1.0 EXECUTIVE SUMMARY

Mid-Atlantic Associates, Inc. (Mid-Atlantic) has performed a Phase I Environmental Site Assessment (Phase I ESA) in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527-21 for the property located at 313 East Martin Street, Raleigh, Wake County, North Carolina (the "Subject Property"). The Subject Property is located approximately 200 feet east of the intersection of South Person Street and East Martin Street. Site maps showing the location and layout of the Subject Property are provided in Appendix A.

The Subject Property consists of approximately 0.32 acres and is assigned the North Carolina Parcel Identification Number (PIN) 1703874995. At the time of our site reconnaissance the Subject Property was developed with one two-story mixed-use structure occupied by Aspire Homes (residential contractor), Catalyst (architectural and planning firm), and Provision Studio (architectural firm) on the first floor and used for residential purposes on the second floor.

Land use at the Subject Property has been confirmed by historical resources back to 1896, when the Subject Property was divided into two parcels (313 and 315 East Martin Street) and was developed with a residential structure on each parcel. The eastern parcel (315 East Martin Street) was also been developed with a small structure, likely to be a storage shed, which is then moved to the north by 1914. The western parcel (313 East Martin Street) was developed with several additional small structures, likely to be storage sheds or private garages, from 1914 to 1950. The residential structure on the eastern parcel (315 East Martin Street), was expanded by 1972. The structure on the western parcel (313 East Martin Street) was used for commercial purposes from 1962 through 1972. Both structures were razed and the present-day structure was constructed in 2004.

Mid-Atlantic has performed this Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 and 40 CFR Part 312. Any exceptions to, or deletions from, these practices are described in Section 15.6 and Section 15.7 of this report. This assessment has revealed the following recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), or significant data gaps in connection with the Subject Property:

- The historical operation of gasoline stations and/or dry cleaners, with documented petroleum and solvent releases, on adjacent and surrounding properties is a REC.

Under 40 CFR Part 312, the environmental professional is tasked with providing an opinion on whether further investigation, if deemed necessary, is appropriate to identify the presence of hazardous substances and/or petroleum products. Subsequently, the User should consider this opinion and determine whether additional inquiries or other services are warranted. It is important to note that this opinion does not establish a requirement for Phase II or other assessment activities. Based on information currently

available for the Subject Property, it is our opinion that additional investigation would be warranted to determine if the off-site historical operations and/or documented releases on adjacent and/or surrounding properties have impacted the Subject Property.

This report is considered valid if the acquisition date of the Subject Property is within 180 days of the earliest completion date listed below.

Critical Dates

Task	Completion Date
Interviews	July 31 and August 13, 2024
Review of Government Records	August 1, 2024
Site Reconnaissance	August 13, 2024
Declaration of Environmental Professional	August 23, 2024
Clean-up Lien Search	(User Responsibility)

2.0 INTRODUCTION

At the request of LODEN Development, LLC, Mid-Atlantic Associates, Inc. (Mid-Atlantic) conducted a Phase I Environmental Site Assessment (Phase I ESA) in conformance with the scope and limitations of The American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (E1527-21) and the United States Environmental Protection Agency (USEPA) 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiry*, for the property located at 313 East Martin Street in Raleigh, Wake County, North Carolina (the Subject Property).

3.0 SITE DESCRIPTION

3.1 Subject Property

The location of the Subject Property is depicted in Drawings 1 and 2 in Appendix A. Wake County property information is provided in Appendix G.

Item	Property Information
Address(es)	313 East Martin Street Raleigh, Wake County, North Carolina 27601
Latitude	35.7770980 °N
Longitude	-78.6342100 °W
Subject Property Acreage	0.32 acres
Current Owner	Howard F. Hadley and Dianne W. Hadley
Current Occupant(s)	The Subject Property is occupied by Aspire Homes (residential contractor), Catalyst (architectural and planning firm), and Provision Studio (architectural firm) on the first floor and residential tenants on the second floor.
Number of Parcels	One
Tax ID / Parcel #(s)	1703874995
Current Land Use	Commercial and residential

3.2 Description of Structures and Other Improvements

The Subject Property is currently developed with one two-story 4,642-square foot mixed-use structure that was constructed in 2004, according to Wake County tax information. The Subject Property historically contained two residential structures that were constructed in approximately 1896 that were razed prior to the construction of the present-day building. The Subject Property is currently used for commercial purposes on the first floor and residential purposes on the second floor. An asphalt-paved parking lot is developed around the on-site structure.

Electricity is provided by Duke Energy and natural gas service is provided by Dominion Energy. Municipal water and sewer services are provided by the City of Raleigh. The Subject Property can be accessed from the south via East Martin Street.

3.3 Adjoining Property Information

During our site reconnaissance, Mid-Atlantic observed the following land uses, occupants and/or tenants on the adjoining properties:

Direction From Subject Property	Current Use
North	Vacant commercial building (northwest), warehouse (north), and parking lot (northeast)
East	Parking lot
South	East Martin Street with Moore Square Magnet Middle School beyond
West	Parking lot

3.4 Physical Setting

The physical settings of the Subject Property are considered of interest since they may provide information related to the direction and physical mechanisms of contaminant migration, if present, from on-site and off-site sources.

Physical Setting Information	
Setting	**Description & Reference**
Topography	The Subject Property is approximately 310 feet above mean sea level according to the Raleigh West, NC USGS Topographic Quadrangle, 2022. According to the Wake County GIS Website (https://maps.raleighnc.gov/iMAPS/) topography at the Subject Property slopes from the northern portion of the site gradually downward to the eastern/southeastern portion of the site. Local topography generally slopes from the west to the east. In absence of other obvious significant structural or geomorphic draining features, surface drainage is suspected to move by sheet-flow generally towards the east/southeast at the Subject Property.
Geologic Settings	The Subject Property is located in the Piedmont physiographic province of North Carolina. The Subject Property is underlain by metamorphic rocks in the Raleigh Belt classified as "biotite gneiss and schist intruded by numerous sills and dikes of granite, pegmatite, and aplite; minor hornblende gneiss". [*Geology of North Carolina,* prepared by the North Carolina Geologic Survey, 1985]
Flood Plain	The Subject Property is not located in a flood zone as defined by the Federal Emergency Management Agency (FEMA). [FEMA Flood Panel 370243, Map Number 37201700300K, July 19, 2022]
Surface Water	Surface water was not observed at the Subject Property during our site reconnaissance.

Physical Setting Information	
Setting	**Description & Reference**
Estimated Depth to Groundwater	According to the *Phase II Environmental Site Assessment* (GeoLogix, Inc.; dated June 19, 2013), depth to groundwater at the east adjacent property was found to be between 26 and 27 feet below land surface (BLS).
Estimated Groundwater Flow Direction	Based on the local topography, groundwater flow at the Subject Property would be expected to flow generally southeast. Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells.
Wells	Mid-Atlantic did not observe evidence of water supply or monitoring wells at the Subject Property.

4.0 USER PROVIDED INFORMATION

ASTM E 1527-21 requires that certain tasks be performed by or on behalf of the User (typically the client) with the results provided to the environmental professional. Mid-Atlantic requested the results of these tasks from the User via the completed User Questionnaire, which was provided to Mid-Atlantic and is included in Appendix E. Mr. Henry Ward, Manager of LODEN Development, LLC, completed the User Questionnaire on behalf of the User. User-provided information is summarized in the following sections.

4.1 Title and Judicial Records for Liens and Activity and Use Limitations

It is the User's responsibility to conduct a search for the existence of environmental liens and activity and use limitations (AULs) by engaging a title company, real estate attorney, or title professional. The User indicated that they had no knowledge of environmental liens or AULs on the User Questionnaire. No other information concerning this User requirement was provided to Mid-Atlantic.

4.2 Specialized Knowledge

The User indicated on the User Questionnaire that they did not have specialized knowledge about the Subject Property.

4.3 Commonly Known or Reasonably Ascertainable Information

The User indicated they did not have knowledge of commonly known or reasonably ascertainable information regarding the Subject Property.

4.4 Valuation Reduction for Environmental Issues

The User indicated that the purchase price for the property reasonably reflects the fair market value.

4.5 Obvious Presence of Releases or Threatened Releases

Mid-Atlantic requested information concerning the obvious presence of releases or threatened releases from the User. The User indicated on the User Questionnaire that they had no knowledge of releases or threatened releases.

4.6 Owner, Property Manager, and Occupant Information

The Wake County Tax Administration lists the current owner of the Subject Property as Howard F. Hadley and Dianne W. Hadley. Refer to Section 6.5 for more detailed owner information. The Subject Property is currently occupied by Aspire Homes (residential contractor), Catalyst (architectural and planning firm), and Provision Studio (architectural firm) on the first floor and residential tenants on the second floor.

4.7 Reason for Performing the Phase I ESA

The purpose of a Phase I ESA is to identify RECs (as defined by ASTM Standard E1527-21) in connection with the Subject Property. A Phase I ESA is also performed to permit a User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bonafide prospective purchaser limitations within the scope of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C 9601) liability. The User indicated that the purpose of conducting this Phase I ESA was in conjunction with a potential property transaction involving the Subject Property.

5.0 STANDARD ENVIRONMENTAL RECORDS SOURCES

Mid-Atlantic Associates contracted Environmental Data Resources, Inc. (EDR) to conduct a search of the required government records outlined in Section 8.2.2 of ASTM E1527-21. Mid-Atlantic reviewed the report provided by EDR and detailed information on sites/listings that may indicate the presence or likely presence of hazardous substances or petroleum products on the Subject Property are included below. The remaining sites identified in the EDR report were deemed unlikely to have resulted in the presence or likely presence of hazardous substances or petroleum products on the Subject Property based on factors such as, but not limited to, the nature of the database listing, distance, topographic and/or hydraulic separation from the Subject Property. Copies of the research data and a description of the databases are included in Appendix C of this report.

5.1 Subject Property Database Records of Concern

The Subject Property was not identified on the lists/databases researched by EDR.

5.2 Nearby Properties Database Records of Concern

215 South Person Street, located northwest adjacent and upgradient of the Subject Property, was identified in the Inactive Hazardous Waste Sites Inventory (SHWS) as "East Martin St Solvent Contamination." The listing did not provide additional information. Refer to Section 5.4 for additional information regarding this property.

301 South Person Street, the block located south adjacent and cross-gradient of the Subject Property across East Martin Street, was identified in several databases with several addresses:

- Moore Square Museums Magnet (328 East Martin Street) was identified in the Leaking Underground Storage Tank (LUST) database and the Incident Management Database (IMD). LUST incident 22684 was reported on October 9, 2000 and closed out on November 6, 2000.
- Block A-42 NE Corner (328 East Martin Street) was identified in the LUST database. LUST incident 33328 was reported on October 9, 2000 and closed out on November 2, 2000.
- Wake County Public Schools (Block A-42; located at South Person and East Davies Street) was identified in the Leaking Aboveground Storage Tank (LAST) and IMD databases. LAST Incident 85016 was reported on April 1, 2000 and was closed out on November 17, 2004.
- Wake County Public Schools (located at South Person and East Martin Street) was identified in the IMD database. LUST incident 20791 was reported on June 24, 1999. The listing indicates that groundwater contamination with the "Material: TCE" detected at the site and references a chlorinated solvent report in the "warehouse of tire file (UST Incident #3897)". An incident closure date is not provided.

Based on the distance to the Subject Property, these historical releases on the south adjacent property suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

225 South Person Street, located approximately 75 feet west and upgradient of the Subject Property, was identified in the Underground Storage Tank (UST) Finder Release database, the LUST database, and the IMD as Killo (or Kilo) Pest Control. The listings indicate that one incident (LUST incident number not assigned) was reported on May 1, 1995 and closed out with a "No Further Action" status on August 24, 2000. The listings also indicate that a second incident, LUST Incident 46082, was reported on February 27, 2017 and remains open. Refer to Section 5.4 for additional information regarding this property.

304 East Martin Street, located approximately 150 feet southwest and cross-gradient of the Subject Property across East Martin Street, was identified in the UST Finder Release, LUST, and IMD databases as Former Ask Mart/Block A-42. The listings

indicate two LUST incidents were discovered at the property. LUST incident 21698 was reported on November 30, 1998 when soil and groundwater contamination were confirmed from a petroleum release. This incident was closed out on September 27, 2000. LUST incident 22129 was reported on July 20, 2000 and was closed out on May 31, 2023. Based on the distance to the Subject Property, these historical releases suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

319/325 South Person Street, located approximately 250 feet south and cross-gradient of the Subject Property, was identified in EDR's Historical Auto, LUST, LUST Trust, and IMD databases. EDR's Historical Auto database indicates that Blackwell and Roberts operated as a gasoline service station from 1970 to 1975, Ramsey Co. of Cary Inc. operated as a general automotive repair shop in 1989, and Transmission and Auto Center operated as a general automotive repair shop from 1986 to 1993. The listing indicates LUST Incident 3897 was reported at Warehouse of Tires on January 4, 1989 when contaminated soil was discovered during the removal of USTs. The listing indicates groundwater contamination was confirmed at the site. A Notice of Violation (NOV) was issued on June 22, 1989 and the incident was closed out on September 27, 2000. Based on the distance and cross-gradient topographic relationship to the Subject Property, historical operations at this facility do not suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property and are therefore not considered to be a REC.

