REPORT OF
PHASE I ENVIRONMENTAL SITE ASSESSMENT

DPV SITE
RALEIGH, NORTH CAROLINA

DECEMBER 23, 2020

PREPARED FOR
CITY OF RALEIGH

VIA EMAIL TO: ralph.recchie@raleighnc.gov

December 23, 2020

Ralph Recchie
Real Estate Manager, Real Estate Services
Department of Planning and Development
City of Raleigh
One Exchange Plaza, Suite 1020
Raleigh, North Carolina 27601

Reference: **Report of Phase I Environmental Site Assessment**
DPV Site
Raleigh, North Carolina

Dear Mr. Recchie:

As authorized by your acceptance of our proposal dated December 4, 2020, SynTerra Corporation (SynTerra) is pleased to submit this Report of Phase I Environmental Site Assessment for the above-referenced site. This report presents the results of our Phase I Environmental Site Assessment (ESA) conducted in general accordance with ASTM International's Standard Practice E1527-13 and the All Appropriate Inquiries rule for a Phase I ESA. SynTerra did not identify recognized environmental conditions in connection with the subject site.

Please review the following report in its entirety for more information regarding our findings and opinions for the site. SynTerra appreciates the opportunity to be of service to the City of Raleigh. Please contact Rick Kolb at either (919) 858-9898 or rkolb@synterracorp.com if you have any questions.

Sincerely,

SYNTERRA CORPORATION

Richard A. Kolb

Report of Phase I Environmental Site Assessment
DPV Site
Raleigh, North Carolina

1 Executive Summary

SynTerra Corporation (SynTerra) conducted a Phase I Environmental Site Assessment (ESA) of the DPV Site, which comprises three parcels and part of a fourth parcel at the intersection of Russ and Hawkins streets in Raleigh, Wake County, North Carolina. The subject site comprises approximately 4 acres and is developed with 10 duplexes and a fourplex. The site is bound to the to the north by New Bern Avenue, across which are two single-family residences; to the east by Russ Street, across which is Southeast Raleigh Table church and its parking lot; to the south by Hawkins Street, across which are two parcels at which Price's Paint and Body stores vehicles in need of repair, and by a strip shopping center with a Family Dollar store as the anchor tenant; and to the west by residential duplexes and Coke Street, across which is residential duplex.

Environmental Data Resources (EDR) reviewed environmental lists published by federal and state agencies for sites on environmental lists within the search distances recommended in ASTM International's Standard Practice E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (E1527-13). EDR did not identify the subject site on the lists they reviewed. EDR identified one site on the Inactive Hazardous Sites Inventory (IHSI) within 1 mile of the site; and 32 sites on the list of leaking underground storage tanks (LUST list), 5 sites on the list of sites with institutional controls (Inst. Controls list), 23 sites on the list of the incident management database (IMD list), and 11 sites on the list of known or potential dry-cleaning sites in the database of the Dry-Cleaning Solvent Cleanup Act list (DSCA list) within ½ mile of the subject site. SynTerra does not consider the listed facilities EDR identified to represent recognized environmental conditions (RECs) to the subject site because these sites are topographically crossgradient or downgradient of the subject site, are in a different drainage basin from the subject site. Contamination at these sites, if present, should not adversely affect groundwater beneath the subject site.

SynTerra established the history of the site by review of available historical references that began in 1938. An aerial photograph dated 1938 shows the site as cleared, undeveloped land. Aerial photographs from 1949 to 2006 show the site developed with the buildings presently on the site and show a residence at 118 Russ Street. The photographs after 2006 do not show this residence and shows the site developed as it appears today.

SynTerra conducted a Phase I ESA in general conformance with the scope and limitations of E1527-13 and 40 Code of Federal Regulations (CFR) Part 312 of the DPV Site in Raleigh, North Carolina, the property. Any exceptions to, or deletions from this practice are described in Section 2.4 of this report. This assessment did not identify evidence of RECs in connection with the property.

2 Introduction

2.1 Purpose

The purpose of this Phase I ESA is to evaluate commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products as required by the United States Environmental Protection Agency's (EPA) All Appropriate Inquiries (AAI) final rule codified in 40 CFR Part 312, "Standards and Practices for All Appropriate Inquiries". ASTM International published E1527-13, which is intended to fulfill the requirements of 40 CFR Part 312 and to assist the user in qualifying for the "bona fide prospective purchaser" liability protection pursuant to Sections 101(40) and 107(r) of the CERCLA and 40 CFR Section 312.1(b)(1)(ii). As defined in 42 United States Code (USC) §9601(35) (B), the practice has been designed to satisfy the requirement for "appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice". E1527-13 is consistent and compliant with the AAI final rule.

Appropriate inquiries include the identification of RECs. E1527-13 defines an REC as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

An evaluation of business environmental risk associated with a parcel of commercial real estate commonly necessitates an investigation of substances and/or materials that may be present and that may lead to contamination but does not meet CERCLA's definition of a hazardous substance. This evaluation is beyond the scope of work identified in E1527-13. The following section outlines the scope of work requested for this project.

