## INTRODUCTION

The new sign program is designed to improve the experience of visitors to the city's greenways and related facilities. The system encompasses a broad range of sign messages that identify, inform, direct and regulate. The program's standards for design, graphics and color schemes are designed to better reflect the quality of the City of Raleigh's Capital Area Greenway System, the professionalism of the department and promoting a positive image of the city.

In designing the sign program every effort was made to strike an appropriate balance between identity and utility. The system responds to a wide variety of needs while providing flexibility. While this document is directed at the sign program for the Capital Area Greenway, the system was also designed to have a visual connection to the sign program developed for the city's parks. The new sign programs will tie the identity of these outstanding recreational facilities together and better identify their relation to the city in an area that has many overlaps of similar facilities under the jurisdiction of county or state governments.

The adherence to the standards defined by this program will result in a sign system that reflects positively on the community, while continuing to promote the livability of Raleigh as a "park with a city in it."

APPROVED CAPITAL AREA GREENWAY LOGO

## RALEIGH PARKS & RECREATION

APPROVED RALEIGH PARKS AND RECREATION LOGOTYPE (SEE PAGE 04)

**\* FINAL ART TO BE PROVIDED BY RALEIGH PARKS AND RECREATION**

### [ LOGO / LOGOTYPE ]

The use of the Capital Area Greenway logo for signage should always be maintained as a consistent design element. There is one (1) approved version of the logo.

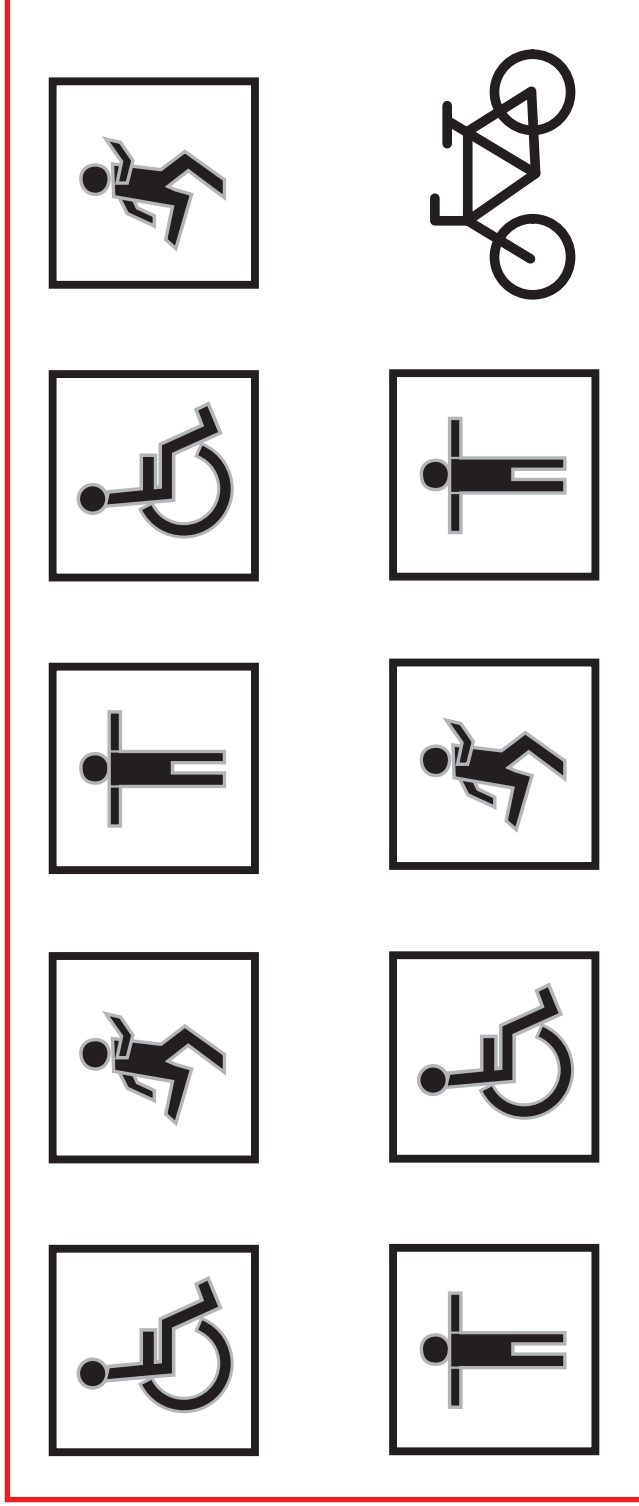

APPROVED DIRECTIONAL  
ARROW

APPROVED HANDICAP ACCESSIBILITY SYMBOL  
FOR THE CAPITAL AREA GREENWAY

APPROVED CAPITAL AREA GREENWAY PICTOGRAMS

\* FINAL ART TO BE PROVIDED BY  
RALEIGH PARKS AND RECREATION

[ GRAPHICS & SYMBOLS ]

The symbols shown are to be used throughout the Master Signage Program as necessary. The components are to be reproduced in the form as shown, in their approved color schemes and are not to be distorted or altered for the signage program. Use of these elements is to be approved by the Raleigh Parks and Recreation Department and copies of this artwork will be provided by the Raleigh Parks and Recreation Department for use by the fabricator.

GRAPHICS

TYPOGRAPHY

Typeface: **Book Antiqua**

100% Vertical Scaling

25% Letter Spacing

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
 abcdefghijklmnopqrstuvwxyz  
 1234567890

[ TYPOGRAPHY ]

To maintain consistency, these standards specify two typefaces for sign legends: **Book Antiqua** (a serif font), and **ITC Stone Sans** (a sans serif font).

Typeface: **ITC Stone Sans Bold**

90% Vertical Scaling

25% Letter Spacing

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
 abcdefghijklmnopqrstuvwxyz  
 1234567890

**Book Antiqua** is the primary typeface used on all Greenway Signs and Facility Identification.

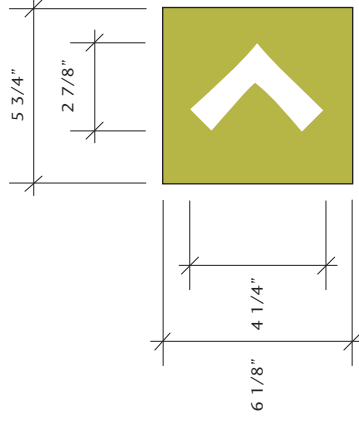

**ITC Stone Sans** is used as a secondary typeface on all Greenway Signs, Facility Identification, and the primary typeface on all Directional Signs.

Only these two fonts are to used on Greenway Sign Systems. **Alternates** — such as **Helvetica, Universe, Century or Times Roman** — are **NOT acceptable**. Specified typefaces are to be used in the production of all graphic panels. Conversions that change the typographic style, letter spacing, alignment, stroke-width, or size will be rejected.

Refer to pages on individual sign types for detailed specifications.

VEHICULAR DIRECTIONAL

PEDESTRIAN DIRECTIONAL

# ARROW & COPY

## [ ARROW & COPY ]

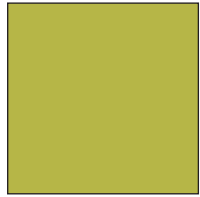

The arrow as shown should be used for all directional needs. The arrow should be used in an orientation which will make the directional information most obvious. The relationship between the arrow and the type as shown should always be maintained.

The fabricator is to provide scaled text layouts of all signs to the parks and greenway for approval prior to fabrication. Refer to drawings for detailed specifications.

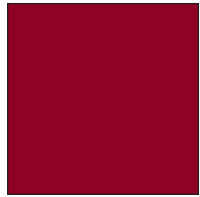

# COLOR / FINISH SCHEDULE

**[ COLOR / FINISH SCHEDULE ]**

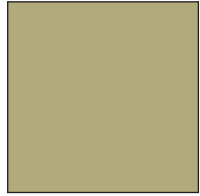

These are the approved colors for the sign system. Colors are specified using the Pantone Matching System (PMS.) The specific use of the colors is defined for each sign type and should not be altered without written approval.

