Executive Summary

The City of Raleigh’s 2016-2020 Consolidated Plan for use of federal housing funds includes strategies to create two Neighborhood Revitalization Strategy Areas (NRSAs). The first NRSA proposed is for the area south and east of St. Augustine’s University, including College Park and the former Washington Terrace Apartments. The reason the City decided to use the NRSA approach is to make use of its federal Community Development Block Grant (CDBG) funds in a more flexible fashion than would otherwise be possible. Job creation would be more easily achieved and public service funding and housing activities would be free of some of the federal restrictions that accompany the CDBG program. The CDBG national objective of principally benefitting low- and moderate-income persons will still be met. On November 3, 2015 the Raleigh City Council adopted this Plan.

Maps of the area covered and details of the proposed NRSA program and NRSA demographics are contained in the Plan that follows. Below is a summary of the Goals and Benchmarks the City intends (as a minimum) to provide in the College Park/Washington Terrace NRSA.

GOAL 1: Infrastructure Improvements

Benchmarks

1.1 Install public infrastructure necessary to serve mixed-income development in East College Park (approximately 10,000 LF water, approximately 7,000 LF sanitary sewer, and approximately 1,300 LF stormwater pipe).

1.2 Install the public infrastructure necessary to serve mixed-income development in Washington Terrace (approximately 2,900 LF water, approximately 2,700 LF sanitary sewer, and approximately 3,700 LF stormwater pipe) including street realignment (approximately 2,200 LF).

1.3 Install new sidewalk on Oakwood Avenue from Heck to Raleigh Blvd.

1.4 Provide and/or upgrade natural gas service to East College Park.
GOAL 2: Residential Development

Benchmarks

2.1 Construct 320 new rental units.

2.2 Construct 195 new homeownership units.

2.3 Provide not less than 30 rehab loans to assist aging-in-place, reduce energy costs, and make other home improvements for existing homeowners with incomes less than 80% of AMI.

GOAL 3: Economic and Human Capital Development

Benchmarks

3.1 Employ not less than 500 persons in construction and construction related activities.

3.2 Continue the City’s Summer Youth Employment Program at St. Monica’s Youth Center and/or Tarboro Community Center.

3.3 Provide not less than 75 potential homebuyers with homebuyer education and training.

3.4 Create a Section 3 Plan, designate a Section 3 Coordinator, and actively promote and encourage Section 3 hires.

3.5 Achieve at least 10 Section 3 hires associated with construction activities in the neighborhoods.

3.6 Achieve not less than 15% participation by Minority and Women owned Business Enterprises in site prep/infrastructure and multi-family construction projects.

3.7 Construct child care facility on the Washington Terrace site serving approximately 80-100 children, infant to pre-Kindergarten.
I. Introduction

Raleigh, North Carolina’s capital city and the largest municipality in the Research Triangle region, has been growing rapidly since the 1990s, generating strong job growth and fueling new residential development. A significant segment of new arrivals since the end of the Great recession have sought an urban lifestyle, increasing market pressure within the Beltline, the limited access divided highway that circles the downtown. This has increased land values and rents within the downtown and close-in urban neighborhoods. A few neighborhoods near downtown, however, have not shared in this growth and have, in fact, lost population. They suffer from poverty, deteriorating housing and failing infrastructure. Two of these neighborhoods are College Park and Washington Terrace, immediately south and east of St. Augustine’s University, a historically black liberal arts university. St. Augustine’s is the largest institutional stakeholder in this area.

The proposed NRSA consists of two historically distinct neighborhoods separated by Oakwood Avenue. The College Park neighborhood lies south of Oakwood. Housing in College Park is 78% single-family detached and 14% duplexes. Rentals predominate: approximate 69% of the housing is rental. The median house value of owner-occupied homes is $107,300, approximately half the citywide median value of $207,000. More than 47% of families live below the poverty level; citywide that number is 11.8%. The neighborhood is 71% African American.

The Washington Terrace neighborhood lies to the north of Oakwood. It is a single development of triplexes and quads totaling 245 units on 25 acres of land. The Washington Terrace neighborhood was originally built by the private sector as an affordable housing development. The Great Recession sent the property into bankruptcy and the property and its deteriorated units went up for sale. DHIC, a local NeighborWorks organization, suggested that the City of Raleigh partner with them to acquire the property to ensure that the site be preserved for affordable housing. The City agreed with this vision and Raleigh City Council awarded DHIC a $2 Million zero interest loan to help with the acquisition. DHIC surveyed the residents and found that 98% have incomes less than 80% of area median income (AMI).

The City has been active in the College Park neighborhood since the early 1990s when the neighborhood was designated a redevelopment area. The neighborhood has had several redevelopment plans since 1994. Initially, the City focused on the western section of the neighborhood in an area locally known as College Park/Idlewild. Over the last several years, the Community Development Division’s focus has shifted to the eastern edge, the blocks bounded by Hill Street, Oakwood Avenue, Raleigh Boulevard, and New Bern. These blocks are called East College Park (ECP). Since the Great Recession, Community Development has acquired approximately 134 deteriorated structures there, relocating the tenants of the substandard housing to decent safe housing of their choosing and clearing the lots. A significant percentage of East College Park is currently vacant and the City is the neighborhood’s largest property owner.

The area directly south of St. Augustine’s University has very few vacant lots and owner-occupied homes are mixed in among rentals. Most housing here is modest in square footage and architecture. Many of the houses, rental and owner-occupied alike are in need of some repair.

Raleigh’s Housing and Neighborhoods Department incorporated these distinct areas into a single NRSA in order to create the framework for mixed-income housing opportunities for
both homeowners and renters. In addition to providing for mixed-income homeownership development on sites acquired with CDBG funds, an approved NRSA plan allows for 9% Low Income Housing Tax Credit (LIHTC) applications under the North Carolina Housing Finance Agency (NCHFA) Qualified Allocation Plan (QAP) to qualify for the Redevelopment set aside. Because of QAP site score requirements, 9% applications for projects in that location would be at a competitive disadvantage. Because of the NRSA’s near-downtown location, having affordable housing over the long term is dependent on proactively taking such steps now.

**Benefits of a Neighborhood Revitalization Strategy Area (NRSA)**

NRSA benefits are described in amendments to the Community Development Block Grant (CDBG) regulations at 24 CFR 570, which were published in the Federal Register on January 5, 1995 and updated in the final rule changes published in the November 9, 1995 Register. They include:

1. **Job Creation/Retention as Low/Moderate Income Area Benefit:** Job creation/retention activities undertaken pursuant to the strategy may be qualified as meeting area benefit requirements, thus eliminating the need for a business to track the income of persons that take, or are considered for such jobs (24 CFR 570.208(a)(1)(vii) and (d)(5)(i);

2. **Aggregation of Housing Units:** Housing units assisted pursuant to the strategy can be considered to be a part of a single structure for purposes of applying the low and moderate-income national objective criteria. This provides a greater flexibility to carry out housing programs that revitalize a neighborhood (24 CFR 570.208(a)(3) and (d)(5)(ii);

3. **Aggregate Public Benefit Standard Exemption:** Economic development activities carried out under the strategy may, at the grantee’s option, be exempt from aggregate public benefit standards, thus increasing a grantee’s flexibility for program design as well as reducing record-keeping requirements related to the public benefit standard (24 CFR 570.209(b)(2)(v)(L) and (M); and

4. **Public Service Cap Exemption:** Public services carried out pursuant to the strategy by a Community Based Development Organization (CBDO) are exempt from the 15% public services cap (24 CFR 570.204(b)(2)(ii).

The following describes the NRSA boundaries, demographic criteria, the community consultation process, the housing and economic features of the neighborhoods, the economic empowerment strategy to be pursued in the area, and performance measurement benchmarks for evaluating the success of implemented programs.
II. STRATEGY CRITERIA

A. Boundaries

The proposed NRSA lies entirely within Census Tract 506 and consists of two distinct neighborhoods: College Park and Washington Terrace. Oakwood Avenue, an important east-west neighborhood street, traverses the study area. Washington Terrace, a unified development of 245 quads and triplexes, lies north of Oakwood Avenue in Block Group 1; College Park, a neighborhood of primarily single-family detached housing and cleared lots, lies south of Oakwood Avenue in Block Group 2. Together these two neighborhoods comprise the proposed NRSA, herein also described as “the study area.” Appendix A contains two maps of the area.

HUD’s FY 2015 estimate of the number of low and moderate income individuals in the study area, based on the 2006—2010 American Community Survey, indicates that Block Group 1 is 65.8% low/mod and Block Group 2 is 86.1% low/mod. Combined, the residents with low or moderate incomes in the two block groups that form the study area are 74.2% of the total population.

The boundaries of the study area are as follows: Raleigh Boulevard on the east, New Bern Avenue and Edenton Street on the south, Heck Street on the west, Oakwood Avenue on the north from Heck to Hill Street, then north on Hill Street which becomes Milburnie Road bending east until it meets Raleigh Blvd. The portion of the College Park neighborhood within the proposed NRSA covers approximately 105 acres and includes all of Block Group 2. Washington Terrace sits in the southeast corner of Block Group 1, sharing that block group with St. Augustine’s University and Madonna Acres, a small neighborhood of single-family detached homes to the north of Milburnie. Washington Terrace covers approximately 25 acres. The study area encompasses a total of more than 130 acres.

The predominant land use in the study area is residential, with a few areas—on Hill Street north of Oakwood and on Tarboro at the corner with Oakwood—of small strip malls or small commercial retail structures. Zoning in the study area is predominantly Neighborhood Mixed Use (NX). Washington Terrace is zoned for greater density as are a few city blocks between Carver and Waldrop Streets south of Pender. Waldrop runs parallel with Raleigh Blvd and is separated from that busy arterial by a green, treed strip of City land and a blue line stream.

