Traditional Japanese Embroidery

The technique of Japanese embroidery goes back more than 1,600 years. We use silk and metallic fibers on silk fabrics to produce traditional and modern designs for framing. Instruction follows an orderly progression of steps with a new design at each level. This workshop is open to beginners as well as current students at all levels. Current students should bring projects they are working on. New students are required to purchase kit and supplies from the instructor, payable at first class. Two options are available, see the supply list on Sertoma's webpage for details and cost. Instructor needs one month's notice to order supplies for new students. Additional supplies will be available for purchase from instructor in class. New students are required to contact the instructor for more information before enrolling at nuidosensei@gmail.com.

Upcycle Garments

Bring a loved garment of your choice, some ideas might be: a denim jacket, broken-in jeans, lacey top, linen shirt or blazer, a summer dress. It is essential to the practice, that the garment be made of natural fibers (silk, linen, cotton). Students will learn Boro style stitching and mending techniques that will help repair the garment where it is needed while simultaneously create a decorative effect. The recovered garment will not only be stronger but beautiful and will hold the story that the hands who worked on it left stitched deep into it. Supply list available on Sertoma's webpage and receipt. 4 sessions.

Enameling and Fabrication for Enameled Components Workshop

Join us for this weekend workshop with Lauren Markley!

Day 1 - Enameling: We will cover the basics of enameling, including cleaning the metal, counter enamel, fire scale protection, and topcoats. We will then spend time on a variety of techniques including the use of stencils, water slide decals, graphite, and lusters. We will also play with dimensional forms such as domed or angular pieces. Troubleshooting, dealing with rivet marks, and proper safety will also be discussed. Students will have the opportunity to make many samples, as well as components that could be used in earrings, rings, or pendants. **A \$25 kit** will be available to purchase for Day 1 of the workshop. Enamels will be provided.

Day 2 - Fabricating with Enameled Components: We will cover several ways to incorporate enamel elements into finished pieces of jewelry such as rings, earrings, or brooches. We will learn about tab, bezel, and prong settings in various contexts, as well as methods of linking enamel components for necklaces and earrings. Students will hone their soldering and fabricating abilities along with their

order-of-operations skills. Students will come away from the class with a variety of samples and finished pieces. **A \$25 kit** will be available to purchase for Day 2 of the workshop. Tools will be provided.

Day 1 of this workshop is suitable for beginners. Day 2 will require basic sawing and soldering skills.

Bright Vivid Sunsets with Brush and Palette Knife

Bright Vivid Sunsets will be explored in this fun impressionist/impasto painting style course. The use of larger brushes and palette knife combined will help students loosen up their style. A big part of this class is understanding light, value, and color. Amanda will break down how to create a successful stylized painting that will still be recognizable to the viewer without being too direct and overworked. Amanda will lead you through 2 paintings in this class that build from one another in technique as the class progresses. We first start with a smaller more basic painting, and then move onto a slightly larger canvas with a more involved painting. You will learn from her methods and apply them to your own work in class or at home. We will cover the use of color, perspective, light, value, how to create your own compositions and more. You will start with a sketch and move along during the length of the course with plenty of one-on-one assistance from the instructor as well as class demonstrations to help you along. Page: 9 of 58 Summer 2023 Classes Activity/Section Activity Description Section Details the way. We will move from basic shape and color placement, to working with finishing details and final touches! Students are welcome to follow along with the instructor's demonstrations in more of a step by step manner, or bring in a reference photograph and work more independently with the instructor's guidance on the subject. This course is great for any skill level, whether you have been painting for years or have never touched a brush/knife before. We will be painting the first day of class so please bring in a 16"x20" or similar size canvas and basic painting supplies. We will run through the supply list the first day as well. Chinese Brush Painting

Chinese brush painting is a traditional art form that shows the beauty of both simplicity and complication of the nature, with only ink or with ink and color. Students will learn how to paint flowers, birds, vegetables and fruits, which are popular brush painting subjects. Instructor will provide step by step demo and individual help. Each person will complete a beautiful painting in every class, while practicing basic brush painting techniques. In addition, the students will learn some basic Chinese calligraphy techniques such as the title of the paintings or the artist's names. This course is for both experienced and beginning students. A **\$5 supply fee** is due to the instructor at the start of each class or students can purchase their own supplies (supply list available on Sertoma's webpage). 1 session.

Instructor: Jinxiu Zhao (Alice) is a professional artist who specializes in the teaching of Chinese brush painting and calligraphy to both children and adults. She has been teaching in North Carolina for 23 years at all levels of the K12-public/private schools, teachers' training programs and in private classes.

[The Art of Capturing Shadows: Cyanotype Printing](#)

Enjoy making cyanotype photography from plants in this rewarding, educational, and playful workshop. Sarah Ann has been offering workshops and university courses in cyanotype printing for over 8 years. This one-day class on creating cyanotype photography with plants and light offers a fun, easy, and rewarding experience in printmaking using the cyanotype technique as well as an introduction to getting the supplies on your own. You'll make your own cyanotypes and go home with your very own, usually frame-worthy, cyanotype art! The cyanotype process, also known as the blueprint process because of its deep blue color, was first introduced in the early 1800s. For artists and scientists, this cyanotype workshop is rewarding. Experimentation is encouraged, no mistakes are possible in cyanotype

art! No experience required. **\$5 supply fee** due to the instructor at the start of class will cover the cost of cyanotype chemicals. All other supplies included. 1 session.