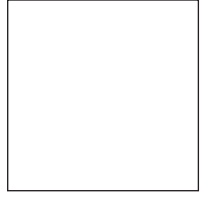

COMMON COLOR  
GREEN — PMS 391

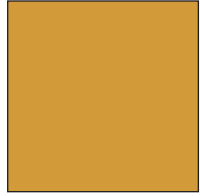

ACCENT COLOR  
RUST — PMS 202

ACCENT COLOR  
TAUPE — PMS 451

LETTERING  
WHITE

AMENITY

AMENITY  
D. BLUE — PMS 648

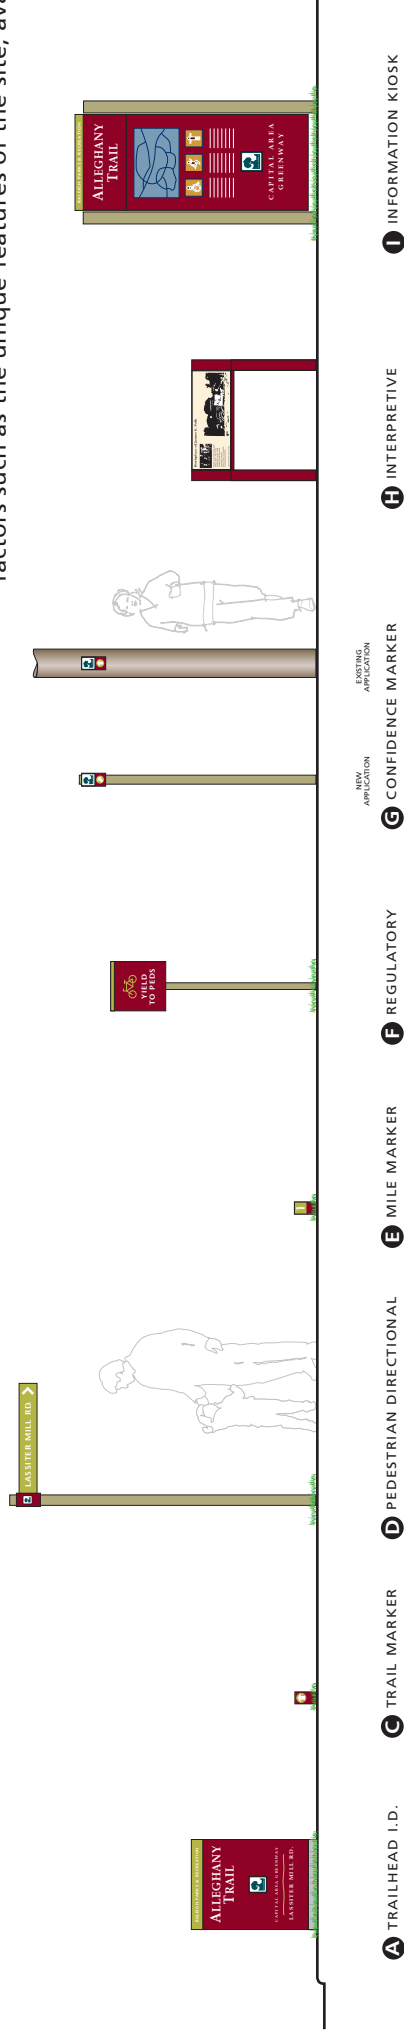

# RALEIGH GREENWAYS SIGN SYSTEM

## [ SIGN SYSTEM OVERVIEW ]

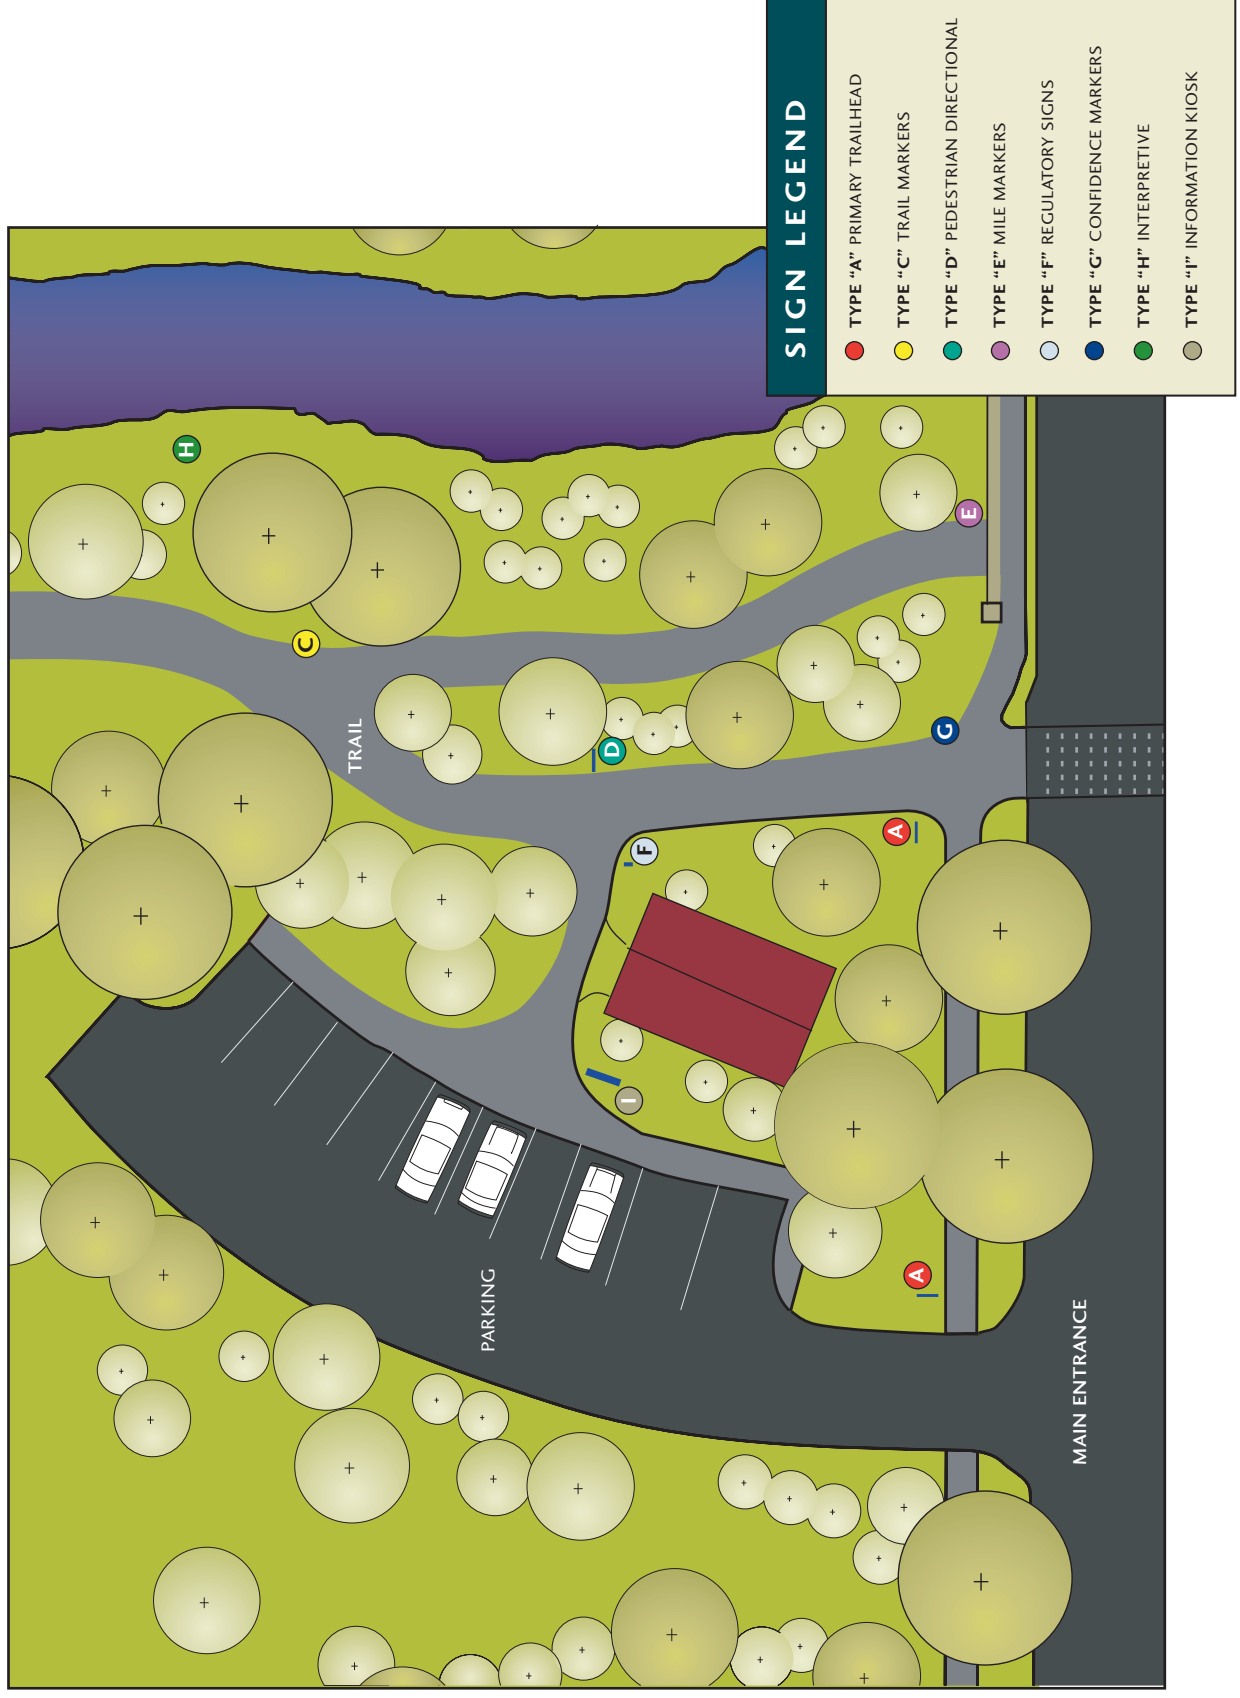

The new sign program is designed to improve the experience of visitors to the city's greenways and related facilities. The system encompasses a broad range of sign messages that identify, inform, direct and regulate. The program's standards for design, graphics and color schemes are designed to better reflect the quality of the City of Raleigh's Capital Area Greenway system, the professionalism of the department and promoting a positive image of the city.

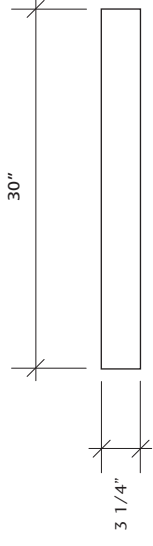

In designing the sign program every effort was made to strike an appropriate balance between identity and utility. The system responds to a wide variety of needs while providing flexibility. While this document is directed at the sign program for the Capital Area Greenway, the system was also designed to have a visual connection to the sign program developed for the city's parks. The new sign programs will tie the identity of these outstanding recreational facilities together and better identify their relation to the city in an area that has many overlaps of similar facilities under the jurisdiction of county or state governments.

The adherence to the standards defined by this program will result in a sign system that reflects positively on the community, while continuing to promote the livability of Raleigh as a "park with a city in it." The placement guidelines are just that, guidelines. Actual placement should also take into consideration factors such as the unique features of the site, available space and ease of maintenance.

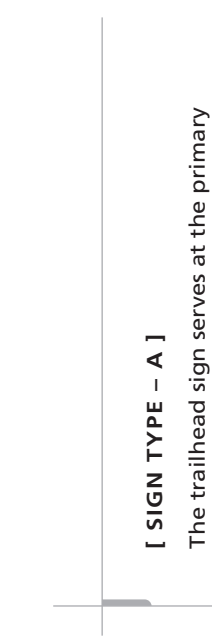

# GREENWAYS TYPICAL SITE PLAN

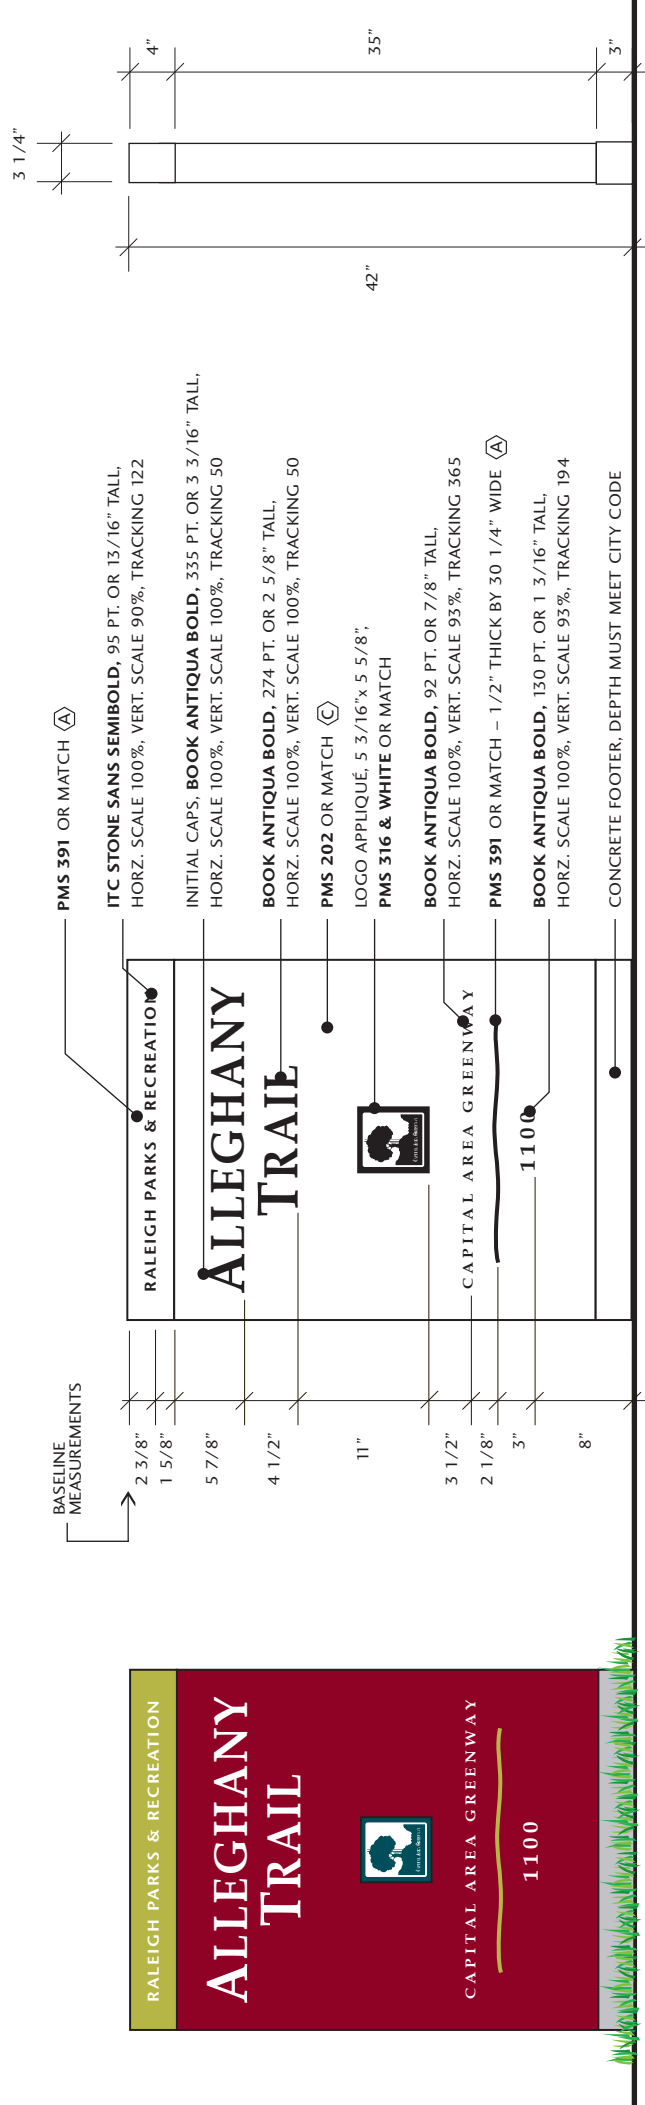

PLAN VIEW

**A** TRAILHEAD I.D.

SIDE VIEW

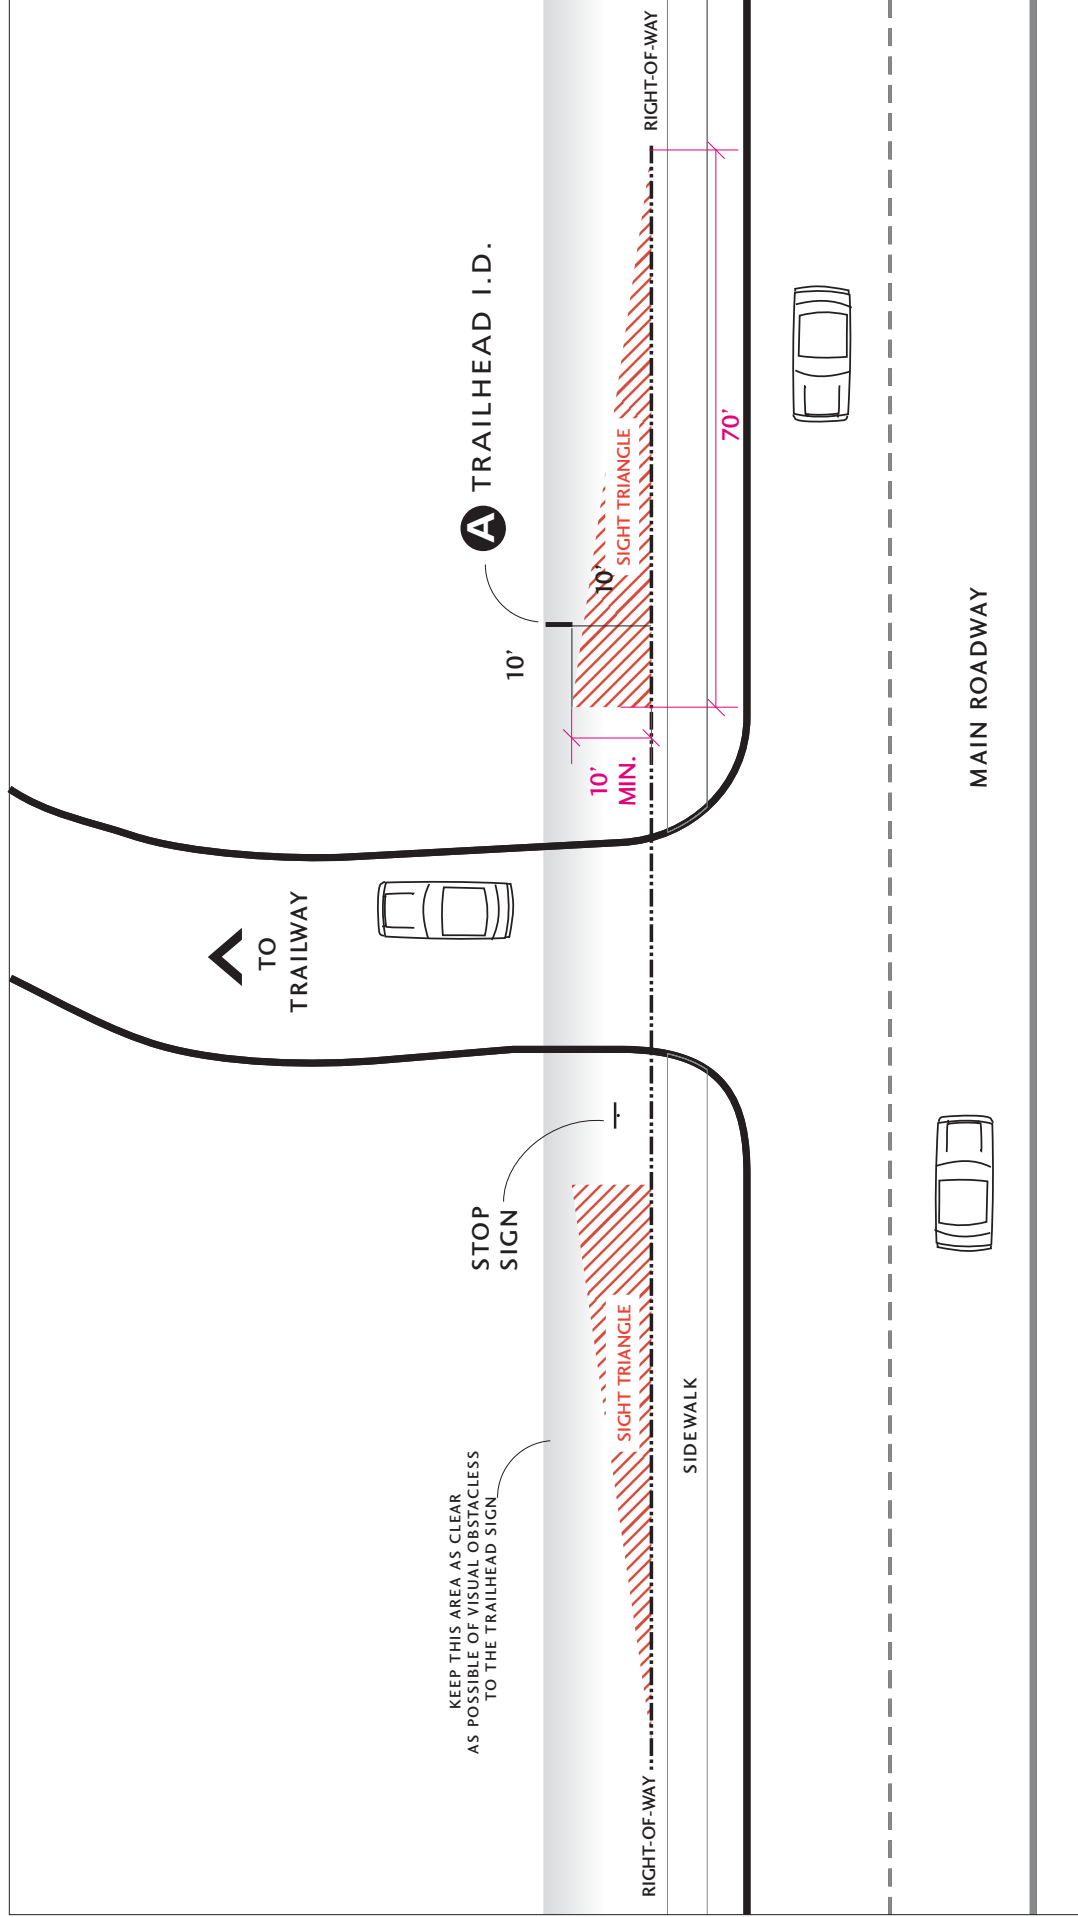

**[ SIGN TYPE - A ]**  
 The trailhead sign serves as the primary identification sign for the greenway. The sign is two-sided and carries the same information on both sides. Typically this sign will be located adjacent to a roadway, also serving as an entry sign to greenways with amenities or other types of facilities.

