring Plan to DEQ, if revised.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Conduct water quality monitoring and data evaluation as documented in the Water Quality Assessment and Monitoring Plan.  Provide the current Water Quality Assessment and Monitoring Plan to DEQ, if revised.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications. ## Section 12: Total Maximum Daily Loads

As documented in Part II Section J of the MS4 permit, the City will determine whether the MS4 discharges to receiving waters with a TMDL and identify the POCs, utilize BMPs within the six minimum control measures and the City's TMDL Plan(s) or Watershed Action Plan(s) to meet the assigned NPDES MS4 regulated stormwater WLA, and address the WLA assigned to the City to the MEP. The City is not expected to attain the water quality standards for the subject receiving waters.

The TMDLs identified within the City are documented in Section 2.5 and Table 2. The Falls Lake TMDL is being addressed through the City's participation in the Upper Neuse River Basin Association. As documented in Section 8, the Neuse River Estuary is a Nutrient Sensitive Water, so the City addresses this TMDL through the implementation of the Nutrient Sensitive Waters Management Strategy. The Pigeon House Branch and Perry Creek TMDL are local TMDLs without individual numeric WLAs assigned to the City MS4.

Implementation of TMDLs, such as Pigeon House Branch and Perry Creek, are achieved through the application of a variety of BMPs detailed in Table 14 for TMDLs with an individual numeric WLA or the program elements in Table 15 for other TMDLs within the corporate limits.

Table 13. BMP Measurable Goals for TMDL Program

		FY2023	FY2024 – FY2027		
Part II Section J.3 (a). Identify, describe and map watershed, outfalls, and streams	<p>Within 12 months the permittee shall prepare a plan that:</p> <ul style="list-style-type: none"><li>Identifies the watershed(s) subject to an approved TMDL with an approved Waste Load Allocation (WLAs) assigned to the permittee; and</li><li>Includes a description of the watershed(s); and</li><li>Includes a map of watershed(s) showing streams &amp; outfalls;</li><li>Identifies the locations of currently known major outfalls within its corporate limits with the potential of contributing to the cause(s) of the impairment to the impaired segments, to their tributaries, and to segments and tributaries within the watershed contributing to the impaired segments; and</li><li>Includes a schedule (not to exceed 6 months) to discover and locate other unknown major outfalls within its corporate limits that may be contributing to the cause of the impairment to the impaired stream segments, to their tributaries, and to segments and tributaries within the watershed contributing to the impaired segments.</li></ul>	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, evaluate strategies and tailor SWMP BMPs to address the POCs and associated TMDLs and develop a TMDL Plan.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, evaluate strategies and tailor SWMP BMPs to address the POCs and associated TMDLs and develop a TMDL Plan.	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>Report TMDLs with WLAs within the MS4</li><li>Report changes in outfall inventory that may be contributing to impairment of identified streams</li></ul>
Part II Section J.3 (b). Evaluate existing measures	<p>Within 12 months the permittee shall prepare a plan that:</p> <ul style="list-style-type: none"><li>Shall describe existing measures currently being implemented by the Permittee designed to achieve the MS4’s NPDES WLA and to reduce the TMDL pollutant of concern to the MEP within the watershed to which the TMDL applies; and</li><li>Provide an explanation as to how those measures are designed to reduce the TMDL pollutant of concern.</li></ul>	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, establish measures for identifying and reducing POCs to the MEP.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, establish measures for identifying and reducing POCs to the MEP.	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report POCs and measures taken for reduction</li></ul>

