TENT PERMIT PROCEDURES

The purpose of this procedure is to guide the customer through the application process. The attached "Procedural Checklist" serves as a sign-off sheet for the permit approval process.

WHEN IS A PERMIT REQUIRED?

If you are erecting a tent in excess of 800 square feet or an air-supported structure/ temporary stage canopy having an area in excess of 400 square feet you must obtain a tent permit from the Fire Marshal's Office. Open air tents in excess of 1800 square feet require a permit. Refer to NC fire code 105.6.45 for further information. You are required to submit construction documents including a detailed site and floor plan for tents, canopies, or membrane structures with an occupant load of 50 or more shall be provided with each application for approval. The tent, canopy or membrane structure floor plan shall indicate details of the means of egress facilities, seating capacity, arrangement of the seating and location and type of heating and electrical equipment. This must be submitted TEN days prior to the event. If you have not already done so, you may use the "tents/canopy permit checklist" to prepare your plans.

DETERMINING WHO YOU NEED TO TALK TO:

If you are planning to put up a tent, or other temporary membrane structure, you will need to talk with various City departments. Zoning (919) 996-2492, Electrical Permit (919) 996-2177.

STEP 1: (Zoning) first, you will need to talk to a Zoning representative to determine if the tent/canopy or air-supported structure can be erected at the proposed location. If the Zoning Ordinance allows such temporary structure(s) to be erected at the proposed location, the Development Services representative will sign off on the "Tent Procedural Checklist". If the Zoning Ordinance does not allow the temporary structure(s) to be erected at a given location, you will need to talk with a current planning representative about the possibility of obtaining a Use Permit, or you will need to consider relocating the temporary structure(s) to a site where the zoning is appropriate. All tents that will be erected for longer than one day require a zoning permit. The phone number for the zoning department is 919-996-2492.

STEP 2: (Development Services) If a temporary pole for electrical service is to be provided for the tent, you must use a licensed electrical contractor and obtain an electrical permit for installation. You will need to talk with a staff member in the electrical section. This requires field inspection and approval prior to the event. The fire department will not issue a tent/canopy permit without an electrical inspection. If there is no electrical service, mark the "No" box under the Electrical Permit section of the "Tent Procedural Checklist". Bleachers will be addressed at this step. You will need to submit engineered structural plans and calculations for bleachers. The phone number for the development services department is 919-996-2495. To request a Temporary Event Permit to the Development Services Department. <http://www.raleighnc.gov/business/content/PlanDev/Articles/Zoning/TemporaryEvent.html>

STEP 3: (Tent Permit and Plans Submittal) each tent permit packet will be forwarded to a Deputy Fire Marshal who will be handling the issuance of your tent permit. He or she will review the submitted information and contact you if additional information is required. Once the submittal has been approved, the fire department will contact you to arrange for an on-site inspection. All applicable fees will be invoiced prior to the site inspection. Upon successful completion of the on-site inspection, the tent permit will be issued.