The area is bounded to the east by Raleigh Boulevard, a north-south, state-owned four lane divided arterial. New Bern Avenue, a major east-west, four lane arterial, forms the southern border of the study area until it becomes Edenton Street at the intersection with Poole Road. New Bern is a busy bus route between the downtown business district approximately a mile to the west, and WakeMed Hospital approximately three miles to the east. Along the section of New Bern Avenue, from St Augustine’s Avenue on the west to Raleigh Boulevard on the east, lies a variety of commercial and retail developments. Some developments are considered by the neighborhood to be community assets, some less so. Most of these commercial establishments are aging and are land-locked on shallow lots that restrict possible expansions.

St. Augustine’s University, a historically black liberal arts university, provides undergraduate and graduate school education and training for 1,200 students with a particular strength in applied health and medical science. The campus covers 105 acres. Through the years, many of its faculty and staff have lived in the surrounding
neighborhoods, helping to build a stable community of homeowners and renters. More recently, though, these neighborhoods have been disrupted by disinvestment as long-time owners moved to other areas, existing houses became blighted, and criminal activity spread.

To the west of the study area lies the West Idlewild neighborhood, which had been the focus of redevelopment in the 2000s. These revitalized blocks of new single-family homes and apartments include, most recently, the Cooke Street Redevelopment, Phases 1 and 2, with acquisition, relocation, demolition, and new construction of housing; the rehabilitation of an apartment community; upgrades to water, sanitary sewer and storm water systems; new curbs, gutters and streets; and the creation of a link in the City’s greenway system that now runs along Cooke Street connecting Oakwood Cemetery to the north with John Chavis Memorial Park to the south. The impact on census data of the revitalization of Cooke Street will be mentioned several times in this document due to its proximity to the study area and its positive influence on census data: BG3 of CT 506 includes the Cooke Street portion of West Idlewild and the eastern most portion of the Historic Oakwood neighborhood, an affluent community with both national and local historic district designation.
**B. Demographic Criteria**

**Background**
HUD’s FY 2015 estimate of the number of low and moderate income individuals in the study area, based on the 2006—2010 American Community Survey, indicates that Block Group 1 is 65.8% low/mod and Block Group 2 is 86.1% low/mod. Combined, the residents with low or moderate incomes in the two block groups that form the study area are 74.2% of the total population. This exceeds the HUD requirement that an area be at least 70 percent LMI to qualify for NRSA designation but significantly undercounts the actual number of LMI households within the study area. In Washington Terrace, which occupies only a portion of BG1, DHIC did a survey of those residents after they acquired the property and found that 98% had incomes less than 80% of AMI.

In this application, we have drawn most frequently from the 2009-2013 American Community Survey (ACS) 5-Year Estimate. When the data is available by block group, we combine BGs 1 and 2, which comprise “the study area.” When data is only available at the census tract level, we provide data from CT 506. At the census tract level, however, negative trends are underestimated, since BG 3 of CT 506 includes the eastern blocks of the Historic Oakwood neighborhood, an affluent historic downtown neighborhood, as well as the blocks of the Cooke Street Redevelopment, Phases 1 and 2. This redevelopment project has stimulated private investment in the neighborhood.

**The Study Area**
Citywide, 20.4% of households have incomes below $25,000; in the study area, more than twice that percentage of households live on that income. While per capita income in Raleigh is $30,470, in the study area it is $8,729. However, in BG 2, the neighborhood south of Oakwood Avenue, per capita income for White alone households, a small portion of the resident households, is $45,988, more than 50% above the citywide median, indicating the beginning of private market homeownership interest in neighborhoods close to the downtown business district.

Date source: Social Explorer, 2009-2013 ACS 5-Year Estimate

Citywide, 29% of Raleigh’s residents are African American. In the study area, 71% of its residents are African American. This percentage exceeds 50% minority, rendering the area an area of minority concentration according to Raleigh’s Housing Location Policy. Under that Policy, family LIHTC projects are allowed in areas of concentration only when they are implementing components of a locally approved revitalization effort such as an NRSA plan or when they represent affordable housing replacement units.
Education has been the traditional vehicle to a better life while the lack of education presents barriers to advancement. In the study area, 16.3% of residents 25 years of age or older have not graduated from high school and only 7.7% have a Bachelor’s degree. The figures for Raleigh as a whole are 10.6% and 31.6% respectively.

The 27.5% poverty rate for households in the study area is 2.3 times that of the City as a whole—11.8%. One factor that distinguishes the poverty in the study area from the city as a whole is that throughout the city poverty is distributed among several household types, including married couples. However, within the study area, according to the census, all households with income below the poverty line are female headed households: of the 27.5%, 20.4% include children, 7.1% do not.

Date source: Social Explorer, 2009-2013 ACS 5-Year Estimate

The median age of the residents in the study area is 23, much younger than the median age of all Raleigh’s residents, 32. While there is a smaller percentage of youth under 18 years of age in the study area than in the city as a whole, there is a much larger concentration of persons age 18-34 than in the city overall and fewer people in their prime working years of 35 to 64 years of age.

### C. Consultation

Community participation is a critical component of the NRSA development process. A series of meetings were held to gather resident and stakeholder input on proposed development ideas. DHIC held several meetings for area residents focused on Washington Terrace with over 350 participants so far. Community Development held a public input meeting that focused on the needs of all project area residents related to programs for seniors, youth and other populations and ninety-nine persons participated (see Appendix B). Outreach to stakeholders was undertaken in small group settings for more detailed or technical discussions. DHIC has held a variety of such stakeholder meetings related to the master planning of Washington Terrace, attended by approximately 50 people in total. Meetings have also been held with St. Augustine’s administrators. Ongoing community consultation will continue as the plan moves into the implementation phase.
Meetings were conducted according to the following schedule. Public comments received are included in Appendix B.

D. Housing Market Analysis
The study area consists of two neighborhoods, both overwhelmingly residential. The housing types north of Oakwood Avenue are different than south of Oakwood. North of Oakwood, 51% of all units are triplexes or quads, all in the Washington Terrace neighborhood. South of Oakwood, in College Park, 78% are single-family detached. Vacancy is higher in College Park, where 64% of all vacancies are neither for rent nor sale, 17 percentage points greater than in the city as a whole (47%). As was mentioned previously, the City is the largest land owner south of Oakwood east of Hill Street while DHIC owns the Washington Terrace development north of Oakwood. This ownership will facilitate the revitalization of the NRSA.

There are three important commercial areas along the edges of the study area that will be included in the revitalization strategies: (1) a small, deteriorated strip development on Hill Street just north of Oakwood Avenue; (2) small run-down retail structures clustered on Tarboro Street at the corner with Oakwood; and (3) a variety of commercial uses on the southern edge along New Bern Avenue, including the William Harrison Public Library, strip mall developments, a car wash, and a gas station at the corner of New Bern and Raleigh Blvd.

Within Raleigh as a whole, 53.6% of housing units are owner-occupied. In the NRSA area, only 30.3% are owner-occupied; 69.7% are rental. Many of the rentals have been owned by absentee landlords. In some cases, this has created blighting influences in the College Park neighborhood: conversions of single-family houses into rooming houses with rooms for rent by the week for cash; poor or no screening of tenants; poor or little property maintenance allowing progressive deterioration, etc. Given these conditions, many of these properties became housing of last result for people with few resources and fewer options. Most of the properties acquired in the past several years by the City have fit this description; once acquired, tenants were relocated to safe, decent, standard housing of their choice, and the blighted structures demolished. As of June 2015, the City owns approximately 134 parcels within the study area.

Raleigh has experienced rapid population growth since 1990 when its population was 207,951. Over the 1990s, Raleigh's population grew by 32.8% to 276,093 in the 2000 Census and by 46.3% in the 2000s to 403,892 in 2010. The number of housing units increased at a comparable pace: growth in housing units was 30% in the 1990s, from 92,643 in 1990 to 120,699 in 2000; and by 46% in the 2000s to 176,124 in 2010. According to the 2009-2013 ACS 5-Year Estimate, 29.5% of all Raleigh’s housing units have been built since 2000, while in the study area only 6.8% have. The median year housing units were built in Raleigh is 1990; in the study area, it’s 1940.

Date source: Social Explorer, 2009-2013 ACS 5-Year Estimate
Housing values reflect this lack of market interest: more than 72% of all owner-occupied housing in the study area is valued at less than $150,000. In the city as a whole, only 24.9% are valued less than $150,000.

The federal Department of Housing and Urban Development (HUD) considers homeowners and renters to be cost burdened when housing costs exceed 30 percent of household income. HUD considers it a severe housing cost burden when housing costs exceed 50 percent of household income. For homeowners, housing costs include mortgage, insurance, and taxes; for renters, it includes rent and utilities.
Housing costs have been rising in Raleigh in response to population growth and market demand since the end of the Great Recession, particularly inside the Beltline, the US 440 limited access road that circles the downtown core and close-in neighborhoods. The closer to downtown, the greater the housing price rise. The study area lies approximately one mile east of the downtown business district. Almost 60 percent of renters within the study area are cost burdened, 38.4 percent severely cost burdened, much higher than the 25 percent of renters throughout Raleigh who are severely cost burdened.

Homeownership provides residents in the study area little defense against high housing costs: 31 percent of homeowners there are severely cost burdened. Citywide that number is 9.5 percent.

**E. Economic Overview**

As stated earlier, the poverty rate for households in the study area is 27.5%, 2.3 times the rate for Raleigh overall (11.8%). A much higher percentage of households in the study area receive some form of public assistance than in the city as a whole. Public assistance income includes general assistance and Temporary Assistance to Needy Families (TANF); it does not include Supplementary Security Income (SSI).