- When applicable include street address on sign face. Do not exceed five (5) lines of copy.
- This sign type will require a city sign permit for installation.

**NOTE: ARTWORK TO BE CENTERED**

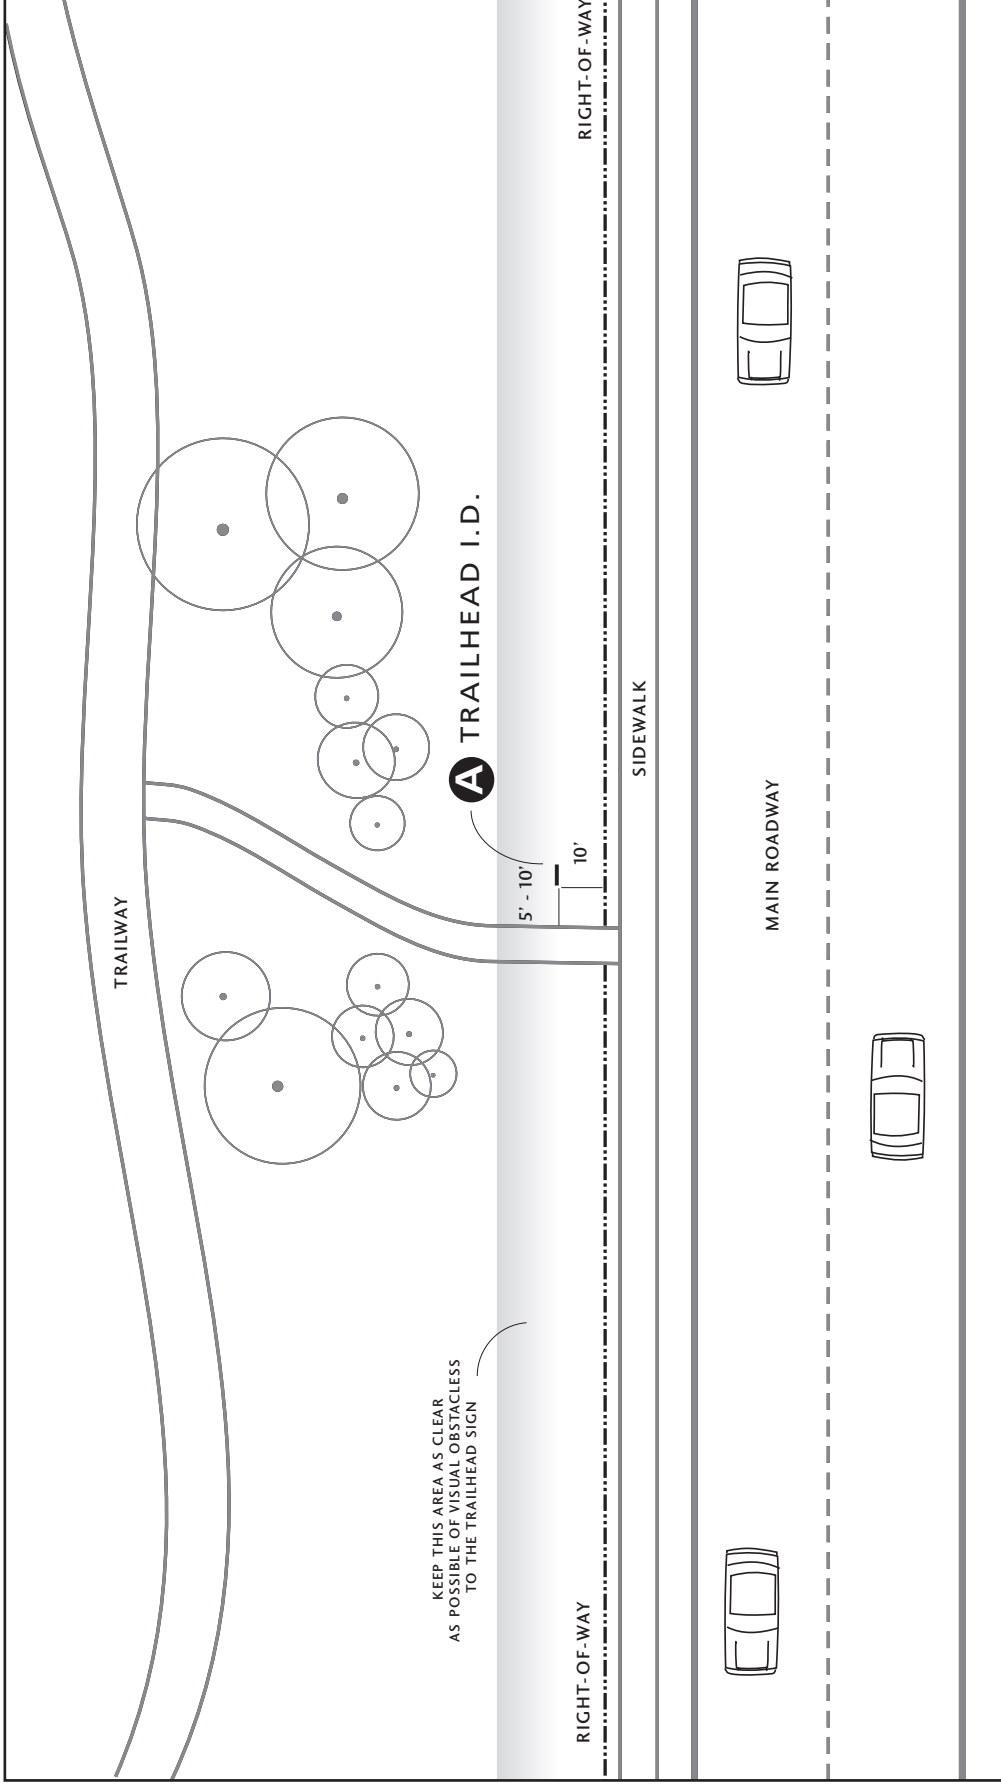

TRAILHEAD I.D. – PLACEMENT GUIDELINES

[ PLACEMENT GUIDES ]

- This sign option is intended as a primary trail identification sign for greenways with parking facilities at the trailhead. For greenways without parking facilities see option B.
- Sign must be placed behind site triangle as illustrated.
- The sign must be placed a minimum of 10 feet from the city right-of-way.
- Orientation of the sign is to be perpendicular to the public street.
- The sign may be placed on either side of the entrance. The preferred location is on the right side, as you face the entrance.
- Try to maintain a clear line of sight from the roadway and sidewalk to the sign on both sides of the trailway.
- Do not place plantings at the base of this sign.
- This sign will require permitting prior to installation.

[ PLACEMENT GUIDES ]

- This sign option is intended as a trail identification sign for situations where a pathway provides access to the trail from a secondary entry point.
- The sign must be placed a minimum of 10 feet from the city right-of-way.
- Orientation of the sign is to be parallel to the public street, and perpendicular to the pathway.
- The sign may be placed on either side of the pathway.
- Try to maintain a clear line of sight from the roadway and sidewalk to the sign on both sides of the pathway.
- Do not place plantings at the base of this sign.
- This sign will require permitting prior to installation.

TRAILHEAD I.D. – PLACEMENT GUIDELINES

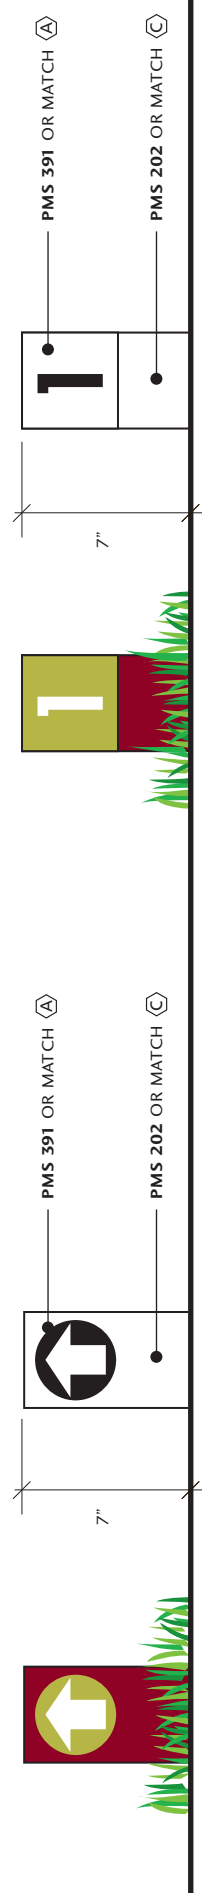

# TRAIL & MILE MARKERS

**[ SIGN TYPE - C ]**

For greenways that have multiple trails or pathways within a trail this marker is to aid navigation of the site. For greenways with multiple trails, the circular background of the directional arrows may be color coded for each trail.

**[ SIGN TYPE - E ]**

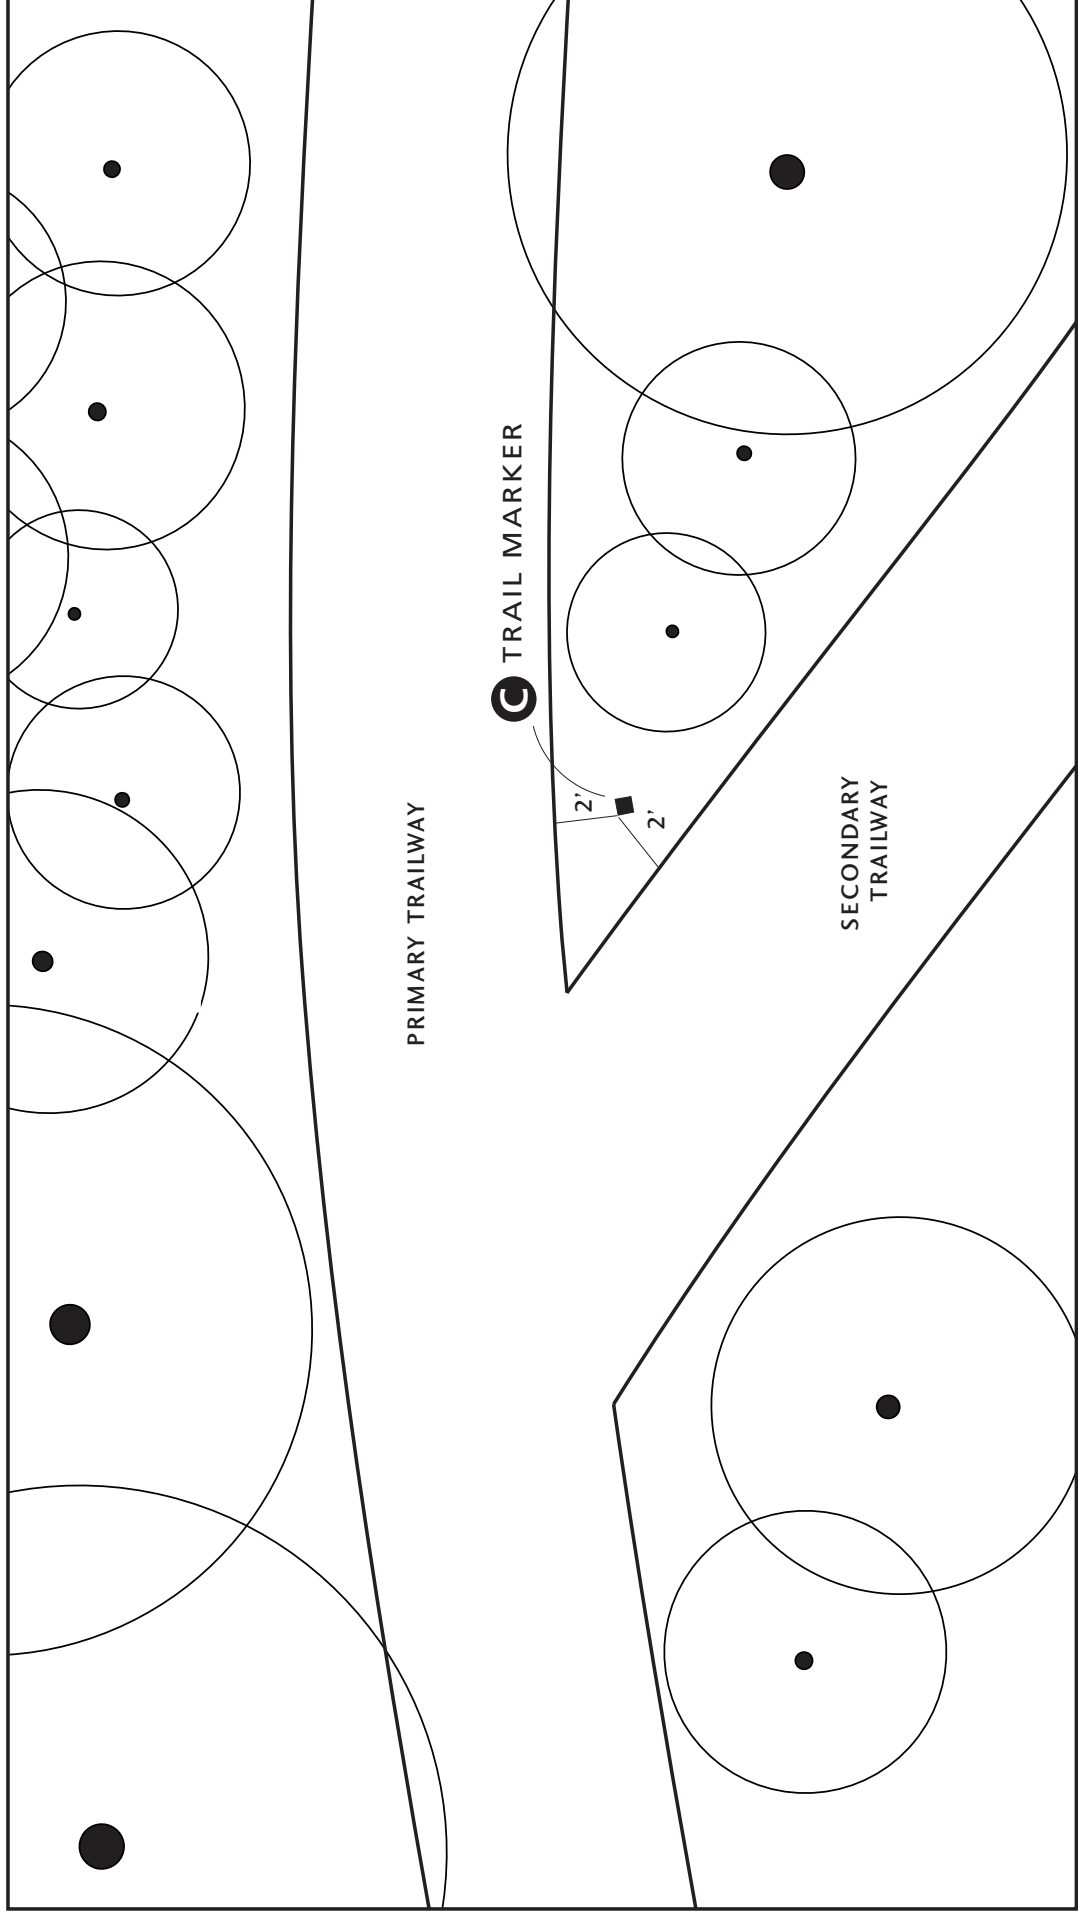

Mile markers are to be set at 1/2 mile intervals to provide users with reference points for goal-oriented workouts and wayfinding. The mile markers will be oriented starting from the primary trailhead.

