Section 1. Section 1.5.4.C. of the Part 10 Raleigh Unified Development Ordinance, Multiple Street Frontage Lots, is hereby amended by adding the language shown in underline, deleting the language shown in strikethrough:

C. Multiple Street Frontage Lots

For the purposes of determining setbacks, build-to lines, and other regulations, a multiple street frontage site or lot other than an Open Lot must designate at least 1 primary street prior to development, not to include additions. A lot may have more than one primary street.

The following rules determine a primary street:

1. A lot developed with the Apartment, General, Mixed-Use, or Civic building types, or Cottage Court Housing Pattern shall designate its primary street using the criteria shown in (a) through (g) below.

If one street meets any of criteria (a) through (d), it will be designated primary. If two streets meet any of criteria (a) through (d), both will be designated primary.

If three or four streets meet any of criteria (a) through (d), the two streets that meet more of (a) through (d) will be designated as primary; if they meet the same number, then the applicant may choose the two streets.

Where the criteria refer to a street, the relevant portion of the street is the portion adjacent to or within the site or lot.

If no street meets criteria (a) through (d), then the street that that satisfies more of criteria (e) through (g) will be designated as primary. If the criteria do not apply or do not produce a clear result, then any street may be designated as primary by the applicant.

- a. The street with transit service;
 - b. The street designated as a Main Street or Urban Thoroughfare on the Urban Form Map;
 - c. Any street designated as a Retail Street in the Downtown section of the Comprehensive Plan.

2. A block face predominately developed with the Townhouse building type shall designate as its primary street either a Local Street or Mixed-use Street, if available. If the site fronts on more than one street meeting these criteria or if they do not apply, then the selection of primary street shall be based on the criteria for Apartment, General, Mixed-Use, or Civic buildings. Any street designated as primary must form the face of a block or extend fully through the property.
 3. For ~~an~~ Tiny, Attached or Detached building types, a corner lot shall designate its primary street as being opposite the rear yard of any adjoining lot. If the corner lot abuts only the side yard of adjoining lots or abuts another corner lot, then the primary street shall be located along the narrowest street frontage. If the two street frontages are within 10 percent of each other in length, either street may be designated as primary. In no case will a Major Street be designated as the primary street.
 4. A limited-access highway shall never serve as the primary street.
 5. A dead-end or cul-de-sac street can only be identified as primary for residential lots.
 6. A private street cannot be primary unless the lot has no public street frontage.
 7. In the event an adopted plan designates primary streets, the adopted plan shall control.

8. If none of the criteria produce a result, the applicant may designate the primary street.