2.2 Detailed Scope of Services

As requested by Ralph Recchie, Real Estate Manager for the City of Raleigh, SynTerra conducted a Phase I ESA for the subject site. We conducted the Phase I ESA in general accordance with the requirements of E1527-13 and the AAI rule as follows:

- review of the public record,
- site visit,
- interviews and data evaluation, and
- preparation of this report.

2.3 Significant Assumptions

SynTerra did not make significant assumptions during this Phase I ESA.

2.4 Limitations and Exceptions

Our findings and opinions are relative to the date of our site work and should not be relied on to represent conditions on other dates. These opinions are based on information obtained during the study and our experience. If additional information becomes available which might change our conclusions, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions, if warranted.

Although this assessment has attempted to identify the potential for environmental impacts to the subject site, potential sources of contamination may have escaped detection due to (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, (5) the ability of contaminants to migrate in the subsurface, and/or (6) deliberate concealment of detrimental information. We note that no environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a site. Performance of this practice is intended to reduce uncertainty regarding the potential for RECs concerning the subject site, recognizing that there are reasonable limits of time and cost.

The scope of work for a Phase I ESA is not intended to test for the presence of soil, groundwater or vapor-phase contamination or waste emplacement on the subject site. Such a determination would require subsurface exploration and sampling activities, which were beyond the scope of services for this Phase I ESA.

2.5 Special Terms/Conditions

The terms and conditions for our services are those in our proposal no. 15953, dated December 4, 2020. Mr. Recchie authorized our work in an email dated December 4, 2020.

2.6 User Reliance

The opinions in this report are for the exclusive use and reliance of the City of Raleigh. SynTerra makes no representation for its use by other parties as a Phase I ESA. The viability of a Phase I ESA is presumed valid as specified in Section 4.6 and 4.8 of E1527-13. The AAI rule states that reports older than 1 year cannot be used and that certain information in the report that is more than 6 months old must be updated.

3 Site Description

3.1 Location and Legal Description

The subject site comprises part of Wake County Parcel Identification Number (PIN) 1713585619, which is owned by New Bern Poole LLC, and consists of approximately 3½ acres of that parcel, and all of the following parcels:

PIN	Owner	Address	Acreage
1713587412	118 & 122 Russ LLC	118 Russ Street	0.17 acres
1913586364		122 Russ Street	0.17 acres
1713584278	New Bern Poole LLC	2000 Hawkins	0.18 acres

3.2 Site and Vicinity General Characteristics

The subject site is in an area developed primarily for residential and institutional uses, approximately 2 miles east of downtown Raleigh.

3.3 Current Use of the Property

The property is developed with multi-family housing.

3.4 Description of Structures, Roads, and Other Site Improvements

The subject site is developed with 10 residential duplexes that are constructed of brick and a fourplex constructed of concrete block, each with a crawlspace and a roof of asphalt shingles. At the request of the City of Raleigh due to the sensitivity of this assessment, we did not observe the interiors of these buildings.

The City of Raleigh provides potable-water, sanitary-sewer, and solid-waste-disposal services to the dwellings. Dominion Energy provides natural gas to some of the units; the remaining units are heated electrically. Duke Energy provides electrical service.

3.5 Current Uses of the Adjoining Properties

The subject site is bound to the to the north by New Bern Avenue, across which are two single-family residences; to the east by Russ Street, across which is Southeast Raleigh Table church and its parking lot; to the south by Hawkins Street, across which are two parcels at which Price's Paint and Body stores vehicles in need of repair, and by a strip shopping center with a Family Dollar store as the anchor tenant; and to the west by residential duplexes and Coke Street, across which is residential duplex.

4 User-Provided Information

4.1 Title Records

SynTerra did not receive title records for the subject site.

4.2 Environmental Liens or Activity and Use Limitations

SynTerra downloaded the deeds for the parcels from the Wake County website (Appendix A). The deeds did not list environmental liens or activity and use limitations (AULs). Mr. Recchie completed a User Questionnaire (Appendix B) and wrote that he was not aware of environmental liens and AULs at the subject site.

4.3 Specialized Knowledge

Mr. Recchie wrote in the questionnaire that he did not have specialized knowledge about the property or nearby properties.

4.4 Commonly Known or Reasonably Ascertainable Information

Mr. Recchie wrote in the User Questionnaire that he was not aware of past uses of the site, or other commonly known or reasonably ascertainable information about the property that would help an environmental professional identify conditions indicative of releases or threatened releases. Mr. Recchie wrote in the questionnaire that he was not aware of obvious indicators that point to the presence or likely presence of contamination on the property.

4.5 Valuation Reduction for Environmental Issues

Mr. Recchie wrote in the User Questionnaire that the purchase price reflects fair market value.

4.6 Owner, Property Manager, and Occupant Information

Brittany Daniels of 3 Point Properties, which manages the dwellings, did not have knowledge of environmental concerns at the site (Appendix C). We sent her User Questionnaires that she forwarded to a representative of the property owners for completion. The completed questionnaires are in Appendix C. Philip Eisenhauer completed the questionnaires on behalf of the property owners and did not cite environmental concerns.