**C** TRAIL MARKER

**E** MILE MARKER

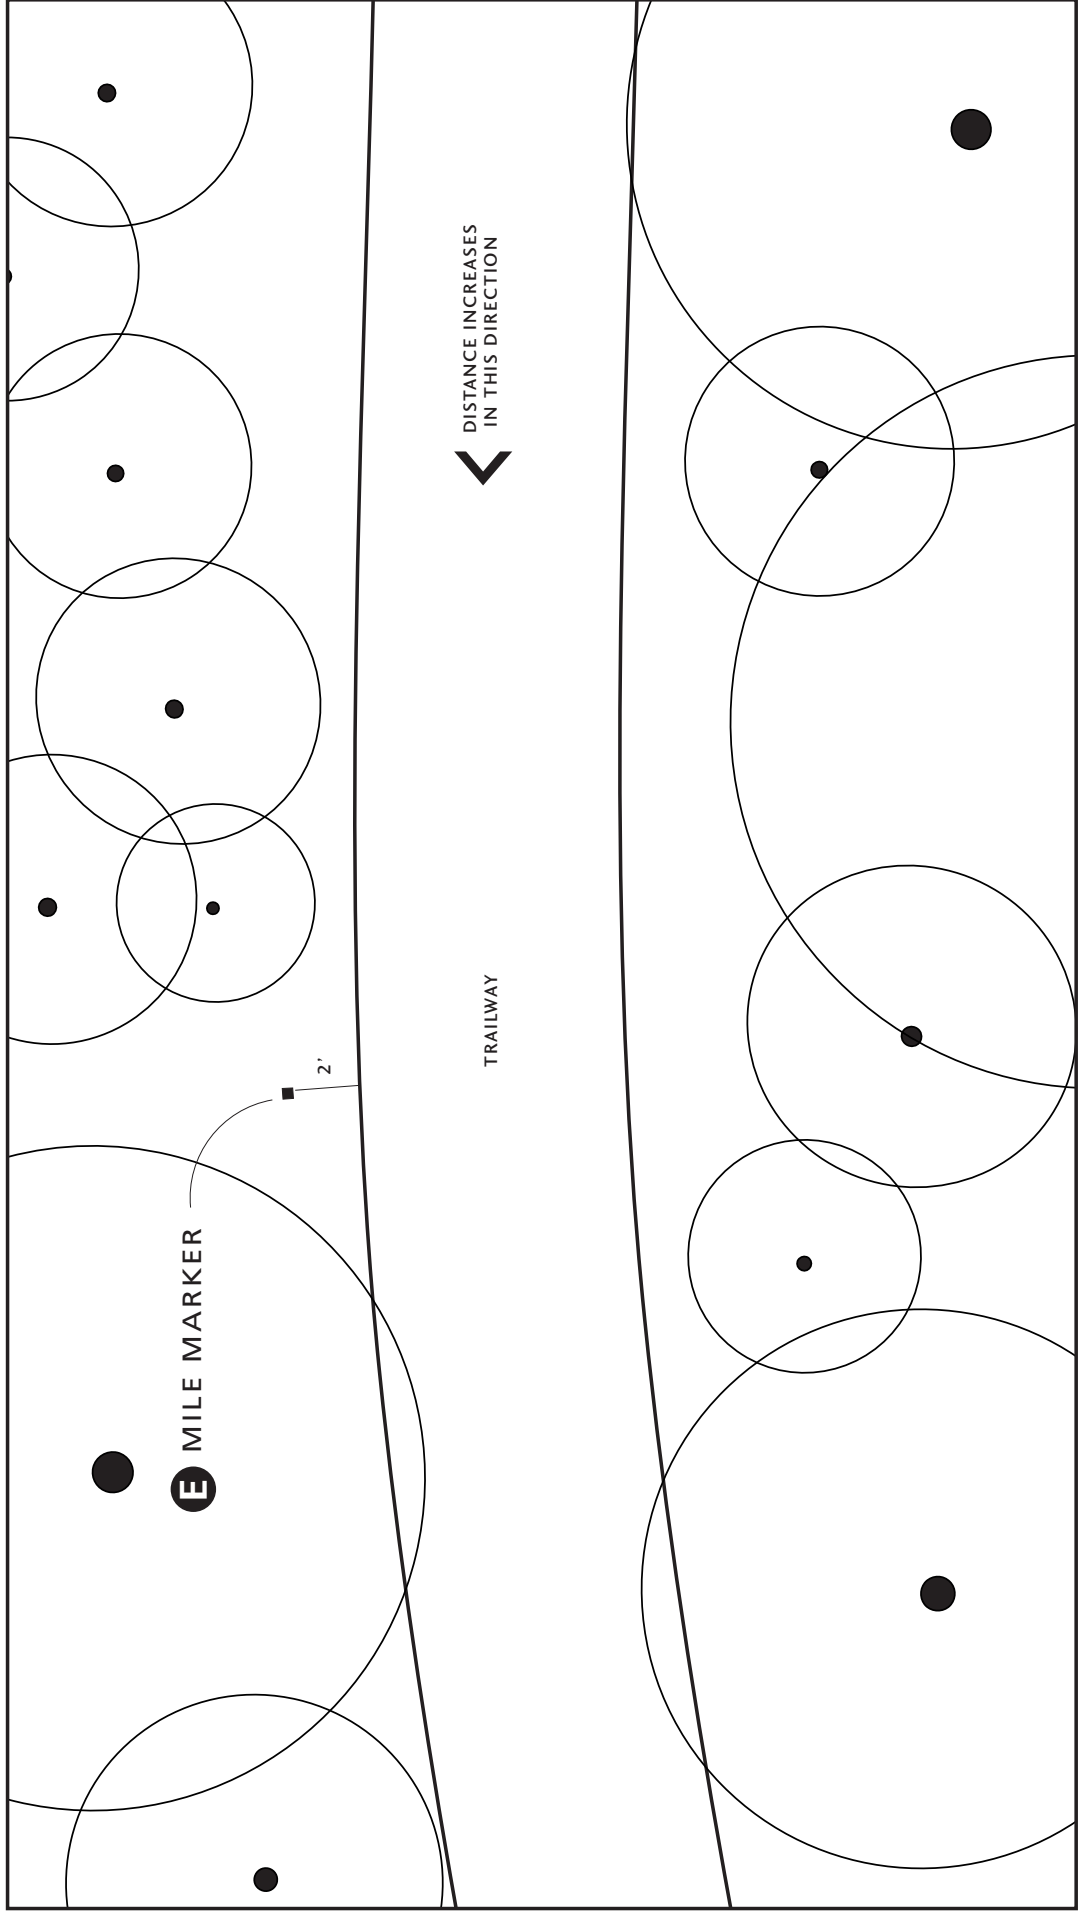

TRAIL MARKERS – PLACEMENT GUIDELINES

[ SIGN TYPE – C ]

