Future Land Use Map Consistency
The rezoning case is ☑ Consistent ☒ Inconsistent with the Future Land Use Map.

Comprehensive Plan Guidance

| FUTURE LAND USE                      | Moderate Density Residential |
| CONSISTENT Policies                  | Policy LU 7.5—High-Impact Commercial Uses |
| INCONSISTENT Policies                | Policy LU 5.4—Density Transitions  
Policy LU 5.6—Buffering Requirements  
Policy LU 7.1—Encouraging Nodal Development  
Policy LU 7.4—Scale and Design of New Commercial Uses  
Policy LU 10.6—Retail Nodes  
Policy UD 3.8—Screening of Unsightly Uses |
Summary of Proposed Conditions

1. A maximum of two parking bays may be located between the building and any public right-of-way.

2. Allowed uses:
   - Single unit, two-unit and multi-unit residential
   - Group living, excluding boarding house, fraternity or sorority houses
   - Civic uses
   - Major and minor utilities
   - Medical uses
   - Offices
   - Beauty/hair salon
   - Cleaning establishment – dry cleaners, laundromat, laundry drop-off facilities
   - Copy center
   - Locksmith
   - Optometrist
   - Tailor
   - Retail sales except convenience stores, fuel (including gasoline and diesel fuel) sales, restaurants and drive-through pharmacies.

3. Building height limited to 39 feet.

4. A maximum 8,900 square feet of commercial building area. Prior to obtaining a building permit, the property owner shall either recombine the subject lots into one lot or record in the Wake County Registry a declaration of allocation of commercial square footage among the lots within the subject.

Planning Commission Recommendation

| Recommendation | The Planning Commission recommends approval of this case, and recommends that the City Council authorize a May 6th Public Hearing for the case. The Planning Commission further recommends that the Planning staff, during the upcoming 5 year update of the Comprehensive Plan, reexamine the future land use recommendations in this vicinity. |
| Findings & Reasons | The proposed rezoning is reasonable and in the public interest because: 1) it will facilitate redevelopment of two triplexes which are not appropriate land uses to front onto Western Boulevard; 2) the site is not appropriate for moderate density housing due to its frontage on Western Boulevard and adjacency to |
convenience store with fuel sales.

| Motion and Vote | Motion: Lyle  
Second: Terando

Zoning Staff Report – Case Z-33-13

Conditional Use District

Case Summary

Overview

The proposal encompasses three contiguous parcels in the northeast quadrant of the intersection of Chaney Road and Western Boulevard, close to the Western Boulevard/I-440 interchange. The parcels are just past the western edge of the extensive commercial strip that runs between Gorman Street on the east and just west of Method/Kent Roads on the west. The parcels are currently occupied by three, three dwelling unit buildings. Single family houses are to the west of the site, across Chaney Road. To the north is a neighborhood with a mix of single unit and duplex residential buildings. To the immediate east of the parcels is a convenience store with gasoline sales. Across Western Boulevard is a church property.

The three subject parcels are zoned R-10, as are the lots to the west and north of the site. There is a strip of R-10 zoning, approximately 20’ deep, within the adjacent convenience store property, running along the western property line of the property. Just to the east and across Western Boulevard from the site is an extensive strip of commercial zoning, mostly Neighborhood Business and Shopping Center. South of Western Boulevard, between Chaney Road and the Beltline are properties zoned R-10, R-6 and R-4.

The parcels are designated for Moderate Density Residential uses on the Future Land Use Map, as are the lots just to the west. The parcels to the north are designated for Low Density Residential and to the south, across Western Boulevard, Office and Residential Mixed Use. Just
to the east is an extensive area designated for Neighborhood Mixed Use which, corresponding with the commercial zoning, runs from just west of Method Road east to Gorman Street.

Western Boulevard is designated as a six lane divided avenue on the Road Typology Map, and the north lane of Western Boulevard (closest to the subject parcels) is marked as an approach lane, and functions as a de facto acceleration lane to the I-440 Beltline.