228 and 230 East Martin and 225 East Davies Streets, located approximately 250 feet southwest and cross-gradient of the Subject Property, were identified in the Drycleaners and the Brownfields databases. 228 East Martin Street appeared as Dixie Dry Cleaners & Laundry in the Raleigh 1965 City Directory as a Cleaners and Dyers listing. The Brownfields listing indicates these properties have a recorded Brownfields Agreement as of August 25, 2014. A brownfields site is an abandoned or underused property where the threat of environmental contamination has hindered its redevelopment. Inclusion in the Brownfields database indicates that environmental assessment has been conducted at the property. A Brownfields Agreement indicates that appropriate measures to protect public health and the environment have been taken in response to release(s) identified on-site. Based on the distance and topographic relationship to the Subject Property, historical operations at these properties suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

308 South Person Street, located approximately 250 feet southwest and cross-gradient of the Subject Property, was identified in the Drycleaners database. The listing indicates Peerless Cleaners appeared in the Raleigh 1955 City Directory as a Cleaners and Dyers listing. The listing did not provide additional information about the facility. Based on the distance and topographic relationship to the Subject Property, the historical dry-cleaning operations at this site suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

5.3 Additional Environmental Record Sources

In addition to the EDR regulatory database search, Mid-Atlantic reviewed the following additional sources of environmental records:

- The Regional UST Incident Database (RUST), a collection of tables updated regularly by the Division of Waste Management (DWM) that lists leaking UST sites and older sites where above ground release of petroleum and hazardous substances have occurred. The tables include incident summary information, report submittal information, State LUST Trust Fund information and the current incident status.
- The Dry Cleaning Solvent Clean-up Act (DSCA) site inventories which include active dry cleaning facilities and three categories of remediation site inventories: known/suspected sites, certified sites, and no further action sites. The term "certified" refer to sites that have entered the DSCA Program and are in the process of assessment.
- Freedom of Information Act (FOIA) requests.
- North Carolina Department of Labor FOIA requests.
- North Carolina Department of Environmental Quality (NCDEQ) Site Locator Tool.

Mid-Atlantic identified additional environmental records in our review that had the potential to result in the identification of hazardous substances or petroleum products on the Subject Property. Refer to Section 5.4 for additional information as applicable.

5.4 File Reviews and/or Other Environmental Reports

During the completion of our assessment, Mid-Atlantic reviewed the following environmental reports (copies included in Appendix G) obtained from the User and/or the NCDEQ Site Locator Tool, as described in the table below:

215-217 South Person Street (West/Northwest Adjacent Properties)

Document Title/Source	Date	Conducted For	Conducted By
Phase II Environmental Site Assessment	February 21, 2013	City of Raleigh	Withers & Ravenel
Findings			
Withers & Ravenel (W&R) issued a *Phase II Environmental Site Assessment* for the two parcels (215 and 217 South Person Street) located west/northwest adjacent to the Subject Property on February 21, 2013. Six temporary monitoring wells were installed across the two parcels. Groundwater flow direction was found to be to the southeast, towards the Subject Property. Elevated concentrations of tetrachloroethene (PCE) were detected in three of the groundwater samples and elevated concentrations of petroleum-related compounds were detected in four of the groundwater samples, each of which were collected northwest and upgradient of the Subject Property. Based on the proximity and upgradient location of this investigation relative to the Subject Property, the results from this assessment suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.			

East Hargett Street, South Bloodworth Street, and East Martin Street Parcels (East Adjacent Properties)

Document Title/Source	Date	Conducted For	Conducted By
Limited Phase II Environmental Site Assessment	June 19, 2013	City of Raleigh	GeoLogix, Inc.
Findings			
GeoLogix, Inc. (GeoLogix) issued a *Limited Phase II Environmental Site Assessment* for the twelve parcels (330 East Hargett Street, 210, 214, 218, 224, 226, and 228 South Bloodworth Street, and 317, 319, 323, 325, and 327 East Martin Street [Block A-45]) located east adjacent to the Subject Property on June 19, 2013. Soil and groundwater samples were collected across the parcel assemblage. One groundwater monitoring well was installed north adjacent to the Subject Property and three groundwater monitoring wells were installed east adjacent to the Subject Property. Depth to groundwater at these wells was between 26 and 27 feet BLS. Two of the monitoring wells located east adjacent to the Subject Property had elevated concentrations of PCE detected in groundwater samples. Based on the proximity to the Subject Property of the samples collected in this assessment, these results suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.			

227 South Person Street (Located Approximately 75 Feet West of the Subject Property)

Document Title/Source	Date	Conducted For	Conducted By
Phase II Environmental Site Assessment	October 2, 2015	Banner Apartments	TerraTech Engineers, Inc.
Findings			
TerraTech Engineers, Inc. (TerraTech) issued a *Phase II Environmental Site Assessment* for 227 South Person Street, located approximately 75 feet west and upgradient of the Subject Property following a Phase I ESA. The report indicates that the Phase I ESA identified several areas of concern, including the historical operation of a pest control company for several decades with observed pesticide storage areas and the historical operation of a petroleum company with vehicle service stations. During the Phase II ESA, soil samples were collected from shallow (near land surface) and deep (approximately 25 feet BLS) locations. Petroleum-related compounds were detected at elevated concentrations in one of the deep soil samples at one location. Pesticides were detected in shallow samples from two of the soil locations and methylene chloride was detected in shallow samples at all four locations. Given that assessment completed nearby (*Limited Phase II Environmental Site Assessment,* GeoLogix, June 19, 2013) found depth to groundwater to be between 26 and 27 feet BLS, it is likely that these deep soil samples were collected near the water table; therefore, the detected petroleum contamination is likely to be present in groundwater. Based on the proximity to the Subject Property, upgradient topographic relationship to the Subject Property, and depth of the samples collected in this assessment, these results suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.			

6.0 HISTORICAL RECORDS REVIEW

6.1 Historical Summary

Historical information identifying the past use of the Subject Property and surrounding properties was obtained from a variety of sources as detailed in Appendix D and Appendix G of this report. The table below summarizes which decades of historical

resources were reasonably ascertainable for review. Resources that were not available or reasonably ascertainable are marked N/A in the table below. In addition, property ownership information was obtained from the Wake County GIS website.

Historical Resource	N/A	1890	1900	1910	1920	1930	1940	1950	1960	1970	1980	1990	2000	2010	2020

6.2 Past Uses of Subject Property

Based on User-provided information and a review of reasonably ascertainable records including aerial photographs, topographic maps, fire insurance maps and/or city directories, the previous uses of the Subject Property are described in the table below in intervals where meaningful property changes were noted. Past uses which may indicate the presence or likely presence of hazardous substances or petroleum products on the Subject Property are noted in bold and italicized text.

Past Uses of Subject Property	
Date	**Description**
1896 - 1949	In the Sanborn fire insurance maps from 1896, 1903, and 1909, the Subject Property appears to have been divided into two parcels (313 and 315 East Martin Street) and was developed with a residential structure on each parcel. The eastern parcel (315 East Martin Street) appears to have also been developed with an additional small structure, likely to be a storage shed, which is then moved to the north in the Sanborn fire insurance map from 1914. In the Sanborn fire insurance map from 1914, the western parcel (313 East Martin Street) appears to have been developed with two additional small structures, likely to be storage sheds. Aerial photographs from 1938 and 1949 appear to depict two residential structures on the Subject Property.
1950 - 1988	In the Sanborn fire insurance map from 1950, the western parcel (313 East Martin Street) appears to have been developed with several small structures north of the residential structure. Also in the Sanborn fire insurance map from 1950, the residential structure on the eastern parcel (315 East Martin Street) appears to have been expanded and two smaller structures are located north of the residential structure. One of these smaller structures is labeled "A" for private auto house. In the fire insurance map from 1972, the residential structure on the western parcel is now labeled "C" for commercial, several of the smaller structures on the western parcel appear to have been removed, and one of the smaller structures is now labeled "A" for private auto house. Aerial photographs from 1973 through 1983

Past Uses of Subject Property	
Date	**Description**
	appear to depict two residential structures on the Subject Property. According to historical city directories, 313 East Martin Street was used for residential purposes through 1957 and for commercial purposes from 1962 through 1972. 315 East Martin Street was used for residential purposes through 1988.
2005 - 2020	In the 2006 aerial photograph, the two residential structures appear to have been razed and the present-day commercial structure is first visible on the Subject Property. According to historical city directories, the Subject Property was used for commercial purposes from 2005 through 2020. The Subject Property appears to have been in its present-day configuration in the 2006 through 2020 aerial photographs.

6.3 Past Uses of Adjoining Properties

Based on User-provided information and a review of reasonably ascertainable records including aerial photographs, topographic maps, fire insurance maps and/or city directories, the previous uses of adjoining properties are described in the table below in intervals where meaningful property changes were noted. Past uses which may indicate the presence or likely presence of hazardous substances or petroleum products on adjoining properties are noted in bold and italicized text.

Past Uses of Adjoining Properties	
Date	**Description**
1896 - 1914	In the Sanborn fire insurance map from 1896, adjacent properties appear to consist of residential structures to the west, north, and south, a vacant structure to the east, and an undeveloped parcel to the north and east. The street located south adjacent to the Subject Property is labeled "E. Martin or Park Av." in the Sanborn fire insurance map from 1896. In the Sanborn fire insurance map from 1903, the east adjacent property is developed with two residential structures and the south adjacent street is now labeled as East Martin Street.
1950 - 1983	In the Sanborn fire insurance map from 1950, the northwest adjacent property (213 South Person Street) is now developed with one structure labeled "Salvation Army Hall" and one residential structure. ***The east adjacent property (317 East Martin Street) is developed with a structure labeled "Printing". According to historical city directories, 317 East Martin Street was occupied by Bogasse Printing Co. in 1952.*** In the Sanborn fire insurance map from 1972, the northwest adjacent property (213 South Person Street) appears to have expanded to include 215 South Person Street and is developed with a Salvation Army Welfare Center and a warehouse. The structure on the east adjacent property (317 East Martin Street) is now labeled as a store. Also in the Sanborn fire insurance map from 1972, the west adjacent property (301 East Martin Street) is labeled as "Used Auto Sales" and contains an office structure. The north/northeast properties appear to have been undeveloped.
2006 - 2020	In the 2006 aerial photograph, the east adjacent property appears to have been cleared of structures and the south adjacent property appears to have been developed with the present-day school. In the 2009 aerial photograph, the northeast

Past Uses of Adjoining Properties	
Date	**Description**
	adjacent property appears to have been used as a parking lot. Adjacent properties appear to have been in their present-day configurations in the 2009 through 2020 aerial photographs.

6.4 Past Uses of Surrounding Properties

Past uses of surrounding properties which could be determined through the course of researching the Subject Property are outlined below. Factors considered for the level of detail in the analysis are included in Section 8.3.10 of ASTM E1527-21. Past uses of surrounding properties which may indicate the presence or likely presence of hazardous substances or petroleum products on surrounding properties are noted in bold and italicized text.

Past Uses of Surrounding Properties	
Date	**Description**
1896 - 1914	In the Sanborn fire insurance maps from 1896, 1903, 1909, and 1914, surrounding properties appear to consist of primarily residential structures.
1936 - 1983	***In the Sanborn fire insurance map from 1950, 227 South Person Street, located approximately 75 feet west of the Subject Property, was labeled as a gasoline station with two gasoline tanks. According to historical city directories, 227 South Person Street was occupied by Lassiters Service Station in 1936, Castleberry Service Station from 1941 to 1952, and Bradley's Crown Service Station in 1957.*** ***Also in the Sanborn fire insurance map from 1950, 228 East Martin Street, located approximately 250 southwest of the Subject Property, was labeled as a gasoline station with two gasoline tanks. According to historical city directories, 228 East Martin Street was occupied by Allen's Service Station in 1931, Market Service Station from 1936 to 1947, and Drivers Esso Service in 1952. Additionally, 228 East Martin Street was occupied as Central Cleaners Inc. in 1957, Dixie Dry Cleaners & Laundry from 1962 to 1967, Lusterkleen Dry Cleaners in 1972, and Brandon's Cleaners in 1977.*** ***Also in the Sanborn fire insurance map from 1950, a gasoline tank was depicted approximately 185 feet southeast of the Subject Property at 322 East Martin Street.*** 322 East Martin Street was vacant or was used for residential purposes from 1941 to 1957. According to historical city directories, ***405 East Martin Street, located approximately 300 feet east of the Subject Property, was occupied by Elite Dry Cleaners in 1952.*** In the Sanborn fire insurance map from 1972, 227 South Person Street is now labeled as "A" for automobile garage and no longer indicates tanks are present. 228 South Person Street is now labeled as a store. The gasoline tank at 322 East Martin Street is no longer labeled. ***305 South Person Street, located approximately 100 feet***

Past Uses of Surrounding Properties	
Date	**Description**
	southwest of the Subject Property, is labeled as a gasoline station. This gasoline station appears to have been present through the 1983 aerial photograph. 305 South Person Street did not appear in historical city directories.
2006 - 2020	Surrounding properties appear to consist of residential structures to the east, commercial structures to the south, southwest, and north, and a community park and commercial structures to the west in the 2006 through 2020 aerial photographs.

6.5 Tax and Deed Information

Mid-Atlantic reviewed the current deed for the Subject Property obtained from the Wake County Register of Deeds. The current deed identifies the current owner of the Subject Property (Parcel ID 1703874995) as follows:

Howard F. Hadley and Dianne W. Hadley
210 Groveland Avenue
Raleigh, North Carolina, 27605

The current deed, dated September 20, 2001, lists Roy L. Watson as the Grantor and Howard F. Hadley and Dianne W. Hadley as the Grantee. A copy of the current property deed is included in Appendix D.

6.6 Data Failure

The objective of the historical research required by ASTM E 1527-21 is to develop a history of the previous uses of the Subject Property, adjoining properties, and surrounding properties to identify the likelihood that past uses have led to a REC in connection with the Subject Property. Historical research is considered complete when either the objective is met, or data failure is encountered. Data failure occurs when all of the reasonably ascertainable standard historical resources that are deemed useful have been reviewed and the objective has not been met. Mid-Atlantic was able to meet the historical research objective and as such did not encounter data failure during the performance of this Phase I ESA.

6.7 Historical Recognized Environmental Conditions

ASTM E 1527-21 defines an HREC as: *"a previous release of any hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by a regulatory authority or authorities, without subjecting the subject property to any controls (for example, activity and use limitations, or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition."*

No evidence of HRECs was identified during completion of this assessment.

6.8 Controlled Recognized Environmental Conditions

ASTM E 1527-21 defines a CREC as: a "*recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*

No evidence of CRECs was identified during completion of this assessment.