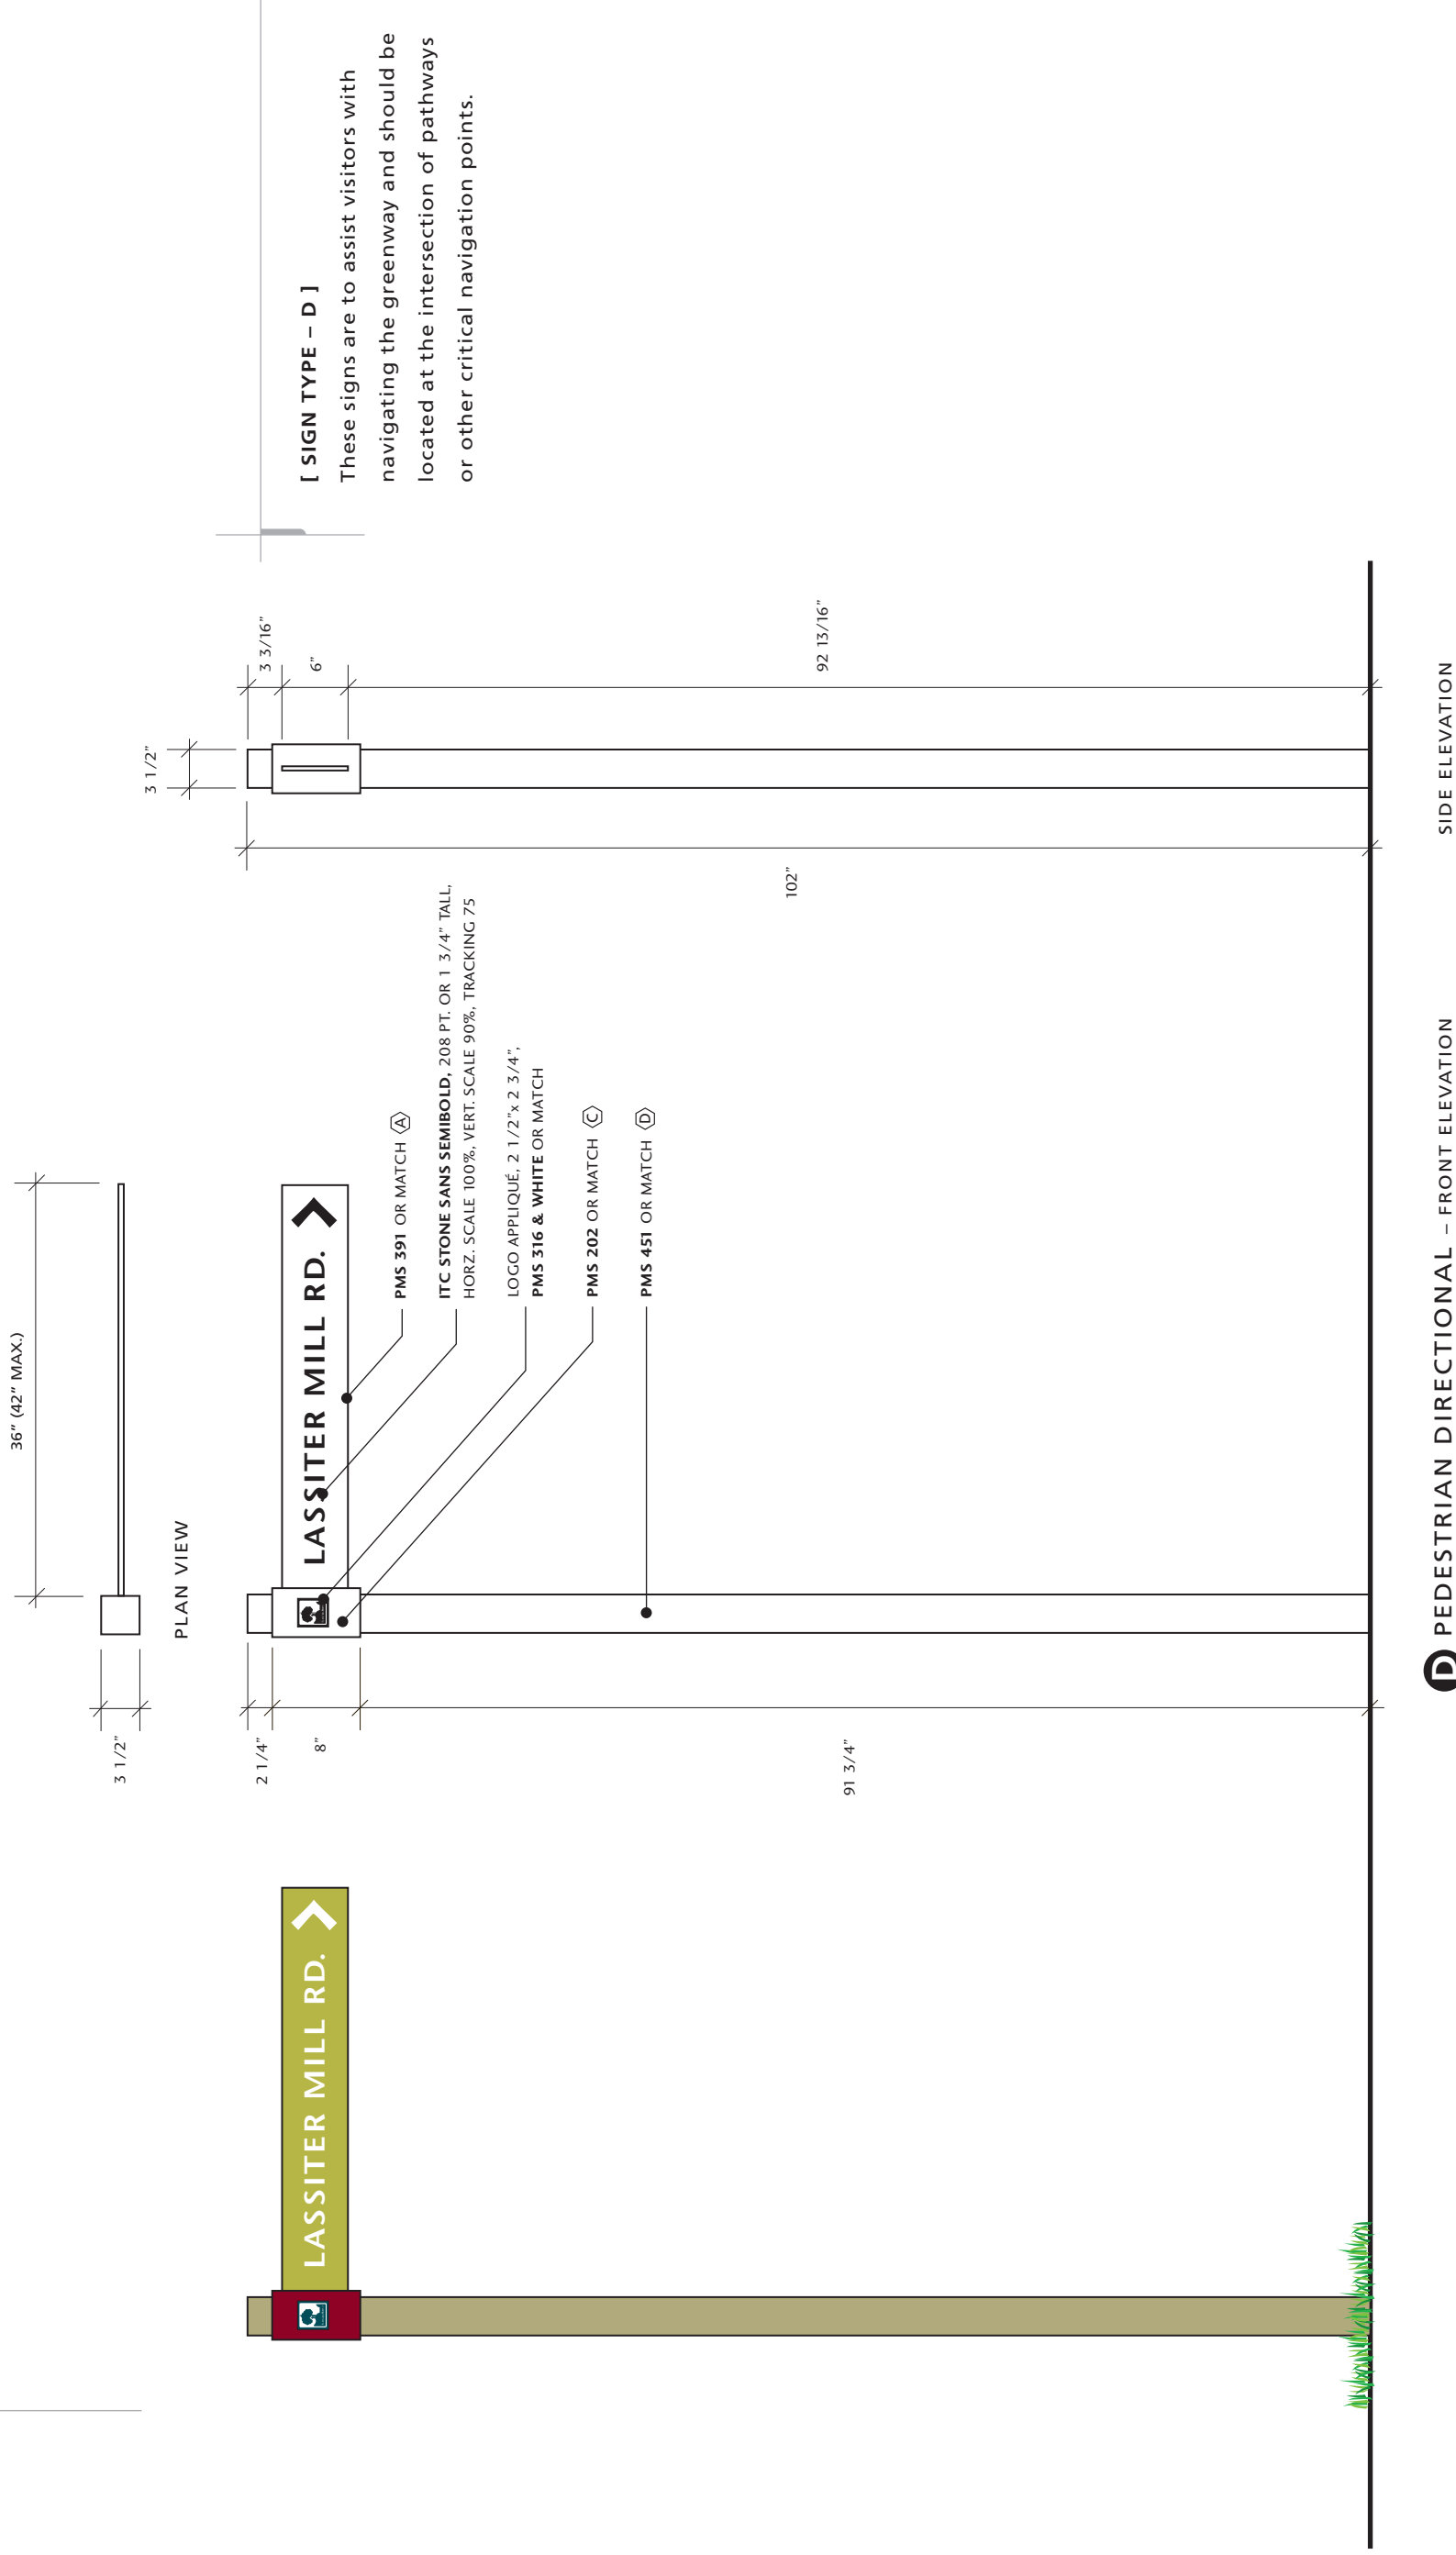

- For greenways that have multiple trails or pathways within a trail this marker is to aid navigation of the site. For greenways with multiple trails, the circular background of the directional arrows may be color coded for each trail.
- The markers should be placed at the intersection of trails or other formations to clarify the direction of the trail.
- Typically the signs will be located adjacent to trail intersections, but the placement should be determined by the site conditions.
- Do not locate these markers within planting beds.

MILE MARKERS – PLACEMENT GUIDELINES

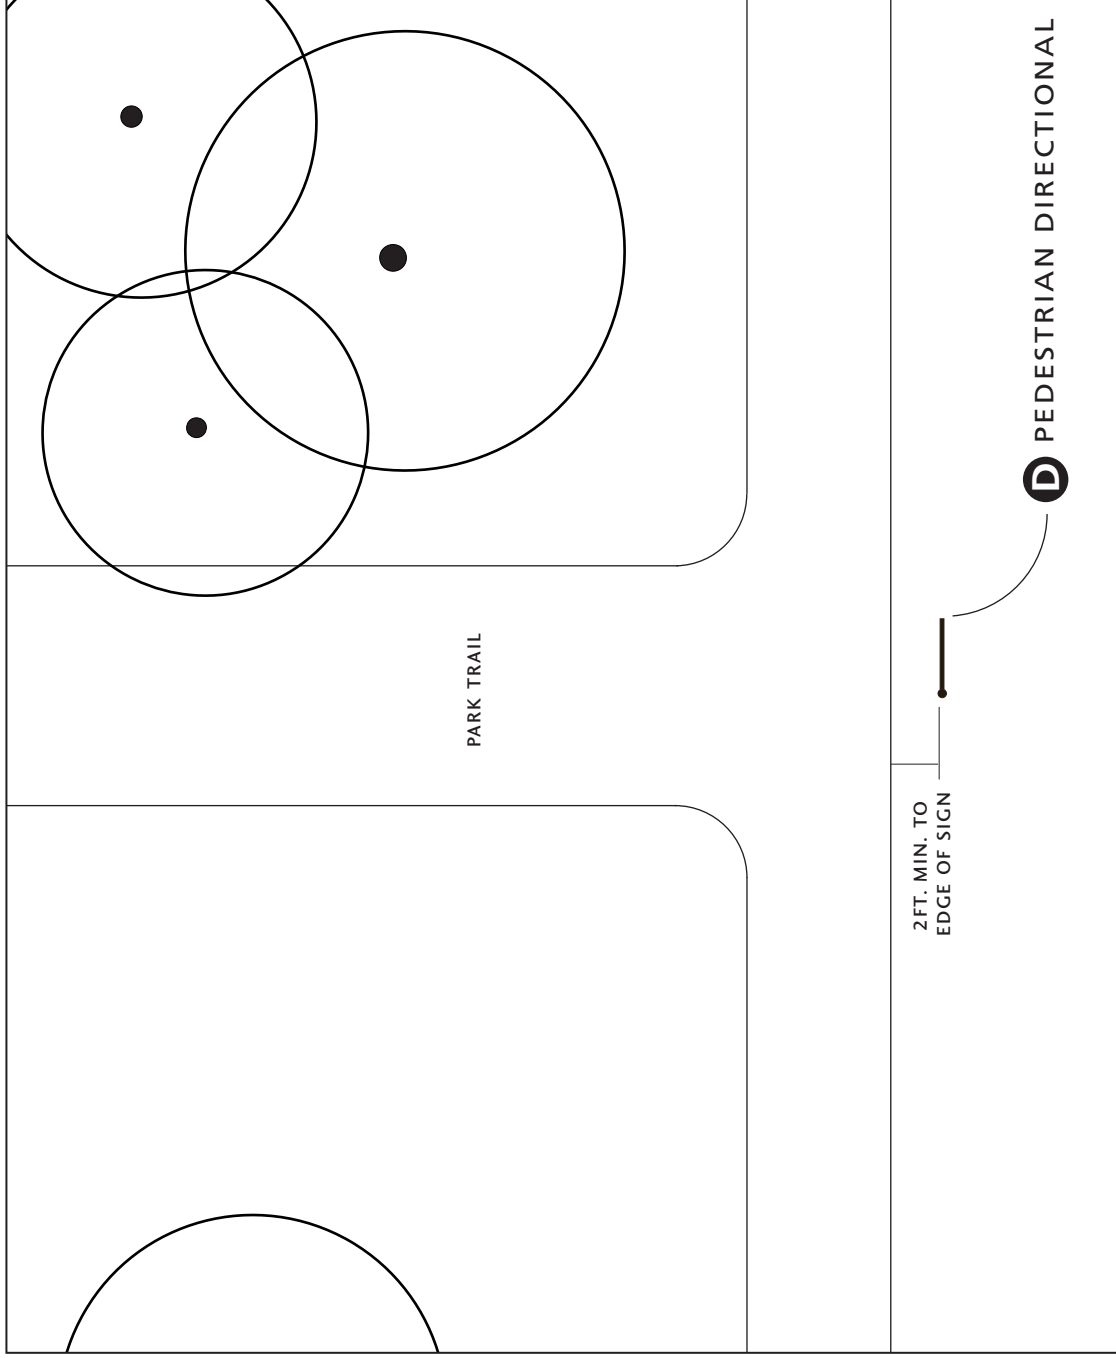

[ SIGN TYPE – E ]

- Mile markers are to be set at 1/2 mile intervals to provide users with reference points for goal-oriented workouts and wayfinding.
- The markers are to be placed on the right hand side of the trail when facing the direction that the distance is increasing.
- Orientation of the marker is perpendicular to the pathway.
- The starting point for indicating mileage is from the outlet end of streams to the headwaters.

## – PLACEMENT GUIDELINES

### [ PLACEMENT GUIDES ] OPTION A

- Typically these signs are placed at the intersections of pathways. The signs may also be placed where needed to assist visitors.
- Orientation of the sign is to be perpendicular to the direction of travel or parallel to the intersecting path. For signs with multiple blades the post should be positioned so it is the element farthest from the pathway.
- Placement should be a minimum of 2 feet from the edge of the sign to the trail. The location should be determined by the site conditions and information that is being conveyed.

PEDESTRIAN DIRECTIONAL SIGNS  
- PLACEMENT GUIDELINES

[ PLACEMENT GUIDES ] OPTION B

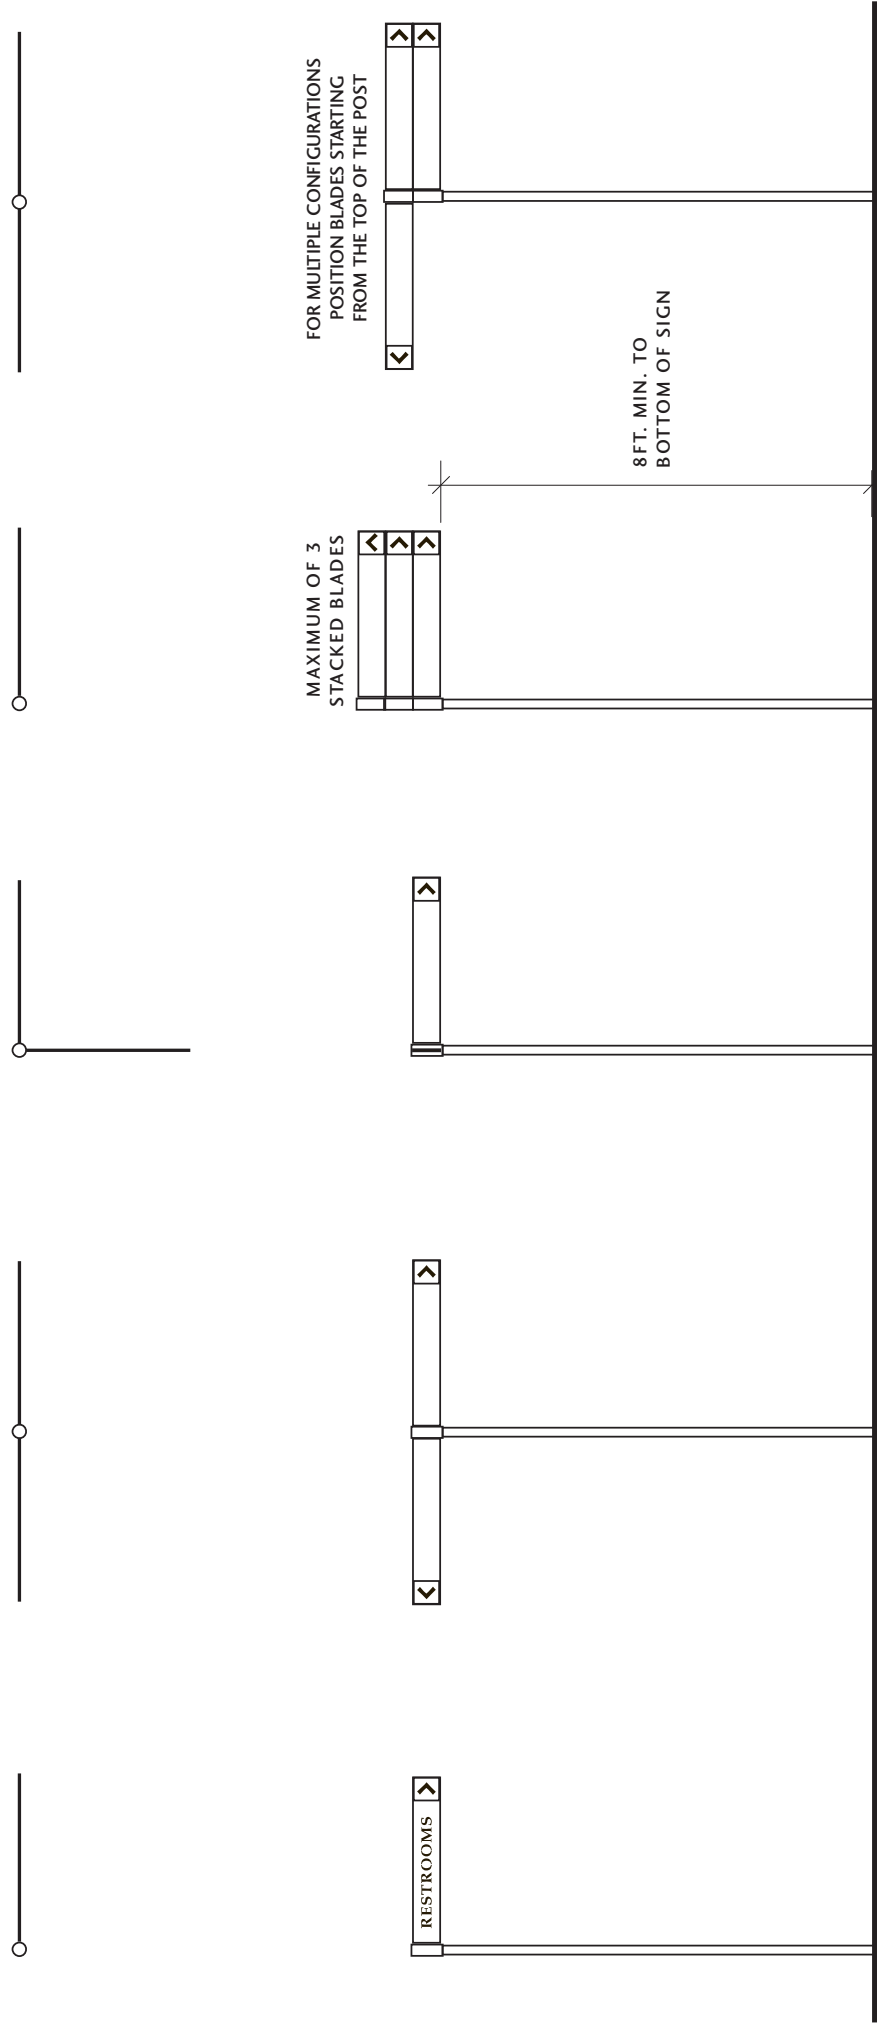

- Typically these signs are placed at the intersections of pathways. The signs may also be placed where needed to assist visitors.
- Orientation of the sign is to be perpendicular to the direction of travel or parallel to the intersecting path. For signs with multiple blades the post should be positioned so it is the element farthest from the pathway.
- Placement should be a minimum of 2 feet from the edge of the sign to the trail. The location should be determined by the site conditions and information that is being conveyed.