*The development intensities for proposed zoning districts were estimated using the Envision Tomorrow impact analysis tool. Reasonable assumptions are factored into the analysis to project the worst case development scenario for the proposed rezoning. The estimates presented in this table are rough estimates intended only to provide guidance for analysis in the absence of F.A.R’s and density caps for specific UDO districts.

The proposed rezoning is:

- **compatible** with the property and surrounding area.
- **Incompatible.**

Analysis of Incompatibility:

The proposed rezoning is marginally incompatible with the surroundings. If a commercial use eventually occupies the property (residential uses are still allowed per the conditions) such a use would be an extension of the existing commercial strip along Western Boulevard. However, the conditions exclude certain high-impact commercial uses, such as convenience stores, restaurants of any type, and pharmacies with drive-throughs. Nonresidential uses are found to the south and east of the site.
Request:

0.9 acres from
R-10 w/ SRPOD
to NX-3-CU
w/ -SRPOD
2. Comprehensive Plan Consistency Analysis

2.1 Future Land Use

Future Land Use designation:

Moderate density residential

The rezoning request is:

☐ Consistent with the Future Land Use Map.

☒ Inconsistent

Analysis of Inconsistency:

The site is designated for Moderate Density Residential (6 – 14 units per acre). This designation applies to some older single family neighborhoods and to small lot and patio home developments. Townhouses and multifamily housing not exceeding 14 dwellings per acre would be consistent with this category.

Corresponding zoning districts are R-6 and R-10, or RX conditioned to limit density.

Commercial development is not consistent with this designation.

2.2 Policy Guidance

The rezoning request is inconsistent with the following policies:

Policy LU 5.4—Density Transitions
Policy LU 5.6—Buffering Requirements
Policy LU 7.1—Encouraging Nodal Development
Policy LU 7.4—Scale and Design of New Commercial Uses
Policy LU 10.6—Retail Nodes
Policy UD 3.8—Screening of Unsightly Uses

The policies with which the proposal is inconsistent relate to the extension of strip development past its current extent, in opposition to established City policies that promote nodes, not strips, of commercial development. Although setbacks and buffering will be required at the time of site plan, commercial uses abutting single family houses is not an ideal juxtaposition. Also, no provision has been made for the screening of loading docks and dumpsters.

2.3 Area Plan Policy Guidance

Not applicable. No area plan exists for this location.
3. Public Benefit and Reasonableness Analysis

3.1 Public Benefits of the Proposed Rezoning

- The development of the site for commercial uses could provide additional variety of the goods and services available in the area.

3.2 Detriments of the Proposed Rezoning

- Commercial uses on the site would further extend a congested, automobile-oriented commercial strip.
- The proposed rezoning would allow an incursion of commercial uses into an established residential area.

4. Impact Analysis

4.1 Transportation
Transportation Planning has conducted a trip generation study based on the estimated development intensities and determined that a Traffic Impact Study is not required if conditions prohibit convenience stores, fuel sales, and fast food restaurants.

Impact Identified:
With high traffic-generating uses prohibited by conditions, the remaining allowed uses will not significantly increase traffic in the area.

4.2 Transit
CAT currently operates on Method Rd. and Triangle Transit operates on Western Blvd. The closest CAT stop is on Method/Western and the closest Triangle Transit stop is on Western/Method.

Impact Identified:
It is not anticipated that this development will have a significant impact on the routes serving this area.

