

ISSUES

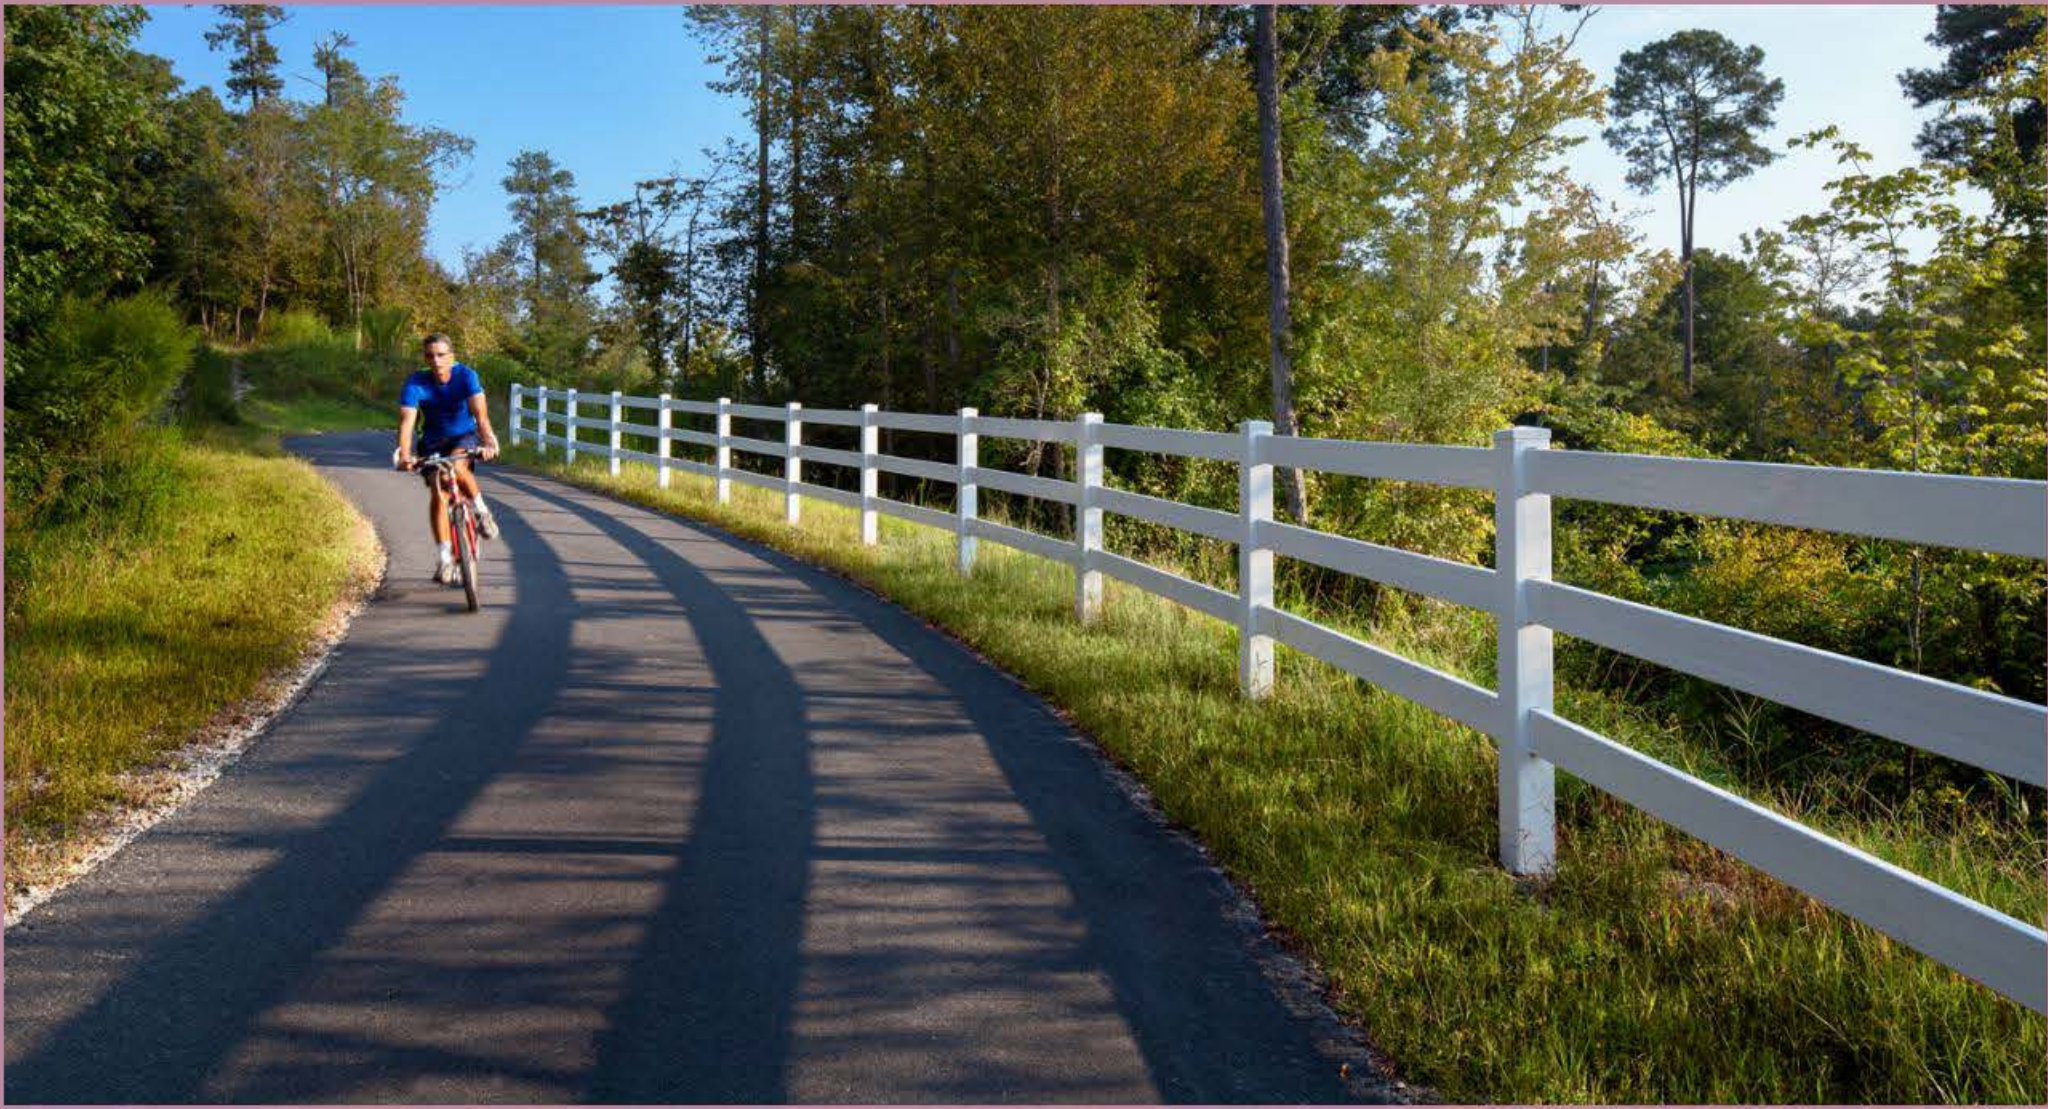

SOLUTIONS

CRACKING

Asphalt cracking is caused by aging, root intrusion, and erosion

RECONSTRUCTION

Replace the trail surface to create a smooth, even surface

STREAM BANK EROSION

Large storm events have caused stream bank erosion, compromising the trail

STREAMBANK STABILIZATION

Reinforcing the stream bank with materials and native plants to prevent erosion

AGING INFRASTRUCTURE

Bridges that cross Mine Creek have deteriorated

REPLACEMENT

Bridge replacement to improve pedestrian safety and aesthetics