# PEDESTRIAN DIRECTIONAL SIGNS

## – PLACEMENT GUIDELINES

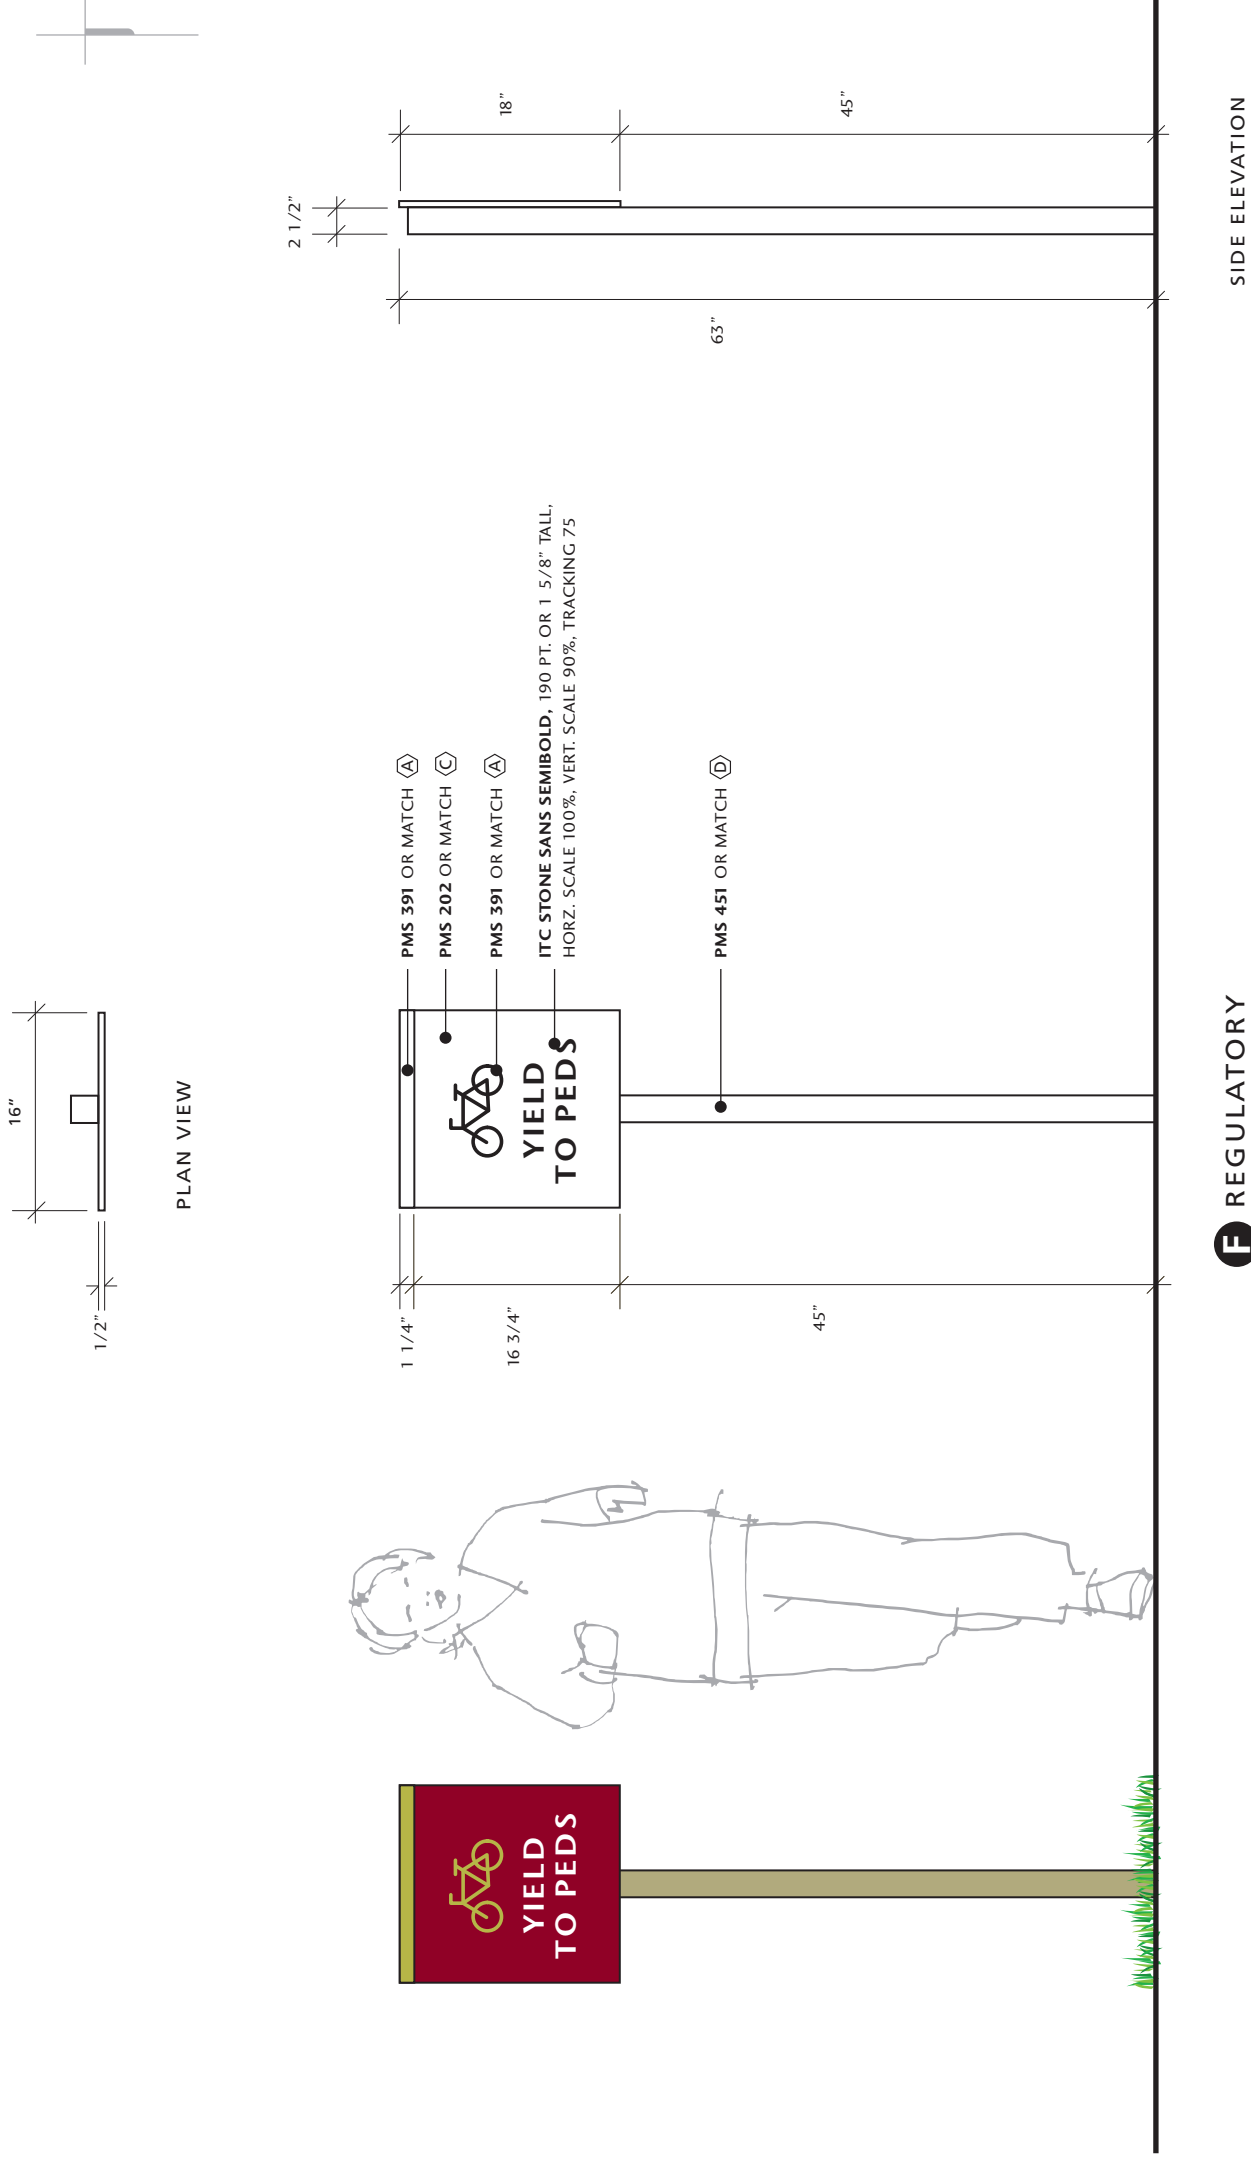

### [ PLACEMENT GUIDES ] OPTIONS

- There are multiple configurations that can be utilized depending on the information to be conveyed.
- For indicating straight ahead, the arrow should point upwards and the blade can be positioned on either side of the post.
- Orientation of the sign is to be perpendicular to the direction of travel. For signs with multiple blades the post should be positioned so it is the element farthest from the pathway.
- The total number of blades should not exceed 6. The maximum number of blades that are stacked should not exceed 3 on any one side.
- Angles of 90 degrees and 180 degrees should be maintained between sign blades.

REGULATORY SIGNS

[ SIGN TYPE - F ]

These are signs intended to reinforce the rules and regulations of the greenway. They should be placed according to the activity to be regulated, preferably at an arrival point or approach to a facility and at appropriate intervals along the trail.

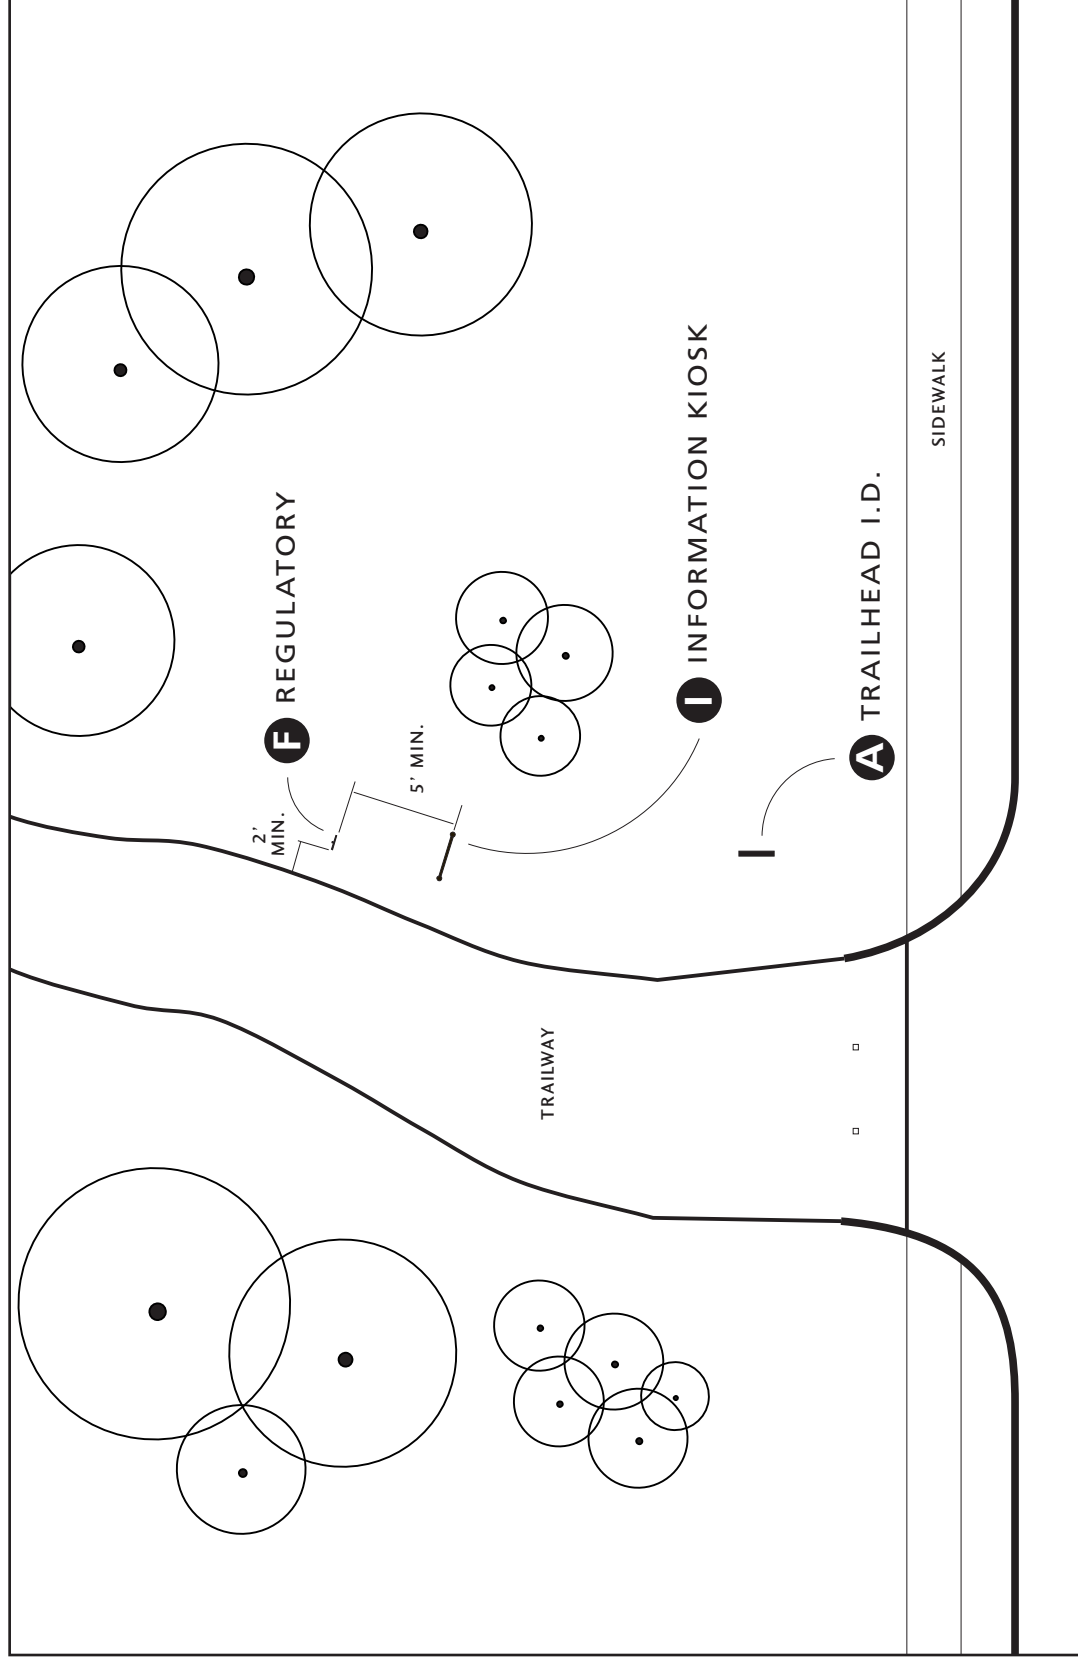

It is permissible to place two sign faces on the same side of the post, and the height of the sign may be adjusted to accommodate the message to be conveyed.

If this type sign is to be located near a larger type sign, then it is recommended that it be located at least 5 feet from the larger type sign.