4.3 Hydrology

<table>
<thead>
<tr>
<th></th>
<th>Floodplain</th>
<th>Drainage Basin</th>
<th>Stormwater Management</th>
<th>Overlay District</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Floodplain</strong></td>
<td>None</td>
<td></td>
<td>Subject to Part 10A, Chapter 9 of UDO</td>
<td>None</td>
</tr>
<tr>
<td><strong>Drainage Basin</strong></td>
<td></td>

<td></td>
<td></td>
</tr>
<tr>
<td><strong>Stormwater Management</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Overlay District</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Impact Identified:
Site will be subject to Stormwater regulations under Part 10A, Chapter 9 of the City of Raleigh UDO. There are no wetlands, Neuse Buffers, or Floodplain on the site.
4.4 Parks and Recreation

Recreation services for this site are currently provided by Method Road Park. There are no adjacent greenway corridors to this parcel.

Impact Identified:
None

4.5 Urban Forestry

Impact Identified:
UDO Article 9.1—Tree Conservation is not applicable. The three parcels combined are smaller than two acres in size. No tree conservation will be required when the properties are re-developed.

4.6 Designated Historic Resources

N/A

4.7 Community Development

N/A

4.8 Appearance Commission

N/A

4.10 Impacts Summary

Uses allowed in the zoning conditions would have only a minor impact on City services.

4.11 Mitigation of Impacts

None suggested.

5. Conclusions

The main issue is the expansion of a commercial, automobile-oriented strip by redevelopment of three residential buildings. The proposal does not comply with Comprehensive Plan policies that are intended to contain such development within commercial nodes. The redevelopment of these residential buildings could set a precedent for further western expansion of the commercial strip. The proposal is inconsistent with the Future Land Use Map. If this request is recommended for approval, the Planning Commission must find that the proposal is reasonable and in the public interest.

A rezoning application will not be considered complete until all required submittal components listed on the Rezoning Checklist have been received and approved.

Revision 10.16.13
2. The following uses are allowed on the subject property:
   (a) Single family or multifamily residential uses
   (b) Group living, excluding boarding house, fraternity or sorority houses
   (c) Civic uses
   (d) Major and minor utilities
   (e) Medical uses
   (f) Office uses
   (g) The following Personal Service uses:
      (i) Beauty/hair salon
      (ii) Cleaning establishment – dry cleaners, laundromat, laundry drop-off facilities
      (iii) Copy center
      (iv) Locksmith
      (v) Optometrist
      (vi) Tailor
   (h) Eating establishments
   (i) Retail sales, except pawnshops

3. The subject property shall have no more than one (1) access point/driveway on Western Boulevard and one (1) access point/driveway on Chaney Road.

4. Prior to obtaining a building permit for redevelopment, a six (6) foot high solid fence will be installed along the northern property line of Parcel 3 adjacent to the following properties: Goldberg, Deed Book 08527, Page 111, PIN 0794005724; and Edwards, Deed Book 14310, Page 2461 PIN 0794004733.

5. The height of any non-residential building constructed on the subject property shall not exceed two (2) stories or twenty-five (25) feet.

6. A maximum of eight thousand nine hundred (8,900) square feet of commercial building area may be constructed on Parcels 1-3, collectively.

These zoning conditions have been voluntarily offered by the property owner. All property owners must sign each condition page. This page may be photocopied if additional space is needed.
### Comprehensive Plan Analysis

The applicant is asked to analyze the impact of the rezoning request. State Statutes require that the rezoning either be consistent with the adopted Comprehensive plan, or that the request be reasonable and in the public interest.

### Statement of Consistency

Provide brief statements regarding whether the rezoning request is consistent with the future land use designation, the urban form map and any applicable policies contained within the 2030 Comprehensive Plan.

1. The proposed zoning is not consistent with the FLUM designation, however, it is consistent with the zoning and FLUM designation on the adjacent tract and is reasonable and in the public interest for the reasons set forth below.