7.0 INSTITUTIONAL CONTROLS (IC) & ENGINEERING CONTROLS (EC)

Based on research conducted by Mid-Atlantic in Sections 5.0 and 6.0, we did not identify Institutional or Engineering Controls associated with the Subject Property.

8.0 SITE RECONNAISSANCE

Mid-Atlantic personnel conducted a physical/visual reconnaissance of the Subject Property and the surrounding area. The reconnaissance included a visual inspection of the entire site. Photographs taken during Mid-Atlantic's site reconnaissance are included in Appendix B.

Site Assessor	Madeline Hook
Date of Site Reconnaissance	August 13, 2024
Methodology	Walking
Limiting Conditions	Mid-Atlantic was unable to access the interiors of the two residential units on the second floor of the building. However, due to the historical residential use of this portion of the building, we do not believe this limiting condition hindered our ability to identify RECs at the Subject Property.
Subject Property Current Uses	The Subject Property is currently used for residential and commercial purposes.
Subject Property Past Uses	*(See Section 6.2)*
Current Uses of Adjoining Properties	*(See Section 3.3)*
Past Uses of Adjoining Properties	*(See Section 6.3)*
Surrounding Areas Current/Past Uses	*(See Section 6.4)*
Physical Setting	*(See Section 3.4)*
Subject Property: Structures/Improvements	The Subject Property is currently developed with one mixed-use building.

Roads/Parking	The Subject Property contains an asphalt-paved parking lot. The Subject Property can be accessed from the south via East Martin Street.
Potable Water Source	City of Raleigh
Sewage Disposal	City of Raleigh
Heating/Cooling	The Subject Property uses natural gas heating and electric cooling systems.

8.1 Site Visit Findings

Mid-Atlantic conducted a site reconnaissance on August 13, 2024. At that time, the Subject Property was developed with one mixed-use building that was occupied by Aspire Homes (residential contractor), Catalyst (architectural and planning firm), and Provision Studio (architectural firm) on the first floor and is used for residential purposes on the second floor. A summary of our site reconnaissance findings is outlined in the table below with more detailed information in the subsequent sections.

Feature, Activity, Use, or Condition	Observed on Subject Property	Observed on Adjacent Property
Hazardous Substances/Petroleum	No	No
Storage Tanks	No	No
Odors	No	No
Water/Pools/Sumps Likely to Contain Hazardous Substances/Petroleum	No	No
Drums, Totes/Other Containers	No	No
Containers Not Connected with Uses	No	No
Unidentified Containers	No	No
Equipment Likely to Contain PCBs	Yes	No
Interior Staining/Corrosion	No	No
Drains/Sumps	No	No
Pits, Ponds, and Lagoons	No	No
Solid Waste Disposal Site	No	No
Stained Soil/Pavement or Stressed Vegetation	No	No
Wells	No	No
Wastewater/Septic/Cesspools	No	No

8.1.1 Equipment Likely to Contain PCBs

A pad-mounted transformer is located northeast adjacent to the on-site building. The transformer displayed a blue "non-PCB" sticker. Mid-Atlantic also observed a pole-mounted transformer on the southern portion of the property along East Martin Street. This pole-mounted transformer appeared to be in good condition and without evidence of a release.

8.2 Interior Observations

Mid-Atlantic observed interior conditions at the Subject Property consistent with commercial office space on the first floor. Mid-Atlantic did not observe conditions that would indicate evidence of recognized environmental conditions.

8.3 Exterior Observations

Mid-Atlantic observed exterior conditions consistent with a commercial property. The ground surface at the site slopes generally south and groundcover consists of asphalt-paved surfaces or landscaped areas. The Subject Property can be accessed from the south via East Martin Street.

9.0 INTERVIEWS

The following were contacted for interviews by Mid-Atlantic with transcripts of these interviews included in the table below with significant findings bolded and italicized. Copies of completed User Questionnaires and other interview information, as appropriate, are included in Appendix E.

Source	Date	Comments
User	July 31, 2024	Mr. Henry Ward, Manager of LODEN Development, LLC, completed the User Questionnaire and did not note areas of environmental concern.
Property Owner/Key Site Manager	August 14, 2024	Mid-Atlantic interviewed Ms. Dianne Hadley, current owner of the Subject Property and her daughter, Ms. Mary-Elizabeth Hadley, who helps manage the building. Ms. Mary-Elizabeth Hadley indicated that the Subject Property had been owned by the family since the residential structures occupied the property. She indicated that the Wake County real estate data is accurate and that the family acquired the property when John O'Briant purchased it (1985, according to Wake County). Ms. Dianne Hadley indicated that the property had only been used for residential purposes historically and is mixed-use currently. She indicated that, to her knowledge, no storage tanks had been located at the property and no environmental assessment had been done at the property.
Occupant	N/A	Mid-Atlantic did not interview the current occupants.
Local Government Agency	August 1, 2024	Mid-Atlantic accessed the Raleigh Fire Department database (http://www.rfdreports.net/) for information maintained in their files regarding possible responses to the Subject Property. The database did not provide fire reports of environmental concern.
Other	N/A	Mid-Atlantic did not interview others during the completion of this assessment.

10.0 NON-SCOPE CONSIDERATIONS

The ASTM E 1527 standard provides for the addition of non-ASTM scope items to the completion of a Phase I ESA as an addition to the ASTM E 1527 scope if requested by the User/Client. Non-scope considerations may also include emerging contaminants that are not currently defined as hazardous substances, but may be so classified in the future. The client did not request inclusion of non-scope items in completion of this report and none were provided by Mid-Atlantic.

11.0 SIGNIFICANT DATA GAP

ASTM E 1527-21 defines significant data gap as *"a data gap that affects the ability of the environmental professional to identify a recognized environmental condition."* A Phase I ESA report should identify and comment on significant data gaps and must also identify the sources of information that were consulted to address these significant data gaps. Mid-Atlantic did not encounter significant data gaps during performance of this PESA.

12.0 FINDINGS

Mid-Atlantic identified the following features, activities, uses, and/or conditions that may indicate the presence or likely presence of hazardous substances or petroleum products at the Subject Property:

- The historical operation of gasoline stations and/or dry cleaners, with documented petroleum and solvent releases, on adjacent and surrounding properties.

13.0 OPINIONS

Mid-Atlantic did not identify RECs originating at the Subject Property. However, regulatory and historical resources indicate several adjacent and surrounding properties historically operated as gasoline stations and/or dry cleaners and that releases of petroleum products and/or hazardous substances have occurred on some of these properties. Further details are included below:

- A *Phase II Environmental Site Assessment* (W&R; February 21, 2013) was conducted for 215 and 217 South Person Street, located west/northwest adjacent to the Subject Property. Elevated concentrations of PCE were detected in three groundwater samples collected from temporary monitoring wells located upgradient to the Subject Property. Based on the proximity and upgradient topographical relationship to the Subject Property of the samples collected in this assessment, these results suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.

- A *Limited Phase II Environmental Site Assessment* (GeoLogix; June 19, 2013) was conducted for the twelve parcels (330 East Hargett Street, 210, 214, 218, 224, 226, and 228 South Bloodworth Street, and 317, 319, 323, 325, and 327 East Martin Street [Block A-45]) located east adjacent to the Subject Property. One groundwater monitoring well was installed north adjacent to the Subject Property and three groundwater monitoring wells were installed east adjacent to the Subject Property. Two of the monitoring wells located east adjacent to the Subject Property had elevated concentrations of PCE detected in groundwater samples. Based on the proximity of the samples collected in this

assessment, these results suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.

- Historical sources indicate the east adjacent property, 317 East Martin Street, was developed with a structure labeled "Printing" in the Sanborn fire insurance map from 1950. Historical city directories indicate the property was occupied by Bogasse Printing Co. in 1952. Because of the typical use of solvents in print shop operations during this time period, historical operations at this east adjacent property suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.

- Regulatory resources indicate that 301 South Person Street, the block located south adjacent to the Subject Property across East Martin Street, has several documented release incidents. LUST incident 20791, associated with Wake County Public Schools (located at South Person and East Martin Street), was reported on June 24, 1999. Groundwater contamination with the "Material: TCE" was detected at the site and referenced a chlorinated solvent report in the "warehouse of tire file (UST Incident #3897)". An incident closure date is not provided. LAST Incident 85016, associated with Wake County Public Schools (Block A-42; located at South Person and East Davies Street), was reported on April 1, 2000 and was closed out on November 17, 2004. LUST incident 22684, associated with Moore Square Magnet Museums (328 East Martin Street) was reported on October 9, 2000 and was closed out on November 6, 2000. LUST Incident 33328, associated with Block A-42 NE Corner (328 East Martin Street), was reported on October 9, 2000 and closed out on November 2, 2000. Based on the proximity to the Subject Property, these historical releases on the south adjacent properties suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

- Historical sources indicate 225 South Person Street, located approximately 75 feet west and upgradient of the Subject Property, operated as a gasoline station from approximately 1936 to 1957. A LUST incident was reported on May 1, 1995 and was closed out with a "No Further Action Status" on August 24, 2000. A second LUST incident (LUST Incident 46082) was reported on February 27, 2017 and remains open. A *Phase II Environmental Site Assessment* (TerraTech; October 2, 2015) was conducted for the site. The site was reportedly used for pesticide storage and as a gasoline station. Elevated levels of petroleum-related compounds were detected in soil at a depth of approximately 25 feet BLS, which was likely to be near the water table. Based on the proximity to the Subject Property, upgradient topographic relationship to the Subject Property, and depth of the samples collected in this assessment, these results suggest the presence or likely presence of hazardous substances or petroleum products on the Subject Property.

- Regulatory resources indicate that 304 East Martin Street, located approximately 150 feet southwest and cross-gradient of the Subject Property across East Martin Street, operated as a gasoline station. The Former Ask Mart/Block A-42 was associated with two LUST incidents. LUST incident 21698 was reported on November 30, 1998 when soil and groundwater contamination were confirmed from a petroleum release. This incident was closed out on September 27, 2000. Additionally, LUST incident 22129 was reported on July 20, 2000 and was closed out on May 31, 2023. Based on the distance to the Subject Property, these historical releases suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

- Regulatory resources indicate that 228 and 230 East Martin and 225 East Davies Streets, located approximately 250 feet southwest and cross-gradient of the Subject Property, have a recorded Brownfields Agreement as of August 25, 2014. 228 East Martin Street operated as a gasoline station with two gasoline tanks from approximately 1931 to 1952 and operated as a dry cleaning facility from approximately 1957 to 1977. Inclusion in the Brownfields database indicates that environmental assessment has been conducted at the property in response to identified release(s). Based on the distance and topographic relationship to the Subject Property, historical operations at these properties suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

- Historical sources indicate that 308 South Person Street, located approximately 250 feet southwest and cross-gradient of the Subject Property, operated as Peerless Cleaners according to the Raleigh 1955 City Directory. The facility reportedly operated as a Cleaners and Dyers. Mid-Atlantic was unable to identify additional information regarding the facility. Based on the distance and topographic relationship to the Subject Property, the historical dry-cleaning operations at this site suggest the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

14.0 CONCLUSIONS AND RECOMMENDATIONS

Mid-Atlantic has performed this Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 and 40 CFR Part 312. Any exceptions to, or deletions from, these practices are described in Section 15.6 and Section 15.7 of this report. This assessment has revealed the following recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), or significant data gaps in connection with the Subject Property:

- The historical operation of gasoline stations and/or dry cleaners, with documented petroleum and solvent releases, on adjacent and surrounding properties is a REC.

Under 40 CFR Part 312, the environmental professional is tasked with providing an opinion on whether further investigation, if deemed necessary, is appropriate to identify the presence of hazardous substances and/or petroleum products. Subsequently, the User should consider this opinion and determine whether additional inquiries or other services are warranted. It is important to note that this opinion does not establish a requirement for Phase II or other assessment activities. Based on information currently available for the Subject Property, it is our opinion that additional investigation would be warranted to determine if the off-site historical operations and/or documented releases on adjacent and/or surrounding properties have impacted the Subject Property.

15.0 REPORT INFORMATION

15.1 Purpose

Mid-Atlantic understands that the findings of this Phase I ESA will be used to evaluate the Subject Property with respect to a potential property transaction. The purpose of this Phase I ESA was to identify RECs that are indicative of an existing release, past release, or material threat of a release at the Subject Property. This Phase I ESA was performed to satisfy one of the requirements to qualify for the innocent landowner, bona fide prospective purchaser or contiguous property owner defense to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and as amended by the Small Business Liability Relief and Brownfields Redevelopment Act: that is, the practices that constitute “all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice,” as defined in 40 CFR 312.

15.2 Scope of Work

This Phase I ESA was completed by gathering required information that was publicly available within reasonable time and cost constraints and which could be practically reviewed. Our scope of services included the following:

- ***Records Review*** - Obtaining and reviewing publicly available records (of both current and historical significance) in order to help identify RECs in connection with the Subject Property. Those specific records reviewed, including those records which were sought and were not readily available or reasonably ascertainable, are identified in the report.
- ***Site and Surrounding Properties Reconnaissance*** - Conducting a site and surrounding property reconnaissance, the objective of which was to obtain information indicating the likelihood of the existence of RECs in connection with the Subject Property, as defined in ASTM E-1527-21.
- ***Interviews*** - Conducting interviews with persons associated with the Subject Property and with appropriate local government officials in order to identify RECs in connection with the Subject Property. The specific parties interviewed and the nature and scope of the interviews are described in the report.

- ***Report*** - Summarizing the results of our investigation into this report and providing a professional opinion regarding the potential for environmental impact at the Subject Property and a list of RECs.

15.3 Special Terms and Conditions

This Phase I ESA was conducted in accordance with the terms and conditions of Mid-Atlantic's contract with LODEN Development, LLC. It is the responsibility of the User (typically the client) to provide known site information, environmental lien and AULs, if there is a lower purchase price than the Fair Market Value due to known or perceived contamination, and the other information noted in Section 4.0 under the User subsection.