REGULATORY SIGNS – PLACEMENT GUIDELINES

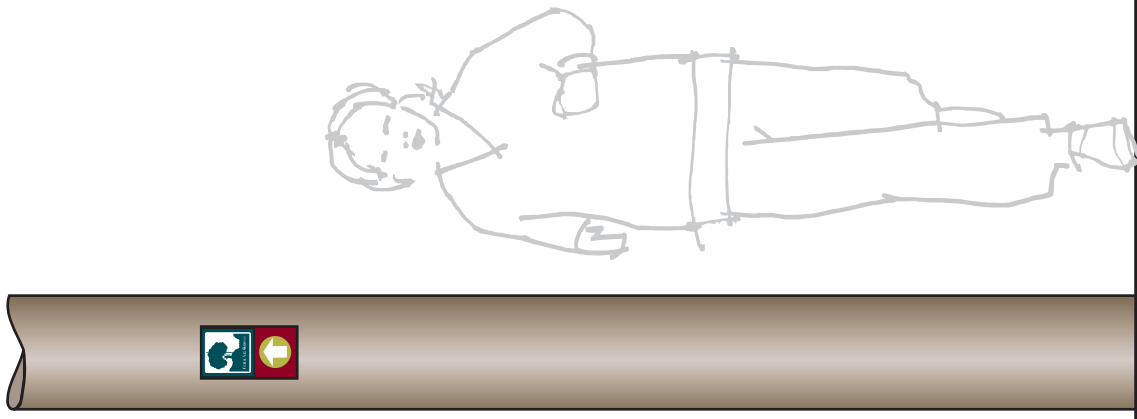

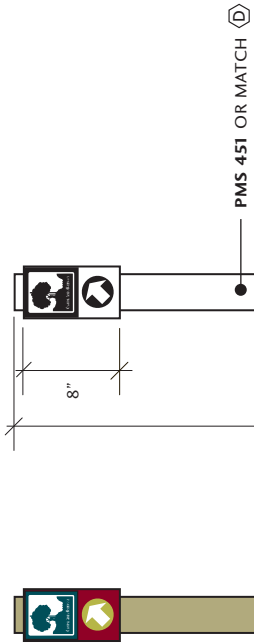

[ PLACEMENT GUIDES ]

- The exact placement of the sign is dependent upon the information to be conveyed.
- Orientation of the sign is to be perpendicular to the direction of travel.
- Placement should be a minimum of 2 feet from the edge of the pathway or roadway.
- If the sign is to be placed adjacent to another sign type, it should be placed a minimum of 5 feet from the sign. If multiple regulatory signs are required, two signs may be attached to the same post or adjacent to one another.

**G** CONFIDENCE MARKER

# CONFIDENCE MARKER

[ SIGN TYPE – G ]

Trail markers are specifically designed to aid navigation in circumstances where the trail may intersect with public streets and reconnects at a distant point. If necessary they may also be placed along the street if the connecting point is not visible from a distance (check with zoning officials prior to placing signs along roadways.)

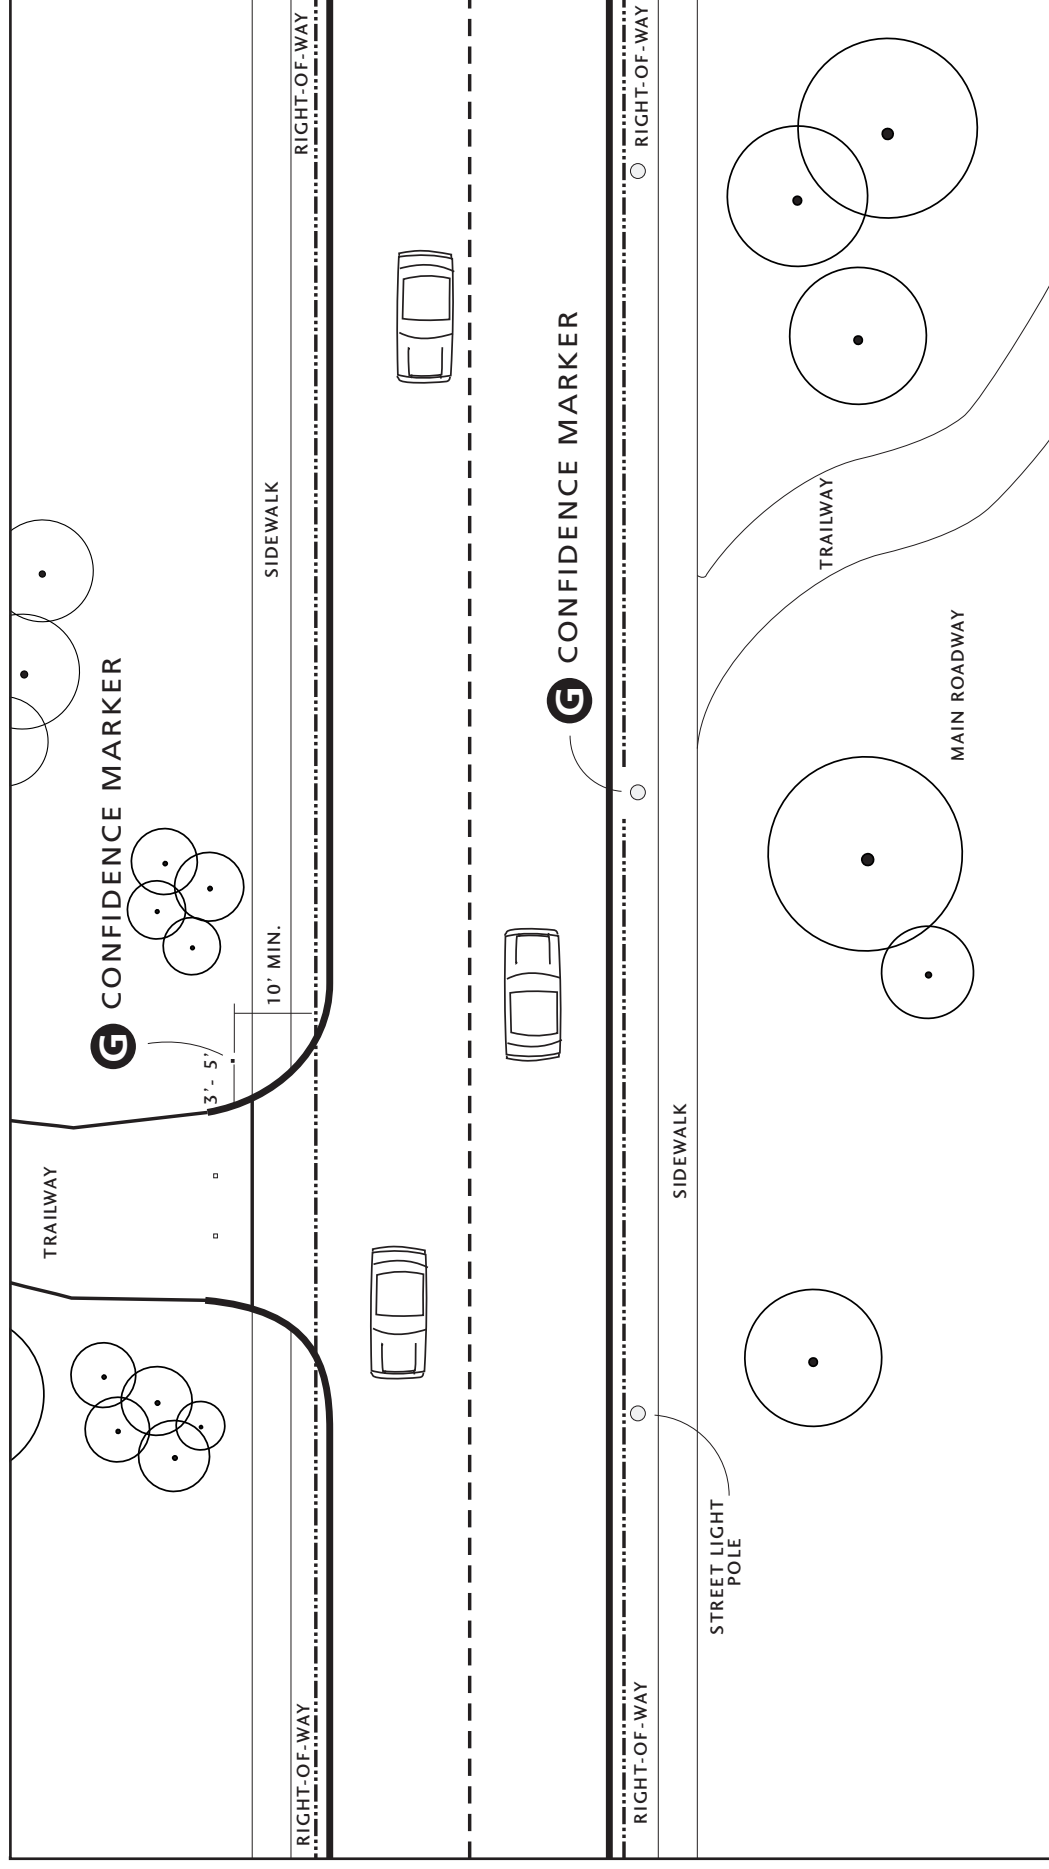

The markers may be placed on existing features such as utility poles or a freestanding post. The marker should be placed at a height of 6 feet as measured from the ground to the center of the marker. Depending on the situation, multiple confidence markers may need to be required for viewing from different directions of travel.

— PMS 391 OR MATCH (A)

— PMS 202 OR MATCH (C)

CONFIDENCE MARKER – PLACEMENT GUIDELINES

[ PLACEMENT GUIDES ]

- Trail markers specifically designed to aid navigation in circumstances where the trail may intersect with public streets and reconnects at a distant point.
- The markers may be placed on existing features such as utility poles or a freestanding post. The marker should be placed at a height of 6 feet as measured from the ground to the center of the marker.
- When applied to a freestanding post the sign must be placed a minimum of 10 feet from the city right-of-way.
- Orientation of the sign is to be perpendicular to the direction of travel.
- The sign may be placed on either side of the trail. The preferred location is on the right side, as you face the trail.

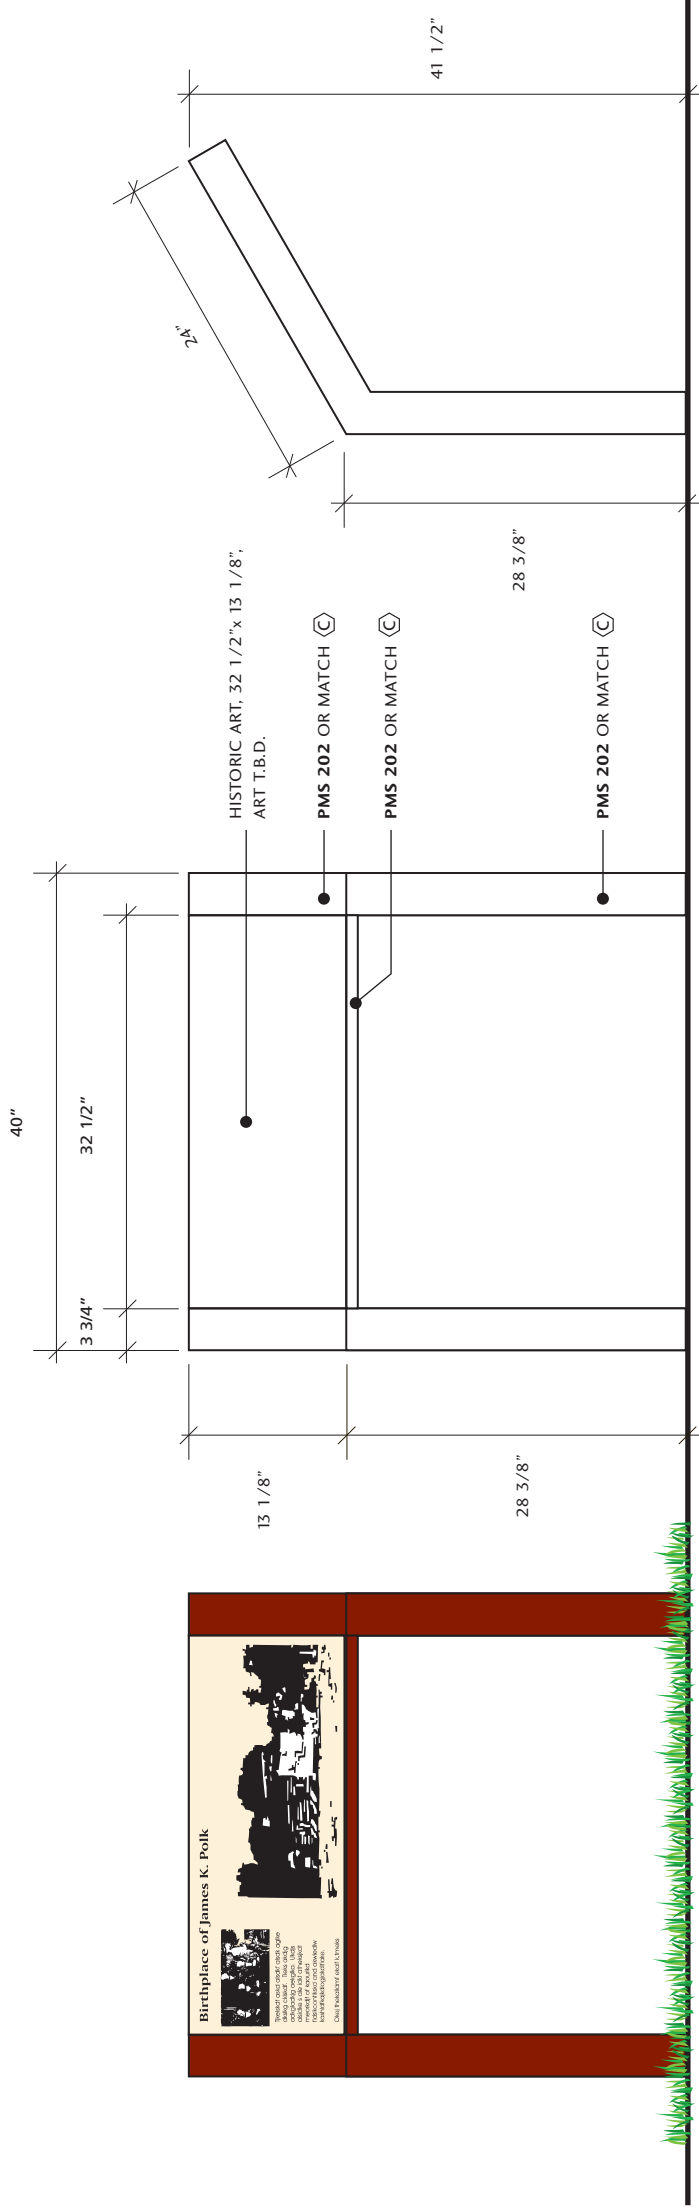

# HISTORIC INTERPRETIVE DISPLAY

[ SIGN TYPE – H ]

Interpretive signs are to provide educational information to visitors at areas of interest or historical significance. The layout and graphics should be consistent for all signs used in any one location.