4.7 Reason for Performing Phase I ESA

The City of Raleigh may acquire the subject site.

5 Records Review

5.1 Standard Environmental Record Sources

EDR reviewed environmental lists published by federal and state agencies for sites that are contaminated or exhibit potential for contamination due to the generation or handling of hazardous materials and/or petroleum products. They reviewed these lists to identify sites within the search distances recommended in E1527-13. Their radius report is in Appendix D. EDR did not identify the subject site on the lists they reviewed. EDR identified one site on the IHSI within 1 mile of the site; and 32 sites on the LUST list, 5 sites on the Inst. Controls list, 23 sites on the IMD list, and 11 sites on the DSCA list within ½ mile of the subject site. NCDEQ has closed the regulatory files for 14 of the sites on the LUST list and 11 of the sites on the IMD.

5.2 Physical Setting Sources

The *Raleigh East* topographic map (Figure 1) shows the elevation of the site ranges from approximately 325 feet above mean sea level (msl) in the northeastern corner of the site to 310 feet above msl in the southwestern corner of the site. The topography of the site slopes down gently to the southwest. Based on this topographic map, we expect groundwater in the surficial aquifer beneath the subject site flows to the southwest, towards an unnamed tributary of Walnut Creek.

The geologic map of Wake County, published by the North Carolina Department of Natural Resources and Community Development, shows the site is underlain by injected gneiss and schist of Late Precambrian to Early Paleozoic age. *Flood Insurance Rate Map No. 3720171300J* shows the subject site within Zone X, an area of minimal flood hazard. The National Wetlands Inventory map does not show potential wetlands on the subject site or on the parcels that adjoin the subject site. The *Soil Survey of Wake County* shows the following soil type at the subject site as the Cecil-Urban land complex, 2 to 10 percent slopes, which is well drained and forms interfluves on shoulders and summits. The depth to the seasonal high water table in this soil type is greater than 80 inches.

5.3 Historical-Use Information on the Property

SynTerra reviewed historical-use information to establish the site history. EDR provided aerial photographs (Appendix E), topographic maps (Appendix F), and city directories (Appendix G). Sanborn maps are not published for the subject site (Appendix H).

An aerial photograph dated 1938 shows the site as cleared, undeveloped land. Aerial photographs from 1949 to 2006 show the site developed with the buildings presently on the site and show a residence at 118 Russ Street. The photographs after 2006 do not show this residence and shows the site developed as it appears today. Topographic maps do not provide additional historical information. The city directories show the duplexes and fourplex as occupied by individuals.

5.4 Historical Use Information on Adjoining Properties

SynTerra reviewed the historical sources referenced in Section 5.3 to establish the history of the properties that adjoin the subject site.

The aerial photograph from 1938 shows the site bound to the north by a commercial building that is adjacent to New Bern Avenue, which at the time was a two-lane road. The remaining aerial photographs show News Bern Avenue as a four-lane, divided boulevard, with the eastbound lanes occupying the area where the commercial building had been. Aerial photographs from 1949 and 1950 show the land across the widened New Bern Avenue as undeveloped. The residences presently on the two parcels across New Bern Avenue were constructed by 1959.

The aerial photographs from 1938, 1949, and 1950 show the site bound to the east by Hawkins Street, across which is wooded and cleared, undeveloped land. The remaining aerial photographs show the site developed with a parking lot and the church building present at that site.

The aerial photograph from 1938 shows the site bound to the south by undeveloped land. The aerial photographs from 1949 and 1950 show the site bound to the south by Hawkins Street, across which is one commercial building, and the remaining adjoining parcels as undeveloped. The aerial photograph from 1950 show a second building across Hawkins Street, and the aerial photograph from 1965 show the strip center presently south of the site.

The aerial photograph from 1938 show the site bound to the west by undeveloped land. The remaining aerial photographs show the site bound to the east by the duplexes presently on those parcels.

The topographic maps do not provide additional historical information. The city directories show the parcels across New Bern Avenue occupied by individuals. The directories show Milner Memorial Presbyterian Church occupied the adjoining parcel to the east from 1962 to 2009, and Iglesia Charasmatica and Loaves & Fishes occupied that site in 2017. The directories show trucking companies, vehicle-repair companies, a welding service, a heating and air conditioning company, and Price's Paint and Body Shop as the primary occupants of the two buildings that adjoin the site to the south, across Hawkins Street, with the last listing in the directories for these two addresses in 2004. The city directories show an A&P grocery store occupied the strip center adjacent to the southern side of the site from before 1967 until after 1982, and the directory from 2017 is the first to show the Dollar Tree store presently at that site.

6 Site Reconnaissance

6.1 Methodology and Limiting Conditions

Rick Kolb of SynTerra conducted the site visit on December 10, 2020. He was unaccompanied on the site visit. Weather conditions at the time of the subject site visit were sunny and mild. Appendix I contains photographs of pertinent site features we observed during our visit and Appendix J contains our field notes.