The unemployment rate in the study area is almost two percentage points higher than throughout the city, but a finer grain analysis reveals complexity. The male unemployment rate in the study area (15.6%) is almost double the rate citywide for men (8.6%) while the female unemployment rate in the study area (5.7%) is considerably lower than the citywide rate for women (9.1%). This suggests that men in the study area
have a harder time finding work than men do throughout the city, while many female heads of household can find employment but the work they find pays low wages.

Date source: Social Explorer, 2009-2013 ACS 5-Year Estimate

Reviewing changes in the broader economy since 2000, the total number of employed persons in Raleigh has grown by almost 37%. The only industries with fewer workers are agriculture and information. This suggests a strong, diversified economy overall.

The experience in the study area contrasts sharply with the city as a whole. The total number of employed persons in the study area actually declined between 2000 and 2013 by 167 persons or 9.3%. The decline in employed persons occurred in every industry but two: 1) educational, health care and social services; and 2) public administration. Some of this reduction in the number of employed can be attributed to the City’s acquisition of blighted property and relocation of tenants to decent housing of their choosing. But it also indicates people’s choice not to move to the neighborhood.

Date source: Social Explorer, 2005-2009 ACS 5-Yr Estimates and 2009-2013 ACS 5-Year Estimate

In the study area, the commute for 56.2% of persons was under 20 minutes in 2013, while citywide, that number is 45.2%. Within the study area, 12.4% use public transportation, while citywide only 2.4% use public transportation to get to work. Within the study area, 12.9% either walked or bicycled to work; citywide, only 2.7% use those options. The walkable nature of the study area is clearly an asset that NRSA revitalization activities will build upon.

### III. Economic Empowerment Strategy

The City of Raleigh’s economic empowerment strategy for the NRSA has numerous components. A major objective is the creation of mixed-income housing opportunities for both homeowners and renters. Achieving diversity is also a valued objective. In preparation for vertical construction of both residential types, significant site preparation and/or infrastructure improvements will be required. Within East College Park, improvements will primarily include the replacement of water, sewer and stormwater lines in a portion of that area. The possible extension of Boyer and/or Pender Streets to connect directly with Raleigh Boulevard to create right turn in and right turn out connectivity will also be evaluated. On the Washington Terrace site, the existing suburban street pattern will be replaced with an urban grid, necessitating all new infrastructure to create six development blocks. In addition, the City had a $75 Million transportation bond approved in October, 2013 that allocates $4 Million of the bond money towards recommendations in the New Bern Avenue Corridor Study project from Tarboro to Sunnybrook by WakeMed Hospital. One of the two projects on New Bern Avenue will directly affect the southern boundary of College Park: widening sidewalks to 14 feet from Tarboro to Raleigh Blvd. The other project, from Raleigh Blvd. to
Sunnybrook, is to widen New Bern for bike lines and a future fixed guideway system and add sidewalks the length of the route.

It is anticipated that several hundred persons will be employed in construction and construction related jobs associated with the site prep/infrastructure and residential construction over the eight year span of the NRSA scheduled time period.

Site prep and infrastructure contracts will be subject to 15% Women-Owned and Minority Business participation goals. Such contracts funded in whole or in part with federal funds will also be subject to Section 3. Given the high unemployment in the area (and among males in particular), if new hires are required, every effort will be made to fill those jobs with LMI residents, including the development of a Section 3 Plan with a Housing & Neighborhood staff assigned to manage its implementation.

As a matter of HUD compliance, not less than 51% of the new residential units constructed on City-owned sites in East College Park will be reserved for LMI households. However, as a matter of local policy, Council has directed staff to achieve a 60% LMI benefit. The 51% low/mod benefit will be a point in time requirement. Since most of the new residential units will be for homeownership, the requirement will be maintained via the closing process.

Homebuyer education and City and NCHFA homebuyer assistance will be provided to make possible the wealth-building that comes with homeownership. DHIC is currently the City’s homebuyer education provider. While the focus in East College Park will be on homeownership, smaller scale rental development on City-owned sites will be evaluated.

Given the high percentage of low income and cost burdened homeowners in East College Park, providing repair and rehabilitation assistance to those in need will also be a priority. Opportunities to reduce utility bills through energy efficiency improvements will be incorporated into rehabilitation efforts.

Outreach to the community identified the desire for expanded programmatic offerings benefitting youth and seniors. Specific suggestions targeting seniors include expanded programming at the Tarboro Community Center, enhanced transit options, health and wellness classes and computer training. For youth, specific suggestions included mentoring, job/vocational prep and tapping into the resource represented by retired educators who live in the neighborhood. Housing & Neighborhoods’ Community Enhancement Grant program, using CDBG funds could be used to support such efforts tailored to the NRSA neighborhoods.

Because of the high unemployment rate among males in the neighborhood, the Capital Area Workforce Development Board was identified as a strategic implementation partner. An initial neighborhood presentation on the Board’s programs was held in October.

An economic development assessment was completed as a part of a larger market study. The assessment found that excluding New Bern Avenue and the additional demand created by drive-by traffic, there is only modest demand for neighborhood based commercial or retail. Even with the full build out of Washington Terrace and vacant land owned by the City, the neighborhood will be able to support about 1,600 square feet in restaurant/café space and about 1,900 square feet in convenience retail space. The existing Washington Terrace Shopping Center and the small retail district at Tarboro Street and Oakwood Avenue already have combined square footages greatly exceeding those levels. Interior to the NRSA therefore, the opportunities are primarily in the realm
of improving what currently exists vs. any expansions. Opportunities do exist however along New Bern Avenue. It should also be noted that alternatives for enhancing the Tarboro Street streetscape and at least some sections of the Oakwood Avenue will be evaluated.

Two significant neighborhood assets are the Tarboro Community Center and the Saint Monica Teen Center. The Teen Center serves 13-19 year old teens who are enrolled in middle or high school. Programmatic offering include homework assistance, a teen advisory board, interview skills and fitness and healthy living. In addition to recreational opportunities that include tennis, basketball, a picnic shelter, and a playground, the Tarboro Community Center houses after school programs, meeting rooms, a teen lounge, technology room, a fitness and dance room and a multipurpose kitchenette. Additionally, the Community Center is a Summer Youth employment site.

IV. PERFORMANCE MEASUREMENT BENCHMARKS

This section establishes benchmarks for the activities presented in this plan. In accordance with the Department of Housing and Urban Development (HUD) regulations, the City will report its accomplishments against its benchmarks in the Integrated Disbursement and Information System (IDIS). The City will also identify in its Annual Action Plan the benchmarks it expects to achieve for that program year. Additionally, the City will report its progress at the end of each program year in its Consolidated Annual Performance and Evaluation Report (CAPER). Over the eight year period of the strategy, the City will work to accomplish the following benchmarks.

New residential unit creation is based on the projected build out of Washington Terrace and City-owned parcels and not on specific development plans. Incremental development plans will be finalized as the project moves through the implementation phases.

GOAL 1: Infrastructure Improvements

Benchmarks

1.1 Install public infrastructure necessary to serve mixed-income development in East College Park (approximately 10,000 LF water, approximately 7,000 LF sanitary sewer, and approximately 1,300 LF stormwater pipe).

1.2 Install the public infrastructure necessary to serve mixed-income development in Washington Terrace (approximately 2,900 LF water, approximately 2,700 LF sanitary sewer, and approximately 3,700 LF stormwater pipe) including street realignment (approximately 2,200 LF).

1.3 Install new sidewalk on Oakwood Avenue from Heck to Raleigh Blvd.

1.4 Provide and/or upgrade natural gas service to East College Park.

GOAL 2: Residential Development

Benchmarks

2.1 Construct 320 new rental units.
2.2 Construct 195 new homeownership units.

2.3 Provide not less than 30 rehab loans to assist aging-in-place, reduce energy costs, and make other home improvements for existing homeowners with incomes less than 80% of AMI.

GOAL 3: Economic and Human Capital Development

Benchmarks

3.1 Employ not less than 500 persons in construction and construction related activities.

3.2 Continue the City’s Summer Youth Employment Program at St. Monica’s Youth Center and/or Tarboro Community Center.

3.3 Provide not less than 75 potential homebuyers with homebuyer education and training.

3.4 Create a Section 3 Plan, designate a Section 3 Coordinator, and actively promote and encourage Section 3 hires.

3.5 Achieve at least 10 Section 3 hires associated with construction activities in the neighborhoods.

3.6 Achieve not less than 15% participation by Minority and Women owned Business Enterprises in site prep/infrastructure and multi-family construction projects.

3.7 Construct child care facility on the Washington Terrace site serving approximately 80-100 children, infant to pre-Kindergarten.

