Existing Zoning

Z-21-2022

Property	5504 Rock Quarry Rd
Size	28.4 acres
Existing Zoning	R-4
Requested Zoning	R-10-CU

Rezoning Application and Checklist

Planning and Development Customer Service Center • One Exchange Plaza, Suite 400 | Raleigh, NC 27601 | 919-996-2500

Please complete all sections of the form and upload via the Permit and Development Portal (permitportal.raleighnc.gov). Please see page 11 for information about who may submit a rezoning application. A rezoning application will not be considered complete until all required submittal components listed on the Rezoning Checklist have been received and approved. For questions email rezoning@raleighnc.gov.

Rezoning Application Addendum #2						
Impact on Historic Resources						
The applicant is asked to analyze the impact of the rezoning request on historic resources. For the purposes of this section, a historic resource is defined as any site, structure, sign, or other feature of the property to be rezoned that is listed in the National Register of Historic Places or designated by the City of Raleigh as a landmark or contributing to a Historic Overlay District.	OFFICE USE ONLY Rezoning case #					
Inventory of Historic Resources						
List in the space below all historic resources located on the property to be re how the proposed zoning would impact the resource.	zoned. For each resource, indicate					
Proposed Mitigation						
Provide brief statements describing actions that will be taken to mitigate all n	egative impacts listed above.

6	A primary task of all urban architecture and landscape designates as places of shared use. Streets should be lined by provide interest especially for pedestrians. Garage entrances side or rear of a property. Response:	buildings rather than parking lots and should

Urban Design Guidelines

Page **5** of **15** REVISION 10.27.20

	Buildings should be located close to the pedestrian-oriented street (within 25 feet of the curb), with off- street parking behind and/or beside the buildings. When a development plan is located along a high- volume corridor without on-street parking, one bay of parking separating the building frontage along the corridor is a preferred option.
7	Response:
8	If the site is located at a street intersection, the main building or main part of the building should be placed at the corner. Parking, loading or service should not be located at an intersection. Response:
9	To ensure that urban open space is well-used, it is essential to locate and design it carefully. The space should be located where it is visible and easily accessible from public areas (building entrances, sidewalks). Take views and sun exposure into account as well. Response:
10	New urban spaces should contain direct access from the adjacent streets. They should be open along the adjacent sidewalks and allow for multiple points of entry. They should also be visually permeable from the sidewalk, allowing passersby to see directly into the space. Response:
11	The perimeter of urban open spaces should consist of active uses that provide pedestrian traffic for the space including retail, cafés, and restaurants and higher-density residential. Response:
12	A properly defined urban open space is visually enclosed by the fronting of buildings to create an outdoor "room" that is comfortable to users. Response:
13	New public spaces should provide seating opportunities. Response:

Page **6** of **15** REVISION 10.27.20

	Parking lots should not dominate the frontage of pedestrian-oriented streets, interrupt pedestrian routes, or negatively impact surrounding developments.
14	Response:
15	Parking lots should be located behind or in the interior of a block whenever possible. Parking lots should not occupy more than 1/3 of the frontage of the adjacent building or not more than 64 feet, whichever is less. Response:
16	Parking structures are clearly an important and necessary element of the overall urban infrastructure but, given their utilitarian elements, can give serious negative visual effects. New structures should merit the same level of materials and finishes as that a principal building would, care in the use of basic design elements cane make a significant improvement. Response:
17	Higher building densities and more intensive land uses should be within walking distance of transit stops, permitting public transit to become a viable alternative to the automobile. Response:
18	Convenient, comfortable pedestrian access between the transit stop and the building entrance should be planned as part of the overall pedestrian network. Response:
19	All development should respect natural resources as an essential component of the human environment. The most sensitive landscape areas, both environmentally and visually, are steep slopes greater than 15 percent, watercourses, and floodplains. Any development in these areas should minimize intervention and maintain the natural condition except under extreme circumstances. Where practical, these features should be conserved as open space amenities and incorporated in the overall site design. Response:
20	It is the intent of these guidelines to build streets that are integral components of community design. Public and private streets, as well as commercial driveways that serve as primary pedestrian pathways to building entrances, should be designed as the main public spaces of the City and should be scaled for pedestrians. Response:

Page **7** of **15** REVISION 10.27.20

	in commercial areas and Pedestrian Business Overlays should be a minimum of 14-18 feet wide to accommodate sidewalk uses such as vendors, merchandising and outdoor seating.
21	Response:
22	Streets should be designed with street trees planted in a manner appropriate to their function. Commercial streets should have trees which complement the face of the buildings and which shade the sidewalk. Residential streets should provide for an appropriate canopy, which shadows both the street and sidewalk, and serves as a visual buffer between the street and the home. The typical width of the street landscape strip is 6-8 feet. This width ensures healthy street trees, precludes tree roots from breaking the sidewalk, and provides adequate pedestrian buffering. Street trees should be at least 6 1/4" caliper and should be consistent with the City's landscaping, lighting and street sight distance requirements. Response:
23	Buildings should define the streets spatially. Proper spatial definition should be achieved with buildings or other architectural elements (including certain tree plantings) that make up the street edges aligned in a disciplined manner with an appropriate ratio of height to width. Response:
24	The primary entrance should be both architecturally and functionally on the front facade of any building facing the primary public street. Such entrances shall be designed to convey their prominence on the fronting facade. Response:
25	The ground level of the building should offer pedestrian interest along sidewalks. This includes windows entrances, and architectural details. Signage, awnings, and ornamentation are encouraged. Response:
26	The sidewalks should be the principal place of pedestrian movement and casual social interaction. Designs and uses should be complementary to that function. Response:

Rezoning Checklist (Submittal Requir	rements)					
To be completed by Applicant			To be	To be completed by staff		
General Requirements – General Use or Conditional Use Rezoning	Yes	N/A	Yes	No	N/A	
1. I have referenced this Rezoning Checklist and by using this as a guide, it will ensure that I receive a complete and thorough first review by the City of Raleigh						
2. Pre-application conference.						
3. Neighborhood meeting notice and report						
4. Rezoning application review fee (see Fee Guide for rates).						
Completed application submitted through Permit and Development Portal						
6. Completed Comprehensive Plan consistency analysis						
7. Completed response to the urban design guidelines						
8. Two sets of stamped envelopes addressed to all property owners of area to be rezoned and properties with 500 feet of area to be rezoned.						
9. Trip generation study						
10. Traffic impact analysis						
For properties requesting a Conditional Use District:						
11. Completed zoning conditions, signed by property owner(s).						
If applicable, see page 11:						
12. Proof of Power of Attorney or Owner Affidavit.						
For properties requesting a Planned Development or Campus District:						
13. Master plan (see Master Plan submittal requirements).						
For properties requesting a text change to zoning conditions:						
14. Redline copy of zoning conditions with proposed changes.						
15. Proposed conditions signed by property owner(s).
