At its meeting on June 1, 2021, the City Council closed the public hearing and deferred further action until the June 15, 2021 meeting to allow the applicant to provide revised zoning conditions to address the concerns of neighboring residents. On June 15, 2021 City Council referred the item to the Safe, Vibrant and Healthy Community Committee for discussion at their June 22, 2021 meeting.

At the June 22, 2021 SVHC Committee meeting, the Committee directed the applicant to hold at least one more in-person neighborhood meeting and consider additional or revised conditions by July 1. The applicant and City staff met with residents of the Inman Park neighborhood on June 28, 2021. The applicant submitted revised zoning conditions on July 1, 2021.

The SVHC Committee met on August 24, 2021 to continue discussion of this case and voted to defer a recommendation until their September 28, 2021 meeting. Following the August meeting, the applicant met with City staff on August 27, 2021 to discuss additional information that could be submitted for the benefit of adjoining residents, particularly regarding the height and form of a proposed retaining wall for the surface parking area. On September 22, 2021 the applicant submitted updated renderings of the retaining wall and an updated concept plan that details the approximate retaining wall heights along multiple points adjacent to the northern and eastern property lines.

On September 28, 2021, the SVHC Committee heard a presentation from the applicant and took comments from Inman Park residents. The Committee directed staff to meet with representatives of the Inman Park neighborhood to discuss potential development options.

On October 14, 2021, Avi Grewal of Singh Development communicated with the neighbors to gauge interest and support in an alternative development scenario. The alternative explored the UDO allowances for residential townhouse development on the property, realizing that additional feasibility would be required on behalf of the applicant and landowner. On October 18, 2021, Inman Park representatives offered comments on the Singh proposals and presented an alternative conceptual plan. Ultimately, Singh Development stated that an alternative development scenario was not feasible.
On October 26, 2021, the SVHC Committee voted 3-1 to report the rezoning proposal to City Council with a recommendation of denial.

**Current zoning:** Residential-4 (R-4)

**Requested zoning:** Residential Mixed Use-4 stories-Parking Limited-Conditional Use (RX-4-PL-CU)

The request is consistent with the 2030 Comprehensive Plan.
The request is consistent with the Future Land Use Map.
The request is consistent with the Urban Form Map.

The Planning Commission voted 4-3 to recommend approval of the request.

Attached are the Planning Commission Certified Recommendation (including the Staff Report), Petition for Rezoning, Neighborhood Meeting Report, revised Zoning Conditions (submitted July 1, 2021), the Retaining Wall Renderings and updated Concept Plan presented on September 28, and the above-referenced correspondence between Avi Grewal and Inman Park residents, including the alternative concept plan.

## SUMMARY OF PROPOSED CONDITIONS

1. Principal Uses shall be limited to Multi-Unit Living and Congregate Care residential and accessory uses.
(2) One of the following shall be allowed in addition to the allowed residential uses: Beauty/Hair Salon, Copy Center, Eating Establishment (maximum of 3,000 square feet), or retail sales of Clothing, Flowers, Package Shipping, Plants, or Stationery.

(3) Total units shall not exceed 250.

(4) A 50’ principal building setback shall be established along the northern property line.

(5) A 30’ Type B1 protective yard shall be established along the northern property line.

(6) Limit stormwater runoff to the 25-year storm.

(7) Establish a 50’ Zone A Type 3 protective yard along the eastern property line.

(8) Require full cutoff lighting fixtures for all parking and pedestrian areas.

Planning and Development Deputy Director  
6/3/21  
Staff Coordinator: Don Belk: (919) 996-4641; Donald.Belk@raleighnc.gov
OVERVIEW

This request is to rezone an assemblage of six (6) parcels located at the intersection of Lead Mine Road and Philcrest Road from Residential-4 (R-4) to Residential Mixed Use-4 Stories-Parking Limited-Conditional Use (RX-4-PL-CU). The applicant proposes conditions that would limit principal uses to multi-unit living and congregate care, permit one of the following ancillary retail uses - beauty/hair salon, copy center, eating establishment – and limit it to no more than 3,000 square feet, and limit the number of residential units to no more than 250.

The site is situated within a larger low-density residential area located wholly within the extraterritorial jurisdiction of Raleigh but surrounded by areas within the corporate limits of the city. It lies approximately 0.25 miles north of the intersection of Lead Mine Road and Glenwood Avenue (US-70), approximately 0.62 miles northwest from the Glenwood Avenue-I-440 interchange, and about 0.9 miles east of the intersection of Creedmoor Road (NC-50) and Glenwood Avenue.

The site presently consists of five (5) single family residential lots and one vacant lot. The site is bordered to the north by the Inman Park residential subdivision, and to the east lie two residential house lots. There is also a residential lot to the south of the site. A four-story apartment building and a medical office building lie to the west across Lead Mine Road.

The site is presently zoned R-4 and is adjacent to other R-4 parcels to the south and east. The Smith Estate Planned Development district (PD) lies to the north. To the west, flanking the intersection of Charles Drive and Lead Mine Road, lies an OX-3-GR-CU district, bordered by a CX-12-UG-CU district.

The proposed rezoning would allow for a maximum of 250 units as residential (apartments), congregate care, or a combination thereof. Retail uses are confined to a small array of commercial activities that would be ancillary to the principal residential uses and are limited by zoning condition to a maximum of 3,000 square feet.

Update for March 23, 2021

The City Council granted an extension for this case on March 2, 2021. On March 9, the Planning Commission deferred the case until March 23 to allow the applicant more time for discussion with neighbors. The applicant submitted a revised rezoning application with new and revised conditions on March 12, 2021.

Substantial changes to the proposal are reflected in the revised application and conditions. The requested zoning is now RX-4-PL-CU, reducing the height from the original RX-7 request. Only three of the original zoning conditions remain the same. New or revised conditions (1) reduce the total number of units from 350 to 250; (2) evaluate the 50’ northern boundary setback for approval as Tree Conservation Area (3) stipulate the additional
plantings (exceeding UDO requirements) within a Type B1 protective yard if the setback does not meet TCA standards; (3) meet stormwater runoff requirements for the 25-year storm in addition to the two-year and ten-year storms; (4) provide a 50’ Zone A Type 3 protective yard along the eastern property boundary, and (5) specify full-cutoff lighting for pedestrian and parking areas, and (6) specify screening of above-grade parking structures with 10’ tall evergreen trees planted 10’ on center.

These new and revised conditions directly address many of the neighborhood concerns regarding adverse impacts to the adjoining low-density residential areas. As a result, Policy LU 5.6 – Buffering Requirements, has been changed from inconsistent to consistent with the Comprehensive Plan. The proposal remains consistent with the Future Land Use Map and the 2030 Comprehensive Plan overall.

COMPREHENSIVE PLAN

Determination of the conformance of a proposed use or zone with the Comprehensive Plan includes consideration of the following questions:

A. Is the proposal consistent with the vision, themes, and policies contained in the Comprehensive Plan?

Yes, the requested zoning is consistent with the Vision Theme of Expanding Housing Choices because it would allow more housing units and an opportunity for congregate care, expanding senior housing capacity to help meet the residential demand of a fast-growing demographic sector.

The proposal is also consistent with the Managing Our Growth Vision Theme because it proposes additional density in an area that is urbanizing and adjacent to a City Growth Center. The site is well-served by existing infrastructure and transit, with a number of shopping and employment destinations nearby.

The request is consistent with the Coordinating Land Use and Transportation theme. The proposal will provide for higher density residential development and support the land use pattern needed to support local and regional transit service.

The proposal is consistent with the Growing Successful Neighborhoods and Communities Vision Theme. The applicant has provided zoning conditions that would help protect the existing character of the Inman Park neighborhood and the low-density residential area to the east from the potential adverse impacts of height and density.

The proposed zoning is generally consistent with the 2030 Comprehensive Plan. The request will advance policies relating to transit supportive density, additional housing capacity, and appropriate infill development along an urban thoroughfare, where existing single-family residential uses are no longer suitable.

B. Is the use being considered specifically designated on the Future Land Use Map in the area where its location is proposed?

Yes, the Future Land Use Map designation on the rezoning site is Office & Residential Mixed Use, which calls for a mix of residential and office use with ancillary retail. The proposed zoning would allow a mix of office and residential uses with ancillary retail, with most of the allowed development being multi-family residential, congregate care, or a combination thereof. The applicant has provided a condition of a maximum height of six stories as measured above the average finished grade on the façade of the building facing Lead Mine Road in order to address a potential adverse impact to adjacent residential uses.

C. If the use is not specifically designated on the Future Land Use Map in the area where its location is proposed, is it needed to service such a planned use, or could it be established without adversely altering the recommended land use and character of the area?

Yes. The proposed use can be established without adversely altering the recommended land use and character of the area.
D. Will community facilities and streets be available at City standards to serve the use proposed for the property?

Yes. Community facilities and streets appear sufficient to serve the proposed use.

**Future Land Use**

**Future Land Use designation:** Office & Residential Mixed Use

**The rezoning request is**

- ☒ **Consistent** with the Future Land Use Map.
- □ **Inconsistent**

The Office & Residential Mixed Use designation applies to “frontage lots along major streets where low-density residential uses are no longer appropriate.” Although the requested seven-story height is of concern because of the site’s proximity to single-family residential areas, the applicant has provided a condition to specify a maximum height of six stories as measured above the average finished grade on the façade of the building facing Lead Mine Road. The proposed RX zoning allows primarily residential uses with ancillary retail uses permitted, and this request conditions the square footage of retail to a maximum of 3,000 square feet.

**Urban Form**

**Urban Form designation:** Urban Thoroughfare

**The rezoning request is**

- ☒ **Consistent** with the Urban Form Map.

The proposed rezoning site is located along Lead Mine Road, designated as an Urban Thoroughfare on the Urban Form Map. These areas recommend an urban or hybrid frontage approach, and this proposal would provide the Parking Limited frontage, used whenever automobile access is desired while maintaining some level of walkability.