V. SCHEDULE

September 1, 2015—June 30, 2016

- ECP: Begin infrastructure improvements: water, sanitary sewer, and storm water systems east of Hill Street between Oakwood Avenue and New Bern Avenue
- ECP: Redesign Homeowner Rehab Program for existing homeowners in the College Park neighborhood
- ECP: Implement redesigned Homeowner Rehab Program: rehab 6 homes
- ECP: Issue RFQ for builders, nonprofit and for profit, and select builders for single-family and townhouse development in the NRSA
- WT: Apply for 4% LIHTC project for 162 units of family housing (Phase I)
- WT: Apply for 9% LIHTC project for 60 or more units of senior housing (Phase II)
- Approximately 50 persons employed in construction and construction related activities
- WT: Begin design of rental projects and associated infrastructure improvements

July 1, 2016—June 30, 2017

- ECP: Complete infrastructure (water, storm, sanitary) improvements
- ECP: Select builders and transfer 15 lots
- ECP: Rehab 10 homes
- Approximately 100 persons employed in construction and construction related activities
July 1, 2017—June 30, 2018
- ECP: Complete 15 homeownership units
- ECP: Rehab 10 homes
- WT: Construction underway on 162-unit rental project and associated infrastructure
- WT: If Phase II is awarded tax credits and all other required funding, begin construction of 60+ rental project and associated infrastructure
- Approximately 100 persons employed in construction and construction related activities

July 1, 2018—June 30, 2019
- ECP: Rehab 4 homes
- ECP: Complete 25 homeownership units
- WT: 162 unit project completed
- WT: Child care facility completed
- WT: Construction of 60+ unit project completed *(if funded in 2016)*
- Approximately 100 persons employed in construction and construction related activities

July 1, 2019—June 30, 2020
- ECP: Complete 25 homeownership units
- WT: 17 homeownership units
- Approximately 100 persons employed in construction and construction related activities

July 1, 2020—June 30, 2023
- WT: Complete 51 homeownership units
- WT: Complete 98 rental units
- ECP: Complete 62 homeownership units
- Approximately 100 persons employed in construction and construction related activities
APPENDIX A: NRSA Maps
APPENDIX B: NRSA PUBLIC ENGAGEMENT PROCESS

Summary of 8/10/15 City of Raleigh Housing and Neighborhoods Department Meeting at Tarboro Community Center on NRSA Needs by Topic

Programming

Seniors
- Computer training
- Health and Wellness classes: healthy food and meals, medical issues
- Bingo
- Exercise (ex- bowling, swimming) and use community center during day
- Bible Study

Non Direct Programing Suggestions for Seniors:
- Transportation: improvement, access to services, improve sidewalks
- Age in place- design housing for seniors

Youth
- Mentoring (especially for underperforming students)
- Job/Vocational Prep
  - Construction Apprenticeship Program (Vernon Malone Career Center)
  - Develop Industrial Cooperative Training (internships, distributive education)
  - Jobs for Life Program- teach how to apply for jobs
- College Prep: help with process and finding higher Ed
- Arts: plays, composition, poetry, etc.
- Partnerships: churches and Richard B. Harrison library to provide space, bring in university students and staff to teach skills, retired educators in neighborhood can teach
- Activities to keep teens off of street (curfew)

Adults/General
- Money Investment classes (i.e. real estate, etc.)
- Parenting Education Classes
- Job opportunity postings
- Adult training
- Second Chance Programs- reintegration of felons

Safety
- Safer Neighborhood
  - Drug-free (people come to buy drugs)
  - Better lighting
  - No loitering in skate park
- Crime Prevention Programming
- Road Improvements
Housing and Improving Homes

- Housing for low-and moderate-income residents
- Work with Housing Committee
- Housing Weatherization

Homeowner

- Mortgage Counseling Education Classes
- Home repair
  - Low (preferably zero) interest rates for loans
  - Grants
- Tool Borrowing Program
- Need homebuyer information (i.e. loans, budgeting, rates, etc)

Rental

- Removal of slum rental
- Code enforcement on rental housing
- Need renter information (i.e. renter rights, etc.)
- Concern about rooming houses

Businesses and Neighborhood Amenities

Businesses/Commercial

- More/better grocery stores (full service), laundromats, and restaurants
  - Enforce ALE 50% Alcohol/Grocery ratio
- Rehab of existing shopping center
- Opportunities for development and rehab of small businesses
- Business owners: from neighborhood and more minority
  - Education Resource: SundayStacks.com

Neighborhood Infrastructure and Amenities

- Need outdoor basketball court
- Programming by Parks and Rec in neighborhood
- Upgrade Library
- Bus- more stops and more frequent bus routes
- Sidewalks- more and in better condition

Questions and Concerns

- Don’t let people get pushed from homes by developers
- Where are the jobs coming from?
- When will Agnes B1g Revitalization occur?
- No relationship with employment and building of new property
- What is affordable housing in the City’s definition?
  - Is this gain or loss for the residents?
- What is going to be required of the existing homes?
  - Will the existing homes have to be brought up to the newer city codes?
• Will property taxes increase more?
• How many rooming houses can be on a block?
• Are the organizations that will rehab homes for existing home owners? That will not require a loan?

**Process Specific**

- Draft needs to be simpler: too high level and confusing
  - Clarity of Services offered
- Role of SAU/Community Groups/Volunteers?
- What are the start dates? When will solutions be implemented?
- What problems already exist?
- Community Outreach for moving forward
  - Communication: Mail, Flyers, Robo Calls, Social Media, Mass media, radio, TV
- Community Input for leadership of projects
- Please have well defined agenda for Sept 1

---

**DHIC Washington Terrace Public Input Summary**

**August 13, 2015**

During DHIC’s civic engagement process, Washington Terrace residents, stakeholders, and the community at-large were asked to share feedback and impressions about the current condition of Washington Terrace and the surrounding area. Strengths recorded included the history of the neighborhood and sense of community; location to downtown and other essential services; easy access to public transportation and travel corridors; presence of St. Augustine’s University and nearby residential neighborhoods such as Madonna Acres; and the affordability of current housing. Also, participant saw having service partners such as the Boys & Girls Club and businesses such as White’s Barbershop as valuable assets in the community.

Noted as weaknesses, participants agreed that the nearby commercial shopping center was an eyesore to the community and was in need of major physical improvements. Also, the commercial strip invited loitering and other activities that contributed negatively to the perception of the neighborhood. Washington Terrace residents also reported on the lack of energy efficient appliances and extremely high electric bills due to poor insulation and aged heating and cooling systems. Residents also noted as weaknesses the limited use of laundry facilities; poor lighting and street drainage; lack of sidewalks and connectivity; and the unsafe flow of traffic caused by current street layout. Additionally, overwhelming concern was expressed about the potential loss of affordable housing for current Washington Terrace residents.

Common themes for opportunities included construction of quality and energy efficient housing that remained affordable to current Washington Terrace residents; incorporation of washer and dryer hook-ups in units; improved landscaping and property lighting; expansion of
community club house to accommodate more seniors and youth programming; the provision for playgrounds, open space and community gardens; the presence of an on-site early childhood education facility; and opportunities for homeownership. Also expressed was the opportunity to improve the nearby commercial center to attract new neighborhood businesses and services that better meet the needs of residents and the college student population.

As the master planning process advanced and design themes emerged, Washington Terrace residents and the community were presented with three formal opportunities to further engage in the planning process and offer additional feedback about preliminary design concepts. Participants emphasized the importance of housing affordability and the historic significance of the neighborhood. It was also agreed that design principles should create a safe and connected network for pedestrians, vehicular traffic and bicycles; building structures should front streets and should provide a more aesthetically pleasing environment; and parking and servicing should be accessibly located to the rear of the buildings. Also, residents commented that a healthy and active community could be achieved by creating a safe and well-defined open space that would be centrally located and designed for use by all ages. Additionally, on-site supporting uses to include child care, primary school and health care facility were tested and discussed. It was the general consensus that a health care facility was not a priority due to the availability of other primary care facilities in the area and that a child care facility and elementary school could be an asset if appropriately situated on the site and if concerns related to safety and traffic were addressed.

The final master plan will be presented to the community in October after which DHIC will continue its efforts to keep the community apprised of its progress and planning efforts to deliver quality, safe, and affordable housing to deserving seniors, families and individuals in the Washington Terrace community.

Summary of 8/25/15 City of Raleigh Housing and Neighborhoods Department Meeting at Tarboro Community Center on draft 2016 NRSA Plan

People in attendance: approximately 110
Staff in attendance: approximately 12

Comments made prior to the Q&A Session on Housing Rehabilitation

I am opposed to this strategy area plan

The City “gerrymandered” the Census Tract to create the NRSA

Comment about the Pender/Waldrop cut through requiring the City to acquire and demolish occupied houses on Pender Street

This Plan benefits the City, not the residents

Demanded we pull this from the September 1Council agenda

Recommendation to create a neighborhood task force

Comments about Genesis and Founders Row developments created in the City in the 1990s,

Questions and Answers from the meeting

- **What is the rush for having the public hearing September 1st? The UDO hasn’t been passed yet. Why the rush?**
  This is mostly to aid DHIC in its remake of the Washington Terrace site (see answer below).

- **We don’t want to prevent Washington Terrace from going forward. Why not make Washington Terrace the NRSA and leave off College Park?**
  Mostly the NRSA is to steer the City’s expenditure of federal Community Development Block Grant (CDBG) funds and that spending has gone on and will go on in College Park. Most of the anticipated spending on the WT site is non-CDBG. Also, state housing tax credits are more accessible to DHIC if WT is part of a larger City-driven revitalization strategy.

- **Where do the funds come from that are used for rehab?**
  Currently, the program is funded with federal HOME funds as well as local affordable housing bond funds.

- **Can you pick your own contractor?**
  The home owner is ultimately responsible for selecting the contract. The contract is between the home owner and the contractor. The City prepares a set of rehab specification that is put out to bid and any contractor that is licensed in the state is allowed to bid including any
contactor that the home owner chooses to invite. The City does provide the home owner a list of contractors that have successfully completed rehabs with the program but that does not mean that the home owner has to pick from that list.

- **What if the homeowner dies?**
  The loan becomes the responsibility of the heir(s). The death of the homeowner triggers the loan to become due and payable, which means that the heir(s) becomes responsible for either paying off the loan (by either selling the home or refinancing the loan with another lender) or making arrangements with the City to repay the loan or defer payments. Every effort is made to enter into a payment arrangement with a willing heir.

- **Will the heir take on the debt?**
  Yes. As stated above, the loan becomes the responsibility of the heir upon the homeowner’s death.