2. The proposed rezoning is consistent with following Comprehensive Plan policies:
   - **LU 4.5 Connectivity.** The proposed development will provide connectivity with the adjacent commercial use which will allow such use to enter and exit its site from Chaney Road as well as Western Boulevard and Method Road and will provide vehicular and pedestrian connection between Method and Chaney Roads without using Western Boulevard.
   - **LU 5.2 Managing Commercial Development Impacts.** The transition of uses, specifying commercial uses along Western Boulevard as well as the provision a six (6) foot high solid fence and a height limit of 25 feet provide appropriate transitions to the moderate density housing in the area.
   - **LU 7.1 Encourage Nodal Development.** The proposed rezoning would facilitate the location of another low intensity retail use beside similar uses along Western Boulevard.
   - **LU 5.6 Buffering.** The proposed use would provide buffering and a six (6) foot high solid fence to mitigate the impacts of redevelopment adjacent to R-10 properties.
   - **LU7.3 Single Family Lots on Thoroughfares.** The proposed rezoning would facilitate the removal of 2 triplexes which are not appropriate for a major arterial roadway such as Western Boulevard.
   - **UD1.3 Creating Attractive Facades.** The proposed rezoning will facilitate the development of an attractive facade with storefront windows, attractive signage and lighting to create visual interest.

3. The property to the east is zoned Neighborhood Business and operated as a Circle K convenience store; the property to the south is currently zoned Neighborhood Business; the property to the west and north are zoned R-10.

### Public Benefits

Provide brief statements regarding the public benefits derived as a result of the rezoning request.

1. The rezoning will facilitate the redevelopment of older housing located on small lots fronting a Major Street.

2. The subject property is not appropriate for low density residential development.
3. Although the subject property is designated for moderate density residential, the size of the lots and the diversity of ownership make the development of significant multifamily housing impractical and unlikely.

4. The property is adjacent to property which is zoned, developed and designated on the FLUM for small scale commercial. All of the property on the north side of Western Boulevard between NCSU and the Beltline is designated as NMRU except one half of this block and the block to the west. All of the property on the south side of Western Boulevard between NCSU and the Beltline is designated as NMRU or ORMU except the westernmost block.

**URBAN DESIGN GUIDELINES**

If the property to be rezoned is shown as a "mixed use center" or located along a Main Street or Transit Emphasis Corridor as shown on the Urban Form Map in the Comprehensive Plan, the applicant must respond to the Urban Design Guidelines contained in the 2030 Comprehensive Plan.

1. All Mixed-Use developments should generally provide retail (such as eating establishments, food stores, and banks), and other such uses as office and residential within walking distance of each other. Mixed uses should be arranged in a compact and pedestrian friendly form. The property to be rezoned is not to be a "mixed use center" and is not located along a Main Street or Transit Emphasis Corridor as per the Urban Form Map; therefore the UDGs do not apply.

2. Within all Mixed-Use Areas buildings that are adjacent to lower density neighborhoods should transition (height, design, distance and/or landscaping) to the lower heights or be comparable in height and massing.

3. A mixed use area’s road network should connect directly into the neighborhood road network of the surrounding community, providing multiple paths for movement to and through the mixed use area. In this way, trips made from the surrounding residential neighborhood(s) to the mixed use area should be possible without requiring travel along a major thoroughfare or arterial.

4. Streets should interconnect within a development and with adjoining development. Cul-de-sacs or dead-end streets are generally discouraged except where topographic conditions and/or exterior lot line configurations offer no practical alternatives for connection or through traffic. Street stubs should be provided with development adjacent to open land to provide for future connections. Streets should be planned with due regard to the designated corridors shown on the Thoroughfare Plan.

6. New development should be comprised of blocks of public and/or private streets (including sidewalks). Block faces should have a length generally not exceeding 660 feet. Where commercial driveways are used to create block structure, they should include the same pedestrian amenities as public or private streets.

6. A primary task of all urban architecture and landscape design is the physical definition of streets and public spaces as places of shared use. Streets should be lined by buildings rather than parking lots and should provide interest especially for pedestrians. Garage entrances and/or loading areas should be located at the side or rear of a property.