**Compatibility**

**The proposed rezoning is**

- ☒ **Compatible** with the property and surrounding area.
- □ **Incompatible**

The proposed uses and height are compatible with the surrounding developments to the west, although there could be some impacts to the single-family lots to the north, south, and east from the potential height and mass of development enabled by the
proposal. However, Neighborhood Transition requirements would apply to development of a RX-zoned property adjacent to an R-4 district and would provide for a minimum 50-foot building setback and height controls. The proposal is compatible with the CX-12 zoning to the west.

Public Benefits of the Proposed Rezoning

- The request would increase the housing supply, particularly housing for seniors.
- The request would provide more intensive development along an urban thoroughfare adjacent to a City Growth Center.
- The request would increase the likelihood of further development and annexation to take advantage of available infrastructure and the location of nearby commercial and employment centers.

Detriments of the Proposed Rezoning

- The request will increase vehicular peak hour trips on nearby roads.

Policy Guidance

*The rezoning request is consistent with the following policies:*

**Policy LU 1.2—Future Land Use Map and Zoning Consistency**
The Future Land Use Map shall be used in conjunction with the Comprehensive Plan policies to evaluate zoning consistency including proposed zoning map amendments and zoning text changes.

- The proposed zoning (RX-7-PL-CU) is consistent with the Future Land Use Map, which is designated for Office and Residential Mixed Use. This designation applies primarily to lots fronting major streets where low-density residential uses are no longer appropriate. The proposal includes limited, ancillary retail uses and a combination of multi-family residential and congregate care, or a combination thereof.

**Policy LU 1.3—Conditional Use District Consistency**
All conditions proposed as part of a conditional use district (CUD) should be consistent with the Comprehensive Plan.

- The conditions proposed in the request will limit ancillary retail uses, reduce the retail square footage otherwise allowable in RX, and cap the number of residential units to 350.

**Policy LU 2.2 – Compact Development**
New development and redevelopment should use a more compact land use pattern to support the efficient provision of public services, improve the performance of transportation
networks, preserve open space, and reduce the negative impacts of low intensity and noncontiguous development.

- Development enabled by the request will increase density nearly seven-fold (29 units/acre versus 4 units/acre) in a location near major commercial and employment areas. The rezoning site is in an urbanizing area that is served by existing City infrastructure.

**Policy LU 2.6 – Zoning and Infrastructure Impacts**

Carefully evaluate all amendments to the zoning map that significantly increase permitted density or floor area to ensure that impacts to infrastructure capacity resulting from the projected intensification of development are adequately mitigated or addressed.

- This proposal constitutes an infill redevelopment that will make efficient use of existing infrastructure and be supportive of transit investment.

**Policy LU 3.2 – Location of Growth**

The development of vacant properties should occur first within the city’s limits, then within the city’s planning jurisdiction, and lastly within the city’s USAs to provide for more compact and orderly growth, including provision of conservation areas.

- The proposal is located within Raleigh’s ETJ in an area surrounded by the corporate limits of the city.

**Policy LU 4.9 – Corridor Development**

Promote pedestrian-friendly and transit-supportive development patterns along multimodal corridors designated on the Growth Framework Map, and any corridor programmed for “transit intensive” investments such as reduced headways, consolidated stops, and bus priority lanes and signals.

- The site is located along an Urban Thoroughfare. These corridors are planned or programmed for public investments in multiple modes of transportation, and this rezoning proposal will support future investment in transit, bike lanes, and pedestrian-oriented streetscapes.

**Policy LU 5.1 – Reinforcing the Urban Pattern**

New development should acknowledge existing buildings, and, more generally, the surrounding area. Quality design and site planning is required so that new development opportunities within the existing urban fabric of Raleigh are implemented without adverse impacts on local character and appearance.

- This proposal will reinforce the urbanization of the immediate area and is adjacent to a City Growth Center. The proposed seven-story height is a concern, but there are methods for mitigating height impacts on the adjoining single-family neighborhoods.

**Policy LU 5.4 Density Transitions**

Low- to medium-density residential development and/or low-impact office uses should serve as transitional densities between lower-density neighborhoods and more intensive commercial and residential uses. Where two areas designated for significantly different development intensity abut on the Future Land Use Map, the implementing zoning should ensure that the appropriate transition occurs on the site with the higher intensity.

- The rezoning request is for a district that applies to locations along major streets, where low-density residential uses are no longer appropriate. This proposal is predominantly for residential and/or congregate care uses and will provide a density transition between the existing residential areas nearby to the higher density, more intensive mixed uses to the west. The maximum density allowed by the proposal is
estimated to be around twenty-nine dwelling units per acre, which would represent a medium density development. Neighborhood transition requirements would apply to development under the proposed zoning and would require a transition area along the property boundary that abuts lots in Inman Park neighborhood and the adjoining residential areas to the east.

**Policy LU 5.5 Transitional and Buffer Zone Districts**
Maintain and enhance zoning districts which serve as transitional or buffer areas between residential and commercial districts and which also may contain institutional, non-profit, and office-type uses. Zoning regulations and conditions for these areas should ensure that development achieves appropriate height and density transitions and protects neighborhood character.

- The requested RX district fits the description of a transitional district found in this policy. The proposed district would provide a buffer of residential use with a small amount of commercial use between the commercial uses that are allowed in the CX district fronting on Lead Mine Road and the low-density residential neighborhoods to the north and east. Consistency with this policy can be improved through zoning conditions requiring new development to properly locate building massing and to provide height transitions from these residential areas.

**Policy LU 5.6 – Buffering Requirements**
New development adjacent to areas of lower intensity should provide effective physical buffers to avoid adverse effects. Buffers may include larger setbacks, landscaped or forested strips, transition zones, fencing, screening, height and/or density step downs, and other architectural and site planning measures that avoid potential conflicts.

- The proposal represents a sharp contrast in both density and building height compared to the existing low-density residential development to the north, south, and east. To mitigate this contrast, the applicant has proposed conditions to increase building setbacks and provide a Type B1 protective yard along the northern property line where existing single-family residences are closest to the site boundary.

**Policy LU 8.1 – Housing Variety**
Accommodate growth in newly developing or redeveloping areas of the city through mixed-use neighborhoods with a variety of housing types.

- This proposal will provide for a mixed-use development that is predominantly residential that includes multi-family and congregate care uses, or a combination thereof.

**Policy LU 8.10 Infill Development**
Encourage infill development on vacant land within the City, particularly in areas where there are vacant lots that create “gaps” in the urban fabric and detract from the character of a commercial or residential street. Such development should complement the established character of the area and should not create sharp changes in the physical development pattern.

- The proposed rezoning site currently consists of one vacant lot and five (5) single-family residences fronting Lead Mine Road, an urban thoroughfare. This area is currently outside of the corporate limits but is surrounding by annexed areas. This proposal would create a higher-density infill development that would provide a transition between existing residential neighborhoods and the adjoining City Growth Center. Consistency with this policy can be improved by conditions that mitigate the proposed height and density of future development.
Policy H 1.8 – Zoning for Housing
Ensure that zoning policy continues to provide ample opportunity for developers to build a variety of housing types, ranging from single-family to dense multi-family. Keeping the market well supplied with housing will moderate the costs of owning and renting, lessening affordability problems, and lowering the level of subsidy necessary to produce affordable housing. In areas characterized by detached houses, accommodations should be made for additional housing types while maintaining a form and scale similar to existing housing.

- The proposed rezoning will provide an opportunity for the apartment building type for independent living and assisted living for seniors. The development will help increase the supply of these housing types to meet the growing demand for senior ‘lifestyle’ and assisted living housing.

Policy T 1.6 – Transportation Impacts
Identify and address transportation impacts before a development is implemented.

- The applicant conducted a traffic impact analysis (TIA) prior to the submittal of the rezoning application. Although a TIA is not required for this request, the analysis will prove useful for site plan review for future development at this location.

Policy UD 1.10 – Frontage
Coordinate frontage across multiple sites to create cohesive places. Encourage consistency with the designations on the Urban Form Map. Development in centers and along corridors targeted for public investment in transit and walkability should use a compatible urban form.

- The rezoning request is consistent with this policy as it proposed a Parking Limited frontage along the urban thoroughfare, which recommends a hybrid approach to frontage

The rezoning request is inconsistent with the following policies:

- There are no inconsistent policies.

Area Plan Policy Guidance
There is no area plan guidance for this site; however, the subject parcel assemblage is adjacent to the area shown in the Crabtree Area Plan (Map AP-CR1).
HOUSING AFFORDABILITY & ENERGY EFFICIENCY ANALYSIS

Carbon Footprint: Transportation

<table>
<thead>
<tr>
<th>City Average</th>
<th>Site</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transit Score</td>
<td>30</td>
<td>33</td>
</tr>
<tr>
<td>Walk Score</td>
<td>30</td>
<td>39</td>
</tr>
</tbody>
</table>

Source: Walk Score is a publicly available service that measures pedestrian friendliness by analyzing population density and road metrics such as block length and intersection density. The higher the Transit Score or Walk Score, the greater the percentage of trips that will be made on transit or by walking, and the smaller the carbon footprint. The scores also correlate with shorter vehicle trips, which also produce less carbon. The city has a wide range of scores. Raleigh Municipal Building, for instance, has a Walk Score of 92, meaning the area is highly pedestrian-friendly and that many destinations are within a short walk. Some areas in the city have scores in single digits, indicating that few if any destinations are within walking distance, so nearly all trips are made by car.

Summary: The proposed site has a slightly higher than average Transit and Walk Score. Bike Score is 40, indicating minimal bike infrastructure.