- **Does the heir have to live in the house to maintain the benefit of the zero interest loan?**
  Yes. And has to meet the same income restrictions as the homeowner (household income cannot exceed 50% of the area median income, adjusted for household size – currently, those limits are $27,600 for a 1-person household and $39,400 for a 4-person household)

- **Three homeowners I know had rehab done to their homes, the City picked the contractors and they’re all unhappy. One had to spend $1,500 to correct what the contractor did.**
  City Staff: “How long ago did this happen?”
  Reply: “A few years back.”
  City staff: “Could you provide the addresses of these homes or the names of the property owner?”
  Reply: “The home owners choose to be anonymous.”
  City staff: “Five years ago the City ended the contract with the agency that was responsible for the elderly rehab program. All rehabs are now being done in-house, so that we could manage the quality of the work being performed.”

- **The City should reduce the number of years the homeowner has to stay in the home.**
  This suggestion will be taken into consideration.

- **Can the homeowner also be the contractor for the rehab work done on their house?**
  No, all work has to be performed by a Licensed General Contractor.

- **Does the City get Rural Development funds?**
  No. The City receives federal Home Investment Partnership (HOME) funds and federal Community Development Block Grant (CDBG) funds. Cities the size of Raleigh have populations in excess of the limit to access Rural Development funding.
• Does the City’s rehab program mirror the County’s rehab program? I had a bad experience with the County. Two family members each had issues with the contractor and the County couldn’t get them to complete the work. I had to step in to make sure it got done.
   The City has its own rehab program.

• I am an heir. Where can I find what I need to do with the house so Code Enforcement doesn’t cite me and take the house? Where can I learn what standards the plan is going to set so I can know what the rules are?
   There is no list of building standards being proposed for the NRSA (just the same building code as other areas of the City).

• How much money will be available to me to do the work that needs to be done? How is the value of the house determined?
   The current guidelines state that there has to be enough equity in the property to support the estimated cost of the work that needs to be done. For instance, if the estimated cost of the work that needs to be done is $50,000, then there has to be at least $50,000 in equity (the value of the house less the amount owed on the house). House value is determined by either tax value or appraised value, whichever is greater.

• Will I be responsible for the contractor’s work?
   The City has a Rehab coordinator who is responsible for approving work prior to submitting request for payment at every stage of the project. Prior to final approval the rehab coordinator, the home owner and the contractor performs a final walk-through to ensure that all punch list items have been addressed to the satisfaction of the home owner. The rehab coordinator has to review the specification to ensure that all items in the scope of work have been completed before submitting the final draw to be processed.

• What about businesses and churches? Can rehab funds be applied to churches?
   Another Department in the City is developing new business assistance programs but these are still in development. The City needs to be cautious with the separation of Church and State. Some churches have a mission driven CDC / nonprofit arm that may be able to tap into funds to provide programs, if there is no “religious test” for receiving benefits.

• Can preference be given to workers and contractors that are from the area?
   First we must define AREA. We cannot limit resources to a specific area. There may not be enough qualified contractors in a given area to support /meet the need or volume of work. This could also affect production. We try to limit the number of jobs that one contractor could perform simultaneously given the nature of rehab work in general.

• How can you have a plan without churches, which are the heart of the community?
   The City sees NRSA churches as stakeholders and has no intention of excluding any stakeholder.
• People have had problems with contractors in the past. How can people know how to select the right one?
The City prepares a set of specification for the repairs. The specifications are advertised for bids. The home owner could also invite anyone they choose to attend the pre-bid. Ultimately it is up to the home owner to do some research on the contractors who submit a bid to perform the work.

• How many contractors are on the City’s list of rehab contractors?
There are about sixteen contractors on the list that is provided to the home owner, all of who have successfully completed projects in the past.

• Comment: Rule of thumb, never give a contractor up front before any work is done; if you do, it’s on you.

• How does the loan work if you don’t live in the house?
Funds are available to assist owners who rent their homes to low- to moderate-income individuals/families.

• Can you get a loan to rehab a house that you plan to rent? How would that work?
Funds are available to assist owners who rent their homes to low- to moderate-income individuals/families.

• Comment: The train has left the station. It’s important to live in your property. In ten years, this neighborhood is going to be very different than it is now. If you own a house here, you need to get it up to code now, so you can keep it in the family. Keep it for your children and your grandchildren.

• Comment: I don’t have a problem with the train leaving the station but I don’t want to just be a passenger. We want to be conductors driving it!

• What’s wrong with keeping the house in the family and letting your children there if you need to move? How would that affect the loan terms?
The City does have a process to accommodate that in certain cases, where the adult child(ren) would have to qualify to assume the loan.

• Do you have to be 65 years old to get a rehab loan?
No. Currently, there is no age requirement.

• Is there a reason why the City does so few rehab loans each year?
There are a variety of issues: homeowner’s credit, the condition of the house, etc. We are currently evaluating this situation.

• You have these existing programs already. How will having an NRSA impact those programs?
Job creation, additional public services, and mixed income housing are the types of investments more easily made with federal funds by a City only in an NRSA.
We don’t want to be obstructionist. I’m from Grace church, we had a plan 10 years ago at the urging of the City, we’ve talked to everyone but we’ve had no contact from the City regarding this plan. I’m not sure our voice is being heard but feel like we’re being patronized. We pay taxes, we vote but we’re excluded from the plan, we want to be considered partners and no excluded, this is not our first meeting. This meeting is one of many in which the City intends to engage all stakeholders moving forward. No one is excluded.

- **Does the City base rehab amount available on tax value?**
  Tax value or appraised value, whichever is greater.

- **What is your process for feedback to us here and the community?**
  Throughout the fall City staff will be providing updates on the NRSA and announcements will be made through mailings, e-mails, flyers, the City web site, etc.

- **When you meet with Council September 1st, will you say that the community wants to postpone this plan or will staff not say that?**
  [H&N Director recommended to City Council on September 1 to continue the public hearing November 3 to provide more opportunity for public input.]

- **Could you explain what “limited rehab” is?**
  Funds are available to homeowners whose homes need repairs that pose a threat to the occupant’s health or safety. The maximum loan amount is $7,500. The interest rate is 0%, and no payments are required as long as the owner stays in the home for five years, at which time the loan is forgiven.
September 1, 2015 Public Hearing at City Council Meeting

The City Council of the City of Raleigh met in a regular reconvened session at 7:00 p.m. on Tuesday, September 1, 2015 in the City Council Chamber, Room 201 of the Raleigh Municipal Building, Avery C. Upchurch Government Complex, 222 W. Hargett Street, Raleigh, North Carolina, with all Council members present.

Mayor McFarlane called the meeting to order and the following items were discussed with action taken and shown.

MATTERS SCHEDULED FOR PUBLIC HEARING

NEIGHBORHOOD REVITALIZATION STRATEGY AREA PLAN – HEARING – CONTINUED UNTIL NOVEMBER 3, 2015

This is a hearing before the City Council to provide citizens opportunity to comment on the Neighborhood Revitalization Strategy Area Plan (NRSA) prior to submittal to the U.S. Department of Housing and Urban Development.

The subject area of the proposed NRSA has suffered from poverty, housing deterioration, and failing infrastructure while much of the nearby downtown core has flourished. In an effort to address these issues, the Housing and Neighborhoods department has proposed an NRSA designation from the federal Department of Housing and Urban Development (HUD). The neighborhoods within the proposed NRSA are portions of the College Park and Washington Terrace areas near St. Augustine’s University. The purpose of NRSA designation is to provide guidance on infrastructure improvements, mixed-income residential development, and economic development opportunities within the target area over an eight-year period from 2016 to 2024. Funding sources for plan implementation include public (federal, state, and local) as well as private sources. A copy of the updated draft NRSA plan was included with the agenda packet.

Two public meetings have been convened in the community to date, August 10 and August 25. Based upon comments and feedback from the community meetings, staff has determined that additional public outreach and information dissemination is the best course of action at this time. When Council opens the hearing, staff will recommend the hearing be continued to the 7:00 p.m. session of the November 3, 2015 Council meeting to allow for additional outreach.

City Manager Hall stated he would like for the Council to receive a brief presentation but would suggest that the Council hold the hearing over to November 3. He stated however if people are present and they wish to speak it would be good to allow that but hold the meeting over.
Housing and Neighborhoods Director Larry Jarvis gave a brief overview and talked about the City of Raleigh’s strategic plan as it relates to safe, vibrant and healthy communities.

Objective 2 talks about preserving and increasing the supply of housing for all income groups including those with supportive service needs. Objective 3 talks about endorsing targeted redevelopment through walkable, mixed-use and mixed income neighborhoods.

Mr. Jarvis talked about the relationship of the Neighborhood Revitalization Strategy Plan and the link to the City’s strategic plan pointing out the NRSA designation allows for mixed income homeownership development on sites acquired with Federal funds. An approved NRSA makes it possible for groups like DHIC to apply for low income housing tax credits to develop affordable housing for seniors similar to what they hope to do in the Washington Terrace second phrase. He presented a map showing the proposed 2016 NRSA major property owners including DHIC, City of Raleigh, St. Augustine’s University and the strategy area in general. He pointed out the City of Raleigh owns a number of properties that were purchased with CDBG fund which carry income restrictions. He talked about how the NRSA if adopted would lift some of those restrictions. He talked about the City’s 130 plus properties and pointed out the NRSA would allow decisions on mixed income. He pointed out neighborhood revitalization is more than just new housing; an NRSA plan is a delineation of activities to uplift the neighborhood and its residents in a holistic manner. It includes activities such as rehab assistance to existing homeowners, new or expanded programs and services for youth and seniors, new day care centers, possible new schools, focus on job creation and employment and possible commercial revitalization. It also provides for infrastructure improvements which help supports new development and talked about sidewalks on New Bern Avenue and Oakwood Avenue both which are included in the 2013 Transportation Bond. He stated another infrastructure improvement would be the Tarboro Road/Oakwood Streetscapes to determine the best options to improve the functionality, etc. It also could include expanding natural gas service which would help reduce energy cost.

