**Painting - Landscapes**

Age: 16yrs. and up. Landscape has been the subject for artists for many centuries. How the artist expresses that subject in painting has changed a great deal over time. Through 'mini' color studies and demonstrations, one will find how very diversely 'a tree and a path' or 'the rocky mountain stream' can be expressed. Or that a tree is not merely 'green leaves and a brown trunk'. We will discuss different styles of landscape paintings in art history. Our inspiration will be from photos, copies of other masterful works as well as sketches that you will complete outside of the class. This is an open medium class with demonstrations in both paints and dry mediums. Students should be familiar with the medium(s) they want to work with in this class; bring supplies you already have and are comfortable with. Suggested materials list provided with receipt. 6 sessions.

### Understanding the Low-FODMAP Diet

This approach, which was developed at Monash University in Australia, is now seen as an effective way to manage IBS symptoms. Age: 18yrs. and up. Today's retiree's may find themselves having to consider other options in addition to Social Security, retirement plans, and personal savings to help meet their financial needs. HECMs (Home Equity Conversion Mortgage, also called reverse mortgages) can, in the right circumstances and with the right borrower, offer both short-term (immediate need) and long-term benefits to help close in the gaps. HECMs accomplish this by turning part of the equity of their homes into cash they can use today, or a line of credit that will be there when they need it. Retirement shouldn't be about worrying. It should be about enjoying life to the fullest. A HECM might be the financial planning tool that can put you on a path towards a more flexible and satisfying retirement. ### Writing as a Meditative Practice

Age: All Ages. This workshop uses poetry and simple exercises as prompts to lead participants into writing on their life's journey, with optional sharing within the group. No writing experience needed. This is a safe, confidential group, with a core of members, where reading aloud reinforces the power of creating new art through our memories and stories. Led by William Finger, MSW, who

enjoys writing as a way to reflect on our life stories and nurture our daily lives. The class utilizes ideas developed by the writer Dan Wakefield (The Story of Your Life: Writing a Spiritual Autobiography), Nan Phifer (Memoirs of the Soul), and others. Finger's memoir, The Crane Dance: Taking Flight in Midlife (2016), recounts how he came to terms with chronic low-grade depression and found new vitality for life, using meditation, yoga, expressive arts and other efforts, including medication and therapy.

# CITY OF OAKS foundation

## City of Oaks Foundation urges children to get outside

Did you know that American children spend an average of 10 minutes each day in outdoor play? 10 minutes a day! As you might suspect, this is a fraction of the time that kids spent playing outdoors 20 years ago, and most of the time that was spent outside has been soaked up by screen time—children in front of phones, tablets, computers and televisions.

Playing outside in nature is vital to childhood development—not to mention physical health. Inventing games and establishing rules helps kids hone their social skills. Unstructured play with natural materials sparks

a child's imagination and creativity. Accomplishments bolster self-confidence, and failings teach them how to handle adversity. Nature play is a time-tested way for children to find their own paths and learn how to get along with others.

If playing outside is so beneficial, then why are children doing so little of it? Richard Louv, author of *Last Child in the Woods*, believes there are 5 barriers to nature play. First, America is growing more urbanized, and our cities' growth is without adequate natural areas and access to them. Second, many parents are afraid to let their children play in the woods and creeks. Third, technology dominates every aspect of our lives (children and adults alike). Fourth, we no longer consider nature play as an enriching activity. Fifth, nature often is seen as the problem (e.g. climate change, species extinction) and not the solution.

This is why the City of Oaks Foundation is busy conserving natural places around Raleigh and providing scholarships to help children participate in the City's incredible summer camps and nature programs.

Through our Raleigh, Naturally land conservation program, we work with landowners who want to leave a legacy by setting aside their forests, farms, gardens and streams as conservation land. Our Give Play initiative strives to remove cost as a barrier for children's participation in the nature play programs Raleigh offers.

Support the City of Oaks Foundation with your tax-deductible contribution and help reverse our nature deficit.