Carbon/Energy Footprint: Housing

<table>
<thead>
<tr>
<th>Housing Type</th>
<th>Average Annual Energy Use (million BTU)</th>
<th>Permitted in this project?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detached House</td>
<td>82.7</td>
<td>Yes</td>
</tr>
<tr>

</tr>
<tr>
<td>Small Apartment (2-4 units)</td>
<td>42.1</td>
<td>Yes</td>
</tr>
<tr>
<td>Larger Apartment</td>
<td>34.0</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Summary: The proposed rezoning would allow all of the housing types listed above. It is anticipated that most of the new development associated with this rezoning will consist of apartments, a congregate care facility, or a combination thereof, both with lower than average annual energy use as compared to detached houses.
### Housing Supply and Affordability

<table>
<thead>
<tr>

<td>Not applicable</td>
</tr>
<tr>
<td>Does it permit a variety of housing types beyond detached houses?</td>
<td>Yes</td>
<td>Apartments would be the predominant building type.</td>
</tr>
<tr>
<td>If not a mixed-use district, does it permit smaller lots than the average?*</td>
<td>N/A</td>
<td>N/A</td>
</tr>
<tr>
<td>Is it within walking distance of transit?</td>
<td>Yes</td>
<td>A bus stop for the #23L Millbrook route is located at the site.</td>
</tr>
</tbody>
</table>

*The average lot size for detached residential homes in Raleigh is 0.28 acres.

**Summary:** The proposal would add to the housing supply by providing additional units for senior independent living and assisted living.
IMPACT ANALYSIS

**Historic Resources**

1. The site is not located within or adjacent to a National Register Historic District or Raleigh Historic Overlay District. It does not include nor is adjacent to any National Register individually-listed properties or Raleigh Historic Landmarks.

**Impact Identified:** None.

**Parks and Recreation**

1. This site is not directly impacted by any existing or proposed greenway trails, corridors, or connectors.

2. Nearest existing park access is provided by North Hills Park (1.3 miles) and Shelly Lake Park (1.6 miles).

3. Nearest existing greenway trail access is provided by Crabtree Creek Greenway Trail (0.3 miles).

4. Current park access level of service in this area is graded a B letter grade.

**Impact Identified:** None.

**Public Utilities**

1. The proposed rezoning would add approximately 82,500 gpd to the wastewater collection and water distribution systems of the City. There are existing sanitary sewer and water mains adjacent to the proposed rezoning area.

2. At the time of development plan submittal, a Downstream Sewer Capacity Study may be required to determine adequate capacity to support the proposed development. Any improvements identified by the study would be required to be permitted prior to the issuance of Building Permit & constructed prior to release of a Certificate of Occupancy.
3. Verification of water available for fire flow is required as part of the Building Permit process. Any water system improvements recommended by the analysis to meet fire flow requirements will also be required of the Developer.

Impact Identified: None.

**Stormwater**

</table>

Impact Identified: Site subject to Stormwater regulations under UDO 9.2 for runoff and nitrogen. No floodplain exists onsite. Possible Neuse Buffers exist. No impacts identified.

**Transit**

1. The Unified Development Ordinance is sufficient as written to obtain the transit improvements required for this site.

Impact Identified: None.

**Transportation**

1. **Site and Location Context**

   **Location**

   The Z-53-2020 site is located in northwest Raleigh, just north of I-440. The site is at the northeast corner of Lead Mine Road and Philcrest Road.

   **Area Plans**

   The Z-53-2020 site is located north of the within the Crabtree Area Plan, which includes Crabtree Valley Mall and the surrounding properties. The plan goal is for a walkable urban community with enhanced transit services and pedestrian amenities. The plan specifies that interconnectivity should be encouraged wherever feasible.

2. **Existing and Planned Infrastructure**

   **Streets**
Lead Mine Road is designated at a 4-lane avenue, divided in the Raleigh Street Plan (Map T-1 in the Comprehensive Plan) and is maintained by NCDOT. Philcrest Road is not designated in the Street Plan and is therefore a local street; it is also currently maintained by NCDOT.

Existing block perimeter for the site is more than 18,000 feet. In accordance with UDO section 8.3.2, the maximum block perimeter for R-10 zoning districts is 2,500 feet.

**Pedestrian Facilities**

There are complete sidewalks on the site’s frontage on Lead Mine Road. Sidewalks extend approximately 35 feet from Lead Mine Road along the site’s frontage on Philcrest Road.

**Bicycle Facilities**

The site is near an existing bikeway on North Hills Drive. Between Lead Mine Road and Shelley Road, North Hills Drive has uphill bicycle lanes and shared lane markings in the downhill direction. The site is also within ½ mile of the Crabtree Creek Greenway Trail by public streets. The Long-Term Bikeway Plan calls for bicycle lanes on Lead Mine Road at the Z-53-2020 site.

**Transit**

The Crabtree Valley area serves multiple GoRaleigh Bus routes. The closest stop to the subject site is for GoRaleigh Route 23L, which stops at the corner of Marriott Drive and Lead Mine Road every 30 minutes. Nearby stops for GoRaleigh Routes 4, 6, 16, 26 and 36 with service every 30 min may also serve this development. In the Wake Transit Plan, Crabtree Valley will be a regional transit hub where several frequent transit services connect. The existing transit center is approximately ½ mile from the Z-53-2020 site.

**Access**

The Z-53-20 Site is access by Lead Mine Road and Philcrest Road.

### 3. Other Projects in the Area

The Z-53-2020 site is located near the NCDOT Project I-5870, which plans to improve the Glenwood Avenue/I-440 Interchange. This project may also include alternatives for the Glenwood Ave and Lead Mine intersection, which is ¼ mile from the site. The extent of changes and corresponding impact to this development are not yet defined.

### 4. Traffic Impact Analysis (TIA) Determination

Based on the conditioned entitlement of 350 units of multifamily residential, approval of case Z-53-20 would increase the amount of projected vehicular peak hour trips for the site as indicated in the table below. The proposed rezoning from R-4 to RX-7-PL-CU is projected to have 102 new trips in the AM peak hour and 128 new trips in the PM peak hour. These values do not trigger a rezoning Traffic Impact Analysis based on the trip generation thresholds in the Raleigh Street Design Manual.

The applicant has submitted a Traffic Impact Analysis with the zoning application. Transportation Staff reviewed the TIA after a request by Planning Commission.
TIA Review

A TIA was performed by Ramey Kemp and Associates (RKA) and reviewed by City staff. The analysis indicates that the proposed development will have impacts to the surrounding roadway network and intersections, including intersections with existing capacity issues. These impacts can be partly mitigated with the study’s recommended improvements listed below.

- **Lead Mine Road and Philcrest Road**
  - Construct an exclusive westbound right-turn lane with a minimum of 50 feet of full width storage and appropriate deceleration and taper length.
- **Lead Mine Road and Charles Drive/Site Drive 1**
  - Construct the westbound approach (Site Drive 1) with one ingress lane and one egress lane.
  - Provide stop-control for the westbound approach.
  - Restripe the existing two-way left-turn lane to include a minimum of 100 feet of full width storage and appropriate deceleration and taper length.
- **Lead Mine Road and Site Drive 2**
  - Construct the westbound approach (Site Drive 2) with one ingress lane and one egress lane (right-out only).
  - Restrict the intersection to right-in/right-out only.
  - Provide stop-control for the westbound approach.
- **Philcrest Road and Site Drive 3**
  - Construct the southbound approach (Site Drive 3) with one ingress lane and one egress lane.
  - Provide stop-control for the southbound approach.
  - Provide an internal protected stem of at least 100 feet for the southbound approach.

In NCDOT’s review of the TIA, Site Drive 2 was denied. NCDOT staff found that the traffic operations were acceptable without this driveway. Staff recommends additional analysis during site plan review to show the impact of the resulting redistribution of traffic.

City Staff agrees with the overall analysis performed in the TIA for the Lead Mine Road Multifamily. Based on the level of delay identified at Lead Mine Road and Inman Park Drive/Sugar Bush Road, staff recommends that the consultant submit a mitigation plan during site plan review showing the impact of a signal installation. That mitigation plan should identify responsible parties based on the contribution of the site to the traffic at the intersection relative to background traffic.

Urban Forestry

Lead Mine Road is classified as a Thoroughfare. Parking Limited (-PL) frontage would allow the applicant to forgo the potential establishment of Primary Tree Conservation Area - Thoroughfare along Lead Mine Road

Impact Identified: None.

Impacts Summary

The major impact of this proposal would be that of increased height and density adjacent to existing residential neighborhoods. The applicant has offered conditions to address the impact by setting a maximum height of six stories and specifying how the height will be measured, and by establishing a larger setback and protective yard adjacent to the most closely situated residential parcels. The request is not expected to have any significant impacts on City infrastructure or service provision. The rezoning site is in an urbanizing area with adequate existing City facilities. Infrastructure improvements to serve development on the site, including road improvements and connectivity measures, will be required as part of a development plan approval. The applicant proactively completed a traffic impact analysis as part of the rezoning application submittal.

Mitigation of Impacts

The applicant has offered conditions to mitigate the potential adverse impacts of increased building height and density to adjoining residential neighborhoods.
CONCLUSION

This proposal would enable a higher-density, mixed-use development within an area that is predominantly low-density residential and presently is an unannexed ‘island’ surrounding by the corporate limits of Raleigh. The proposal would increase the housing supply and provide additional housing for seniors.

The potentially adverse impacts of height and density on adjoining residential neighborhoods are the major concerns as this proposal would represent a substantial increase in both of these measures. Zoning conditions have been offered by the applicant to successfully address these concerns and provide an appropriate transition between the single-family residential areas and the adjoining City Growth Center.

The area is mostly car-dependent but is served by transit.

Z-53-20 is consistent with the Future Land Use Map, the Urban Form Map, and the 2030 Comprehensive Plan overall.

#### Narrative of Zoning Conditions Offered

1. Principal Uses shall be limited to the following: Multi-Unit Living and Congregate Care residential and accessory uses, except as provided for in Condition #2 below.

2. One of the following shall be allowed in addition to the allowed residential uses: Beauty/Hair Salon, Copy Center, Eating Establishment, or retail sales of Clothing, Flowers, Package Shipping, Plants, or Stationary. The gross floor area of Eating Establishment shall not exceed 3,000 square feet.

3. The total number of units for Multi-Unit Living units, Congregate Care units, or a combination thereof, shall not exceed 250.

4. There shall be a 50-foot principal building setback from the northern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796626107, 0796627185, 0796628185, and 0796629156 (the “Northern Parcels”).