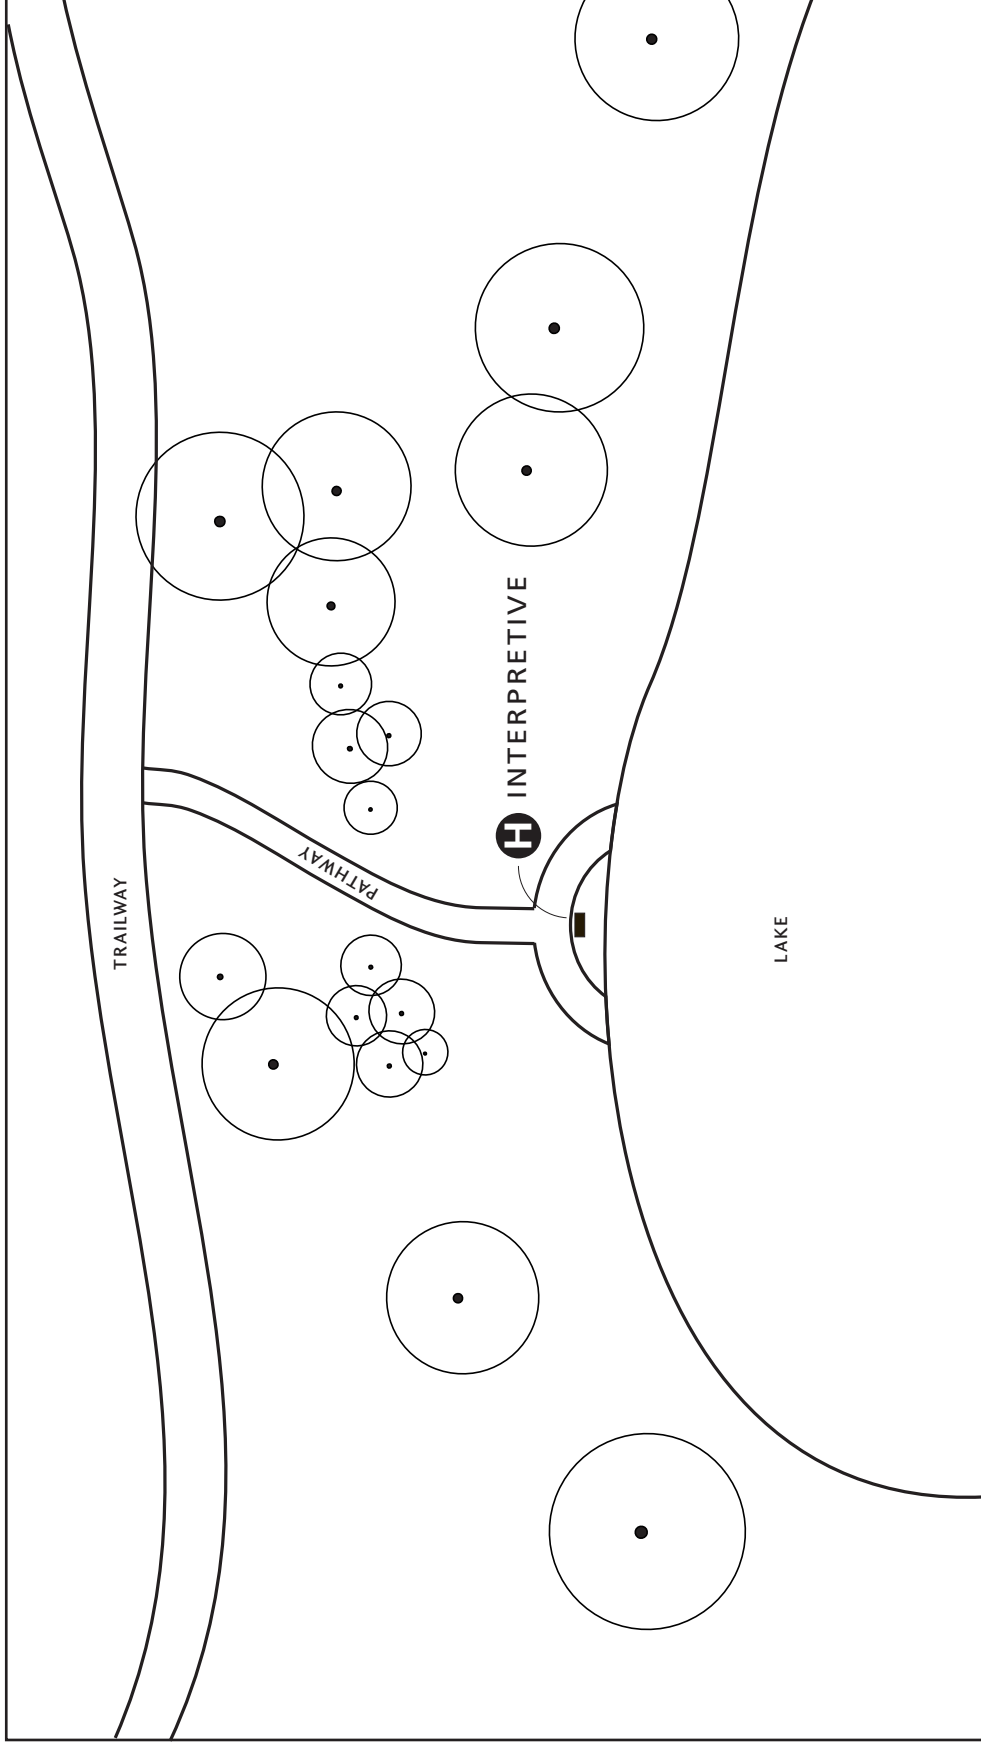

Interpretive signs are to provide educational information to visitors at areas of interest or historical significance.

The width of the sign may be varied, but should not exceed 42 inches.

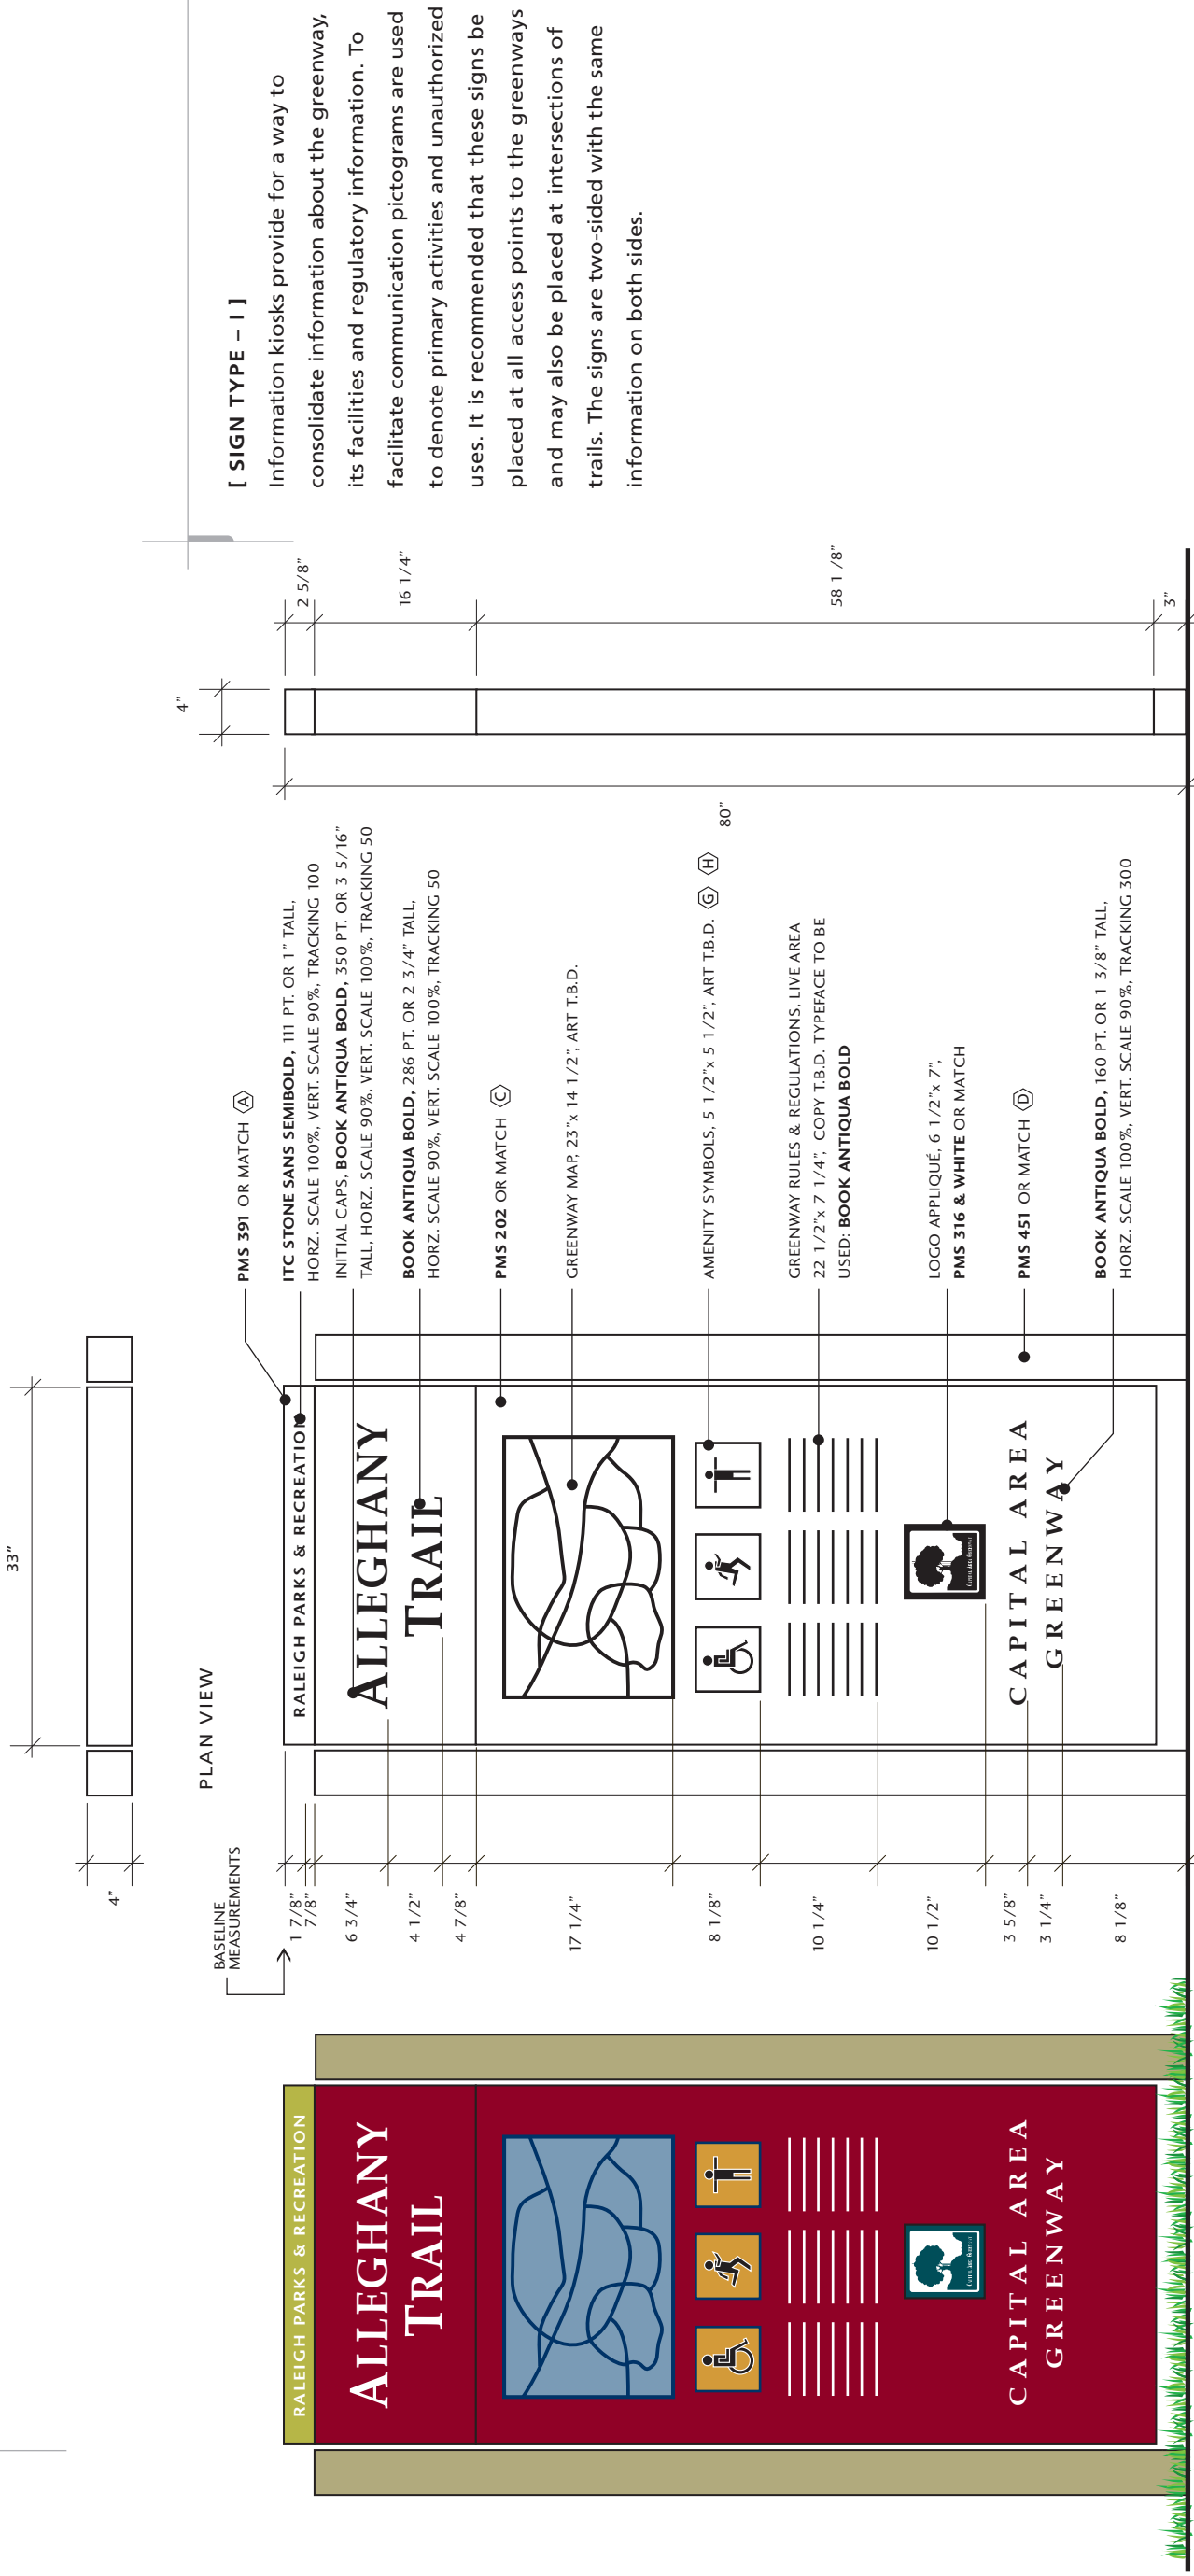

**H** INTERPRETIVE

SIDE ELEVATION

[ PLACEMENT GUIDES ]

- Interpretive signs are to provide educational information to visitors.
- The placement of the sign is dependent upon the site and information that is to be portrayed.
- Orientation of the sign whenever possible should be parallel to the view of the subject.
- It is also recommended that the sign be placed out of the main path of circulation.
- Do not place plantings at the base of this sign.

INFORMATION KIOSK – PLACEMENT GUIDELINES

[ PLACEMENT GUIDES ]

- This sign should be located near the trailhead and set back a minimum of 30 feet from the trailhead sign. For greenways with parking areas, see option B.
- Orientation of the sign is to be perpendicular to the trail.
- Positioning of the sign should be based on existing landscaping. The diagram shows the preferred location. Keep the sign a minimum of 3 feet from the trail.
- Do not place plantings at the base of this sign.

[ PLACEMENT GUIDES ]

- For greenways with parking areas, the sign should be located at the access path from the parking area to the trail. If the trail is visible from the parking area, then it is recommended that the sign be placed adjacent to the trail.
- Orientation of the sign is to be perpendicular to the pathway or the trail.
- Positioning of the sign should be based on existing landscaping. The diagram shows the preferred location. Keep the sign a minimum of 3 feet from the trail.
- Do not place plantings at the base of this sign.