15.4 Reliance

The User for this report is LODEN Development, LLC. Pursuant to ASTM E 1527-21, Mid-Atlantic requested site information from the User representative, Henry Ward, via a User Questionnaire. Henry Ward is the Manager of LODEN Development, LLC. A copy of the completed User Questionnaire is included in Appendix E**,** and User provided information is summarized in Section 4.0.

The User may rely on the contents of this Phase I ESA subject to the limitations placed on the scope, nature and type of Mid-Atlantic's services as stated in the Phase I ESA and subject to those Terms and Conditions as stated in Mid-Atlantic's contract with the client. The User and any additional parties specifically granted reliance, are the only parties to whom Mid-Atlantic grants the right to rely upon the Phase I ESA. No other third party may rely on the Phase I ESA unless the express written consent of Mid-Atlantic is first obtained. Any such reliance will be granted in accordance with the terms of the original contract between Mid-Atlantic and the client.

The standard states that a Phase I ESA completed on a property within 12 months of property acquisition or the date intended for a property transaction (if the property is not being acquired), may be used provided that the following Phase I ESA components are completed or updated within 180 days of the acquisition date or date intended for a property transaction: (i) interviews with owners, operators and occupants; (ii) a search for recorded environmental cleanup liens; (iii) review of federal, tribal, state and local government records (i.e. an environmental database search); (iv) visual inspection of the property and adjacent properties; and, (v) the declaration by the EP responsible for the assessment or update.

This report is assumed viable under the standard (ASTM E1527-21) if it was completed less than 180 days prior to the date of property acquisition or the date intended for a property transaction (if the property is not being acquired). If a party other than to whom the report was prepared wishes to use the report during the 180 day period, the

new User(s) must satisfy the User responsibilities noted in Section 15.8 under the User subsection. The 180 day period begins at the completion of the earliest required task as noted in the table below.

For using Phase I ESA reports greater than 12 months old prior to the intended acquisition or transaction date, the standard outlines procedures that Users should follow in Section 4.7 and 4.8 of ASTM E1527-21.

Critical Dates

Task	Completion Date
Interviews	July 31 and August 13, 2024
Review of Government Records	August 1, 2024
Site Reconnaissance	August 13, 2024
Declaration of Environmental Professional	August 23, 2024
Clean-up Lien Search	(User Responsibility)

15.5 Significant Assumptions

Mid-Atlantic assumes that information provided by the User of the Phase I ESA report and those interviewed in conjunction with the Phase I ESA is true and accurate to the best of their knowledge. No other significant assumptions were used during the performance of this Phase I ESA.

The ASTM Standard Practice E 1527-21 provides several definitions that are applicable to the performance of this Phase I ESA:

> Significant Data Gap - a data gap that affects the ability of the environmental professional to identify a recognized environmental condition." A Phase I ESA report should identify and comment on significant data gaps and must also identify the sources of information that were consulted to address these significant data gaps.
>
> REC (recognized environmental condition) - "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." For the purposes of [the standard], "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form including solid and liquid at the surface or subsurface and vapor in the subsurface". Note: a vapor encroachment condition (VEC) in the subsurface is described in ASTM Guide E2600-15 *Standard Guide for Vapor*

Encroachment Screening on Property Involved in Real Estate Transactions. Per the authorized contract, Mid-Atlantic was not requested to conduct a Vapor Encroachment Screen in accordance with the E2600-15 guide.

CREC (controlled recognized environmental condition) - a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). A condition identified as a CREC does not imply that the EP has evaluated or confirmed the adequacy, implementation or continued effectiveness of the required control that has been, or is intended to be, implemented. If CREC(s) are identified during the Phase I ESA, they will be listed in the Findings section of the report and as a REC in the Conclusions Section.

HREC (historic recognized environmental condition) - a previous release of any hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by a regulatory authority or authorities, without subjecting the subject property to any controls (for example, activity and use limitations, or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition. Before calling the past release a HREC, the EP must determine whether the past release is a REC at the time the Phase I ESA is conducted (e.g. if there has been a change in the regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

De minimis condition - A condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. *De minimis* conditions are not RECs nor CRECs.

Business Environmental Risk (BER) - A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Client imposed limitations and site condition limitations, if encountered, are detailed in Section 7.0.

User - The party seeking to use Standard Practice E1527 [the standard] to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The User has specific obligations for completing a successful application of the standard including: 1)

completion and return of the User Questionnaire, preferably prior to the EP visiting the site; 2) Review Title and Judicial Records for Environmental Liens and Activity and Use Limitations (AULs); 3) communicate to the EP prior to the site visit any specialized knowledge or experience pertinent to the identification of RECs in connection with the property and/or actual knowledge of any environmental liens or AULs encumbering the property; 4) communicate to the EP if a significantly lower purchase price (with regard to fair market value) is being offered on the property due to perceived or known environmental contamination (the purchase price need not be disclosed); 5) inform the EP prior to the site visit about commonly known or reasonably ascertainable information within the local community about the property that could pertain to the identification of RECs, and, 6) the User must consider the degree of obviousness of the presence or likely presence of releases or threatened releases at the property and the ability to detect releases or threatened releases by appropriate investigation. In regard to environmental liens and AULs (number "2" above), the standard does not impose on the EP the responsibility to undertake a review of recorded land title records and judicial records for environmental liens and AULs. It is the User's responsibility to either (1) engage a title company, real estate attorney, or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens and AULs currently recorded against or relating to the property, or (2) negotiate such an engagement of a title company, real estate attorney, or title professional as an addition to the scope of work of the EP.

VEC - A vapor encroachment condition (VEC) is the presence of likely presence of COC vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property.

VIC - A vapor intrusion condition (VIC) is the presence or likely presence of chemicals of concern in the interior space of a building or at a planned building location. The term includes hazardous substances or petroleum products even under conditions in compliance with laws.

15.6 Limitations and Exceptions

As contracted, the scope of work of this Phase I ESA did not include a detailed review of agency files on specific, environmentally related incidents (unless mentioned in the report) which may have occurred near the Subject Property. It also did not include other issues that may be addressed, depending on site-specific circumstances, during commercial real estate transactions. These include, but are not limited to, asbestos-containing materials, lead-based paint, radon, lead in drinking water, wetlands, cultural or natural resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, radiological compounds, etc.

Our professional services have been performed using the degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional information included in this report. Although this study has been a reasonably-thorough attempt to identify conditions that are indicative of releases and threatened releases of hazardous substances, as well as pollutants, contaminants, petroleum and petroleum products and controlled substances on and/or off-site, there is always the possibility that potential sources of contamination have escaped detection due to the limitations of this study, the availability of historical records, the inaccuracy of governmental records and/or the presence of undetected and unreported environmental accidents. It should be noted that no environmental site assessment can completely eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a site. Mid-Atlantic reserves the right to alter our findings based on our review of any information obtained and reviewed after the date of this report.

Observations, conclusions and/or recommendations pertaining to environmental conditions at the Subject Property are necessarily limited to conditions observed, and or materials reviewed at the time this study was undertaken. It was not the purpose of this study to determine the actual presence, degree or extent of contamination, if any, at this site. This could require additional exploratory work, including sampling and laboratory analysis. In addition, the findings of this Phase I ESA are not intended to serve as an audit for health and safety compliance issues pertaining to improvements or activities at the site. Mid-Atlantic is not liable for the discovery or elimination of hazards that may potentially cause damage, accidents or injury. No warranty, expressed or implied, is made with regard to the conclusions and/or recommendations presented within this report.

15.7 Deviations from the ASTM Standard

This Phase I ESA substantially complies with the scope of work outlined in our proposal and approved by LODEN Development, LLC. In completing this Phase I ESA, Mid-Atlantic utilized the procedures set forth in ASTM E 1527-21, as amended, except for exceptions and /or limiting conditions as discussed in Section 15.6.

15.8 Continuing Obligations

Persons seeking protection under CERCLA liability are not entitled to the CERCLA liability protections provided for innocent landowners, bona fide prospective purchasers and contiguous property owners, unless they comply with all of the continuing obligations of the Subject Property set forth by federal, state, county, and any other governing body.

15.9 Qualifications of Environmental Professionals

Refer to Appendix F for qualifications of the environmental professionals.

15.10 Declaration of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/22/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

NC HSDS: The Hazardous Substance Disposal Sites list contains locations of uncontrolled and unregulated hazardous waste sites. The file contains sites on the national priority list as well as the state priority list. The data source is the North Carolina Center for Geographic Information and Analysis.

A review of the NC HSDS list, as provided by EDR, and dated 08/09/2011 has revealed that there are 4 NC HSDS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

NC SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

A review of the NC SHWS list, as provided by EDR, and dated 02/29/2024 has revealed that there are 21 NC SHWS sites within approximately 1 mile of the target property.

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/11/2024 has revealed that there are 5 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 28 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are

6 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants

(manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

RALEIGH MGP NO. 2	600 WEST CABARRUS ST	W 1/2 - 1 (0.754 mi.)	AN202	439

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D029
Waste Description:	1,1-Dichloroethylene
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichloroethylene
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	P022
Waste Description:	Carbon Disulfide
Waste Code:	P029
Waste Description:	Copper Cyanide (Or) Copper Cyanide Cu(Cn)

ASHLAND INC. (Continued) **1000881885**

Waste Code:	U001
Waste Description:	Acetaldehyde (I) (Or) Ethanal (I)
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U004
Waste Description:	Acetophenone (Or) Ethanone, 1-Phenyl-
Waste Code:	U012
Waste Description:	Aniline (I,T) (Or) Benzenamine (I,T)
Waste Code:	U019
Waste Description:	Benzene (I,T)
Waste Code:	U028
Waste Description:	1,2-Benzenedicarboxylic Acid, Bis(2-Ethylhexyl) Ester (Or) Diethylhexyl Phthalate
Waste Code:	U031
Waste Description:	1-Butanol (I) (Or) N-Butyl Alcohol (I)
Waste Code:	U037
Waste Description:	Benzene, Chloro- (Or) Chlorobenzene
Waste Code:	U044
Waste Description:	Chloroform (Or) Methane, Trichloro-
Waste Code:	U055
Waste Description:	Benzene, (1-Methylethyl)- (I) (Or) Cumene (I)
Waste Code:	U056
Waste Description:	Benzene, Hexahydro- (I) (Or) Cyclohexane (I)
Waste Code:	U057
Waste Description:	Cyclohexanone (I)
Waste Code:	U069
Waste Description:	1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate
Waste Code:	U070
Waste Description:	Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene
Waste Code:	U071
Waste Description:	Benzene, 1,3-Dichloro- (Or) M-Dichlorobenzene
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U088
Waste Description:	1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate
Waste Code:	U092
Waste Description:	Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)
Waste Code:	U102
Waste Description:	1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

ASHLAND INC. (Continued) **1000881885**

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U107
Waste Description: 1,2-Benzenedicarboxylic Acid, Dioctyl Ester (Or) Di-N-Octyl Phthalate

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U110
Waste Description: 1-Propanimine, N-Propyl-(I) (Or) Dipropylamine (I)

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U125
Waste Description: 2-Furancarboxaldehyde (I) (Or) Furfural (I)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U160
Waste Description: 2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U171
Waste Description: 2-Nitropropane (I,T) (Or) Propane, 2-Nitro- (I,T)

Waste Code: U189
Waste Description: Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

ASHLAND INC. (Continued) **1000881885**

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U219
Waste Description: Thiourea

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/25/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: Inactive Hazardous Sites Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics

Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

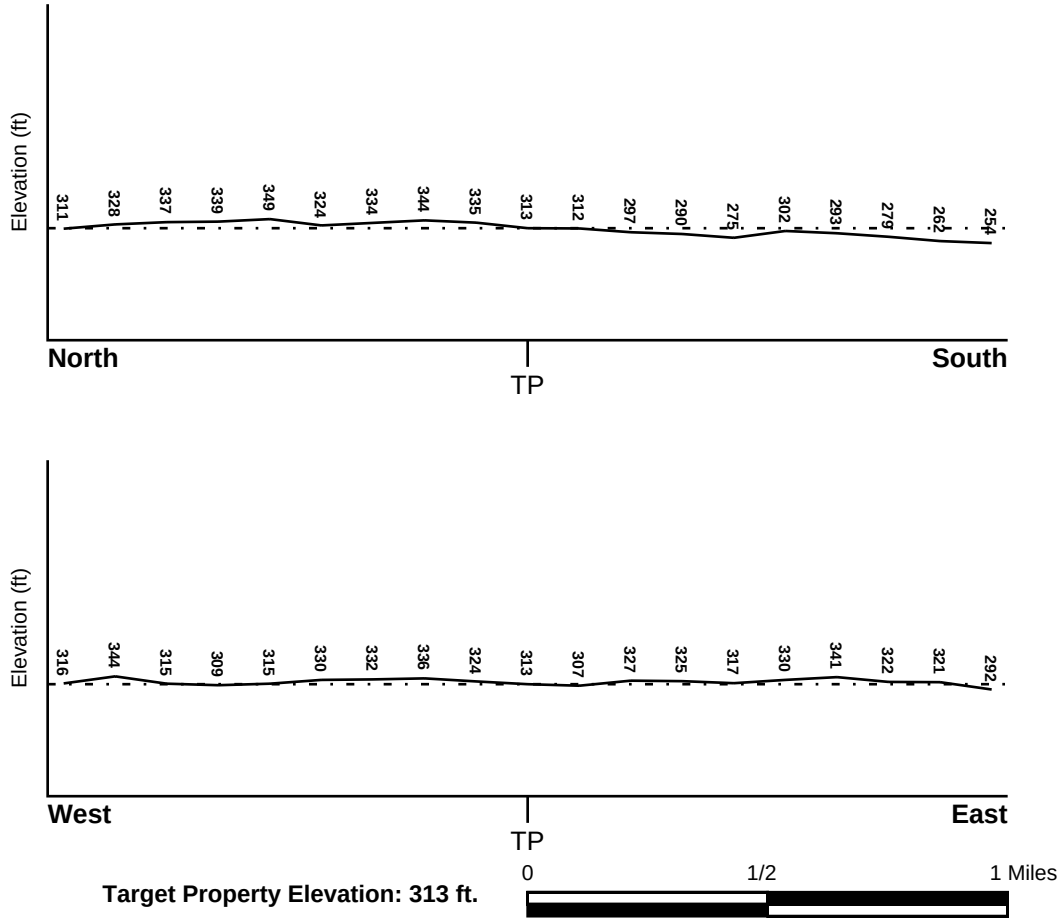

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3720170300J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3720170400J	FEMA FIRM Flood data
3720171400J	FEMA FIRM Flood data
3720171300J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
RALEIGH WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Pennsylvanian
Series:	Felsic paragneiss and schist
Code:	mm1 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Metamorphic Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
fine sandy loam
loam

Surficial Soil Types: sandy loam
fine sandy loam
loam

Shallow Soil Types: clay loam
clay
sandy clay

Deeper Soil Types: sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: US Fish & Wildlife Service
Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

North Carolina Public Water Supply Wells

Telephone: 919-715-3243

OTHER STATE DATABASE INFORMATION

North Carolina Wildlife Resources/Game Lands
Source: Center for Geographic Information and Analysis
Telephone: 919-733-2090
All publicly owned game lands managed by the North Carolina Wildlife Resources Commission and as listed in Hunting and Fishing Maps.