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section J.3 (c). Assessment of available monitoring data	Within 24 months the permittee shall prepare a plan that shall include an assessment of available monitoring data. Where long-term data is available, this assessment should include an analysis of the data to show trends.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, review and assess monitoring data.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, review and assess monitoring data.	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report monitoring data summary and data trends</li></ul>
Part II Section J.3 (d). Monitoring Plan	Within 24 months the permittee shall develop a Monitoring Plan for the permittee’s assigned NPDES regulated WLA as specified in the TMDL. The permittee shall maintain and implement the Monitoring Plan as additional outfalls are identified and as accumulating data may suggest. Following any review and comment by the Division the permittee shall incorporate any necessary changes to monitoring plan and initiate the plan within 6 months. Modifications to the monitoring plan shall be approved by the Division.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, develop TMDL monitoring plan for applicable assigned NPDES regulated WLA.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, develop TMDL monitoring plan for applicable assigned NPDES regulated WLA.	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report updates to monitoring plan</li></ul>
Part II Section J.3 (e). Additional Measures	Within 24 months the permittee shall prepare a plan to: <ul style="list-style-type: none"><li>Describe additional measures to be implemented by the permittee designed to achieve the permittee’s MS4’s NPDES WLA and to reduce the TMDL pollutant of concern to the MEP within the watershed to which the TMDL applies; and</li><li>Provide an explanation as to how those measures are designed to achieve the permittee’s MS4’s NPDES regulated WLA to the MEP within the watershed to which the TMDL applies.</li></ul>	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, establish programs and measures to be implemented within the City’s MS4 permit program that are designed to achieve the assigned MS4 NPDES regulated WLA and to reduce the TMDL pollutant of concern to the MEP within the watershed to which the TMDL applies.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, establish programs and measures to be implemented within the City’s MS4 permit program that are designed to achieve the assigned MS4 NPDES regulated WLA and to reduce the TMDL pollutant of concern to the MEP within the watershed to which the TMDL applies.	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report additional measures taken</li></ul>
Part II Section J.3 (f). Implementation Plan	Within 48 months the permittee shall prepare a plan that describes the measures to be implemented within the remainder of the permit term designed to achieve the MS4’s NPDES WLA and to reduce the TMDL pollutant of concern to the MEP; and <ul style="list-style-type: none"><li>Identify a schedule, subject to Division approval, for completing the activities.</li><li>Implement the permittee’s TMDL plan</li></ul>	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, establish a schedule to address the NPDES WLA pollutant of concerns	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, establish a schedule to address the NPDES WLA pollutant of concerns	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report achievement of schedule milestones</li></ul>

Permit Reference/BMP	Measurable Goals	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
		FY2023	FY2024 – FY2027		
Part II Section J.3 (g). Incremental Success	The permittee’s plan must outline ways to track progress and report successes designed to achieve the MS4’s NPDES regulated WLA and to reduce the TMDL pollutant of concern to MEP within the watershed to which the TMDL applies.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, track successes per the plan. Review and update as needed	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, track successes per the plan. Review and update as needed	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report successes</li></ul>
Part II Section J.3 (h). Reporting	The permittee shall conduct and submit to the Division an annual assessment of the program designed to achieve the MS4’s NPDES WLA and to reduce the TMDL pollutant of concern to the MEP within the watershed to which the TMDL applies. Any monitoring data and information generated from the previous year are to be submitted with each annual report.	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, prepare an assessment of activities and data analysis for the TMDL watershed plan	Continue to monitor TMDL development. If a TMDL is developed that assigns an individual numeric WLA to the City MS4, prepare an assessment of activities and data analysis for the TMDL watershed plan	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>N/A, Report annual assessment outcomes</li></ul>

Table 14. Program Elements for TMDL Program

Program Element	Program Actions		Responsible Party(ies)	Annual Reporting Metric(s)
	FY2023	FY2024 – FY2027		
Part II Section J.4. If no MS4 NPDES regulated waste load allocation (WLA) is specified in the TMDL At any time during the effective dates of this permit, if a TMDL has been approved that does not assign a WLA for the POC to the MS4, or if there was no WLA specified for the POC in the TMDL assigned to the MS4, in lieu of developing a plan within this permit section: within 24 months the Permittee shall evaluate strategies and tailor BMP’s within the Permittee’s MS4 service area and in the context of the scope of the six minimum permit measures to address the POC in the watershed(s) to which the TMDL applies, to the MEP and to the extent allowable by law.	Develop Watershed Action Plans for Pigeon House Branch and Perry Creek that include strategies and tailor BMPs to address the POC in the watersheds.  Implement the Watershed Action Plans.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Review annually the Watershed Action Plans and update, if necessary.  Implement the Watershed Action Plans.  Coordinate with the Department of Water Resources to integrate the Pigeon House Branch and Perry Creek Watershed Action Plans into the DEQ StoryMap format, as staff and resources are available within DEQ.  Evaluate the program effectiveness annually and notify the Water Quality Manager of program modifications.	Stormwater Program Manager  Water Quality Program Manager  Water Quality Project Development, Monitoring, and Volunteer Engagement	<ul style="list-style-type: none"><li>Report the development/maintenance of the Watershed Action Plans and modifications, if necessary</li><li>Report BMPs implemented</li></ul>

## Section 13: Program Assessment, Record Keeping, and Reporting

### 13.1 Record Keeping and Program Assessment

Program assessments may be conducted by DEQ throughout the duration of the MS4 permit. As required in Part III of the MS4 permit, the City will document implementation of this SWMP, including inspections, maintenance activities, educational programs, monitoring and sampling, implementation of BMPs, enforcement actions, and other stormwater activities.

Documentation will be kept on-file by the City for at least five years and made available to DEQ upon request. As required in Part IV.A of the MS4 permit, the City will retain records of monitoring data, including all calibration and maintenance records, and copies of reports required by the permit for at least five years from the date of the sample, measurement, report, or application.