5. Trees within 32’ of the property line abutting the Northern Parcels shall be evaluated for designation as tree conservation area in accordance with the standards in the UDO. If these do not meet the UDO’s standards to be designated as tree conservation area, a Type B1 protective yard (UDO Sec. 7.2.4), with a minimum width of 32’, shall be placed along the northern property line abutting the Northern Parcels. The Type B1 protective yard shall provide, in addition to the minimum plantings required for a Type B1 protective yard pursuant to UDO Section 7.2.4, additional evergreen plantings at a rate of 12 shrubs per 100 linear feet with a minimum planting height of 6 feet. Mature height for additional evergreen plantings will be a minimum of 15 feet.

6. Runoff limitation for development on the property as defined by UDO Section 9.2.2.E.1 shall be met for the 25-year storm in addition to the two-year and ten-year storms.

7. A Zone A Type 3 Neighborhood protective yard (UDO Sec. 3.5) with a minimum width of 50’ shall be provided along the eastern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796629093, 0796710830.

8. All Parking and Pedestrian Area lighting, as described in Section 7.4.5 of the UDO located within 100’ of the northern or eastern property line shall be full cutoff fixtures. Lighting within any structured parking shall be designed to reduce light spillage outside the parking structure. Any portion of structured parking above grade facing the Northern Parcels shall be screened with 10-foot tall evergreen trees planted 10 feet on center.

The property owner(s) hereby offers, consents to, and agrees to abide, if the rezoning request is approved, the conditions written above. All property owners must sign each condition page. This page may be photocopied if additional space is needed.

3. The total number of units for Multi-Unit Living units, Congregate Care units, or a combination thereof, shall not exceed 250.

4. There shall be a 50-foot principal building setback from the northern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796626107, 0796627185, 0796628185, and 0796629156 (the “Northern Parcels”).

5. Trees within 32’ of the property line abutting the Northern Parcels shall be evaluated for designation as tree conservation area in accordance with the standards in the UDO. If these do not meet the UDO’s standards to be designated as tree conservation area, a Type B1 protective yard (UDO Sec. 7.2.4), with a minimum width of 32’, shall be placed along the northern property line abutting the Northern Parcels. The Type B1 protective yard shall provide, in addition to the minimum plantings required for a Type B1 protective yard pursuant to UDO Section 7.2.4, additional evergreen plantings at a rate of 12 shrubs per 100 linear feet with a minimum planting height of 6 feet. Mature height for additional evergreen plantings will be a minimum of 15 feet.

6. Runoff limitation for development on the property as defined by UDO Section 9.2.2.E.1 shall be met for the 25-year storm in addition to the two-year and ten-year storms.

7. A Zone A Type 3 Neighborhood protective yard (UDO Sec. 3.5) with a minimum width of 50’ shall be provided along the eastern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796629093, 0796710830.

8. All Parking and Pedestrian Area lighting, as described in Section 7.4.5 of the UDO located within 100’ of the northern or eastern property line shall be full cutoff fixtures. Lighting within any structured parking shall be designed to reduce light spillage outside the parking structure. Any portion of structured parking above grade facing the Northern Parcels shall be screened with 10-foot tall evergreen trees planted 10 feet on center.

The property owner(s) hereby offers, consents to, and agrees to abide, if the rezoning request is approved, the conditions written above. All property owners must sign each condition page. This page may be photocopied if additional space is needed.

OFFICE USE ONLY
Rezoning case #

### Narrative of Zoning Conditions Offered

1. Principal Uses shall be limited to the following: Multi-Unit Living and Congregate Care residential and accessory uses, except as provided for in Condition #2 below.

2. One of the following shall be allowed in addition to the allowed residential uses: Beauty/Hair Salon, Copy Center, Eating Establishment, or retail sales of Clothing, Flowers, Package Shipping, Plants, or Stationary. The gross floor area of Eating Establishment shall not exceed 3,000 square feet.

3. The total number of units for Multi-Unit Living units, Congregate Care units, or a combination thereof, shall not exceed 250.

4. There shall be a 50-foot principal building setback from the northern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796626107, 0796627185, 0796628185, and 0796629156 (the “Northern Parcels”).

5. Trees within 32’ of the property line abutting the Northern Parcels shall be evaluated for designation as tree conservation area in accordance with the standards in the UDO. If these do not meet the UDO’s standards to be designated as tree conservation area, a Type B1 protective yard (UDO Sec. 7.2.4), with a minimum width of 32’, shall be placed along the northern property line abutting the Northern Parcels. The Type B1 protective yard shall provide, in addition to the minimum plantings required for a Type B1 protective yard pursuant to UDO Section 7.2.4, additional evergreen plantings at a rate of 12 shrubs per 100 linear feet with a minimum planting height of 6 feet. Mature height for additional evergreen plantings will be a minimum of 15 feet.

6. Runoff limitation for development on the property as defined by UDO Section 9.2.2.E.1 shall be met for the 25-year storm in addition to the two-year and ten-year storms.

7. A Zone A Type 3 Neighborhood protective yard (UDO Sec. 3.5) with a minimum width of 50’ shall be provided along the eastern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796629093, 0796710830.

8. All Parking and Pedestrian Area lighting, as described in Section 7.4.5 of the UDO located within 100’ of the northern or eastern property line shall be full cutoff fixtures. Lighting within any structured parking shall be designed to reduce light spillage outside the parking structure. Any portion of structured parking above grade facing the Northern Parcels shall be screened with 10-foot tall evergreen trees planted 10 feet on center.

The property owner(s) hereby offers, consents to, and agrees to abide, if the rezoning request is approved, the conditions written above. All property owners must sign each condition page. This page may be photocopied if additional space is needed.

### STATEMENT OF CONSISTENCY

Provide brief statements regarding whether the rezoning request is consistent with the future land use designation, the urban form map, and any applicable policies contained within the 2030 Comprehensive Plan.

See attached addendum.

### PUBLIC BENEFITS

Provide brief statements explaining how the rezoning request is reasonable and in the public interest.

See attached addendum.
### Impact on Historic Resources

The applicant is asked to analyze the impact of the rezoning request on historic resources. For the purposes of this section, a historic resource is defined as any site, structure, sign, or other feature of the property to be rezoned that is listed in the National Register of Historic Places or designated by the City of Raleigh as a landmark or contributing to a Historic Overlay District.

### INVENTORY OF HISTORIC RESOURCES

List in the space below all historic resources located on the property to be rezoned. For each resource, indicate how the proposed zoning would impact the resource.

| N/A |

### PROPOSED MITIGATION

Provide brief statements describing actions that will be taken to mitigate all negative impacts listed above.

| N/A |
The applicant must respond to the Urban Design Guidelines contained in the 2030 Comprehensive Plan if:

a) The property to be rezoned is within a "City Growth Center" or "Mixed-Use Center", or
b) The property to be rezoned is located along a "Main Street" or "Transit Emphasis Corridor" as shown on the Urban Form Map in the 2030 Comprehensive Plan.

Urban Form Designation N/A  Click [here](#) to view the Urban Form Map.

1. **All Mixed-Use developments should generally provide retail (such as eating establishments, food stores, and banks), and other such uses as office and residential within walking distance of each other. Mixed uses should be arranged in a compact and pedestrian friendly form.**
   **Response:**
   N/A

2. **Within all Mixed-Use Areas buildings that are adjacent to lower density neighborhoods should transition (height, design, distance and/or landscaping) to the lower heights or be comparable in height and massing.**
   **Response:**
   N/A

3. **A mixed use area's road network should connect directly into the neighborhood road network of the surrounding community, providing multiple paths for movement to and through the mixed use area. In this way, trips made from the surrounding residential neighborhood(s) to the mixed use area should be possible without requiring travel along a major thoroughfare or arterial.**
   **Response:**
   N/A

4. **Streets should interconnect within a development and with adjoining development. Cul-de-sacs or dead-end streets are generally discouraged except where topographic conditions and/or exterior lot line configurations offer no practical alternatives for connection or through traffic. Street stubs should be provided with development adjacent to open land to provide for future connections. Streets should be planned with due regard to the designated corridors shown on the Thoroughfare Plan.**
   **Response:**
   N/A

5. **New development should be comprised of blocks of public and/or private streets (including sidewalks). Block faces should have a length generally not exceeding 660 feet. Where commercial driveways are used to create block structure, they should include the same pedestrian amenities as public or private streets.**
   **Response:**
   N/A