NC Natural Heritage Sites: Natural Heritage Element Occurrence Sites
Source: Natural Heritage Occurrence Sites Center for Geographic Information and Analysis
Telephone: 919-733-2090
A point coverage identifying locations of rare and endangered species, occurrences of exemplary or unique natural ecosystems (terrestrial or aquatic), and special animal habitats (e.g., colonial waterbird nesting sites).

NC Natural Areas: Significant Natural Heritage Areas
Source: Center for Geographic Information and Analysis
Telephone: 919-733-2090
A polygon converage identifying sites (terrestrial or aquatic) that have particular biodiversity significance. A site's significance may be due to the presenceof rare species, rare or high quality natural communities, or other important ecological features.

RADON

State Database: NC Radon
Source: Department of Environment & Natural Resources
Telephone: 919-733-4984
Radon Statistical and Non Statiscal Data

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Mid-Atlantic Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

NORTH CAROLINA GENERAL WARRANTY DEED

THIS DEED made this 20th day of September, 2001, by and between

GRANTOR	GRANTEE
ROY L. WATSON, widower	**HOWARD F. HADLEY and wife, DIANNE W. HADLEY**
P. O. Box 27701 **Raleigh, NC 27611-7701**	**210 Groveland Ave.** **Raleigh, NC 27605**

Enter in appropriate block for each party: name, address, and, if appropriate, character of entity, e.g., corporation or partnership.

The designation Grantor and Grantee as used herein shall include said parties, their heirs, successors, and assigns, and shall include singular, plural, masculine, feminine or neuter as required by context.

WITNESSETH, that the Grantor, for a valuable consideration paid by the Grantee, the receipt of which is hereby acknowledged, has and by these presents does grant, bargain, sell and convey unto the Grantee in fee simple, all that certain lot or parcel of land situated in the City of **Raleigh, Raleigh Township, Wake County, North Carolina and more particularly described as follows:**

TRACT 1: 313 E. Martin Street
Begins at a point on the Northern line of East Martin Street, Mrs. S. G. Blakes Southwest corner, runs thence with said Blakes line and at right angles with said East Martin St., North one hundred and five feet to said Blakes Northeast corner thence West seven feet and three inches to L. W. Adams Southern corner; thence North with said Adams line thirty five feet to another Lot or tract of land of said Blake; thence East with this line of said Blake fifty four feet to Samuel Bagasse, line which form the Eastern line of the Cox home conveyed; thence South one hundred and forty feet to said East Martin Street; thence West with said street forty six feet and nine inches to the joining of the beginning. Also one half interest in a cetum well upon the Western line of the lot herein conveyed. Also being the same property conveyed in Book 154, Page 64, Wake County Registry.

TRACT 2: 315 E. Martin Street
BEING on the North side of Martin Street and bounded on the East by the land of Henderson Rerves dec'd on the south by said Martin Street on the West by the land of Eldudge Johnson dec'd and on the North by the lot formerly belonging to Wesley Whitaker fronting on Martin Street Thirty five (35) feet and running back Two Hundred and ten (210) feet containing one sixth of an acre more or less and being part of Lot No. 108 in the Place of said City. Also being the same property conveyed in Book 139, Page 302, Wake County Registry.

N.C. Bar Assoc. Form No. 3 © 1976, Revised © 1977

The property hereinabove described was acquired by Grantor by instrument recorded in Book , Page .

A map showing the above described property is recorded in Book , Page

TO HAVE AND TO HOLD the aforesaid lot or parcel of land and all privileges and appurtenances thereto belonging to the Grantee in fee simple.

And the Grantor covenants with the Grantee, that Grantor is seized of the premises in fee simple, has the right to convey the same in fee simple, that title is marketable and free and clear of all encumbrances, and that Grantor will warrant and defend the title against the lawful claims of all persons whomsoever except for the exceptions hereinafter stated.

Title to the property hereinabove described is subject to the following exceptions:

Subject to easements, restrictions and rights of way of record, if any.

Subject to 2001 ad valorem property taxes and subsequent years.

IN WITNESS WHEREOF, the Grantor has hereunto set his hand and seal, or if corporate, has caused this instrument to be signed in its corporate name by its duly authorized officers and its seal to be hereunto affixed by authority of its Board of Directors, the day and year first above written.

USER QUESTIONNAIRE
(Page 1 of 2)

Site: 313 E. Martin Street, Raleigh NC Proposal # R4616.00P

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the Brownfields Amendments), **the User of the Phase I Environmental Site Assessment (PESA)** must conduct the following inquiries and provide the information to the environmental professional. Failure to provide this information could result in a determination that the PESA is not complete. Use this form and/or additional sheets as necessary to provide the requested information.

1. Did a search of recorded land title records or judicial records identify any environmental liens against the property that are filed or recorded under federal, tribal, state, or local law?

   Yes _____ No _____ Comment _____

2. Did a search of recorded land title records or judicial records identify any activity or land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

   Yes _____ No _____ Comment _____

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and/or processes used by current or former businesses at this site or nearby sites?

   Yes _____ No _____ Comment _____

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

   Yes _____ No _____ Comment _____

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

   a. Do you know the past uses of the property?

      Yes _____ No _____ Comment _____

   b. Do you know of specific chemicals that are present or once were present at the property?

      Yes _____ No _____ Comment _____

   c. Do you know of spills or other chemical releases that have taken place at the property?

      Yes _____ No _____ Comment _____

   d. Do you know of any environmental cleanups that have taken place at the property?

      Yes _____ No _____ Comment _____

USER QUESTIONNAIRE
(Page 2 of 2)

Site: 313 E. Martin Street, Raleigh NC Proposal # R4616.00P

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   Yes _____ No _____ Comment _____

7. Are any of the following documents available for the property and if so can they be provided to Mid-Atlantic within reasonable time and cost constraints?

   - Previous site assessment reports
   - Environmental compliance audit reports
   - Environmental permits (solid waste, hazardous waste, wastewater, NPDES, underground injection)
   - UST or AST registrations or permits
   - Underground injection system registrations
   - Material safety data sheets (MSDS)
   - Community right-to-know plans
   - Safety plans
   - Spill Prevention Control and Countermeasure Plans
   - Hydrogeologic reports on property or surrounding properties
   - Correspondence from governmental agencies regarding past or current violations of environmental laws with respect to the property or relating to environmental liens
   - Hazardous waste generator notices or reports
   - Geotechnical reports
   - Risk assessments
   - Recorded legal or physical restrictions or limitations on the use of or access to the property

   Yes _____ No _____ Comment _____

8. Do you know of any a) pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property; b) pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and c) notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Mid Atlantic

MADELINE HOOK

STAFF SCIENTIST

Ms. Hook has been involved in the environmental field for approximately 2 years. Madeline is a graduate from North Carolina State University where she earned a Bachelor's degree in Environmental Sciences while also obtaining a minor in Business Administration.

Ms. Hook has experience with environmental assessment projects, both Phase I and follow-up contamination assessments (Phase II). She has completed Phase I projects at sites that have included dry cleaners, former manufacturing facilities, office buildings, vehicle maintenance facilities, and properties located in central business districts. Ms. Hook frequently conducts the field reconnaissance and sample collection required of the Phase I and Phase II projects. Ms. Hook also assists with producing figures for projects using the ESRI ArcGIS software.

CAREER SUMMARY

Mr. Raymond S. Marchant, III serves as a Principal Geologist for assessment and remediation of contaminant releases. Mr. Marchant has conducted and overseen hundreds Phase I and Phase II environmental site assessments since the inception of his 33-year career. He has conducted these assessments for undeveloped, commercial and industrial properties. While his specialty has been petroleum releases, he has also assessed contaminant releases associated with metals, acids, PCBs, and solvents. He has assessed/delineated contaminants in soil, groundwater and surface water. Mr. Marchant's broad environmental experience provides an excellent base for discerning potential environmental liabilities to a property. Mr. Marchant is experienced with the public notification requirements associated with contaminant releases and remediation, particularly with UST sites.

Mr. Marchant is Mid-Atlantic's account manager for assessment and cleanup tasks for one of the largest petroleum retailers in the U.S., as well as for NCDOT and two local municipalities. Mr. Marchant specializes in the installation and operation of remedial systems for both petroleum-impacted sites and sites affected by chlorinated solvents. He manages projects from proposal stage, through field activities, to the completion of final reports. His management experience has included scheduling and sequencing work elements for remedial projects associated with petroleum and solvent contamination. Mr. Marchant has developed plans, specifications and bid documents for the installation of aboveground tanks and of remediation system equipment.

1.0 Background

Withers & Ravenel, Inc (W&R) completed a Phase I Environmental Site Assessment (ESA) on behalf of the City of Raleigh, for the property located at 215-219 South Person Street in Raleigh, NC during November 2012. At the time of our report the Subject Property was occupied by The Salvation Army of Wake County. The Phase I ESA dated November 6, 2012 identified the following Recognized Environmental Conditions (RECs):

- The potential encroachment of dissolved phase and/or vapor phase contaminants from the operations on the adjacent property at 225 and/or 227 South Person Street, currently occupied by Killo Pest Control Company and formerly occupied by an automobile service station with suspected retail petroleum sales.
- The potential encroachment of dissolved phase and/or vapor phase contaminants from a historical petroleum and chlorinated solvent release from the adjacent Moore Square Museum Magnet School Property.
- The potential encroachment of dissolved phase and/or vapor phase contaminants from a release of chlorinated solvent compounds from the historical dry cleaners located at 228 East Martin Street.
- The former used car dealership on the portion of the property abutting Martin Street.

The Raleigh West Quadrangle, Wake County, North Carolina - 7.5 Minute Series Map is included as **Figure 1** and shows the location of the site.

2.0 Phase II ESA

The investigation activities were completed in two phases with an initial phase of investigation completed in November 2012 and a second phase of investigation completed in February 2013. The purpose of the investigation was to complete assessment of the soil and shallow groundwater to focus on potential impacts to the property from the above referenced offsite sources of contamination. The following paragraphs describe the findings of each phase of work completed at the Subject Property.

2.1 November 2012 Investigation

The November 2012 investigation involved the installation of soil borings and shallow temporary groundwater monitoring wells and soil vapor probes. The following paragraphs describe the first phase of investigation completed for the Subject Property.

Soil Boring Advancement:

Prior to initiating of the first phase of the Phase II ESA, W&R contracted Bateman Civil Survey to mark underground utilities on the Subject Property. Additionally, NC811 was also contacted to mark underground utilities along the right-of-ways along East Martin Street and South Person Street. W&R, along with the subcontract drilling company mobilized to the Subject Property on November 29, 2012 to initiate Phase II ESA activities. The driller utilized a direct push probe to advance seven soil borings (SB-1 through SB-7) on the Subject Property on November 29, 2012. A continuous sleeve Macrocore™ sampler was employed to collect a representative cross-section of geologic material. A W&R geologist logged the conditions encountered in each of the borings. Observations during drilling activities indicated soils ranging from clayey sands to sandy clays with some micaceous silt were

encountered. Coarse-grained, partially weathered rock was also observed in all the soil borings at or near the termination depths which ranged from 32 to 33 feet below land surface. Borings logs of each soil boring are included in the **Appendix**. A site map illustrating the location of the Phase II ESA soil borings, temporary monitoring well and soil vapor points is included as **Figure 2**.

Soil Boring Screening and Sample Collection:

Soil samples were segregated into two or foot intervals and placed into clean zip-lock baggies and screened for volatile organic compounds (VOCs) with a TVA-1000B® Photoionization Detector / Flame Ionization Detector (PID/FID). Field FID readings are included for each boring on the attached boring logs. W&R communicated with the City of Raleigh prior to the work and agreed that only soil samples would be submitted for analyses when a field observation or FID/PID reading suggested that contamination was likely to be present. Using this standard of care, one soil sample from SB-5 from the 26 to 28 foot interval was selected for laboratory analysis during the November 29, 2012 assessment.

The collected soil sample was immediately transferred to laboratory supplied containers; placed in a cooler containing ice; and transported under proper chain-of-custody to the Environmental Science Corporation in Mt. Juliet, TN. The soil sample was submitted for analyses of volatile organic compounds (VOCs) by EPA Method 8260B, Total Petroleum Hydrocarbons – Gasoline Range by EPA Method 8015D, and Total Petroleum Hydrocarbons – Diesel Range by EPA Method 3546 (TPH GRO/DRO).

Soil Analytical Results:

Laboratory analysis revealed that no analytes were detected above the laboratory detection limit for any of the submitted soil samples. Soil analytical results are tabulated in attached **Table 1** and the laboratory analytical report is included in the **Appendix**.