6.2 General Site Setting

The subject site is in an area near downtown Raleigh that is developed primarily for residential and institutional uses (Figure 2). Ten duplexes and a fourplex occupy the site (Photograph Nos. 1-4), which is bound:

- to the north by New Bern Avenue, across which are two single-family residences (Photograph No. 5);

- to the east by Russ Street, across which is Southeast Raleigh Table church (Photograph No. 6) and its parking lot;
- to the south by Hawkins Street, across which are two parcels at which Price's Paint and Body stores vehicles in need of repair (Photograph Nos. 7 and 8), and by a strip shopping center with a Family Dollar store as the anchor tenant (Photograph No. 9); and
- to the west by residential duplexes (Photograph No. 10) and Coke Street, across which is a residential duplex (Photograph No. 11).

6.3 Exterior Observations

SynTerra observed the exteriors of the duplexes and fourplex. The duplexes back up to a grass-covered area (Photograph No. 12). We observed gas meters at the backs of some of the units.

SynTerra observed three pole-mounted transformers, each affixed with a blue dot. Duke Energy uses a blue dot to designate a transformer is non-PCB. The Toxic Substances Control Act defines a non-PCB transformer as one with dielectric fluids that contain PCBs at concentrations from 0 to 50 parts per million. We did not observe evidence of leakage on the transformer casings or the ground beneath the transformers.

6.4 Interior Observations

At the request of the City of Raleigh, we did not observe the interiors of the duplexes or fourplex.

7 Interviews

7.1 Interview with Owner

As referenced in Section 4.6, Mr. Eisenhauer did not cite environmental concerns in the questionnaires he completed.

7.2 Interview with Site Manager

As referenced in Section 4.6, Ms. Daniels is not aware of environmental concerns at the subject site.

7.3 Interviews with Occupants

SynTerra did not interview occupants.

7.4 Interviews with Local Government Officials

SynTerra searched the on-line records of the Raleigh Fire Department at www.rfdreports.net. The department did not have records of responses spills of hazardous chemicals or petroleum products at the subject site but had records of responses to fires and miscellaneous issues (Appendix C). One of these records show the residence formerly at 118 Russ Street was destroyed by a fire in 2009.

8 Findings

- The historical references show the subject site was undeveloped until the duplexes were constructed in the late 1940's.
- SynTerra did not observe the interior of the residential buildings due to the sensitive nature of this Phase I.
- EDR did not identify the subject site on the environmental lists they reviewed. They identified one site on the IHSI within 1 mile of the site; and 32 sites on the LUST list, 5 sites on the Inst. Controls list, 23 sites on the IMD list, and 11 sites on the DSCA list within ½ mile of the subject site. NCDEQ has closed the regulatory files for 14 of the sites on the LUST list and 11 of the sites on the IMD.

9 Opinions

- Synterra does not consider the absence of viewing the interiors of the duplexes and fourplex to be a significant deviation from E1527-13 due to the residential uses of these buildings.
- SynTerra does not consider the listed facilities EDR identified to represent RECs to the subject site because these sites are topographically crossgradient or downgradient, or are in a different drainage basin from the subject site, so that contamination at these sites should not adversely affect groundwater beneath the subject site.

10 Conclusions

SynTerra conducted a Phase I ESA in general conformance with the scope and limitations of E1527-13 and 40 CFR Part 312 for the DPV Site in Raleigh, North Carolina, the property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment did not reveal evidence of RECs in connection with the property.

11 Deviations

Duncklee & Dunham did not deviate from E1527-13 other than not observing the interiors of the duplexes and fourplex. We do not consider this deviation to be significant.

13 Qualifications of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The resume for Mr. Kolb is in Appendix K.

RETURN TO: Grantee

BRIEF DESCRIPTION FOR THE INDEX: 118 and 122 Russ Street, Raleigh, NC

NORTH CAROLINA GENERAL WARRANTY DEED

THIS DEED IS MADE THIS THE 23rd DAY OF SEPTEMBER, 2020, BY AND AMONG THE FOLLOWING:

GRANTOR: **PRICE'S BUSINESS REAL ESTATE COMPANY, LLC**
A North Carolina limited liability company
1900 Old Crews Road
Knightdale, North Carolina 27545

GRANTEE: **118 & 122 Russ LLC**
A North Carolina limited liability company
3926 Marcom Street
Raleigh, North Carolina 27606

The designation Grantor and Grantee as used herein shall include said parties, their heirs, successors, and assigns, and shall include singular, plural, masculine, feminine or neuter as required by context.

WITNESSETH, that the Grantor, for a valuable consideration paid by the Grantee, the receipt of which is hereby acknowledged, has and by these presents does grant, bargain, sell and convey unto the Grantee in fee simple, all of Grantor's interest in that certain lot or parcel of land situated in Wake County, North Carolina and more particularly described on Exhibit A attached hereto and incorporated herein by reference.

Submitted electronically by "The Pryzwansky Law Firm"
in compliance with North Carolina statutes governing recordable documents
and the terms of the submitter agreement with the Wake County Register of Deeds.

This is not the primary residence of Grantor.

TO HAVE AND TO HOLD all of Grantor's interest in the aforesaid lot or parcel of land and all privileges and appurtenances thereto belonging to the Grantee in fee simple.