Mr. Jarvis talked about the NRSA eligibility which calls for at least 70% of the households within selected geographical areas being low to moderate income; HUD provides broad flexibility and delineating the geographic area but must be contiguous; blocks groups 1 and 2 of census tract 506 are 74% low to moderate income. If you add block group 3, the required threshold would not be have been met and the area would not have been eligible for these programs and services. In response to questioning from Ms. Baldwin, Mr. Jarvis pointed out block group 3 doesn’t need the economic incentives.

Mr. Jarvis talked about the City’s acquisitions of properties in East College Park which began in the late 1990s. He went through the past efforts to move forward with a plan starting with design concepts which were presented in public meetings at the Tarboro Road Community Center in January 2012, projected areas included in one of three proposed neighborhood revitalization zones which was presented to the chairs of the North Central, Central and South Central CACs. He talked about the community outreach particularly in Washington Terrace which was led by DHIC and the number of meetings, workshops and the 48 stakeholder interviews that were held. There were three city staff meetings with St. Augustine’s University, combined East College Park/Washington Terrace Meetings, talked about the number of people that attended the various workshops, the distribution of the NRSA summary
which address most frequently asked questions and the meeting held on August 25, where 122 residents attended to discuss the plan in general. Mr. Jarvis pointed out there are ongoing conversations centering on issues of concerns with plan outcomes or proposed activities and pointed out we need to continue to clarify that the NRSA is not tied to the UDO remapping, the comprehensive plan or proposed plan for the New Bern Corridor and suggested that we continue the hearing until November 3, 2015.

Mr. Stephenson pointed out he attended part of the information meeting at the Tarboro Road Park and had questions about proposed loan term, forgivable loans, restructuring of loans etc., and questioned how that would play out and what the City would want to provide. Mr. Jarvis talked about HUD restructuring loans as grants, how we wanted to look at making sure that homes are not rehabbed and turned around and sold for a profit, different concerns that people have relative to loans and grants. How an NRSA would work as it relates to Washington Terrace was also talked about. Mr. Stephenson had a number of questions about the pros and cons of a NRSA and whether the income from the moderate or market rate housing could be utilized to benefit an area. Mr. Jarvis talked about the ongoing conversations and the work with the City’s Communications Director relative to getting the correct information out to our stakeholders. Ms. Baldwin had questions about the city owned property questioning if it is vacant lots or boarded up housing with Mr. Jarvis pointing out the majority are vacant lots. He talked about streetscape improvements, how all could work together to achieve desired results, responded to questions about the economic development study on Tarboro Road, etc.

The Mayor opened the hearing.

Octavia Rainey talked about her concerns with the way Neighborhood Services has operated calling it sneaky, underhanded, etc. She talked about what the area had been told under previous administrations staring in the 90s, expressed concern that racism is still present, expressed concern about the comments presented by Mr. Jarvis pointing out she does not feel they are correct. She stated she has a background in housing and she is asking to get all of the emails, etc., relative to College Park and work that JDavis is doing. She expressed concern about what she called underhanded meetings, pointing out she had read the strategy and the NRSA and expressed concern about lack of transit, people being deceived, called the process wrong, pointed out East College Park should not be a part of this. She does not feel the City needs the NSRA, HUD needs to hold the City. She pointed out she is taking this to HUD, talked about the lack of distrust and concerns in general. She asked about diversity study, all the misinformation and stated she does not understand or appreciate Mr. Jarvis’ policies and studies.

Mr. Maiorano expressed concern relative to Ms. Rainey’s choice of words which he felt were personal and inappropriate and called on everyone to exercise a level of respect.

Carmen Wimberley Cauthen presented the following prepared statement:

My name is Carmen Wimberley Cauthen, I reside at 703 Latta Street in Raleigh. I have lived in Raleigh for 53 of my 56 years. I was born at St. Agnes Hospital and brought home to B-1 Washington Terrace. I lived in southeast Raleigh until 1968 (including Idlewild Avenue),
when I moved northwest Raleigh off of Ridge Road. When I married, I moved back to College Park, on N. Carver Street. I now reside in Oberlin.

I took a ride this past Saturday throughout Southeast Raleigh to show a relatively new resident the Raleigh of my memories. We were both astonished at the changes. Both my father and grandfather had drugstores in South Raleigh. One on Blount Street, the other on the corner of Cabarrus and Swain Street. The areas are vastly different now than they were when I was growing up. The methods of change are not.

In the 1960's, the method of change for downtown African American (Negro) communities was Urban Renewal. The people had to move without representation on the City Councils, without being part of the planning process and were told that they would be able to return. You have only to look past the Red Hat Amphitheater and Washington School towards Mount Hope Cemetery to see the great expanse of land that was once a great African American community.

The area around Moore Square was a thriving African American community as well, but is now gone. My grandparents purchased their home on Bloodworth Street in the 1940's from white people who were moving out of the community to the suburbs as did many others. College Park was a thriving community with homes dedicated to the professional education community of St. Augustine's College (now University). My parents rented a home from a family whose parents had lived in that house. Our neighbor was the librarian at Shaw University. That community is in flux today as well.

I spoke with a College Park resident who told me that this NRSA/Senior Housing project discussion had been going on for a couple of years. If this is the case, why are residents of the area just hearing/seeing the fruit of the discussion now? Why hasn't the community at large been a part of the process until now? What has the discussion been about until now?

Communication is key to any type of change. While the NRSA plan might be a good thing, it is full of unanswered questions. The questions that are there should be discussed in full with the residents that will be affected by the "plan". Whether the plan is complete or not, it looks finalized to people who haven't seen any of the words in written form. And looks and perception are what matter here - what matter to people who have a history of being lied to and taken advantage of. This neighborhood deserves better than that. You, the City Council members and your staff, should give them better than that, because you wouldn't accept this type of treatment in your neighborhood. Communication matters. We, the at large Raleigh Community, deserve better.

Thank you.

Pauline Goza, 1508 Tierny Circle, stated the first time she had heard anything about this was August 5 and a plan was presented on August 10. She stated the people who live in the area should be allowed to contribute and be a part of the plan. She talked about DHIC’s proposal for Washington Terrace and then they started hearing about a strategic plan and expressed concern that the people are being told that studies were done but they did not have any input.
She called for a task force to be formed to make sure that the people are included in the planning.

Terri Becom, Vice Chair of North Central CAC, expressed concern and the feeling that people are being deceived and are not considered when the plans are done. She stated everyone should be a part of the plan; it should be an open, transparent process. She stated she is optimistic this could be a win/win situation and called for everyone to put all cards on the table.

Jeanette Howard, 1606 Poole Road, stated she has lived her entire life in this area and told of her family connections. She stated mixed income is not a new technology. This area has always had mixed income. They understand what that means. She stated what is so confusing is that the people have heard conversation on 3 or 4 different occasions from representatives of the City and each time it is different. They were told that the 51% affordable 49% market rate was set in stone but tonight they are hearing that could be changed. She indicated they are hearing that nothing could be done with the City property unless this plan is adopted and expressed concern about the disconnection or contradictions in the information they are receiving. She stated a task force could engage people. She pointed out this NRSA could be a model for the country if it is done right.

Mary Johnson, 1301 East Jones Street, stated she had heard nothing about the plan until the August 25 meeting. She stated not everybody has computers and don’t have the information. She stated there is a lot of distrust, lack of communication, and expressed concern about some of the information provided at the August 25 meeting. She talked about the Dempsey Benton era in which they were told they could go back into their community in the Cook Street area but nobody has been able to return.

Alicia Blaylock, 206 Idlewild Avenue, expressed concern that the people did not know about what was going on. They need information and everybody needs the same information. They need to build pride in their community.

No one else asked to be heard, the Mayor expressed appreciation to everyone who came and asked that staff continue working with the community and listen to what the people say, and the disseminate the information and the hearing would be continued until November 3.

The City of Raleigh Housing and Neighborhoods Department hosted four Drop-In Sessions at Washington Terrace Leasing Office and Tarboro Community Center on the draft 2016 NRSA Plan

Q&A Drop-In Sessions City of Raleigh staff was on site to answer resident questions. These were free-flowing events and participants could spend as little or as much time they need to get their questions answered.

1. **Tuesday, October 6th** - 11:00 a.m. – 1:00 p.m. Washington Terrace Leasing Office
(10 participants)

2. **Thursday, October 8th** – 3:00 p.m. – 5:00 p.m. Tarboro Community Center
   (6 participants)

3. **Tuesday, October 13th**- 11:00 a.m. – 1:00 p.m. Washington Terrace Leasing Office
   (5 participants)

4. **Thursday, October 15th** – 3:00 p.m. – 5:00 p.m. Tarboro Community Center
   (4 participants)

**Questions/Comments that can up in drop-in sessions:**

- Is College Park in the same Redevelopment area as Washington Terrace?
- How many of the rental units will be in College Park?
  - How much of that will be affordable?
  - How many of the townhomes will be done by Washington Terrace vs. the City?
- (Considering required to have 51% low and moderate income)- can it be more?
- How are we ensuring that the workforce exists in the community?
- I would like the Section 3 coordinator to be a community person
- NRSA requires community engagement, this seems like engagement is an afterthought.
- There should be a task force for engagement
- Are Pender and Boyer Streets being taken out- is that off the table?
- What about “Generational Rights”?
- How many of the 352 rental will be in College Park?
- Will rent be set on or adjusted by income? (in reference to Washington Terrace)
  - A: Rent will be set- tenant must show they can afford rent.
- Is there a plan for Wake Tech skill training in the plan?
- Access the infrastructure in the remainder of College Park.
- Increase Section 3 from 10 to 50
- What about co-op housing?
- What about housing design guidelines for College Park?
- Getting letters about water line from City source- unsure of what it means
- Washington Terrace
  - When will demo begin?
  - When will people move?
- Does the city have resources to help people without work who want to lease a home?
- Do you have rent to own?
- Fisher Street Park- people are in park late at night
  - Need higher fence for neighbors
- Sidewalks- people walk on yards now because there are no sidewalks
- People speed on Fisher
- Need trash cans in neighborhood
The Capital Area Workforce Development Meeting was hosted by the Housing and Neighborhood Departments’ Community Engagement Division on Thursday, October 15 at Tarboro Community Center from 6:30 p.m. to 8:00 p.m.