7. Buildings should be located close to the pedestrian-oriented street (within 25 feet of the curb), with off-street parking behind and/or beside the buildings. When a development plan is located along a high volume corridor without on-street parking, one bay of parking separating the building frontage along the corridor is a preferred option.

8. If the site is located at a street intersection, the main building or main part of the building should be placed at the corner. Parking, loading or service should not be located at an intersection.

9. To ensure that urban open space is well-used, it is essential to locate and design it carefully. The space should be located where it is visible and easily accessible from public areas (building entrances, sidewalks). Take views and sun exposure into account as well.

10. New urban spaces should contain direct access from the adjacent streets. They should be open along the adjacent sidewalks and allow for multiple points of entry. They should also be visually permeable from the sidewalk, allowing passersby to see directly into the space.

11. The perimeter of urban open spaces should consist of active uses that provide pedestrian traffic for the space including retail, cafes, and restaurants and higher-density residential.

12. A properly defined urban open space is visually enclosed by the fronting of buildings to create an outdoor “room” that is comfortable to users.

13. New public spaces should provide seating opportunities.
14. Parking lots should not dominate the frontage of pedestrian-oriented streets, interrupt pedestrian routes, or negatively impact surrounding developments.

15. Parking lots should be located behind or in the interior of a block whenever possible. Parking lots should not occupy more than 1/3 of the frontage of the adjacent building or not more than 64 feet, whichever is less.

16. Parking structures are clearly an important and necessary element of the overall urban infrastructure but, given their utilitarian elements, can give serious negative visual effects. New structures should merit the same level of materials and finishes as that a principal building would, care in the use of basic design elements can make a significant improvement.

17. Higher building densities and more intensive land uses should be within walking distance of transit stops, permitting public transit to become a viable alternative to the automobile.

18. Convenient, comfortable pedestrian access between the transit stop and the building entrance should be planned as part of the overall pedestrian network.

19. All development should respect natural resources as an essential component of the human environment. The most sensitive landscape areas, both environmentally and visually, are steep slopes greater than 15 percent, watercourses, and floodplains. Any development in these areas should minimize intervention and maintain the natural condition except under extreme circumstances. Where practical, these features should be conserved as open space amenities and incorporated in the overall site design.

20. It is the intent of these guidelines to build streets that are integral components of community design. Public and private streets, as well as commercial driveways that serve as primary pedestrian pathways to building entrances, should be designed as the main public spaces of the City and should be scaled for pedestrians.

21. Sidewalks should be 5-8 feet wide in residential areas and located on both sides of the street. Sidewalks in commercial areas and Pedestrian Business Overlays should be a minimum of 14-18 feet wide to accommodate sidewalk uses such as vendors, merchandising and outdoor seating.

22. Streets should be designed with street trees planted in a manner appropriate to their function. Commercial streets should have trees which complement the face of the buildings and which shade the sidewalk. Residential streets should provide for an appropriate canopy, which shadows both the street and sidewalk, and serves as a visual buffer between the street and the home. The typical width of the street landscape strip is 6-8 feet. This width ensures healthy street trees, precludes tree roots from breaking the sidewalk, and provides adequate pedestrian buffering. Street trees should be at least 6 1/4” caliper and should be consistent with the City’s landscaping, lighting and street sight distance requirements.

23. Buildings should define the streets spatially. Proper spatial definition should be achieved with buildings or other architectural elements (including certain tree plantings) that make up the street edges aligned in a disciplined manner with an appropriate ratio of height to width.

24. The primary entrance should be both architecturally and functionally on the front facade of any building facing the primary public street. Such entrances shall be designed to convey their prominence on the fronting facade.

25. The ground level of the building should offer pedestrian interest along sidewalks. This includes windows entrances, and architectural details. Signage, awnings, and ornamentation are encouraged.

26. The sidewalks should be the principal place of pedestrian movement and casual social interaction. Designs and uses should be complementary to that function.