Groundwater Investigation:

Soil borings SB-1, SB-2, and SB-3 were used to construct temporary monitoring wells (see **Figure 2**). The temporary wells were installed with 1-inch diameter PVC well screen between 22 and 32 feet below ground surface (BGS). Saturated soil conditions expected to be representative of groundwater were encountered at a depth of 28 feet BGS. The interstitial space between the 10-slot well screen and the boring wall was filled with clean sand. Hydrated bentonite seal was placed on top of the sand. Details of well construction may be viewed in the boring logs included in the **Appendix**. W&R personnel returned to the Subject Property on November 30, 2012 to collect static groundwater levels, develop, and collect groundwater samples from TW-1 through TW-3. Groundwater elevations are included in **Table 2** and a potentiometric map illustrating groundwater elevations and flow direction from the November 2012 sampling event are included as **Figure 3.** Groundwater was identified at depths ranging from 29 to 31 feet BGS.

Groundwater Sampling:

Groundwater samples from TW-1 though TW-3 was placed in laboratory supplied containers; and transported in a cooler containing ice under proper chain-of-custody to Environmental Science Corporation in Mt. Juliet, TN. Groundwater samples from TW-1 and TW-2 were laboratory analyzed for VOCs by EPA Method 6200B, 8 RCRA metals by EPA Method 6010B, and mercury by EPA Method 7470A. Due to the low well yield observed in well TW-2, the sample from this well was only submitted for analyses of VOCs by EPA Method 8260B.

Groundwater Analytical Results:

Groundwater analytical results from the November 2012 groundwater investigation revealed that the following analytes were detected above the 15A North Carolina Administrative Code (NCAC) Subchapter 2L Groundwater Quality Standard in temporary monitoring wells TW-2 and TW-3:

TW-2: Tetrachloroethene and

TW-3: MTBE and Tetrachloroethene.

Additionally, the following analytes were detected above the laboratory reporting limit but below the NC 2L Standard:

TW-1: Barium;

TW-2: MTBE; and

TW-3: Barium and Di-isopropyl ether;

Illustrated groundwater analytical results are included in **Figure 5** and **Table 3** summarizes the analytical results. The laboratory analytical report is included in the **Appendix**.

2.2 February 2013 Investigation

Upon receipt of the November 2012 laboratory data which indicated that concentrations of tetrachloroethene and MTBE were present in groundwater at concentrations exceeding the 15A NCAC Subchapter 2L Groundwater Quality Standards, W&R discussed the need for additional assessment of groundwater conditions with the City relative to the placement of additional monitoring wells abutting the properties to the north and south of the monitoring wells TW-1,TW-2 and TW-3 installed during the first round of investigation. The purpose of the additional assessment was to determine whether contaminant concentrations in groundwater contained similar or potentially higher concentrations of tetrachloroethene and MTBE.

The following paragraphs describe the results of the February 2013 investigation activities.

Soil Boring Advancement:

W&R mobilized to the property with a drilling contractor on February 11, 2013 to continue Phase II ESA activities. The drilling contractor used a direct push rig to advance three additional soil borings (TW-4 through TW-6) on the property. A continuous sleeve Macrocore™ sampler was employed to collect a representative cross-section of geologic material and a W&R geologist logged the conditions encountered in each of the borings. Boring logs prepared during drilling activities are included in the **Appendix**.

Although no obvious indications of contamination were observed during the drilling, one soil sample from the 8 to 12 foot interval was selected for laboratory analysis from all three of the soil borings completed on February 11, 2013. The soil samples collected during the February 11, 2013 assessment were laboratory analyzed for VOCs by EPA Method 8260B.

Soil Analytical Results:

Laboratory analysis revealed that no analytes were detected above the laboratory detection limit for any of the submitted soil samples. Soil analytical results are tabulated in attached **Table 1** and the laboratory analytical report is included in the **Appendix**.

Groundwater Investigation:

Each boring was used to construct a temporary groundwater monitoring well. The three additional temporary monitoring wells (TW-4 through TW-6) were installed along the northwestern, northern, and southwestern property boundaries to attempt to further delineate the groundwater plume discovered in the November 2012 investigation (see **Figure 2**). The temporary monitoring wells were screened between 17 and 40 feet below ground surface (BGS). The interstitial space between the 10-slot well screen and the boring wall was filled with clean sand. A minimum two-foot thick hydrated bentonite seal was brought up from the top of sand. Details of well construction may be viewed in the boring logs included in the **Appendix**. Following installation of TW-4 through TW-6, the temporary monitoring wells were gauged (to determine static groundwater levels), developed, and sampled on February 11, 2013. Groundwater elevations are included in **Table 2** and a potentiometric map illustrating groundwater elevations and flow direction from the February 2013 sampling event are included as **Figure 4.**

Groundwater Sampling:

Following development of TW-4 though TW-6, groundwater samples were placed in laboratory supplied containers; placed in a cooler containing ice; and transported under proper chain-of-custody to Environmental Science Corporation in Mt. Juliet, TN. Groundwater samples from TW-4 through TW-6 were laboratory analyzed for VOCs by EPA Method 6200B.

Groundwater Analytical Results:

Groundwater analytical results from the February 2013 groundwater investigation identified the following analytes in concentrations above their respective 15A NCAC Subchapter 2L groundwater quality standard:

TW-6: Benzene, MTBE and Tetrachloroethene.

Additionally, the following analytes were detected above the laboratory reporting limit but below the respective 15A NCAC Subchapter 2L groundwater quality standard:

TW-5: MTBE and

TW-6: Di-Isopropyl Ether

No analytes were detected above the laboratory reporting limit from the sample collected from TW-4. The groundwater analytical results are shown on the attached **Figure 4.** Likewise, **Table 3** summarizes the analytical results for each temporary well. The laboratory analytical report is included in the **Appendix**.

2.3 Soil Vapor Assessment

Soil borings SB-4 and SB-5, installed during the November 2012 investigation, were converted to soil vapor monitoring points following completion of the soil borings (**Figure 2**). The soil vapor points were constructed with a 3-inch long section of 1-inch diameter 10-slot PVC screen connected to 0.25-inch diameter polyethylene tubing. The Phase II ESA work plan suggested that soil vapor sampling would only occur should groundwater analytical results indicate the potential presence of a soil vapor plume on the Subject Property. W&R compared the groundwater concentrations to the Inactive Hazardous Site Branch (IHSB)

Vapor Intrusion Screening Table for acceptable groundwater concentrations. The Vapor Intrusion Screening Table indicated that the groundwater concentrations observed on the Subject Property are well below the concentrations deemed to be a risk to generate soil vapor that would be a threat to indoor air. Therefore, W&R did not collect soil vapor samples for laboratory analysis from SV-1 and SV-2.

3.0 Conclusions & Recommendations

The results of the Phase II ESA activities completed at the above referenced site are summarized as follows:

- Tetrachloroethene was identified in groundwater samples collected from temporary monitoring wells TW-2, TW-3, and TW-6 with concentrations that exceed the 15A NCAC Subchapter 2L Groundwater Quality Standard;
- MTBE was identified in groundwater samples collected from temporary monitoring wells TW-3 and TW-6 with concentrations that exceed the 15A NCAC Subchapter 2L Groundwater Quality Standard;
- Field observations and PID/FID screening did not detect obvious sources of shallow soil contamination that would be considered a source area on the property;
- Laboratory analytical results did not detect any contaminants of concern in the soil samples collected from the site.

Tetrachloroethene

Tetrachloroethene is a chlorinated solvent used in the dry cleaning of clothes and as a degreaser of metal parts in the automotive and metalworking industries. W&R identified no historical use of the subject property that would be likely attributed to the presence of this compound in groundwater.

W&R is aware of a historical dry cleaning operation located southwest of the Subject Property at 228 East Martin Street a historical service station on the Killo-Pest Control property, and a former Testing Laboratory of the NC Highway & Public Works Commission on the property currently developed as Marbles Museum. Groundwater flow was determined to be from northwest toward the southeast which is cross-gradient from the historical dry cleaning and service station operations but down-gradient of the former Testing Laboratory of the NC Highway & Public Works Commission. W&R believes the current groundwater data indicates that an offsite source is responsible for the rather low concentrations of tetrachloroethene observed on the Subject Property.

W&R compared the concentration of tetrachloroethene in groundwater to the IHSB's Residential Vapor Intrusion Screening Table which lists the minimum theoretical concentration in groundwater that would produce a soil vapor concentration that would potentially enter the indoor air of a building and create an inhalation hazard for the occupants of the building. The maximum concentration of tetrachloroethene identified in groundwater on the site is 3.6 ug/l. The groundwater concentration appearing in the IHSB residential use table is 12 ug/l. Based on this finding, it appears that the current concentrations of tetrachloroethene in groundwater have a low potential of creating a soil vapor plume that would pose a potential indoor air hazard for the occupants of the current building on the property.

MTBE

MTBE was primarily used as a gasoline additive to prevent engine knocking starting in 1979. North Carolina limited MTBE's use in gasoline to no more than 0.5% on January 1, 2008. Review of City Directories, included in the November 6, 2012 Phase I ESA, indicates that the historical used car dealership, Kelly's Auto and Truck Sales which operated on a portion of the Subject Property, was no longer in operation by 1979 and therefore does not appear to be the source for the MTBE contamination observed on the Subject Property. Historical gas stations were located on the Moore Square Museums Middle School property during the timeframe of MTBE use in gasoline. However, groundwater flow indicates that the historical gasoline stations are cross-gradient to the temporary monitoring wells on the Subject Property. W&R believes that current groundwater data also indicates that an offsite source area is responsible for the elevated levels of MTBE observed on the Subject Property.

Recommendations

Based on our findings, the identified contamination appears to be typical of a dilute groundwater contaminant plume from a probable offsite source. The practical limitation on reuse of the property would include no use of groundwater (irrigation or supply wells) for any purpose and that future use of the property consider the potential for soil vapor intrusion into buildings and other related structures placed on the property from the groundwater contaminants identified on site.

W&R recommends that the City consider informing the Raleigh Regional Office of the NC Division of Waste Management of the findings of this investigation prior to purchasing the property. Please do not hesitate to contact us at (919) 469-3340 should you have any questions or comments regarding this investigation.

Sincerely,

WITHERS & RAVENEL, INC.

FIELD BORING LOG

BOREHOLE NO.: **TW-6**

PROJECT INFORMATION		DRILLING INFORMATION	
PROJECT NAME:	**Salvation Army Property**	**DRILLING COMPANY:**	**SAEDACCO**
JOB NO.:	**02120424.00**	**METHOD OF DRILLING:**	**GeoProbe**
SITE LOCATION:	**215 - 219 South Person Street**	**SAMPLING METHOD:**	**MacroCore**
	Raleigh, NC	**HOLE DIAMETER:**	**2.0 inch**
LOGGED BY:	**Matt James**	**DATES DRILLED:**	**2/11/13**
		TOTAL DEPTH:	**40.0 Feet**

DEPTH (FEET)	GRAPHIC	SOIL DESCRIPTION	PID (ppm)	FID (ppm)	WELL DESCRIPTION	REMARKS
0		SANDY CLAY; 60% fines; medium plasticity; coarse to medium sand; grades from brown/black to brown/red at 4 feet; moist; no odors	7.0	5.0		TEMPORARY WELL TOTAL DEPTH: 40 ft CASING: 1.0" PVC CASING INTERVAL: 0.0 - 20' SEAL: BENTONITE SEAL INTERVAL: 16 - 18' SAND PACK INTERVAL: 18 - 40' SCREEN: 10 SLOT SCREEN INTERVAL: 20 - 40'
5		CLAYEY SAND; with silt; 40% fines; coarse to medium sand; brown/orange; moist; no odors	7.0	5.3		
10		SAND; resembles fill; medium; orange; uniform; dry; no odors	7.7	5.2		
15		SILTY SAND; medium to coarse sand; 40% fines; dry; micaceous; orange/brown - more white with depth	10.5	7.3		
20			6.8	5.4		
25			11.5	10.0		
30			10.5	8.8		
35			13.0	12.0		
40			6.0	4.0		

NOTES: Boring Terminated @ 40.0' BLS in Weathered Rock

Quality Assurance Report
Level II

L608681

December 11, 2012

The data package includes a summary of the analytic results of the quality control samples required by the SW-846 or CWA methods. The quality control samples include a method blank, a laboratory control sample, and the matrix spike/matrix spike duplicate analysis. If a target parameter is outside the method limits, every sample that is effected is flagged with the appropriate qualifier in Appendix B of the analytic report.

Method Blank - an aliquot of reagent water carried through the entire analytic process. The method blank results indicate if any possible contamination exposure during the sample handling, digestion or extraction process, and analysis. Concentrations of target analytes above the reporting limit in the method blank are qualified with the "B" qualifier.

Laboratory Control Sample - is a sample of known concentration that is carried through the digestion/extraction and analysis process. The percent recovery, expressed as a percentage of the theoretical concentration, has statistical control limits indicating that the analytic process is "in control". If a target analyte is outside the control limits for the laboratory control sample or any other control sample, the parameter is flagged with a "J4" qualifier for all effected samples.

Matrix Spike and Matrix Spike Duplicate - is two aliquots of an environmental sample that is spiked with known concentrations of target analytes. The percent recovery of the target analytes also has statistical control limits. If any recoveries that are outside the method control limits, the sample that was selected for matrix spike/matrix spike duplicate analysis is flagged with either a "J5" or a "J6". The relative percent difference (%RPD) between the matrix spike and the matrix spike duplicate recoveries is all calculated. If the RPD is above the method limit, the effected samples are flagged with a "J3" qualifier.

Accreditation is only applicable to the test methods specified on each scope of accreditation held by ESC Lab Sciences.
Note: The use of the preparatory EPA Method 3511 is not approved or endorsed by the CA ELAP.

This report may not be reproduced, except in full, without written approval from ESC Lab Sciences.
Where applicable, sampling conducted by ESC is performed per guidance provided in laboratory standard operating procedures: 060302, 060303, and 060304.