There were about 14 in attendance at this meeting.

During the community engagement session on August 10th, numerous attendees stated that employment opportunities and job training were areas of need for the residents of Washington Terrace and the College Park/Idlewild neighborhoods. As part of the continuing Neighborhood Revitalization Strategy Area (NSRA) efforts, we are partnering with various agencies to provide information and assistance to address some of the expressed resident concerns.

On Thursday, October 15, the Community Engagement Division hosted a presentation by Capital Area Workforce Development. Capital Area Workforce Development is a public-private partnership that focuses on economic development by ensuring the local workforce has the skills, training and education to meet the needs of local employers. As well, the board oversees NCWorks Career Centers throughout Wake County to help citizens, regardless of their circumstances or background, be more competitive candidates as they look for employment. The event was open to the public and all interested residents were encouraged to attend. Capital Area Workforce Development staff was present to share information on their programs and to answer questions from residents.

The NRSA Open House was hosted by the City of Raleigh’s Housing and Neighborhoods Department on Tuesday, October 20th from 6:00 – 7:30 p.m. at Tarboro Community Center.

There were about 20 in attendance at this meeting.

The Open House was another opportunity for residents to learn more about the Neighborhood Revitalization Strategy area plan. Housing and Neighborhoods staff was hand to share information and answer questions about the proposed plan and programs for the Washington Terrace and College Park neighborhood. All interested residents were encouraged to attend.

Unlike other City of Raleigh meetings, there was no formal presentation. Instead, residents were invited to come by between 6:00 p.m. and 7:30 p.m. when staff was available at stations to talk with you about the following topics:

- General information about the draft 2016 NRSA (content and process)
- NRSA housing rehabilitation programs
- Employment opportunities in the NRSA
- Washington Terrace plans for affordable housing and other improvements
- Homebuyer counseling and financial assistance
- Future planning process for the development of City-owned sites and infrastructure improvements (water, sewer, storm drainage) and redevelopment
November 3, 2015 Public Hearing at City Council Meeting

NEIGHBORHOOD REVITALIZATION STRATEGY AREA PLAN – HEARING – APPROVED; TARBORO ROAD IMPROVEMENTS – REPORT REQUESTED

This is a continuation from the September 1, 2015 hearing before the City Council to provide citizens further opportunity to comment on the Neighborhood Revitalization Strategy Area Plan (NRSA) prior to the submittal to the US Department Housing and Urban Development (HUD).

Once the hearing is closed, the Council may take action to approve the plan for submittal to HUD.

Larry Jarvis, Housing and Neighborhoods Director, provided an update of what has occurred since September. He presented a PowerPoint talking about Neighborhood Revitalization Strategic Area (NRSA) Plan. He went over the background, benefits, outreach and community engagement before the beginning of the public hearing and since the public hearing, and how NRSA links to the strategic plan, Department of Housing and Urban Development which encourages mixed income neighborhoods, read information about NRSA eligibility, the boundaries of the proposed 2016 NRSA, activities allowed and proposed, community outreach prior to September 1, 2015 and since September 1, 2015, what they heard relative to mixed income concerns and responses, need to increase affordable housing in the areas and the changes to increase numbers to at least 60%, gave illustrations, the next steps and recommendations.

In response to questioning from Ms. Baldwin, Mr. Jarvis pointed out the City has a contract with JDavis to help develop the master plan and talked about the public process which will be used, mixed income and pointed out until the staff knows the direction of Council, the consultant is on hold. He stated after the public process the item will come back to City Council. Mr. Stephenson expressed appreciation for the public outreach pointing out most of the comments he heard during the meeting held at Tarboro Road related to low interest or forgivable loans and asked for clarification on that concept. Mr. Jarvis explained the desire to craft rehab loan programs that will be attractive to seniors. He stated a lot of the times elderly people do not want to encumber their home for long periods of time, they want to be able to pass their homes to their heirs. The details are yet to be finalized and staff will be going out to the public with those at the appropriate times. Mr. Weeks expressed appreciation that the percentage for low and moderate income housing has been raised to 60% and questioned if that can be raised any time during the process. Mr. Jarvis stated as the final edits are made, language could be added to make sure the Council could make adjustments at any time it sees fit. Mr. Maiorano had questions relative to preserving affordability for the long term and if that is built into the process for new units. Mr. Jarvis explained the loan process, recapturing of funding and how it would be set up to discourage people from selling quickly after they purchase the homes. He talked about the possibility of land trust units, etc.

Mayor McFarlane opened the hearing.
Octavia Rainey, 1516 East Lane Street, pointed out she had lived in the College Park area some 60 years. She stated she is opposed to this plan pointing out she met with HUD officials yesterday and has asked for a Federal investigation into the process. She talked about the Census Tract 506 and how the boundaries have been “gerrymandered.” She stated 509 is worse than 506. She presented a chart showing the “most distressed areas.” She expressed concern as to why Greg Warren of DHIC filed the College Park LLC pointing out this designation should be for Washington Terrace. She talked about meetings she has attended and the need to build trust. She asked the Council not to approve the process as she feels it is sneaky, under handed, etc. She again talked about her call for a federal investigation.

Roland Gammon, 2845 Claremont Road, Chair of DHIC, distributed the following written comments:

I currently serve as the Chair of the DHIC Board of Directors and would like to thank the City for your support over the years. We know that we could not have purchased the Washington Terrace property without your assistance in early 2014. And, this partnership will continue as we build new housing in the site.

Over the past 6 years that I have been on the DHIC Board I have been continuously impressed with both quality of housing that DHIC builds and the staff's capacity to leverage financial resources from all quarters to get the biggest bang for the buck.

Further, I have learned that DHIC's reputation for creating quality creative affordable housing solutions extends well beyond the immediate area. DHIC is a regional, and indeed, a national leader.

The DHIC Board sees the NRSA designation in the area that includes Washington Terrace as an important tool that could help us add to a neighborhood rich with history.

NRSA will enhance our chances to secure tax-credits to assist the delivery of affordable housing for seniors.

We will also make critically important infrastructure upgrades at the Washington Terrace site that will benefit the entire area- water, sanitary sewer, and stormwater systems.

We support the City's application for NRSA designation in the area and because of all the benefit it is poised to have for the entire area, we are glad that Washington Terrace will be a key component.

Thank you again for the time to speak this evening.

Mr. Gammon stated he does not recognize the comments about Greg Warren and pointed out DHIC and Greg Warren are highly regarded nationally and he just does not understand the
comments. He stated DHIC and the City of Raleigh have enjoyed a good relationship over the years and talked about how this program came about.

Jannet Barnes, President of the African American Caucus, distributed a pack of information relative to their concerns. She stated she attended the meeting with HUD officials and presented the same packet to them. She expressed concern about the LLC form by Greg Warren. She talked about David Price and also suggested that the Council take Madonna Acres out of the numbers as that is a historic area and shouldn’t be included as they do not need financial assistance. She stated if that area is removed then it would not meet the requirements. She stated the packet of information includes information on the formation of the LLC, talked about her feeling that it is a conflict of interest on the part of the DHIC, talked about calling for the federal investigation indicating HUD is not doing their job and they should never approve of Madonna Acres being included. She talked about their expectations and the votes they represent.

Greg Warren, President of DHIC and of the College Park Collaborative LLC, stated he is totally confused by the conversations and the comments being made. He stated when DHIC purchases property they always put it in a LLC that is how they have operated for many years. This LLC was formed to purchase the Washington Terrace property and talked about how he may not have choose the right name for the LLC and he apologizes for any confusion. He stated he would disclose any information about the College Park Collaborative and made the following remarks:

Good evening, I am Gregg Warren President of DHIC and my office is located in the historic Prairie Building at 113 S. Wilmington Street, Raleigh NC.

We at DHIC are most appreciative of the City's support of our plan to replace the existing run-down apartments at Washington Terrance with new, beautiful, energy efficient and affordable apartment homes.

As you know, DHIC has a more than a 40 year legacy of creating affordable; high-quality housing for renters and first-time homebuyers in Raleigh and the Triangle. In SE Raleigh alone, DHIC has built 8 affordable rental communities totaling 590 apartments with a value in excess of $40 million.

And, we have helped many SE Raleigh residents find a path to homeownership.

I use the term "transformative" carefully, but I think you will find that our plan will indeed have a significant positive impact on the lives of Washington Terrace residents, our adjoining residential neighborhoods to the North and South, and St. Augustine's University.

We envision a community that embraces the best qualities of green, sustainable design that will enhance family stability and healthy living for all of our residents.
Our team has engaged Washington Terrace residents, businesses, congregations and other stakeholders in a generative discussion on the plan to remake the Washington Terrace community. Our master plan is well underway and will be presented to the community in December.