One Exchange Plaza, Suite 304
Raleigh, NC 27601

RE: NEIGHBORHOOD MEETING REPORT Regarding Proposed Rezoning Petition of J.C. Edwards, J.C. Edwards, Trustee and Amy E. Edwards, Trustee (the “Owners”) of approximately 1.12 acres, located at 4128 Western Boulevard, 4130 Western Boulevard, 1011 Chaney Road and 1005 Chaney Road (the “Property”).

Dear Ms. Sumpter:

As indicated in my attached letter of November 19, 2013 the Neighborhood Meeting was held on Wednesday, December 4, 2013 at 7:00 PM at the Lifepointe Church, Middle Building, 4131 Western Boulevard, Raleigh, NC 27606 to discuss the proposed rezoning of the Property located at 4128 Western Boulevard, 4130 Western Boulevard, 1011 Chaney Road and 1005 Chaney Road collectively. The meeting was moved downstairs to accommodate handicapped accessibility.

The persons and organizations contacted about this meeting are indicated upon the attached list and the roster of those in attendance and their respective addresses are as indicated upon the attached Attendance Roster.

I opened the meeting with a discussion of the four (4) properties owned by Mr. J.C. Edwards, Individually and as Trustee and by Amy Edwards, Trustee (both in attendance), their present zoning and designation in the 2030 Comprehensive Plan. I then described their proposed zoning to Neighborhood Mixed-Use (NX) in accordance with the new UDO effective September 1, 2013. I indicated that proposed Conditions for the southerly three lots would include provision for one building limited to two stories (25’) in height with a size limitation of 8,000 to 9,000 square feet for a proposed AutoZone retail store. I also indicated that a solid wood fence six (6’) feet in height is proposed along the north line of the proposed AutoZone site. I explained that the fourth lot proposed for this Case lying north of the three lots for the proposed AutoZone Store would be restricted to the uses now permitted in the existing R-10 Zone. There will be one (1) access proposed for Western Boulevard and one (1) access proposed for Chaney Road.
The summary of the issues discussed follows:

1. Concerns about the zoning change which would permit a retail use in an area where a substantial majority of the present uses are residential with particular questions about the need for rezoning the northern most of the four lots if its uses were to continue as now permitted under the R-10 Zone.

2. Concerns about the prospect for increased traffic through the residential neighborhood in order to access the proposed AutoZone Store from Chaney Road as according to those in attendance there is already significant cut-through traffic from Method Road down Reavis and Chaney Roads to Western Boulevard as motorists seek to avoid the traffic signal at Method Road and Western Boulevard.

3. Concerns about whether a cross access between the adjacent Circle K Store and the AutoZone Store would be achievable.

4. Concerns related to the proposed AutoZone Store as follow:

   AutoZone’s continued responsibility for maintaining the proposed fence along the rear (northern) line, the distance of the proposed building from the rear line, dumpster location serving the proposed store, onsite auto repairs by customers of the store, Hazmat leakage concerns regarding products sold at the store, questions about vehicular ingress and egress from and to Western Boulevard given the present topography and the location of parking spaces upon the store property.

5. Questions about raising the site to Western Boulevard by importing soil and about the accident history at the Method/Western Boulevard and Chaney/Western Boulevard Intersections.

6. Questions about the specifics of the present Special Residential Parking Overlay District and regarding its continued applicability if the rezoning takes place and the AutoZone Store is built upon the southerly three lots.

7. Discussion about an earlier rezoning Case in the area for AutoZone which did not proceed through the rezoning process and the reasons therefore.

8. Concerns of Mr. & Mrs. Jerome Goldberg, owners of adjacent properties (including a house that was leased the day of this meeting) and a fully permitted vacant lot which are both under contract for sale that the rezoning application would damage and likely result in the loss of their proposed sale of the house and lot.

In closing I request that you contact me regarding any questions or comments about this report.

Sincerely,

Thomas C. Worth, Jr.