And the Grantor covenants with the Grantee, that Grantor is seized of the premises in fee simple, has the right to convey the same in fee simple, that title is marketable and free and clear of all encumbrances, and that Grantor will warrant and defend the title against the lawful claims of all persons whomsoever except for the exceptions hereinafter stated. Title to the property hereinabove described is subject to the following exceptions:

Ad valorem taxes for the current and subsequent years.

IN WITNESS WHEREOF, the Grantor has duly executed the foregoing as of the day and year first above written.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE

Introduction:

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfield Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Site Information:

Name: DPV Site

Location: Raleigh, North Carolina

1. **Environmental cleanup liens that are filed or recorded against the site (CFR 312.25)**
   Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? ☐ yes or ☑ no If yes, please explain.

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)**
   Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? ☐ yes or ☑ no If yes, please explain.

3. **Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28)**
   As the user of this Phase I, do you have any specialized knowledge or experience related to the property or nearby properties? ☐ yes or ☑ no If yes, please explain.

   Are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by the business? ☐ yes or ☑ no If yes, please explain.

4. **Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)**
   Does the purchase price being paid for this property reasonably reflect the fair market value of the property? ☑ yes or ☐ no If you concluded that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? ☐ yes or ☑ no If yes, please explain.

5. **Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)**
   Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of a release or threatened release? ☐ yes or ☑ no For example, as user:

   - Do you know the past uses of the property? ☐ yes or ☑ no If yes, please explain.

   - Do you know of specific chemicals that are present or once were present at the property? ☐ yes or ☑ no If yes, please explain.

   - Do you know of spills or other chemical releases that have taken place at the property? ☐ yes or ☑ no If yes, please explain.

   - Do you know of any environmental cleanups that have taken place at the property? ☐ yes or ☑ no If yes, please explain.

6. **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**
   As the user of this Phase I, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? ☐ yes or ☑ no If yes, please explain.

7. **Do you know of 1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; 2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property, and 3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?** ☐ yes or ☑ no If yes, please explain.

8. **Do you know if copies of any of the following exist, and if so, can you provide copies to SynTerra?**

- Environmental site assessment reports
- Environmental compliance audit reports
- Environmental permits
- Registrations for underground and aboveground storage tanks
- Registration for underground injection systems
- Material safety data sheets
- Community right-to-know plan plans or reports
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- Reports regarding hydrogeologic conditions on the property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded activity and use limitations

Subject: RE: Duplex Village Environmental Assessment

Good morning, Brittany. Can you answer these questions for me?

1. Are most of the residences occupied? **Entire property's occupancy is currently 65%**.
2. How are the residences heated? If by natural gas, who is the provider? **Some units have central air and a few do have gas furnace provided by PSNC.**
3. Does Duke Energy provide electrical service? **Yes, Duke Energy is provider for electricity.**
4. Who takes off solid waste? **Solid Waste provider is City of Raleigh**
5. City water and sewer? **Yes, city water and sewer**
6. Are there any water-supply wells on these parcels? **No wells on the property**
7. Are you aware of any environmental concerns at the site? **No environmental concerns known.**

Thanks,
Rick

Subject: RE: Duplex Village Environmental Assessment

Good afternoon, Brittany. I plan to conduct the Phase I site visit tomorrow afternoon. As Ralph suggested, I have attached a map with a red outline of the site we are assessing, taking photographs of buildings on the site and of the adjacent sites (but not walking on those adjacent sites; photos from our site). I will be wearing a yellow reflective vest and driving a white pickup truck. I expect to be at the site for no more than 2 hours.

Thanks,
Rick

Subject: Duplex Village Environmental Assessment

Rick,
Please contact Brittany Daniels (copied here) to arrange to go on site. As your work is all exterior I don't think any official tenant notification is necessary but I want to make sure that the property managers know what day you will be out there in case tenants call her to ask about the activity. Please share your area map with Brittany so she knows exactly what units, parcels and buildings you will be around as she manages the entire site, not just the premises we are interested in.
Thank you,
Ralph

PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE

Introduction:

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfield Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Site Information:

Name: 118 and 122 Russ St.

Location: Raleigh, North Carolina

1. **Environmental cleanup liens that are filed or recorded against the site (CFR 312.25)**
   Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? ☐ yes or ☑ no If yes, please explain.

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)**
   Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? ☐ yes or ☑ no If yes, please explain.

3. **Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28)**
   As the user of this Phase I, do you have any specialized knowledge or experience related to the property or nearby properties? ☐ yes or ☑ no If yes, please explain.

   Are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by the business? ☑ yes or ☐ no If yes, please explain.

4. **Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)**
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? ☐ yes or ☑ no If you concluded that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? ☐ yes or ☑ no If yes, please explain.

5. **Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)**
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of a release or threatened release? ☐ yes or ☑ no For example, as user:

- Do you know the past uses of the property? ☑ yes or ☐ no If yes, please explain.

Residential

- Do you know of specific chemicals that are present or once were present at the property?
☐ yes or ☑ no If yes, please explain.

- Do you know of spills or other chemical releases that have taken place at the property?
☐ yes or ☑ no If yes, please explain.