Affordability, accessibility and quality are three concepts we have heard time and again through the series of community and stakeholder meetings held discussing the future of Washington Terrace and the neighborhood.

While our first priority is to replace the existing 245 apartments with new affordable apartments on a one-to-one basis, later phases of our plan will involve for-sale housing and perhaps market-rate rental housing. We will build a mixed-income community.

The NRSA designation will immediately help DHIC compete for 9% tax-credits that will allow us to more quickly deliver affordable, accessible high-quality housing and amenities at Washington Terrace for seniors.

DHIC is immensely qualified and remains committed as we have for decades, to use all available tools to deliver and maintain affordable apartments and homes for sale—and NRSA can help create more of those opportunities. Thank you!

Sheila Porter presented the following prepared statement:

Thank you for the opportunity to speak this evening. My name is Shelia Porter and I have the pleasure of serving as the Director of the DHIC Homeownership Center located at 450 East Davie Street.

I am certified as a counselor through the Association of Housing Counselors and NeighborWorks® America. I also have my N.C. Real Estate Brokers License.

At the DHIC Homeownership Center, our goal is to aid individuals build wealth and housing stability through homeownership opportunities.

Our services include credit repair, budget counseling and providing support throughout the home buying process.

We also work in partnership with area banks and the City of Raleigh to provide our services to families, at our below 80% of the Area Median, who seek City down payment assistance.

We understand that a possible outcome of NRSA in this area is the creation of affordable homeownership opportunities and we believe that DHIC can be of service.
In 2014, over 400 prospective homebuyers participated in our monthly Homebuyers Education Workshops and we're on track this year to match or exceed this number.

In 2014, 90 individuals that participated in our program went on to purchase their first home. Here is a snapshot of who we served:

- 64% were aged 31 to 50;
- 65% African-American
- 51% had 2 or more children;
- 73% had household incomes less than $40,000;

I do not want to simply recite percentages to you, but wanted you to know that DHIC stands ready to assist individuals and families prepare for homeownership opportunities that may result from the NRSA designation and we look forward to doing so. Thank you!

The resident at 4201 Winter Place told of her experience of tutoring some young people who live in the New Bern Avenue area and these two young people’s need for affordable housing. She gave the history of this family who pays $625 a month for rent and health issues that caused the father to have to retire and what they have gone through to try to pay their rent. She talked about how this family and others need affordable housing and asked the Council to do what they can to provide for affordable housing.

Les Seitz, 3200 Ridge Mill Road, indicated he has served on the Affordable Housing Task Force, has a long-standing relationship with DHIC and called on the Council to support staff’s recommendation for the NSRA. He pointed out how he feels approving the NSRA would be in keeping with the goals and plans that the Council has recently approved including the adoption of the Affordable Housing Location Policy which replaced the scattered site policy. He stated affordable housing is a hot topic; talked about various Council members’ efforts relative to housing and Council members’ efforts to provide additional resources for affordable housing. He asked the Council to move forward and keep up the good work.

Cheryl Parson presented the following prepared statement:

Good Evening! My name is Cheryl Parsons and I serve as the Regional Manager for Ginkgo Residential, the property management company contracted by DHIC to manage property operations at Washington Terrace. My address of record is 1951 Booker Drive, Raleigh NC.

Since DHIC purchased the property in January 2014, we have enjoyed working with DHIC and with the residents at Washington Terrace.

Our property team consists of Shavonna Herron, property manager, Barry Tyler, assistant manager, Jamien Taylor, maintenance supervisor and Ricky Stokes,
maintenance tech and they have done a great job serving and meeting the needs of residents at the property on a daily basis.

As stated earlier, Washington Terrace was built in 1950 and as you can imagine, maintaining a property this old that has gotten great usage over the years is a daily challenge for our team, though we manage to do.

We are reminded each day of this challenge and the desperate need for new construction housing when we go into vacant units to make ready for the on-site relocation of current Washington Terrace residents.

We are also reminded when things breakdown and we're told that they don't make the parts anymore.

Ginkgo manages properties throughout the region and we work with owners going through similar processes and comparably, I can say that DHIC has been very thoughtful and accommodating and has worked extremely hard to make sure that current residents are cared for during this transition.

Thank you for your time and we support the approval of NRSA so that those we serve on a daily basis can live in quality, safe, and affordable housing.

Glenn French, 1732 Quail Ridge Road, presented the following statement:

Good evening! My name is Glenn French and I reside at 1732 Quail Ridge Rd, Raleigh.

I am a DHIC Board member as well as a member of the board's Washington Terrace Advisory Committee.

This year I am celebrating my 40th anniversary as a Certified Property Manager and I have extensive experience in property management, urban renewal and the turnaround of distressed properties.

Earlier in my career, I served as the director of management of the Cambridge Housing Authority in Massachusetts and upon my departure, the city-wide tenant organization recognized me for the work I had done.

In addition, for 11 of those years, I served as a consultant to Saint Augustine's University where I developed, designed, and implemented the only real estate degree program among the nation's HBCUs. I also had the pleasure of serving as Chair of the Board of Directors of the St. Augustine's Community Development Corporation.
The board created the Washington Terrace sub-committee to advise the DHIC board and staff on matters directly related to the Washington Terrace civic engagement and master planning process.

I have attended most, if not all of the community meetings hosted by DHIC, and at least one of the City sponsored meetings, and I was impressed with the involvement from the community and especially impressed with the involvement of Washington Terrace residents, whose presence served as a constant reminder of why we were all there.

At the meetings, I heard firsthand what residents wanted to see in a new Washington Terrace and what they valued in their neighborhood and in my experience, what I heard only served to enhance the process and ultimately the outcome of the master plan.

However, what I heard most often where residents asking how soon would the new housing be made available. In other words, they wanted to see new housing sooner, rather than later.

This leads me to why supporting the NRSA designation is important for DHIC. Approving the NRSA will help DHIC deliver new housing sooner for residents who currently live in this area and for those who want to return to this area to live.

We are also very much aware of the history that is associated with Washington Terrace and the surrounding neighborhood and we, like others, want to make sure that all viable affordable housing options are available for those who need it the most.

Thank you for your time and support and we look forward to future opportunities that will serve the housing needs of the community.

Janet Howard, Poole Road, indicated the question before the City Council is whether the designation really meets the criteria as established by the Federal government. She stated the program is intended to reduce poverty in an area and there are five elements. One of the elements relates to resident engagement and community leadership and she feels the process was missed in this discussion. She talked about the Washington Terrace redevelopment plan but questioned if that makes this an NRSA area. She stated there should be other stakeholders at the table such as St. Augustine’s, talked about the program needing strategic and accountable partnerships, the need to look at the entire area and how this doesn’t look beyond Washington Terrace, her understanding that the infrastructure would only benefit Washington Terrace or the lots owned by the City of Raleigh, called on the Council to look at the entire area, Maple Street to Heck Street as she feels they should be included. She stated she has seen three versions of the plans with three different sets of numbers, expressed concern that they were not given all of the information and everyone should look at more than Washington Terrace.
James Giles, 2120 Sanderford Road, talked about his work for the Community Development department some 20 years ago. He spoke against the NRSA plan, talked about how he worked and what his job for the city entailed and stated in his opinion this plan does not meet the Federal guidelines and the people are not being treated fairly.

Colby Crandall, 211 Ashe Avenue, talked about the need to get the community involved and that has to be done if this is done right.

A representative of Grace AME Church which is located at the corner of Hill and Boyer talked about the different master plans that have been developed for the area. He stated he is not opposed to what is being talked about but he just feels they should be included in the process. We should be talking about more than Washington Terrace. He stated a group came together and paid for a master plan for College Park, talked about St. Augustine’s University being ready to participate in the process and asked that they all be included at the table. They want to be participants.

No one else asked to be heard thus the hearing was closed.

Ms. Baldwin indicated she needs a little clarity on what is being proposed with the NRSA. She stated she understands the NRSA is only a designation, the plan will come later. There will be a lot of work done in the future with the planning process, etc. Mr. Jarvis indicated that is correct.

In response to questioning from Mr. Weeks, Mr. Jarvis clarified the census tract used and how the boundaries were drawn. Ms. Baldwin questioned what staff is asking the Council to approve with Mr. Jarvis presenting the following list.

- Approve the draft FY 2016 Neighborhood Revitalization Strategy Area (NRSA) Plan;
- Amend the 2016-2020 Consolidated Plan to include the NRSA designation and Plan; and
- Authorize submission of the Plan to the U.S. Department of Housing and Urban Development.

Mr. Maiorano moved approval of the recommendations. His motion was seconded by Mr. Stephenson. What will happen at this point was talked about briefly. The motion as stated was put to a roll call vote which resulted in all members voting in the affirmative. The Mayor ruled the motion adopted on an 8-0 vote.

Ms. Baldwin pointed out the infrastructure comments that were made earlier made her think about concerns raised by Mr. Weeks and Mr. Odom in trying to get improvements made for Tarboro Road. She stated she understands there is funding available in reserve and she would ask administration to bring back a report about the possibility of earmarking up to $3M to develop necessary infrastructure for Tarboro Road. Mayor McFarlane stated it was her understanding we were waiting for the results of the economic development study that is occurring in this area. City Manager Hall talked about the design elements along the corridor.
pointing out staff could provide an update. When this update could be provided was talked about briefly with the Mayor pointing out she thought we were waiting for the study results to find out how to best spend the money. City Manager Hall indicated he could schedule a time to present the results and Council can determine how to go ahead. Ms. Baldwin asked that it be brought to the next meeting with City Manager Hall indicating he would provide an update at the next meeting.
