Utility Acceptance Checklist

PROJECT FINAL INSPECTION CHECKLIST TO BE COMPLETED BY CONTRACTOR AND CHECKED BY STAFF		N/A	COMPLETED BY							
				STAF						
			YES	NO	N/A					
Other										
Fence Per PUD Detail S-52 (12'MIN)	Ιп	Ιп								
All Testing has passed.										
All Paperwork has been turned in for final inspection.			i i		- 					
Inside Drop / outside drop										
Water										
Hydrants Tested to be on		ГП								
Painted Fire Hydrant To Safty Yellow					- H					
Check all Water Valves to be Open, and at all meters, test for water to be on and valve										
boxes clean			Ш		Ш					
Meter Valves And Blow Off Need Valves To Be Closed and valve boxes clean and water valves are operable										
3 Foot Clearance Around Fire Hydrant (Center Line)										
2" To 6" Traffic Flange At Hydrant										
Concrete Around All Valve Boxes In Grass/Dirt Area (2'X2'X4")	 									
Asphalt Around All Valve Boxes In Streets										
Blow Off and Pad (6" X8" X8" With Rip Rap) / Valve Maker At Blow Off										
Water Meter Curb Stops In Place and turned on / Curb stop 1 ft away from the meter box.										
All Valves Uncovered And Marked Ready For Inspection										
Meter Box Stone (64) and (3") deep of stone					\dashv					
Meter Box 380 Deep With Water Line 24"										
Meter Has Back Flow In Right / Valve 12" below lid / Water box for meter is 6" thick /		$\vdash \vdash$								
Meter Lid Installed Per PUD Details and water on meter.										
3 or 4 Valves in all intersections										
Blow Off Valve turned off / 2" treaded Plug / Valve 5 to 10 ft away / Water Marker.		$\vdash \vdash \vdash$			<u> </u>					
Blow Off Lid must be a water Lid, NOT SEWER LID / Bolted down with 5/8"x3."										
Air Release and Water lid. Valve box Max 3' from MH / 16" clearance from the top of Air Releases										
Water Markes at 300' / blue / 4" in diameter					\Box					
Valve Stem (over 10' Deep)(max 5' Extension)	 				$\overline{\Box}$					
All fire hydrants are operable and properly adjusted.		$\vdash \vdash \vdash$								
All fire hydrants are properly painted.					$\overline{\Box}$					
All fire hydrants are operable and properly adjusted.										
Sewer										
Coating Manholes: over 12" sewer lines run into MH		ГП								
Manhole Bolted Down In Grass/Dirt Area / Test stations downstream of MH		┝╬┈			ᆸ					
Manhole With Cam Lock In Grass/Dirt Areas/sealant at MH and Frame	 	$\vdash \vdash \vdash$	H	H	$\overline{\Box}$					
Manhole 12" Tall In Grass/Dirt Areas / Bolts for Frame: (4) 5/8" X 3" Galv. Red Heads										
/ MH 3' High: Steps on outside/ properly grouted.										
All Sewer Uncovered And Marked Ready For Inspection and properly adjusted.	$\vdash \vdash$	$\vdash \sqcup$			<u> </u>					
24" to first step in MH street/ 12" to first step non-street		$\vdash \vdash$								
11" Chimney to the first step in a manhole		├								
12" Of Pre-Cast To Top Of Manhole In 100 Year Flood And Cam Locks On Lid. No Holes In Lid.		$\vdash \sqcup$								
Sewer Markes at 300' / green / 4" in diameter										
Air Release and sewer lid. Valve box Max 3' from MH / 16" clearance from the top of Air Releases										
Casing Pipe Sealed / Rip Rap / ¾ Stainless straps and bolts /					П					
Aerial pipe sealed / 2" vent pipe with screen 12" above grade /					$\overline{\Box}$					
SS Pipe in MH to project 4" into MH /					$\overline{}$					
i transfer to the contract of		. –								

MH Vents screened and 3' abouve flud stage (pg103) / Seal vent hipe at MH / Cam lock / 12"	Ιп	Ιп			
above grade /					
MH wrapped in MIN of 8" of concrete /					
SS with Cast Iron or Bronze cleanout cap / DIP or PVC Cleanout /					
Mini MH surrounds with 4' diameter concrete 6" thick and SS 2" blow grade.	<u> </u>				_
All sewer manhole inverts are clean/free of debris		⊢⊢			⊢⊢
All sewer manhole plugs were removed.		Ш		Ш	Ш
Raleigh Utility Only					
Asphalt					
QAQC reports for asphalt testing on all streets				\sqcup	
Final Lift of Asphalt installed, inspected, and approved.					
All damaged asphalt was repaired per the inspector.	<u> </u>				
Sidewalks, Ramps, Driveways, Curb and Gu	ttrer				
All sidewalks within the common areas or completed home frontages					
All missing sidewalks to be installed along future home frontages must have		<u>Ц</u>			
a current bond at 125% of the construction of the sidewalk cost in place					
Plastic removed from all HC Ramp truncated domes.					
All damaged or broken driveways are repaired in the public right of way.					
All damaged or broken curb and gutter repaired.					
All sidewalks within the common areas or completed home frontages					
All missing sidewalks to be installed along future home frontages must have					
a current bond at 125% of the construction of the sidewalk cost in place					
All sidewalks within the common areas or completed home frontages					
Streets					
All roadway markings/striping complete					
All street signs installed, including end of road markers.					
All street lights are installed per design.					
All Transist Infrastructure (bus shelters, bike racks, parking) installed.					
All street trees are installed unless bonded with the COR Urban Forestry Dept.					
Final Walkthrough Inspection scheduled and passed by NCDOT (as needed)					
QAQC reports for asphalt testing on all streets					
Final Lift of Asphalt installed, inspected, and approved.					
Storm Drain					
All storm drain boxes were properly grouted.					
All storm drain inlet protection was removed.					
All storm drain boxes free of debris and form boards					
All storm drain boxes were properly grouted.					
All storm drain inlet protection was removed.					
All storm drain boxes were properly grouted.					
All storm drain inlet protection was removed.					
All storm drain boxes free of debris and form boards					
All storm drain boxes were properly grouted.					
All storm drain inlet protection was removed.					
All storm drain pipe size					
All storm drain pipe material					
All storm drain pipe length					
All storm drain rim elevations					
All storm drain invert elevations					
All storm drain pipe slope			ā	ĪĒ	ΠĪ