The SWMP will be reviewed on an annual basis and updated, if necessary. This annual SWMP review will include reporting by responsible departments for each permit element to the Water Quality Manager, including whether updates are required to program actions or metrics, as documented in each program action in Table 4 through Table 15. The Water Quality Manager will be responsible for incorporating these program changes into the SWMP and documenting these program changes during annual reporting. The City will submit an annual report of the SWMP evaluation and monitoring information to DEQ, as described in Section 13.2.

### 13.2 Annual Reporting

As required in Part IV.B of the MS4 permit, the City will submit an annual report to DEQ that tracks progress in implementing the SWMP. The annual report will include the following components:

- A detailed description of the status of implementation of the SWMP, including the development and implementation of each major component of the SWMP for the past year and schedules and plans for the following year
- A description and justification of any proposed changes to the SWMP. This will include descriptions and supporting information for the proposed changes and how these changes will impact the SWMP (i.e., results, effectiveness, implementation schedule, etc.)
- Any necessary changes to programs or practices for assessment of management measures implemented through the SWMP
- A summary of data accumulated as part of the SWMP throughout the year with an assessment of what the data indicates
- An assessment of compliance with the permit, information on the establishment of appropriate legal authorities, inspections, and enforcement actions
- Discussion of program funding

### **13.3 Additional Reporting**

As stated in Part III and Part IV.C of the MS4 permit, the City will provide reporting information to DEQ more frequently if requested by DEQ. The documents that will be retained on file are included in Section 13.1.

# **Appendix A: Stormwater Permit Delegation of Signature Authority Form**

NC Department of Environmental Quality

Division of Energy, Mineral and Land Resources

## Stormwater Permit Delegation of Signature Authority Form

*Directions are in red.*

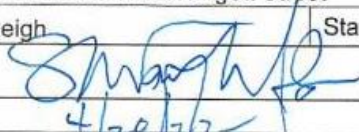

- ⇒ *This form shall be used to delegate signature authority from the permit Owner (Permittee) to another party. Only the Responsible Official defined below may submit permit applications and reports required by the permit (such as Data Monitoring Reports and Annual Reports) until this form is completed and submitted to the DEMLR Stormwater Program. Please note that delegating signature authority does not relieve the Permit Owner from the responsibility for permit compliance.*
- ⇒ *The permit Owner is the legal entity to which/whom a permit has been issued, and may be an individual or an organization such as a company or government agency. Every Owner is required to have a Responsible Official who meets the legal signature authority requirements in [40 CFR 122.22](#), summarized below:*
- *For a corporation, the Responsible Official shall be a president, secretary, treasurer, or vice-president in charge of a principal business function, or another individual who performs similar functions for the corporation, or the manager of one or more manufacturing, production, or operating facilities who is authorized to make management decisions about the facility operation.*
  - *For a partnership or sole proprietorship, the Responsible Official shall be a general partner or the proprietor, respectively; or*
  - *For a municipality, State, Federal, or other public agency, the Responsible Official shall be either a principal executive officer [City/County Manager] or ranking elected official [Mayor].*
- ⇒ *Even if delegated signatory authority has been delegated to another individual, the Responsible Official retains responsibility for compliance with permit conditions.*

Permittee:	City of Raleigh				
Permit Number:	NCS000245				
Responsible Official Title:	City Manager				
Email Address:	citymanager@raleighnc.gov	Phone:	919-996-3070		
Mailing Address:	222 W. Hargett Street				
City:	Raleigh	State:	NC	Zip:	27601

**A. Persons to Receive Signatory Authority**

⇒ The signatures of the persons listed below indicates their acceptance of signatory authority.

Delegated Party Name:	S. Wayne Miles				
Delegated Party Title:	Stormwater Program Manager				
Delegated Party Organization:	City of Raleigh				
Email Address:	wayne.miles@raleighnc.gov	Phone:	919-996-3964		
Mailing Address:	P.O. Box 590 West Hargett Street				
City:	Raleigh	State:	NC	Zip:	27601
Signature of Delegated Party indicating acceptance of Signatory Authority:

**B. Responsible Official Signature**

The Responsible Official, as identified in accordance with 40 CFR 122.22, is the appropriate individual with the authority to sign and submit reports for the organization.

As the Responsible Official, I, Marchell Adams-David (printed name),  
have the authority to enter into this Agreement for  
City of Raleigh (Owner/Organization Name).

I request that the DEMLR Stormwater Program include the persons listed in Part A of this form signatory authority for the above-named permit.

I acknowledge that I, and the persons listed in Part A of this form work at/for my organization and have authority to act as a signatory for purposes of the NCDEQ's electronic document systems.

By submitting this application, I, Marchell Adams-David (printed name),  
have read, understand, and accept the terms and conditions of the stormwater permit(s) for which I am the Responsible Official.