- Do you know of any environmental cleanups that have taken place at the property?
☐ yes or ☑ no If yes, please explain.

6. **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**
As the user of this Phase I, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
☐ yes or ☑ no If yes, please explain.

7. **Do you know of 1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; 2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property, and 3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?** ☐ yes or ☑ no If yes, please explain.

8. **Do you know if copies of any of the following exist, and if so, can you provide copies to SynTerra?**

- Environmental site assessment reports
- Environmental compliance audit reports
- Environmental permits
- Registrations for underground and aboveground storage tanks
- Registration for underground injection systems
- Material safety data sheets
- Community right-to-know plan plans or reports
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- Reports regarding hydrogeologic conditions on the property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded activity and use limitations

Narrative

CAD NARRATIVE (FRF091218035353): Incident Type- WORKING FIRE -------- ---------- On 12/18/2009 at 15:58:03 dispatched To 2000 HAWKINS ST /RALEIGH, NC 27601. The location is a 1 or 2 family dwelling. The incident was determined to be a(n) Building fire. 15:59:08 arrived on scene. The following actions were performed on scene: Information, investigation & enforcement, Oth Extinguishment by fire service personnel Investigate Units responding were: Unit FBATT2 responded. Unit RFAIR1 responded. Unit RFC10 responded. Unit RFC20 responded. Unit RFE1 responded. Unit RFE12 responded. Unit RFE3 responded. Unit RFE7 responded. Unit RFL4 responded. Unit RFR2 responded. 18:29:19 all units back in service. Incident Commander Narrative: Engine 7 on the scene with a working structure fire. The fire was located at 118 Russ Street. The fire was fully vented, The fire was involved in the front two rooms in division 1 and was vented out the windows on division A,B,D with the front porch fully involved. 701 assumed command with the first 1 1/2 inch line used for exposure control on division B by engine 7 personnel. . The second 1 1/2 inch line was used to knock down fire on the front porch and to make a interior attack into division 1 by engine 3 personnel. During my size up and walk around of the home I encountered the tenant and his female companion, he said it was his house and that the fire started with the heater, I asked if everyone was out of the home and he said yes. The fire was knocked down , with ventilation performed by Ladder 4, Engine 1 was RIT and Engine 12 assisted with a 2 inch attack line to division C. The fire was brought under control and Battallion 2 assumed command. The tenant of the home was a Mr. Ray Crudup, phone number (919) 231-1257. He was renting the home from a Mrs. Price with Prices' Real Estate. (919)810-3704. Mr. Crudup said he and his friend were in the home when they heard a pop sound in the front right hand room. The space heater had been plugged into the home and the heater was burning when he came to the room, he tossed the heater across the room and started trying to put the flames out on the couch area and on floor, he then found fire under the couch and behind it , he tried to move the couch from the room but was over come by smoke. He then tried to put it out with water from outside. His friend went outside by way of the front door, and then he finally had to leave out the back door. He said he figured that he waited anywhere from five to fifteen minutes before he called 911 to report the fire. The Red Cross were called in to give assistance to the tenant and his friend because the home was almost a total loss and was uninhabitable.

Classified:Unintentional

Address: 122 RUSS ST RALEIGH NC 27610

Dispatch Time: 15:39:20
Arrival Time: 15:43:21
Clear Time: 16:34:59

Narrative

CAD NARRATIVE (FRF070205003369): Incident Type- HOUSE FIRE Upon our arrival we discovered that the power line supplying the home had been partially torn from the home. It was lying across the street and across a chain link fence. E-12 determined that the fence was conducting current. Along with RPD, we blocked off access to the area. The occupant arrived and provided access to the interior of the home. There was no sign of fire. We stood by until Progress Energy removed the line from the street then cleared the scene. The occupant advised me that Price's Auto salvage owned the home. Shortly after our arrival, I walked down the street to Price's and advised them of the situation. Jamie was busy with a phone call so I advised the gentleman behind the counter we would be at the scene for a while should Jamie have any questions.

The incident was determined to be a(n) Heat from short circuit (wiring), defective/worn. 18:17:10 arrived on scene. The following involvements were noted: Name/Business Name Involvement Type ---------- ---------- Graham, Mary Tenant The following actions were performed on scene: Investigate Remove hazard Units responding were: Unit FBATT2 responded. Unit RFE13 responded. Unit RFE3 responded. Unit RFE7 responded. Unit RFL4 responded. Unit RFR1 responded and took these actions: Cancelled en route 19:18:14 all units back in service. Incident Commander Narrative: Engine 7 on the scene with nothing showing, upon arrival we were met by the tenant of the apartment , she said that they had smoke coming from the floor, we investigated the smoke and found it to be coming from under the home. The source of the smoke was coming from an electrical feed under the home that appeared to be shorting out. I had Progress Energy come out to tag out both power meters, effecting apartment 1940 and 1942. The tenants were able to make accommodations for themselves due to displacement. They attempted to make contact with Joyner Realty to have them to come out, but we were unable to reach anyone .All units returned to service.

