

Eggshell Seed Starter

Things You'll Need

- Empty eggshells
- Egg carton
- Potting soil
- Spoon
- Needle/Pin (to poke holes in eggshells)
- Seeds of your choice

Steps

1. Prepare eggshells by removing the top third by gently cracking, then remove the inside completely
2. Use needle/pin to poke one small hole in bottom of each eggshell to allow for drainage
3. Use spoon to fill eggshells with potting soil
4. Plant seeds inside eggshells that are filled with potting soil
5. After planting seeds, place eggshells back in egg carton to use as a stable base
6. Place plants in a sunny spot
7. Once plants grow too large for the eggshells, remove the shells by cracking them and place the plants in the ground to allow them to continue growing