6. **A primary task of all urban architecture and landscape design is the physical definition of streets and public spaces as places of shared use. Streets should be lined by buildings rather than parking lots and should provide interest especially for pedestrians. Garage entrances and/or loading areas should be located at the side or rear of a property.**
   **Response:**
   N/A
<table>
<thead>
<tr>
<th></th>
<th>Buildings should be located close to the pedestrian-oriented street (within 25 feet of the curb), with off-street parking behind and/or beside the buildings. When a development plan is located along a high volume corridor without on-street parking, one bay of parking separating the building frontage along the corridor is a preferred option. <strong>Response:</strong> N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.</td>
<td>If the site is located at a street intersection, the main building or main part of the building should be placed at the corner. Parking, loading or service should not be located at an intersection. <strong>Response:</strong> N/A</td>
</tr>
<tr>
<td>9.</td>
<td>To ensure that urban open space is well-used, it is essential to locate and design it carefully. The space should be located where it is visible and easily accessible from public areas (building entrances, sidewalks). Take views and sun exposure into account as well. <strong>Response:</strong> N/A</td>
</tr>
<tr>
<td>10.</td>
<td>New urban spaces should contain direct access from the adjacent streets. They should be open along the adjacent sidewalks and allow for multiple points of entry. They should also be visually permeable from the sidewalk, allowing passersby to see directly into the space. <strong>Response:</strong> N/A</td>
</tr>
<tr>
<td>11.</td>
<td>The perimeter of urban open spaces should consist of active uses that provide pedestrian traffic for the space including retail, cafés, and restaurants and higher-density residential. <strong>Response:</strong> N/A</td>
</tr>
<tr>
<td>12.</td>
<td>A properly defined urban open space is visually enclosed by the fronting of buildings to create an outdoor &quot;room&quot; that is comfortable to users. <strong>Response:</strong> N/A</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
</tbody>
</table>
|13. | New public spaces should provide seating opportunities.  
Response: | N/A |
|14. | Parking lots should not dominate the frontage of pedestrian-oriented streets, interrupt pedestrian routes, or negatively impact surrounding developments.  
Response: | N/A |
|15. | Parking lots should be located behind or in the interior of a block whenever possible. Parking lots should not occupy more than 1/3 of the frontage of the adjacent building or not more than 64 feet, whichever is less.  
Response: | N/A |
|16. | Parking structures are clearly an important and necessary element of the overall urban infrastructure but, given their utilitarian elements, can give serious negative visual effects. New structures should merit the same level of materials and finishes as that a principal building would, care in the use of basic design elements can make a significant improvement.  
Response: | N/A |
|17. | Higher building densities and more intensive land uses should be within walking distance of transit stops, permitting public transit to become a viable alternative to the automobile.  
Response: | N/A |
|18. | Convenient, comfortable pedestrian access between the transit stop and the building entrance should be planned as part of the overall pedestrian network.  
Response: | N/A |
|19. | All development should respect natural resources as an essential component of the human environment. The most sensitive landscape areas, both environmentally and visually, are steep slopes greater than 15 percent, watercourses, and floodplains. Any development in these areas should minimize intervention and maintain the natural condition except under extreme circumstances. Where practical, these features should be conserved as open space amenities and incorporated in the overall site design.  
Response: | N/A |
<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| **20.** | It is the intent of these guidelines to build streets that are integral components of community design. Public and private streets, as well as commercial driveways that serve as primary pedestrian pathways to building entrances, should be designed as the main public spaces of the City and should be scaled for pedestrians.  
**Response:**  
N/A |
| **21.** | Sidewalks should be 5-8 feet wide in residential areas and located on both sides of the street. Sidewalks in commercial areas and Pedestrian Business Overlays should be a minimum of 14-18 feet wide to accommodate sidewalk uses such as vendors, merchandising and outdoor seating.  
**Response:**  
N/A |
| **22.** | Streets should be designed with street trees planted in a manner appropriate to their function. Commercial streets should have trees which complement the face of the buildings and which shade the sidewalk. Residential streets should provide for an appropriate canopy, which shadows both the street and sidewalk, and serves as a visual buffer between the street and the home. The typical width of the street landscape strip is 6-8 feet. This width ensures healthy street trees, precludes tree roots from breaking the sidewalk, and provides adequate pedestrian buffering. Street trees should be at least 6 1/4" caliper and should be consistent with the City's landscaping, lighting and street sight distance requirements.  
**Response:**  
N/A |
| **23.** | Buildings should define the streets spatially. Proper spatial definition should be achieved with buildings or other architectural elements (including certain tree plantings) that make up the street edges aligned in a disciplined manner with an appropriate ratio of height to width.  
**Response:**  
N/A |
| **24.** | The primary entrance should be both architecturally and functionally on the front facade of any building facing the primary public street. Such entrances shall be designed to convey their prominence on the fronting facade.  
**Response:**  
N/A |
| **25.** | The ground level of the building should offer pedestrian interest along sidewalks. This includes windows entrances, and architectural details. Signage, awnings, and ornamentation are encouraged.  
**Response:**  
N/A |
| **26.** | The sidewalks should be the principal place of pedestrian movement and casual social interaction. Designs and uses should be complementary to that function.  
**Response:**  
N/A |

NOTICE OF NEIGHBORHOOD MEETING

Dear Property Owner:

You are invited to attend a neighborhood meeting on October 8, 2020 from 6pm – 8pm. The purpose of the meeting is to discuss an upcoming application to rezone six parcels of land located at 4508 Lead Mine Road (Parcel No. 0796616579), 4512 Lead Mine Road (Parcel No. 0796616743), 4516 Lead Mine Road (Parcel No. 0796616804), 4518 Lead Mine Road (Parcel No. 0796616904), 4600 Lead Mine Road (Parcel No. 0796626014), and 4707 Lead Mine Road (Parcel No. 0796618916). The site is currently zoned R-4 and is proposed to be rezoned to RX-7-CU. The applicant will describe the nature of this rezoning request and field any questions from the public. Enclosed are: (1) an aerial photograph of the parcels (2) a vicinity map outlining the location of the parcels; (3) a zoning map of the subject area; (4) a draft of the Rezoning Application cover page; and (5) draft conditions for the rezoning.

The meeting will be held virtually. You can participate online via Zoom or by telephone. To participate in the Zoom online meeting:

Visit: https://zoom.us/join
Enter the following meeting ID: 822 8055 8912
Enter the following password: Leadmine

To participate by telephone:

Dial: 1-929-205-6099
Enter the following meeting ID: 822 8055 8912 #
Enter the Participant ID: #
Enter the Meeting password: 89615470 #

The City of Raleigh requires a neighborhood meeting involving the property owners within 500 feet of the area requested for rezoning prior to the submittal of any rezoning application. Any landowner who is interested in learning more about this project is invited to attend. Information about the rezoning process is available online; visit www.raleighnc.gov and search for “Rezoning Process.” If you have further questions about the rezoning process, please contact:

JP Mansolf
Raleigh Planning & Development
(919)996-2180
JP.Mansolf@raleighnc.gov

If you have any questions about this rezoning, please contact me at (919) 835-4648 or via email at lauragoode@parkerpoe.com.

Thank you,
Laura Goode

1. Uses shall be limited to the following residential and accessory uses: multi-unit living and congregate care.

2. The number of units for either use or combination thereof shall be a limit of 350 units.
SUMMARY OF ISSUES

A neighborhood meeting was held on October 8, 2020 to discuss a potential rezoning located at 4508, 4512, 4516, 4518, 4600, and 4707 Lead Mine Road (property address).

The neighborhood meeting was held at virtual meeting via zoom (location).

There were approximately 43 (number) neighbors in attendance. The general issues discussed were:

| Neighbors asked about setbacks, building square footages, buffers and tree conservation areas |
| Neighbors asked why a building height of 7 stories was chosen |
| Neighbors asked about traffic impacts, potential roadway improvements, and how to make their neighborhood a private, gated community |
| Neighbors asked about the development's parking design |
| Neighbors asked about water and sewer services to development |
| Neighbors asked questions related to storm runoff |
| Neighbors asked about the site access points |
| Neighbors asked about the proposed multi-unit and congregate care uses |
SUMMARY OF ISSUES

A neighborhood meeting was held on October 8, 2020 to discuss a potential rezoning located at 4508, 4512, 4516, 4518, 4600, and 4707 Lead Mine Road. The neighborhood meeting was held at a virtual meeting via zoom. There were approximately 43 neighbors in attendance. The general issues discussed were:

<table>

WAKE COUNTY

OWNER'S AFFIDAVIT

Personally appeared before the undersigned attesting officer, duly authorized to administer oaths in said State and County, Frances Todd Corbin and Abigail C. Chopel, who after being duly sworn, deposes and says upon oath:

That Frances Todd Corbin and Abigail C. Chopel are the legal owners of the property located at 4508 Lead Mine Road, Raleigh, North Carolina, with a Wake County PIN of 0796616579, as evidenced by that certain Deed of Gift recorded in Book 017884, Page 02266 in the Wake County Register of Deeds Office.

Further, Frances Todd Corbin and Abigail C. Chopel, as the legal owners of the above-described property, hereby grant Singh Development, LLC, a North Carolina limited liability company ("Singh Development, LLC"), the authorization and permission to submit to the City of Raleigh the application to rezone the described property. Singh Development, LLC, is hereby authorized to act on behalf of the Frances Todd Corbin and Abigail C. Chopel as the applicant. Further, Frances Todd Corbin and Abigail C. Chopel, as the legal owners of the described property, understand and acknowledge that they must sign, approve and consent to any zoning conditions.

Rezoning Application Addendum #1
4508, 4512, 4516, 4518, 4600, and 4707 Lead Mine Rd, Raleigh, NC 27612

STATEMENT OF CONSISTENCY

Provide brief statements regarding whether the rezoning request is consistent with the future land use designation, the urban form map, and any applicable policies contained within the 2030 Comprehensive Plan.

This request will allow for redevelopment of six properties from single-family residential to multi-family housing and congregate care uses, with the potential for an ancillary retail or service use, which are more appropriate for the properties’ frontage along the major Lead Mine roadway. The subject properties combined total approximately 5.04 acres, with PIN #s 0796616579; 0796616743; 0796616804; 0796616904; 0796618916; and 0796626014 (the “Site”). The Site is currently zoned R-4, a residential district with a maximum density of 4 dwelling units/acre. The Site is designated as Office & Residential Mixed Use (“ORMU”) in the Future Land Use Map (“FLUM”) of the 2030 Comprehensive Plan (“Comp Plan”). The adjacent parcels to the south and west across Lead Mine Road are also designated as ORMU. The adjacent residential parcels immediately to the north and east of the Site are designated Low Density Residential. One of the primary locations for the ORMU FLUM is for properties fronting major streets where low-density residential uses are no longer appropriate. ORMU encourages a mix of residential and office use, and contemplates retail uses that are ancillary to residential uses. While heights are generally limited to four stories when near neighborhoods, additional height is allowed for locations along major corridors where adjacent uses would not be adversely impacted. OX is the closest corresponding zoning district. (Comp Plan p. 48).

The proposed rezoning to RX-7-PL-CU to allow for different residential building types and housing options at a higher density is consistent with this FLUM designation given the properties’ frontage along Lead Mine Road, a major street designated as Avenue 4-Lane Divided in the City’s street plan (Comp Plan Map T-1, p. 90), and because residential use is a contemplated use in the ORMU FLUM. Importantly, low-density residential development and the Site’s current R-4 zoning designation are not contemplated by the ORMU FLUM. Additionally, this proposed RX-7-PL-CU district would allow for certain retail and service uses ancillary to the permitted residential uses, which is also contemplated by the ORMU FLUM.

