

Monarch Waystation Program

Create, Conserve and Protect Monarch Habitats

PURPOSE:

The Parks, Recreation and Cultural Resources Department is excited to champion the Monarch Waystation Program.

A Monarch Waystation is an intentionally-managed garden that provides food and habitat for the struggling Monarch butterfly population.

Greenways, parks and urban gardens are learning centers for discovery, self-instruction, and sharing knowledge about pollinators.

CERTIFICATION:

Six Raleigh park locations have been certified by [Monarch Watch](#). By becoming a certified monarch habitat we show that we are creating, conserving and protecting monarch habitats.

Our Raleigh parks provide plants and resources needed for monarchs to produce the next generation of butterflies by sustaining their migration.

They also support other pollinator species and provide a diversity of colors and textures for visitors to enjoy. We invite you to visit one of our certified Monarch Waystations when visiting the parks below.

Registered Raleigh Parks Locations:

Forest Ridge Wildlife Garden
Sassafras All Children's Playground
City of Raleigh Convention Center

Horseshoe Farm
Walnut Creek Wetland Center
Anderson Point