CAD NARRATIVE (FRF090530015030): Incident Type- CARBON MONOXIDE ALAR ---------- On 05/30/2009 at 13:47:13 dispatched To 2002 HAWKINS ST /RALEIGH, NC 27601. The location is a Multifamily dwelling. The incident was determined to be a(n) Carbon monoxide detector activation, no CO. 13:51:20 arrived on scene. The following actions were performed on scene: Investigate Units responding were: Unit RFE7 responded. Unit RFL1 responded. 14:10:18 all units back in service. Engine 7 arrived on scene of a multifamily dwelling with nothing showing. 701 established command. Engine 7 went up to residence to find no one home. While talking with neighbors, the occupants of the residence arrived. Ladder 1 arrived on scene. The occupants told us that the CO detector had been going off for a month. Engine 7 and Ladder 1 talked with occupants and monitored the residence with two different four gas monitors. No harmful readings found throughout residence. The only source of gas in the residence was the heater in the floor. No readings were found near the heater. Engine 7 took the batteries out of the CO detector and put them back in. The CO detector stopped going off. The occupants were told to call back if the detector goes back off. Ladder 1 was cleared. No other services were provided by Engine 7. Command terminated, Engine 7 in service.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.375 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NCDSCA DC920069(PEG EPA ID:: NCR000174300	1605 NEW BERN AVE	WNW 1/4 - 1/2 (0.305 mi.)	J61	133

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 4 RCRA-VSQG sites within approximately 0.375 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

A review of the SHWS list, as provided by EDR, and dated 09/04/2020 has revealed that there is 1 SHWS site within approximately 1.125 miles of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incidents Management Database contains an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environment, & Natural Resources' Incidents by Address.

A review of the LUST list, as provided by EDR, and dated 10/30/2020 has revealed that there are 31 LUST sites within approximately 0.625 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environment & Natural Resources' Petroleum Underground Storage Tank Database.

A review of the UST list, as provided by EDR, and dated 07/31/2020 has revealed that there are 11 UST

sites within approximately 0.375 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.375 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 09/04/2020 has revealed that there are 7 FINDS sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a

LONGVIEW LAUNDRY & CLEANERS INCORPORATED (Continued) **1016625945**

common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020
Date Data Arrived at EDR: 11/05/2020
Date Made Active in Reports: 11/25/2020
Number of Days to Update: 20

Source: EPA
Telephone: N/A
Last EDR Contact: 12/02/2020
Next Scheduled EDR Contact: 01/11/2021
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

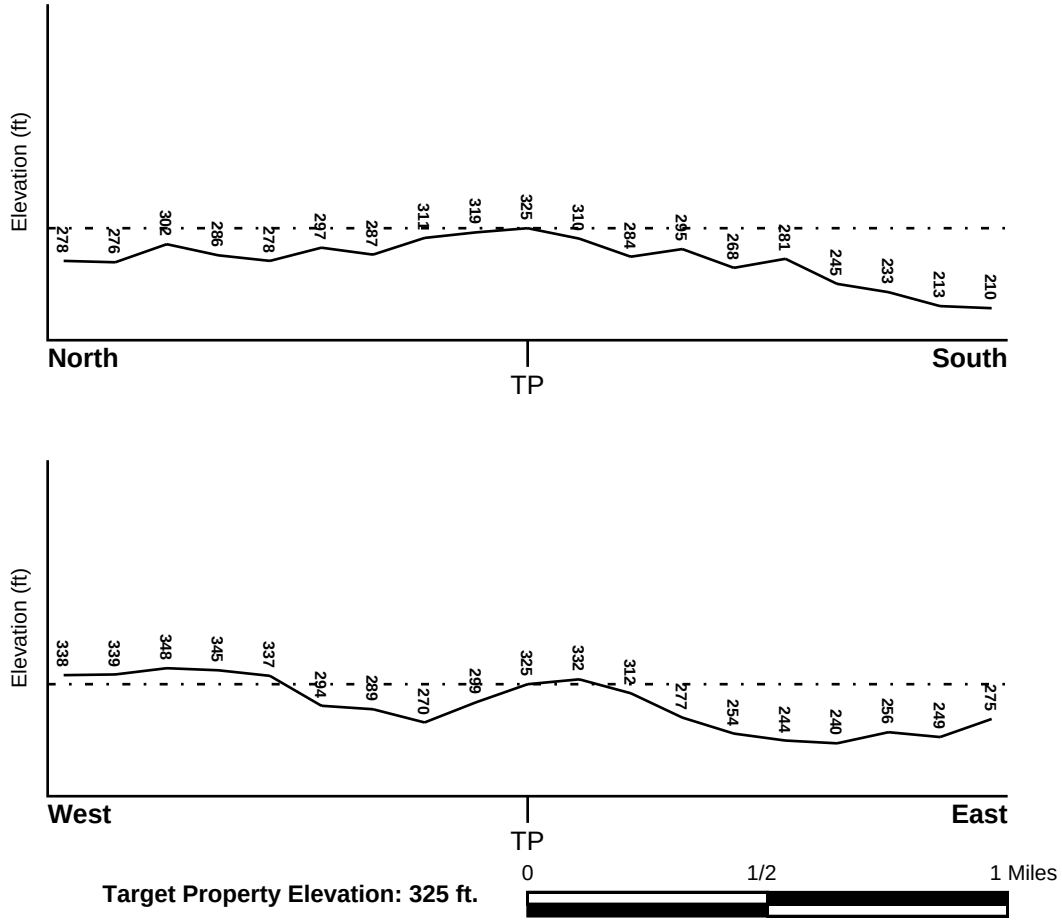
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 325 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3720171300J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3720171400J	FEMA FIRM Flood data
3720172400J	FEMA FIRM Flood data
3720172300J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
RALEIGH EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile WNW	Not Reported
2	1/4 - 1/2 Mile NNW	Not Reported
3	1/2 - 1 Mile West	Varies
4	1/2 - 1 Mile WSW	Not Reported
5	1/2 - 1 Mile WNW	NW
1G	1/2 - 1 Mile WNW	NW
2G	1/4 - 1/2 Mile NNW	Not Reported