While the Site does not have an assigned Urban Form designation, the Site fronts a portion of Lead Mine Road designated as an Urban Thoroughfare by the Urban Form Map, and the properties to the west of Lead Mine Road and to the south of North Hills Drive are designated as a City Growth Center by the Urban Form Map (Com Plan Map UD-1, p. 276). Urban Thoroughfares are planned for public investments such as bike lanes and/or pedestrian oriented streetscapes that encourage multiple means of transportation, and contemplates an urban or hybrid frontage. (Comp Plan p. 275). City Growth Centers are where significant infill development and redevelopment are expected, and urban or hybrid frontages are encouraged. (Comp Plan p. 274). Hybrid frontages are appropriate for intensifying suburban areas where multimodal investments are planned and where on-street parking is not an option for front-door access. Off-street front door parking is appropriate if limited in depth to maintain convenient and direct pedestrian connections. (Comp Plan p. 273).
The proposed rezoning to RX-7-PL-CU will utilize the Parking Limited (PL) frontage, a hybrid frontage, which is appropriate for the Site’s location in an intensifying suburban area where on-street parking on Lead Mine Road is not an option for front-door access. This frontage will allow limited off-street front door parking that is limited in depth, and the frontage requires a primary street-facing pedestrian entrance for each building and direct pedestrian access from the public sidewalk to the primary street-facing entrance of a building.

The proposed development is also consistent with the following policies in the 2030 Comprehensive Plan:

**Policy LU 1.2** Future Land Use Map and Zoning Consistency. *The Future Land Use Map shall be used in conjunction with the Comprehensive Plan policies to evaluate zoning consistency including proposed zoning map amendments and zoning text changes.* (Comp Plan p. 52). This rezoning request from R-4 to RX-7-PL-CU is consistent with the ORMU FLUM designation, appropriate for lots fronting major roadways where low-density residential uses are no longer appropriate, and which contemplates a mix of residential and office uses and ancillary retail uses. This RX-7-PL-CU rezoning request to allow multi-family housing and congregate care residential uses is consistent with the spirit of the ORMU FLUM as it will allow for redevelopment of low-density residential uses, no longer appropriate for the Site fronting the major Lead Mine Road, to more appropriate residential building types and density. Additionally, this proposed RX-7-PL-CU district will allow for certain retail and service uses ancillary to the permitted residential uses, which is also contemplated by the ORMU FLUM. Although the site is located adjacent to a low density residential area to the east, the site also fronts a major roadway with building height designations in the mixed use zoning districts directly across Lead Mine Road ranging from 3 to 12 stories such that a 7 story building height is in character with the area.

**Policy LU 2.1** Placemaking. *Development within Raleigh’s jurisdiction should strive to create places, streets, and spaces that in aggregate meet the needs of people at all stages of life, are visually attractive, safe, accessible, functional, inclusive, have their own distinctive identity, and maintain or improve local character.* (Comp Plan p. 40). The applicant intends to develop a quality development consisting of either an apartment or congregate care residential community, or combination of the two housing types. Thus, this development will expand housing variety in the area and provide homes for Raleigh’s growing population. Apartments would provide units in a format available to renters and owners at a variety of life stages. Congregate care housing would meet the needs of elderly members of the community. In addition, the proposed RX-7-PL-CU district will implement the Parking Limited frontage development standards, which will govern building placement, location of primary entrances, landscaping, parking and pedestrian access. The standards of this frontage are encouraged by the Comprehensive Plan based on the Site’s frontage along Lead Mine Road, designated an Urban Thoroughfare, and the properties to the west and south designated as a City Growth Center. This is a hybrid frontage that is suitable for the Site’s location and will make the Site visually attractive. This frontage will also maintain the character of the area, as the zoning districts for several properties to the west across Lead Mine Road are also designated with a Parking Limited frontage.

**Policy LU 2.2** Compact Development. *New development and redevelopment should use a more compact land use pattern to support the efficient provision of public services, improve the performance of transportation networks, preserve open space, and reduce the negative impacts of low intensity and non-contiguous development.* (Comp Plan p. 56). The rezoning of this Site will
allow for redevelopment from low-density residential uses capped at 4 units per acre to up to 350 dwelling units in a compact multi-unit housing and/or congregate care development pattern. This development pattern will be contiguous with the surrounding developed properties in the area. Additionally, the developer plans to annex the properties to support efficient provision of public services and reduce the negative impacts of low-intensity and non-contiguous development. This rezoning and annexation would allow the filling of a portion of a “donut hole” of properties not within the corporate limits of the City of Raleigh, but surrounded by properties within the City’s corporate limits.

**Policy LU 2.6 Zoning and Infrastructure Impacts.** Carefully evaluate all amendments to the zoning map that significantly increase permitted density or floor area to ensure that impacts to the infrastructure capacity resulting from the projected intensification of development are adequately mitigated or addressed. (Comp Plan p. 57) The applicant will take measures to mitigate adverse impacts resulting from increased density. The applicant is offering conditions to limit the use types to multi-unit and congregate care residential uses and accessory uses, with limited ancillary retail or service uses, and cap the number of dwelling units to 350. In addition, the applicant is preparing a Traffic Impact Analysis that will be submitted as part of the rezoning case to evaluate any increase to traffic from the rezoning and roadway improvements and access design that may be warranted to mitigate any increase to traffic created by the rezoning and redevelopment of the Site.

**Policy LU 3.1 Zoning of Annexed Lands.** The zoning designation for newly annexed land into the City of Raleigh shall be consistent with the Future Land Use Map. In those cases where the annexed lands are within a special study area (as shown on the Future Land Use Map), a special study will need to be completed prior to zoning and development of the property. (Comp Plan p. 59) The applicant plans to file annexation petitions for the Site in association with this rezoning request. The Site is currently within the City’s Extraterritorial Jurisdiction (“ETJ”), and is surrounded by adjacent properties within the City’s corporate limits, thus the annexation will fill a hole in the City’s corporate limits. The proposed RX-7-PL-CU zoning designation is consistent with the ORMU FLUM designation appropriate for lots fronting major roadways where low-density residential uses are no longer appropriate, and contemplates a mix of residential and office uses. This RX-7-PL-CU rezoning request to allow to allow multi-family housing and congregate care residential uses is consistent with the spirit of the ORMU FLUM as it will allow for redevelopment of low-density residential uses no longer appropriate for the Site fronting the major Lead Mine Road to more appropriate residential building types and density. Additionally, this proposed RX-7-PL-CU district would allow for certain retail and service uses ancillary to the permitted residential uses, which is also contemplated by the ORMU FLUM. Although the site is located adjacent to a low density residential area to the east, the site also fronts a major roadway with building height designations in the mixed use zoning districts directly across Lead Mine Road ranging from 3 to 12 stories such that a 7 story building height is in character with the area.

**Policy LU 3.2 Location of Growth.** The development of vacant properties should occur first within the city’s limits, then within the city’s planning jurisdiction, and lastly within the city’s USAs to provide for more compact and orderly growth, including provision of conservation areas. (Comp Plan p. 59) One of the Site’s properties is vacant and is within the City’s planning jurisdiction, thus, this rezoning will allow for development that will provide for more compact and orderly growth in the City.
Policy LU 4.4 Reducing Vehicle Miles Traveled Through Mixed-Use. Promote mixed-use development that provides a range of services within a short distance of residences as a way to reduce the growth of vehicle miles traveled (VMT). (Comp Plan p. 62) This proposed RX-7-PL-CU district would allow for certain retail and service uses ancillary to the permitted residential uses, thus permitting mixed-use development at the Site. This supports a reduction in VMT by allowing development of a commercial use that could be used by residents on-site without the need to travel by vehicle.

Policy LU 4.7 Capitalizing on Transit Access. Sites within walking distance of existing and proposed rail and bus rapid transit stations should be developed with intense residential and mixed use to take full advantage of and support investment in transit infrastructure. (Comp Plan p. 63) The rezoning will allow for up to 350 units of multi-unit and/or congregate care residential uses to be located within walking distance of transit stop for the GoRaleigh Connector Route 23L – Millbrook Crosstown, located at the intersection of Lead Mine and Philcrest Road. Route 23L has a stop at Crabtree Valley Mall, just across Glenwood Avenue from the Site, that is a Transfer Point for four additional GoRaleigh Transit Routes: 4 (Rex Hospital), 6 (Crabtree Radial, with service to downtown Raleigh), 16 (Oberlin Radial, with service to downtown Raleigh), and 70X (Briar Creek Express).

Policy LU 5.1 Reinforcing Urban Pattern. New development should be visually integrated with adjacent buildings, and more generally with the surrounding area. Quality design and site planning is required so that new development opportunities within the existing urban fabric of Raleigh are implemented without adverse impacts on local character and appearance. (Comp Plan p. 64) While the Site is not an urban center, the applicant will implement the benefits of this intended policy. The applicant has limited the permitted uses to multi-unit and congregate care residential and accessory uses, with limited ancillary retail and services uses, and with a maximum of 350 dwelling units. These uses and the building types and scale associated with these uses will be in line with those directly across Lead Mine Road to the west, which include apartment and other multi-unit living building types, commercial and office uses, with permissible building height designations ranging from 3 to 12 stories. Additionally, the RX zoning designation will meet one of the district intents of the RX district of providing a transition between other commercial and office mixed use developments to the west and the lower density residential neighborhood to the east. Finally, the proposed RX-7-PL-CU district will implement the Parking Limited frontage development standards, which will ensure that redevelopment of the Site will be integrated with adjacent developments to the west that also have a Parking Limited frontage designation.