List of Analytes with QC Qualifiers

Sample Number	Work Group	Sample Type	Analyte	Run ID	Qualifier
L619830-04	WG636557	SAMP	Bromomethane	R2541599	J4
	WG636557	SAMP	Dichlorodifluoromethane	R2541599	J3
L619830-05	WG636557	SAMP	Bromomethane	R2541599	J4
	WG636557	SAMP	Dichlorodifluoromethane	R2541599	J3
L619830-06	WG636557	SAMP	Bromomethane	R2541599	J4
	WG636557	SAMP	Dichlorodifluoromethane	R2541599	J3

Attachment B
Explanation of QC Qualifier Codes

Qualifier	Meaning
J3	The associated batch QC was outside the established quality control range for precision.
J4	The associated batch QC was outside the established quality control range for accuracy.

Qualifier Report Information

ESC utilizes sample and result qualifiers as set forth by the EPA Contract Laboratory Program and as required by most certifying bodies including NELAC. In addition to the EPA qualifiers adopted by ESC, we have implemented ESC qualifiers to provide more information pertaining to our analytical results. Each qualifier is designated in the qualifier explanation as either EPA or ESC. Data qualifiers are intended to provide the ESC client with more detailed information concerning the potential bias of reported data. Because of the wide range of constituents and variety of matrices incorporated by most EPA methods,it is common for some compounds to fall outside of established ranges. These exceptions are evaluated and all reported data is valid and useable "unless qualified as 'R' (Rejected)."

Definitions

Accuracy - The relationship of the observed value of a known sample to the true value of a known sample. Represented by percent recovery and relevant to samples such as: control samples, matrix spike recoveries, surrogate recoveries, etc.

Precision - The agreement between a set of samples or between duplicate samples. Relates to how close together the results are and is represented by Relative Percent Differrence.

Surrogate - Organic compounds that are similar in chemical composition, extraction, and chromotography to analytes of interest. The surrogates are used to determine the probable response of the group of analytes that are chemically related to the surrogate compound. Surrogates are added to the sample and carried through all stages of preparation and analyses.

TIC - Tentatively Identified Compound: Compounds detected in samples that are not target compounds, internal standards, system monitoring compounds, or surrogates.

Quality Assurance Report
Level II

L619830

February 19, 2013

The data package includes a summary of the analytic results of the quality control samples required by the SW-846 or CWA methods. The quality control samples include a method blank, a laboratory control sample, and the matrix spike/matrix spike duplicate analysis. If a target parameter is outside the method limits, every sample that is effected is flagged with the appropriate qualifier in Appendix B of the analytic report.

Method Blank - an aliquot of reagent water carried through the entire analytic process. The method blank results indicate if any possible contamination exposure during the sample handling, digestion or extraction process, and analysis. Concentrations of target analytes above the reporting limit in the method blank are qualified with the "B" qualifier.

Laboratory Control Sample - is a sample of known concentration that is carried through the digestion/extraction and analysis process. The percent recovery, expressed as a percentage of the theoretical concentration, has statistical control limits indicating that the analytic process is "in control". If a target analyte is outside the control limits for the laboratory control sample or any other control sample, the parameter is flagged with a "J4" qualifier for all effected samples.

Matrix Spike and Matrix Spike Duplicate - is two aliquots of an environmental sample that is spiked with known concentrations of target analytes. The percent recovery of the target analytes also has statistical control limits. If any recoveries that are outside the method control limits, the sample that was selected for matrix spike/matrix spike duplicate analysis is flagged with either a "J5" or a "J6". The relative percent difference (%RPD) between the matrix spike and the matrix spike duplicate recoveries is all calculated. If the RPD is above the method limit, the effected samples are flagged with a "J3" qualifier.

Report of Phase II
Environmental Site Assessment
225 South Person Street
Raleigh, North Carolina
Our Project Number 121-15-80720

Gentlemen:

TerraTech Engineers, Inc. has completed a Phase II Environmental Site Assessment for the above referenced property. These services were requested and authorized by Mr. Tom Suminski of Banner Apartments. The results of our assessment and findings are enclosed herein.

PURPOSE AND CONDITIONS

The primary purpose of the Phase II Environmental Site Assessment was to evaluate the recognized environmental conditions identified in a previously performed Phase I Environmental Site Assessment. The scope of our services, which was provided in our proposal 6222-N dated August 12, 2015, was to provide a determination of the possible presence of petroleum hydrocarbons in the soils and ground water as well as pesticides and volatile organic compounds in the near surface soils at the subject site. This evaluation is not intended to provide test results suitable for submission to the North Carolina Department of Environment and Natural Resources (NCDENR) for compliance with any current environmental regulations.

This report is subject to the limitations in ASTM E-1903 (97), *Standard Guide for Environmental Site Assessments: Phase II Environmental Site Assessment Process.* This assessment did not include an evaluation of any additional issues, as described ASTM E-1903 (97) such as asbestos containing materials, radon, lead based paint, wetlands, and lead in drinking water.

As mentioned above, this report specifically evaluates the possible presence of petroleum hydrocarbons in the soil and ground water as well as pesticides and volatile organic compounds in the near surface soils at the site. We did not evaluate the possible presence of heavy metals, PCBs, or other hazardous substances pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and as interpreted by EPA regulations.

METHODOLOGY USED

We have reviewed our Report of Phase I Environmental Site Assessment, dated September 25, 2015. We performed a total of four test borings at the subject site to a depth of approximately 25 feet below the existing ground surface elevation. Selected samples of the soils collected from near the top and bottom of each test boring were stored in sealed containers. Ground water was not encountered in our test borings at the time of our investigation. Where necessary, equipment decontamination and other procedures were used in order to reduce the potential of cross-contamination of the soil samples. Each of the soil samples was placed on ice and transported to an analytical chemistry laboratory for a

determination of the presence of diesel and gasoline range petroleum hydrocarbons. The shallow or near surface soil samples were also tested for pesticides and volatile organic compounds. All laboratory testing was performed in accordance with EPA and NCDENR approved methods.

BACKGROUND

The subject site consists of a 0.21 acre parcel (Wake County PIN 1703873964) located northeast of the intersection of South Person Street and East Martin Street in Raleigh, North Carolina. We understand that the property address is 225 South Person Street, Raleigh, North Carolina. However, the property address is listed in Wake County GIS records as 227 South Person Street. The approximate site boundaries transposed on an aerial photograph are shown in Figure 1 of Appendix I.

Based on the results of our Phase I environmental site assessment, conditions were found that indicated an increased potential for soil and/or ground water contamination at the site. These conditions were identified in our report as:

1. The subject site has housed a pest control company for several decades. Numerous pesticide storage areas were observed on the subject site.
2. We observed a plastic above ground storage tank on the subject site. At the time of our site visit, we were not sure of the contents of this container, but it is our opinion that it was likely used to store pesticides.
3. A concrete pad was observed along the eastern wall of the northern building. The purpose of this concrete pad is unknown, but it could potentially be related to an underground storage tank.
4. We observed two pipes at the ground surface on the east side of the northern building. These pipes could be related to an underground storage tank or previous above ground storage tank.
5. There are 157 mapped hazardous materials sites and/or hazardous materials incidents located within the ASTM minimum search radius of the subject sites, including 4 historical auto stations and 2 historical dry cleaners, 4 NC HSDS, 12 NC SHWS, 4 U.S. Brownfield sites, 4 NC brownfield sites, 7 LASTs, 9 USTs, 2 MGPs, 2 RCRA-CESQGs, 1 CERCLIS, 1 CORRACTS, and 2 NC VCP. There are 13 unmapped hazardous materials sites and/or hazardous materials incidents located within the ASTM minimum search radius of the subject site. Of these identified sites, at least 5 were determined to be potentially located within the surface water drainage area of the subject site.
6. Based on our interview with the current owner of the property, small quantities of pesticides are stored on the property. The current owner also stated that police and other emergency personnel were previously called to a pesticide leak on the subject site. The current owner also stated that dry cleaning solvents were discovered during soils testing performed on the site located to the north of the subject site.
7. Based on information provided by the User of our Phase I report and the current owner, at least 1 underground storage tank was previously located on the site.
8. Based on our review of ownership records and City Directory information provided to us, the property was previously owned by a petroleum company and housed vehicle service stations.
9. Based on our review of City Directory and our review of aerial photographs, the property housed structures that were of the vintage that likely utilized fuel oil for heating purposes.

FIELD INVESITGATION

Soil borings were performed in 4 selected locations. The approximate test boring locations are shown in the attached Figure 1. It should be noted that our scope did not include surveying of the property or the test boring locations. The test boring locations shown in Figure 1 should be considered approximate. Test boring locations may have been shifted during our field operations to avoid obstructions and marked underground utilities. Each of the test borings was performed to a depth of approximately 25 feet below the existing ground surface elevation. Soil was collected in each test boring using continuous sampling by a track mounted GeoProbe drill rig. Ground water was not encountered in the test borings at the boring termination depths.

The soil samples were selected from the top (shallow sample) and bottom (deep sample) of the soil test borings for screening and laboratory testing for petroleum hydrocarbons. All soil samples were first screened using a Rae Model PGM-761S portable photo-ionization detector (PID) prior to being placed in sample containers for laboratory testing. Soil samples collected from test boring B-1 were determined to contain volatile hydrocarbons based on our initial PID screening. Near surface soil samples were also packaged in separate sample containers for pesticide and volatile organic compound testing.

LABORATORY INVESTIGATION

All soil samples were transported to Pace Analytical Laboratories for testing using EPA methods 8015-C for TPH-GRO (Gasoline Range Organic Compounds), and TPH-DRO (Diesel Range Organic Compounds). Due to the current and previous site usage as well as the findings of our Phase I assessment, soil samples collected from near the top of test borings were also tested using EPA method 8081 for pesticides and EPA method 8260/5035A for volatile organic compounds.

ANALYTICAL TEST RESULTS

The results of our laboratory testing of the soil samples for petroleum hydrocarbons, volatile organic compounds and pesticides are summarized in the attached Table 1, Table 2, and Table 3, respectively. Gasoline range organic compounds were detected in the soil sampled collected from near the bottom of test boring B-1, while diesel range organic compounds were detected near the surface as well as near the bottom of this test boring. Gasoline and diesel range organic compounds were not detected in the shallow or deep soil samples collected from test borings B-2, B-3 and B-4. The petroleum hydrocarbons detected in test boring B-1 were detected at concentrations ranging from 11.3 to 1450 mg/kg. It should be noted that current NCDENR guidelines require that the responsible party remediate contaminated soils if gasoline and diesel range organic compounds are detected at concentration levels greater than 10 mg/kg.

Volatile organic compounds indicative of dry cleaning chemicals and/or volatile petroleum hydrocarbons were detected in each soil test boring. The compound constituents detected in our samples were found at concentrations greater than the Soil-To-Ground water maximum contaminant concentrations (MCC).

Pesticides were detected in the near surface soils collected in test borings B-2 and B-3. The concentrations of the pesticides encountered were less than residential health remediation goals.

However, the concentrations of pesticides found at the site were greater than Protection of Ground Water remediation goals set by NCDENR for inactive hazardous waste sites.

The detailed results of the completed analytical testing, along with testing quality control and chain-of-custody information, are included in Appendix II.

CONCLUSIONS

Based on the results of our testing, the targeted hazardous materials were detected in soil samples collected from the site at concentrations above state action levels. NCDENR guidelines provide additional information on additional assessment activities that may be required, remediation goals, procedures for adjusting preliminary remedial goals and other criteria that may affect remediation goals (e.g. ecological receptors, cross-media contamination). In addition, if sensitive environments are present, the NCDENR may require the adjustment of remediation goals and/or proposed remedial alternatives.

RE: Project: 2255 . Person Street
Pace Project No.: 92268196

Dear Mr. Malpass:
Enclosed are the analytical results for sample(s) received by the laboratory on September 16, 2015. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Analyses were performed at the Pace Analytical Services location indicated on the sample analyte page for analysis unless otherwise footnoted.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Taylor Ezell
taylor.ezell@pacelabs.com
Project Manager

ANALYTICAL RESULTS

Project: 2255 . Person Street
Pace Project No.: 92268196

Sample: B-2S **Lab ID: 92268196002** Collected: 09/15/15 10:00 Received: 09/16/15 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: 2255 . Person Street
Pace Project No.: 92268196

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

Acid preservation may not be appropriate for 2 Chloroethylvinyl ether, Styrene, and Vinyl chloride.

A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-C	Pace Analytical Services - Charlotte

ANALYTE QUALIFIERS

1g	The sample was weighed and preserved in the laboratory from a soil jar. Sample was not preserved within 48 hours.
C9	Common Laboratory Contaminant.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
F3	The recovery of the second source standard used to verify the initial calibration curve for this analyte is outside the laboratory's control limits. The result is estimated.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
S0	Surrogate recovery outside laboratory control limits.
S4	Surrogate recovery not evaluated against control limits due to sample dilution.

LIMITED PHASE II ENVIRONMENTAL ASSESSMENT
THE WOOD PILE BLOCK A-45 PARCELS
E. HARGETT ST./S. BLOODWORTH ST./E. MARTIN ST.
RALEIGH, NORTH CAROLINA

BACKGROUND

A Phase I Environmental Site Assessment (ESA), dated June 17, 2013, was conducted by *GeoLogix* on subject property consisting of twelve combined parcels of land located in Block A-45 near downtown Raleigh, North Carolina. The subject property is bounded to the north by E. Hargett Street, to the east by S. Bloodworth Street, and to the south by E. Martin Street. A Site Vicinity Map indicating the location of the subject property is contained in Appendix A.

While no release incidents or facilities of concern were identified on the subject property in the Phase I ESA, release incidents were identified on adjacent property across E. Hargett Street to the north where an underground storage tank (UST) at a U. S. Postal Service maintenance facility experienced a release(s) incident. The other release incident occurred at the site of the Moore Square Museums Magnet Middle School to the south/southwest of the subject property across E. Martin Street. In addition to those identified release incidents, the City of Raleigh recently commissioned a Limited Phase II Environmental Site Assessment which was conducted by another consultant on property adjacent to, and west of, the subject property. The Limited Phase II west of the subject property consisted of soil and groundwater sampling on property owned by the Salvation Army.