4G	1/2 - 1 Mile West	Varies
5G	1/2 - 1 Mile WSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Devonian
Series:	Middle Paleozoic granitic rocks
Code:	Pzg2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Plutonic and Intrusive Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
fine sandy loam
loam

Surficial Soil Types: sandy loam
fine sandy loam
loam

Shallow Soil Types: clay loam
clay
sandy clay

Deeper Soil Types: sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: US Fish & Wildlife Service
Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

North Carolina Public Water Supply Wells
Source: Department of Environmental Health
Telephone: 919-715-3243

OTHER STATE DATABASE INFORMATION

North Carolina Wildlife Resources/Game Lands
Source: Center for Geographic Information and Analysis
Telephone: 919-733-2090
All publicly owned game lands managed by the North Carolina Wildlife Resources Commission and as listed in Hunting and Fishing Maps.

NC Natural Heritage Sites: Natural Heritage Element Occurrence Sites
Source: Natural Heritage Occurrence Sites Center for Geographic Information and Analysis
Telephone: 919-733-2090
A point coverage identifying locations of rare and endangered species, occurrences of exemplary or unique natural ecosystems (terrestrial or aquatic), and special animal habitats (e.g., colonial waterbird nesting sites).

NC Natural Areas: Significant Natural Heritage Areas
Source: Center for Geographic Information and Analysis
Telephone: 919-733-2090
A polygon converage identifying sites (terrestrial or aquatic) that have particular biodiversity significance. A site's significance may be due to the presenceof rare species, rare or high quality natural communities, or other important ecological features.

RADON

State Database: NC Radon
Source: Department of Environment & Natural Resources
Telephone: 919-733-4984
Radon Statistical and Non Statiscal Data

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by SynTerra were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Certified Sanborn® Map Report

12/08/20

Site Name:

DPV Site
Russ and Hawkins Streets
Raleigh, NC 27610
EDR Inquiry # 6293168.3

Client Name:

SynTerra
148 River Street
Greenville, SC 29601
Contact: Rick Kolb

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SynTerra were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 34B6-425D-B105

PO # 00.2749.00

Project DPV Site

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 34B6-425D-B105

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

SynTerra (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Experience Summary

Rick has 30 years of experience as an environmental consultant. His project experience includes sites in nearly every state in the United States and in Mexico and Puerto Rico. He is a registered geologist in North Carolina and Virginia.

Selected Key Projects

PHASE II ENVIRONMENTAL SITE ASSESSMENTS:

Rick has conducted and/or managed Phase II Environmental Site Assessments at hundreds of sites, through which he has gained knowledge of the regulatory requirements of NCDEQ's regulatory programs and familiarity with the staff. He has conducted UST closures, Limited Site Assessments and Comprehensive Site Assessments under NCDEQ's UST program, and Remedial Investigations under NCDEQ's Superfund program. Rick was the Project Manager and Principal for the NCDEQ's Green Square project in downtown Raleigh, at which he conducted a Phase I Environmental Site Assessment and Environmental Assessment at the site and discovered that a dry cleaner had occupied part of the site in the past. Subsequently, he prepared a Phase II Remedial Investigation (RI) Work Plan for soil and groundwater contamination, implemented the work plan, prepared a Phase II Soils RI report and Remedial Action Plan (RAP), and implemented the soils RAP.

PHASE I ENVIRONMENTAL SITE ASSESSMENTS:

Rick has conducted, managed, and/or provided technical review for thousands of Phase I Environmental Site Assessments at commercial, residential, industrial, institutional, and agricultural sites, both occupied and abandoned, and at undeveloped sites. He is an Environmental Professional as defined in 40 CFR 312.10 and conducts Phase I ESAs at Duncklee & Dunham for private corporations and the public sector, including those conducted under EPA Brownfield grants.

PROGRAM AND PROJECT MANAGER FOR DRY-CLEANING SITES

Rick served as Program Manager for the contract between his former employer, MACTEC (now the Wood Group), and NCDEQ's Dry-Cleaning Solvent Cleanup Program. In this role, he was the primary contact with NCDEQ personnel for projects across the state that were assigned to the company. He also served as Project Manager and Principal for those projects assigned to the Raleigh office.