Policy LU 5.2 Managing Commercial Development Impacts. Manage new commercial development using zoning regulations and through the conditional use zoning and development review processes so that it does not result in unreasonable and unexpected traffic, parking, litter, shadow, view obstruction, odor, noise, and vibration impacts on surrounding residential areas. (Comp Plan p. 64) The limited retail and services uses permitted ancillary to the multi-unit living and/or congregate care residential uses are ones that would result in nominal increases to traffic at the Site. Additionally, the permitted retail and service uses are already limited by the UDO to the ground floor of an apartment building, no greater than 4,000 square feet, and with limited hours of operation to reduce potential impacts on surrounding residential areas.
Policy LU 5.5 Transitional and Buffer Zone Districts. Maintain and enhance zoning districts which serve as transitional or buffer areas between residential and commercial districts and which also may contain institutional, non-profit, and office-type uses. Zoning regulations and conditions for these areas should ensure that development achieves appropriate height and density transitions, and protects neighborhood character. (Comp Plan p. 65). The proposed RX zoning district with conditions to limit uses and number of dwelling units will meet one of the district intents of the RX district of providing a transition between other commercial and office mixed use developments to the west and the lower density residential neighborhood to the east.

Policy LU 8.1 Housing Variety. Accommodate growth in newly developing or redeveloping areas of the city through mixed-use neighborhoods with a variety of housing types (Comp Plan p. 69) The proposed rezoning to allow redevelopment of the Site for multi-unit and congregate care residential uses will add to the variety of housing types in the area.

Policy LU 8.10 Infill Development. Encourage infill development on vacant land within the city, particularly in areas where there are vacant lots that create “gaps” in the urban fabric and detract from the character of the area and should not create sharp changes in the physical development pattern. (Comp Plan p. 70) One of the properties comprising the Site is vacant. This proposed rezoning will fill a gap and will allow for residential development with the potential for a small ancillary commercial component, consistent with uses and building scales along this stretch of Lead Mine Road. Thus, the development will complement the area and not create a sharp edge in the general development pattern. This rezoning to the RX district will also serve as a transition between the other commercial and office mixed use districts to the west and the low density residential neighborhood to the east.

Policy LU 8.11 Development of Vacant Sites. Facilitate the development of vacant lots that have historically been difficult to develop due to infrastructure or access problems, inadequate lot dimensions, fragmented or absentee ownership, or other constraints. Explore lot consolidation, acquisition and other measures that would address these. (Comp Plan p. 70) One of the properties comprising the Site is vacant and does not have direct access to a public right of way, making development difficult. This rezoning will allow for consolidation of this property with the others comprising the site to facilitate development.

Policy LU 10.3 Ancillary Retail Uses. Ancillary retail uses in residential and office developments located in areas designated High Density Residential, Office and Residential Mixed Use and Office/Research and Development should not be larger in size than appropriate to serve primarily the residents, employees, visitors and patrons of the primary uses in the area; should preferably be located within a mixed-use building; and should be sited to minimize adverse traffic, noise and visual impacts on adjoining residential areas. (Comp Plan p. 75). This RX-7-PL-CU district within the ORMU FLUM will allow for potential retail uses ancillary to the permitted residential uses to primarily serve the residents, employees and visitors of the multi-unit living and/or congregate care uses at the Site. These uses are already limited by the UDO to the ground floor of an apartment building, no greater than 4,000 square feet, and with limited hours of operation to reduce potential impacts on surrounding residential areas.

Policy UD 1.10 Frontage. Coordinate frontage across multiple sites to create cohesive places. Encourage consistency with the designations on the Urban Form Map. Development in centers and along corridors targeted for public investment in transit and walkability should use a
compatible urban form. (Comp Plan p. 280). The proposed RX-7-PL-CU zoning district will apply the Parking Limited frontage to the Site. This is cohesive with the zoning districts of several properties to the west across Lead Mine Road that also require the Parking Limited frontage. This frontage is consistent with the Site’s frontage along Lead Mine Road, designated as an Urban Thoroughfare, and proximity to parcels to the west and south designated as City Growth Center. Urban Thoroughfare and City Growth Center Urban Form designations both contemplate application of hybrid frontages appropriate for intensifying suburban areas where multimodal investments are planned and where on-street parking is not an option for front-door access. Parking Limited, a hybrid frontage, is appropriate given the Site’s location in an intensifying suburban area where on-street parking on Lead Mine Road is not an option for front-door access.

PUBLIC BENEFITS

Provide brief statements regarding the public benefits derived as a result of the rezoning request.

The applicant intends to make a productive use of this Site with a quality development that will add to the value of the existing neighborhoods. This RX zoning designation will serve as a transition between the commercial and office mixed use zoning designations across Lead Mine Road to the west and the low density residential neighborhood to the east. The applicant is also in the process of performing a Traffic Impact Analysis. This analysis will evaluate any increase to traffic from the rezoning as well as roadway improvements and access design that may be warranted to mitigate any traffic increase.

This rezoning will allow for redevelopment of multiple properties with frontages along the major street of Lead Mine Road where low-density residential uses are no longer appropriate. Allowing multi-unit and congregate care residential uses capped at 350 units will increase the housing supply and variety in the area, in a more compact development pattern, within walking access to transit. This rezoning and associated annexation will also allow for orderly, compact, contiguous development in a way that maximizes public infrastructure and reduces the negatives associated with low density development on the fringes of the City. Overall, the applicant intends to develop a quality residential community that will add to the character of the surrounding neighborhood, while meeting the City’s growing housing demand.
SUMMARY OF ISSUES

A neighborhood meeting was held on **January 11, 2021** (date) to discuss a potential rezoning located at **4508, 4512, 4516, 4518, 4600 and 4707 Lead Mine Road** (property address). The neighborhood meeting was held at **virtual meeting via zoom** (location).

There were approximately **50** (number) neighbors in attendance. The general issues discussed were:

**Summary of Issues:**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Neighbors asked about setbacks, building height, buffers, tree</td>
<td>conservation areas and site layout</td>
</tr>
<tr>
<td>Neighbors asked about traffic mitigation, planned improvements and</td>
<td>traffic analysis methods, including whether the traffic impact analysis accounted for</td>
</tr>
<tr>
<td>changes in traffic counts due to COVID-19</td>
<td>changes in traffic counts due to COVID-19</td>

Narrative of Zoning Conditions Offered

1. Principal Uses shall be limited to Congregate Care residential and accessory uses, except as provided for in Condition #2 below.

2. One of the following shall be allowed in addition to the allowed residential uses: Beauty/Hair Salon, Copy Center, Eating Establishment, or retail sales of Clothing, Flowers, Package Shipping, Plants, or Stationary. The gross floor area of Eating Establishment shall not exceed 3,000 square feet.

3. The total number of units for Congregate Care units shall not exceed 185.

4. There shall be a 150-foot principal building setback from the northern property line abutting those properties with the following Parcel Identification Numbers (PINs): 0796626107, 0796627185, 0796628185, and 0796629156 (the “Northern Parcels”).

5. Trees within 32’ of the property line abutting the Northern Parcels shall be evaluated for designation as tree conservation area in accordance with the standards in the UDO. If these do not meet the UDO’s standards to be designated as tree conservation area, a Type B1 protective yard (UDO Sec. 7.2.4), with a minimum width of 32’, shall be placed along the northern property line abutting the Northern Parcels. The Type B1 protective yard shall provide, in addition to the minimum 40 shrubs per 100 linear feet required by UDO Section 7.2.4, 12 additional shrubs per 100 linear feet, for a total of 52 shrubs per 100 linear feet. Said additional 12 shrubs per 100 linear feet shall be evergreen and have a minimum planting height of 6 feet and minimum mature height of 15 feet.

6. Trees within 50’ of the property line abutting those properties with PINs 0796629093 and 0796710830 (the “Eastern Parcels”) shall be evaluated for designation as tree conservation area in accordance with the standards in the UDO. If these do not meet the UDO’s standards to be designated as a tree conservation area, a Zone A, Type 3 Neighborhood protective yard (UDO Sec. 3.5) with a minimum width of 50’ shall be provided along the eastern property line abutting the Eastern Parcels.

7. Runoff limitation for development on the property as defined by UDO Section 9.2.2.E.1 shall be met for the 25-year storm in addition to the two-year and ten-year storms.

8. All exterior Parking and Pedestrian Area lighting, as described in Section 7.4.5 of the UDO located within 150’ of the northern or eastern property line shall be full cutoff fixtures. Lighting within any structured parking shall be designed to reduce light spillage outside the parking structure. Any portion of structured parking above grade facing the Northern Parcels shall be screened with 10-foot tall evergreen trees planted 10 feet on center. Any surface parking located within 150 feet of the Northern Parcels that is also located above a retaining wall shall include a 3’-6” opaque screen along the northern and eastern edges of the lot on top of the retaining wall.

9. Locations for trash storage and collection, loading docks, and generators shall not be within 200’ of the northern property line abutting the Northern Parcels.

10. Trash collection, mechanical equipment and other utilitarian equipment should be screened from view by a structure that complements the design of the building through use of similar materials, colors, finishes, and architectural details as the principal building.

11. At the discretion of the City of Raleigh Department of Transportation, prior to issuance of a building permit, the developer shall dedicate a 15’ x 20’ transit easement along Lead Mine Road and be responsible for constructing accompanying transit infrastructure prior to the issuance of the first certificate of occupancy on the property. The location of the easement shall be established during site plan or subdivision review. The transit infrastructure shall be constructed to the City of Raleigh standard details specified by the City of Raleigh Department of Transportation, and shall not exceed the following list of improvements:
   (a) A 15’ x 20’ concrete pad
   (b) a cement landing zone between the back of curb and sidewalk
   (c) a transit waiting shelter and bench
   (d) trash receptacle
   (e) sidewalk connectivity

12. The property owner shall not make a connection to existing City of Raleigh sewer lines located on Wysong Court.

13. Before any certificate of occupancy is requested or issued the developer shall issue a letter of credit in the amount of $20,000, listing the City of Raleigh as the beneficiary, to be applied toward the cost of installation of a traffic signal at the intersection of Lead Mine Road, Sugar Bush Road and Inman Park Drive. The letter of credit shall be renewed annually for the five-year period after the first certificate of occupancy is granted (or until the earlier date of NCDOT approval of the traffic signal installation).

The property owner(s) hereby offers, consents to, and agrees to abide, if the rezoning request is approved, the conditions written above. All property owners must sign each condition page. This page may be photocopied if additional space is needed.