The Limited Phase II conducted on the Salvation Army property to the west indicated low but detectable concentrations of Perchloroethylene (PCE), a.k.a. "perc" (dry cleaning fluid), and petroleum-related constituents including Benzene, Naphthalene, and MTBE.

As follow-up to the Phase I ESA, and utilizing information resulting from the Limited Phase II on the Salvation Army property, *GeoLogix,* after consultation with City of Raleigh personnel, commenced a Limited Phase II Environmental Site Assessment (ESA) on the subject property. The Limited Phase II ESA was conducted in order to determine, by soil and groundwater sampling, if the soil and/or groundwater on the subject property had been contaminated as a result of the off-site releases identified, and/or by groundwater contamination from an unknown source which may have migrated onto the subject property.

SCOPE OF WORK

The scope of the Limited Phase II ESA included having subsurface utilities marked via the "811" number. Electrical, natural gas, water, and sewer lines were marked. After the subsurface utilities were marked, plans called for five or six groundwater samples and two or three soil samples to be obtained as determined in the field by *GeoLogix* personnel.

FIELD ACTIVITIES and SAMPLING

On June 12, 2013, *GeoLogix* personnel were on site to accomplish the intended scope of work on the subject property. Troxler Geologic Services was contracted to provide a geoprobe necessary to obtain the soil and groundwater samples. The locations of the samples obtained at the subject property are indicated on an aerial photograph in Appendix B.

The first soil and groundwater samples (Sample Nos. S-1 and GW-1) were obtained near the southwest corner of the subject property. Sample No. GW-2 was obtained further north along the western property boundary. Sample No. GW-3 was obtained even further north along the western property boundary. Sample No. GW-4 was obtained from an indention in the western property boundary adjacent to Salvation Army property on the west, and behind Raleigh Rescue Mission property to the north. Sample Nos. S-5 and GW-5 were obtained from the parking lot in the northwest corner of the subject property near E. Hargett Street. Sample No. GW-6 was obtained from about mid-way down the eastern property boundary adjacent to S. Bloodworth Street. Pictures taken at each of the sampling locations are contained in Appendix C.

The geoprobe operator used new plastic core sample tubes at each location for soil samples. The push probe used to collect groundwater samples was also decontaminated between each sampling location. *GeoLogix* personnel obtained the soil and groundwater samples using clean nitrile gloves at each sample location in order to avoid contaminating the samples, and sample cross-contamination.

The soil and groundwater samples obtained were placed into sample jars and vials containing preservatives as provided by the analytical laboratory. The samples were placed in a cooler containing ice for cooling until they were delivered later that same afternoon to Environmental Conservation Laboratories (ENCO), Inc., for appropriate analyses.

ANALYTICAL LABORATORY RESULTS

The laboratory analytical results for the two soil samples are indicated on the chart below:

Soil Sample ID	Sample Depth (bgs)	Analytical Method	Analytical Results - mg/kg	Laboratory Method Detection Limit (MDL) mg/kg	Practical Quantitation Limit (PQL) mg/kg
S-1	4.0'	8260B	Acetone - 0.012	0.0017	0.0060
S-5	7.0'-8.0'	8260B 8260B DRO	Acetone - 0.017 Methylene Chloride - 0.0030 2.6	0.0018 0.00095 2.0	0.0065 0.0026 3.8

The soil samples indicated trace amounts of Acetone and Methylene Chloride, and a low level of Diesel Range Organic (DRO) constituents. The trace levels of Acetone and Methylene Chloride in the soil samples are common in laboratory analyses and are usually associated with compounds used to clean lab equipment. As such, they are generally discounted and not considered sample contaminants. The low concentration of DRO indicated may be the result of a release identified across E. Hargett Street at the U. S. Post Office facility, or it may have originated at another source.

The lab results for the groundwater samples taken are indicated on the chart below:

Groundwater Sample ID	Sample Depth (bgs)	Analytical Method	Analytical Results – ug/L	Laboratory Method Detection Limit (MDL) ug/L	Practical Quantitation Limit (PQL) ug/L
GW-1	26.0'	8260B	Non-Detect	-	-
GW-2	26.5'	8260B	Tetrachloroethene (PCE) - 4.8 Trichloroethene (TCE) - 1.3	0.17 0.15	1.0 1.0
GW-3	26.5'	8260B " " " " "	1,1,1-Trichloroethane - 7.2 1,1-Dichloroethane- 1.4 1,1-Dichloroethene - 18.0 Chloroform - 1.2 MTBE - 3.5 Tetrachloroethene (PCE) - 0.92	0.12 0.13 0.21 0.18 0.16 0.17	1.0 1.0 1.0 1.0 1.0 1.0
GW-4	27.0'	8260B " " " "	1,1,1-Trichloroethane - 1.5 1,1-Dichloroethene - 0.94 Chloroform - 2.0 MTBE - 1.2 Acetone - 5.6	0.12 0.21 0.18 0.16 1.2	1.0 1.0 1.0 1.0 5.0
GW-5	32.0'	8260B " " " 8015C	Acetone - 5.7 Benzene - 4.8 Chloroform - 3.9 Naphthalene - 1.2 DRO - 0.083	1.2 0.15 0.18 0.11 0.060	5.0 1.0 1.0 1.0 0.10
GW-6	27.0'	8260B	1,1,1-Trichloroethane - 4.2 1,1-Dichloroethene -3.4	0.12 0.21	1.0 1.0

Groundwater Sample No. GW-2 exhibited both "dry cleaning" constituents Tetrachloroethene (a.k.a perchloroethylene or PCE) and Trichloroethene (TCE) above detectable levels. Sample No. GW-3 also exhibited a low level of PCE. The levels of Tetrachloroethene (PCE) in Sample Nos. GW-2 and GW-3 were both in excess of its State of North Carolina's 2L Groundwater Quality Standard of 0.7 ug/L.

Solvents, some of which are similar to dry cleaning fluids (PCE and TCE), or are "broken down" by-products of dry cleaning fluids, were detected in Sample Nos. GW-3, GW-4, and GW-6.

An additive to gasoline called Methyl tert-Butyl Ether (MTBE), was detected in the groundwater Sample Nos. GW-3 and GW-4 at low concentrations. In Sample No. GW-5, petroleum-related constituents were detected including Benzene and Naphthalene. The Benzene detected in Sample No. GW-5 was in excess of its State of North Carolina's 2L Groundwater Quality Standard of 1.0 ug/L.

Detectable levels of Chloroform were detected in Sample Nos. GW-3, GW-4, and GW-5. Chloroform is commonly detected in areas served by, or previously served by, city water systems where chlorination is used. This is not a contaminant concern.

The analytical results from ENCO laboratories are contained in Appendix D.

CONCLUSIONS and RECOMMENDATIONS

The soil samples obtained at two locations on the subject property in proximity both indicated a low level of Acetone, and Sample No. S-5 indicated a low concentration of Methylene Chloride. Both compounds are discounted as environmental contaminants as they are generally related to residue from cleaning laboratory equipment. The low concentration of DRO detected in Sample No. GW-5 may have resulted from a reported release at the U. S. Post Office facility across E. Hargett Street from the location of Sample No. GW-5, or it could have originated elsewhere.

Analyses of the groundwater samples obtained on the subject property resulted in mixed findings. No analytes were detected in Sample No. GW-1. In Sample No. GW-2, both constituents related to "dry cleaning" fluids, PCE and TCE, were detected. A low concentration of PCE was also detected in Sample No. GW-3 along with other solvents which can result from the break down of PCE and TCE. Also in Sample No. GW-3, Methyl tert-Butyl Ether (MTBE), a gasoline additive, was detected. MTBE and trace solvents were also detected in Sample No. GW-4. In Sample No GW-5, taken in the northwest corner of the subject property, petroleum constituents were detected such as Benzene and Naphthalene, along with a low level of Diesel Range Organics (DRO). It is possible that the petroleum constituents detected in the groundwater at the location of Sample No. GW-5 is due to migration of petroleum constituents in the groundwater from a release incident identified at the U. S Post Office maintenance facility directly across E. Hargett Street. The concentration of Benzene in Sample No. GW-5 was in excess of the State of North Carolina's 2L Groundwater Quality Standard. At the location of Sample No. GW-6, low levels of solvents were detected.

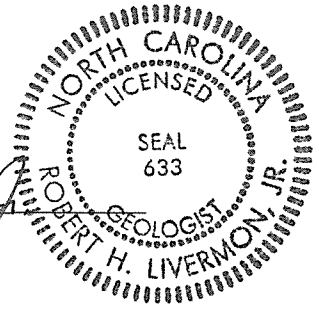

In addition to the above constituents, Chloroform was detected in the groundwater at the locations of Sample Nos. GW-3, GW-4, and GW-5. The reason for Chloroform to be present is not known for certain. However, it is common to find Chloroform in samples in proximity to city water systems where chlorination is used.

The North Carolina Department of Environment & Natural Resources (DENR) requires reporting of release incidents to the groundwater where contaminants are indicated in excess of the 2L Groundwater Quality Standards. In this instance, that would include PCE, TCE, and Benzene. City of Raleigh entities do not appear to be the source of the contamination detected on the subject property. However, it is recommended that the City of Raleigh, prior to purchasing the subject property, notify N. C. DENR of the release(s) encountered, and/or inform the current subject property owner, The Wood Pile, LLC, that a reportable release(s) has been detected on the subject property that should be reported to N. C. DENR.

This sampling event was associated with a Limited Phase II ESA conducted for the City of Raleigh. No further assessment/investigation of the targeted areas for environmental contaminants as part of the Limited Phase II ESA event is planned or recommended at this time.

The sampling event conducted at the subject property represented an attempt to determine if environmental contaminants existed at the targeted areas. Due to the limited nature of the assessment, there is always the potential that contamination can escape detection due to the limitations of the study or the inaccuracy of information furnished by other parties used to arrive at the conclusions reached in this report. *GeoLogix* is not responsible for any inaccuracy of information furnished by other parties used to arrive at the conclusions reached in this report. The findings contained in this report are relevant to the dates of the site work and should not be relied upon to represent site conditions at other times.

RE: Laboratory Results for
Project Number: [none], Project Name/Desc: Wood Pile A-45
ENCO Workorder(s): C306876

Dear ROB LIVERMON,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Wednesday, June 12, 2013.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Cary. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Stephanie Franz

Project Manager

Description: Trip Blank
Matrix: Water
Project: Wood Pile A-45

Lab Sample ID: C306876-09
Sampled: 06/12/13 10:30
Sampled By: ENCO

Received: 06/12/13 17:42
Work Order: C306876

Volatile Organic Compounds by GCMS

^ - ENCO Cary certified analyte [NC 591]

FLAGS/NOTES AND DEFINITIONS

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported value is between the laboratory method detection limit (MDL) and the laboratory method reporting limit (MRL), adjusted for actual sample preparation data and moisture content, where applicable.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
MRL	Method Reporting Limit. The MRL is roughly equivalent to the practical quantitation limit (PQL) and is based on the low point of the calibration curve, when applicable, sample preparation factor, dilution factor, and, in the case of soil samples, moisture content.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

GeoLogix - Qualifications of Personnel

GeoLogix
GEOLOGIC STRATEGIES, P.C. 5316 Deep Valley Run Raleigh, NC 27606

GeoLogix/Geologic Strategies, P. C.

Qualifications of Environmental Professionals

Principal: Robert H. Livermon, Jr.

Education: North Carolina State University (B. S. - Geology, 1973)

Licenses: N. C. Board for Licensing of Geologists - **Professional Geologist**, License No. 633

Geologic Strategies, P. C. – **N. C. Professional Geological Corporation,** License No. C-419

Certifications: - **Registered Environmental Manager** No. 9963 - National Registry of Environmental Professionals

- **40-Hour Hazwopper Certified**

The principal of *GeoLogix* has over thirty (30) years of experience in the environmental field. During twenty-two (22) plus years of employment with a local utility, Mr. Livermon performed environmental site assessments for eight (8) years, and waste disposal vendor compliance audits/reviews for twelve (12) years.

Mr. Livermon is experienced in the areas of Phase I Environmental Site Assessments (ESA), site remediation/spill clean-ups, Spill Prevention Control and Countermeasure (SPCC) Plan preparation, environmental permitting, solid waste disposal, waste minimization, and the transportation, storage, treatment/disposal of hazardous substances, toxic substances, and hazardous wastes. Mr. Livermon possesses an across-the-board knowledge of environmental regulations which, along with his years of experience, allows him to perform multi-media environmental compliance audits at commercial/industrial facilities, maintenance facilities, warehouses and garages. Mr. Livermon also has experience in the environmental regulatory area. He was employed for over two years with an environmental agency of the State of North Carolina.

GeoLogix has provided clients with a variety of environmental and geological consulting services since 1995. Over five hundred fifty (550) Phase I Environmental Site Assessments, seventy-five (75) Phase II Environmental Site Assessments or similar site investigations/assessments, forty (40) Underground Storage Tank (UST) closures/site investigations, and one hundred twenty-five (125) waste disposal vendor environmental compliance reviews have been conducted. *GeoLogix* capabilities also include management oversight services (remedial projects), toxic and hazardous waste training, geological consulting services, and other miscellaneous tasks.

*Wake County assessed building and land values reflect the market value as of January 1, 2024, which is the date of the last county-wide revaluation. Any inflation, deflation or other economic changes occurring after this date does not affect the assessed value of the property and cannot be lawfully considered when reviewing the value for adjustment.

The January 1, 2024 values will remain in effect until the next county-wide revaluation. Until that time, any real estate accounts created or new construction built is assessed according to the 2024 Schedule of Values.

For questions regarding the information displayed on this site, please contact the Department of Tax Administration at Taxhelp@wake.gov or call 919-856-5400.
