

Eastgate Park Dam Rehabilitation

Updating and Repairing the Dam Structures

OVERVIEW OF EASTGATE PARK DAM

Eastgate Park opened in 1972 and dam improvements occurred in 1970 and the 1990's. No major work to the dam has been done since then. In 2023, the city completed a report that detailed safety deficiencies found in the dam. The report did not identify major safety concerns, but did identify problems that needed to be addressed to bring the dam back into compliance with NC Dam Safety.

NC Dam Safety, a division within the NC Department of Environmental Quality, oversees and regulates dam inspections and compliance within the state.

WHAT WE ARE DOING

To bring the dam back to compliance, we will construct a new spillway and regrade the dam banks. A series of public meetings will be held to hear from the public about the dam updates and repairs.

UPCOMING WORK

In Summer 2025, we plan to complete the design of the project and expect to start construction Summer 2026. The projected completion date of the project is mid Fall 2027. Visit raleighnc.gov and search "**Eastgate Park Dam**" for more information about the project and to read the engineering report.