12. The property owner shall not make a connection to existing City of Raleigh sewer lines located on Wysong Court.

13. Before any certificate of occupancy is requested or issued the developer shall issue a letter of credit in the amount of $20,000, listing the City of Raleigh as the beneficiary, to be applied toward the cost of installation of a traffic signal at the intersection of Lea Mine Road, Sugar Bush Road and Innman Park Drive. The letter of credit shall be renewed annually for the five-year period after the first certificate of occupancy is granted (or until the earlier date of NCDOT approval of the traffic signal installation).

The property owner(s) hereby offers, consents to, and agrees to abide, if the rezoning request is approved, the conditions written above. All property owners must sign each condition page. This page may be photocopied if additional space is needed.

Property Owner(s) Signature: ____________________________

Good afternoon everyone,

Following up on the last Committee meeting, the neighbors who have opposed the current case have publicly expressed support for a new zoning request for a townhome project several times. We do not have authority to file such a case and there is no guarantee the landowners would agree to withdraw the current application and go through another rezoning effort. But in order to evaluate that, we would need to know exactly what density of townhomes the group would support. Under the new Missing Middle text change, we understand townhomes would be allowed in R-6 at 6,000 sf lot minimums (about 36 townhomes on the 5 acre site), or R-10 at 4,000 sf lot minimums (about 54 townhomes). Certain conditions (i.e. building setbacks, increased storm water measures, contribution to a traffic light, etc.), which are part the senior housing development, may not be feasible with a Townhome project. Please respond by next Monday with the designation (R-6 or R-10) that the group would support. If that remains unclear, we do not believe we’d be able to convince the landowner to pursue this option. Or, if the group would not support either designation, please let us know that as well.

Hello All,

We have been working diligently since the last SVHC Committee meeting to respond to your questions regarding the proposed retaining wall that will be necessary for the surface parking in order to accommodate the 150' building setback from the northern property line. Please see attached for your reference (1) updated renderings to include the retaining wall, and (2) updated concept plan that details the approximate retaining wall heights along multiple points adjacent to the northern and eastern property lines, including indications as to whether the retaining wall is anticipated to be a cut or fill at each point.

Please know that these updated documents are fresh off the press and we are providing them to you as they became available to us. We appreciate your patience and understanding given both the lead engineer and architect on this project recently changed companies and the new folks have been getting up to speed.

All,

After some back and forth on language with the City the last couple days, we were able to get the final conditions signed and submitted yesterday. Attached you’ll find the following:
1. Final conditions submitted yesterday 7.1.21
2. Comparison of final conditions to proposed conditions we sent over to you on Tuesday, 6.29.21
3. Comparison of final conditions to conditions as of 6.2.21 (submitted after the 6.1.21 public hearing) – to illustrate all changes made

At this point we cannot add new conditions or change any language but please let me know if you have questions.

Angie – Let me know some dates to meet with you and your neighbors down Philcrest regarding construction traffic, staging, etc.

Hope you have a great holiday weekend!

Subject: Additional Draft Rezoning Conditions

All,
I appreciate you meeting with us on short notice yesterday and thanks Matthew for providing refreshments. We were able to get a better understanding of your concerns and I hope you all have some more clarity on what we’re trying to accomplish. Below is a list of the conditions we discussed yesterday and attached is a draft of all the conditions including these new ones. This has been concurrently sent to City staff for review and comment and are subject to change based on staff’s comments.

- **Edits to Condition #8 - Parking Screening**: We have retained the prior commitment
regarding evergreen screening of any structured parking above grade. As we discussed yesterday, since we have not completed grading plans for the site, there still may be some structured parking, so we would honor our existing screening commitments for any structured parking. In response to your comments about additional screening for surface parking, we have added a commitment for an opaque screen for portions of any surface parking above a retaining wall to provide screening and mitigate light impact for surface parking.

- **New Condition #11 - Transit Infrastructure to be added on the site if allowed by City Transportation Staff**

- **New Condition #12 – Prohibiting sewer connection to the north**

- **New Condition #13 – Contribution to cost of Traffic Signal at Inman Park Drive/Sugar Bush Rd and Lead Mine:** Intent – developer pays $20,000 toward installation of a signal
  
  a. **Cost Explanation:** Our traffic engineer estimates that the traffic signal infrastructure in the immediate area (ex: intersection of North Hills Drive and Lead Mine) typically costs approximately $100,000-$120,000. The TIA demonstrated that the expected traffic from the development is anticipated to be less than 1% of the total traffic at this intersection. Thus, any cost the developer offers to pay towards this traffic signal should be proportional. A proportional payment for 1% of traffic at the intersection would be roughly $1,000 - $1,200. A $20,000 contribution is roughly 20 times the amount that would be proportionate to the traffic expected to be generated from the development. This amount shows a good faith effort to address concerns by neighbors about traffic, and to build in a large margin for potential cost increases should it take a number of years for NCDOT to approve a traffic signal at this intersection.

  **Note: We have removed the previously proposed condition to put at traffic signal at Charles Drive**

- **Philcrest Drive entrance:** After discussions during the on-site meeting, it sounds like the best way to address the majority of concerns about the potential impact to Philcrest Drive is through coordinating a construction plan with the neighbors. Given several outstanding variables that are unknown to us before we complete a final grading plan, we are unable to commit to the Philcrest access being right in – right out. However, with the latest concept plan shared today, this is now a secondary entrance to the development, anticipated mainly for service and overflow parking, with the main facility and parking access coming from Lead Mine. This will significantly reduce the impact to Philcrest and the number of vehicles expected to use that access point.

As we communicated during the meeting, we are committed to offering conditions that are both responsive to your concerns and that will assist with making the neighbors more comfortable with this development. Please let us know if these conditions are not helpful, or if adding these conditions will not fundamentally change your position towards the case.

Avi,

Good afternoon. I hope that you, your family, and your colleagues are well.

Thank you for your email of Thursday afternoon to our neighborhood steering committee, which we have discussed several times at length.

Our response:

On behalf of our core leadership group, here is our collective, unanimous response to your questions about our levels of support for a townhouse development under two scenarios at the Z-53-20 site at Lead Mine and Philcrest roads in Raleigh's ETJ:

Pursuant to the first option you outlined, we would support an R-6 townhouse-only development, up to the 36 units you proposed, without reservation.

Regarding your second option, we would be willing to discuss the parameters of an R-10 townhouse-only development up to the 54 units you specified.

We have said repeatedly from the beginning of this case that we do not oppose redevelopment of the Z-53-20 site; that we would support a reasonable upzoning; and that we believe townhouses would provide much-needed missing middle housing, a substantial profit to the property owners and developer, and a far more compatible transition between our adjacent single-family neighborhoods and the more intense commercial development across Lead Mine Road within the Crabtree City Growth Center.

Our constructive vision:

As you might know, at the suggestion of District E City Council member David Knight, we commissioned at our expense a professional alternative plan for the site, which is attached. It proposes 32 luxury townhomes of varying sizes with a single entry drive off Philcrest Road, at a density of 6.4 units per acre. It provides for water detention, per City requirements. It shows a new bus stop and a covered shelter just north of the street intersection.

Our plan also includes a 50-foot northern buffer to accommodate a City easement for a greenway connector from the Lead Mine Road sidewalk toward the creek just east of the tract, along which a future greenway could connect southward to North Hills Drive and the City's popular Crabtree Creek greenway, an interest of Council member Patrick Buffkin, our District A representative.

With the future addition of a much-needed traffic light and crosswalks at Lead Mine and Sugar Bush roads, this route would provide the only safe access to Raleigh's greenway network for the 1,000+ tax-paying households in the superblock west of Lead Mine Road, east of Creedmoor Road, north of Glenwood Avenue, and south of Millbrook Road. We would support widening the Lead Mine Road sidewalk next to Inman Park to accommodate safely the increased pedestrian traffic.
**Townhouse comparisons:**

Raleigh's townhouse market is on fire. Farther north on Lead Mine Road, near Forum Drive, M/I Homes is selling nice but generic townhomes in "Wykoff" as fast as they can build them for $500K to $600K+ apiece. ([https://www.zillow.com/community/wykoff/29237281_plid/](https://www.zillow.com/community/wykoff/29237281_plid/)) We believe luxury townhomes on the edge of Crabtree Valley would fetch higher prices and would sell quickly, perhaps even pre-selling. For comparison, Wykoff is 59 units plus greenspace on about 11 acres -- or 5.4 units per acre, which is somewhat less than the density we propose here.

Meanwhile, in a location comparable to ours, across Crabtree Valley off Blue Ridge Road, M/I Homes has just started building Altair, an 88-townhome development on 14 acres -- a density of 6.3 units per acre, a bit less than what we propose here. We believe that what's appropriate for Raleigh City Council District E on one side of Crabtree Valley also is appropriate for District A on the other side.

We hope that you will give our professionally designed townhouse plan serious, good-faith consideration. If you decide to build what we propose, we will endorse your project wholeheartedly and publicly. As long as you pay the current property owners the prices established in your pending purchase options, we can't imagine why they would not agree to this reasonable compromise for the benefit of all involved.

**Next steps:**

We've put our heads together quickly to honor your request that we respond by today. Please note that we have not yet had an opportunity to discuss with our hundreds of neighbors the scenarios you have outlined or our reaction to them.

Although we can't speak yet for all of our neighbors, we on the steering committee are united openly in our positions stated here. We believe we could build support quickly in our neighborhoods for such a development compromise, helping to expedite a new zoning case so your company can get going soon on signature townhouses built to Singh's customary high standards of construction quality, amenities, and appearance.

Please let us know if you have questions.

Best regards,

Matthew Eisley, on behalf of:

Matthew,

Thanks for the thorough response and Townhome concept plan. I expressed to Mr. Buffkin a couple weeks ago that doing a standalone townhome development like this is not something we typically do and we also do not believe it is the best use for this property. However, we would explore the option presented to us and let you know if it’s something we could do. I will review with the team this week and get back to you with any questions.
